THE University of TENNESSEE

{2006-2007}

GRADUATE CATALOG
The University of Tennessee does not discriminate on the basis of race, sex, color, religion, national origin, age, disability, or veteran status in provision of education programs and services or employment opportunities and benefits. This policy extends to both employment by and admission to the university.

The university does not discriminate on the basis of race, sex, or disability in the education programs and activities pursuant to the requirements of Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990.

Inquiries and charges of violation concerning Title VI, Title IX, Section 504, ADA, the Age Discrimination in Employment Act (ADEA), or any of the other above referenced policies should be directed to the Office of Equity and Diversity (OED), 1840 Melrose Avenue, Knoxville, Tennessee 37996-3560, telephone (865) 974-2498 (V/TTY available) or 974-2440. Requests for accommodation of a disability should be directed to the ADA Coordinator at the UT Knoxville Office of Human Resources, 600 Henley Street, Knoxville, Tennessee 37996-4125.

The University of Tennessee, Knoxville, in its efforts to ensure a welcoming environment for all persons, does not discriminate on the basis of sexual orientation in its campus-based programs, services, and activities. Inquiries and complaints should be directed to the Office of Equity and Diversity.

In accordance with the Tennessee College and University Security Information Act of 1989 and the Student Right-to-Know and Campus Security Act, the University of Tennessee has prepared a report containing campus security policies and procedures, data on campus crimes, and other related information. A free copy of this report may be obtained by any student, employee, or applicant for admission or employment from the Office of the Dean of Students; The University of Tennessee; 413 Student Services Building; Knoxville, Tennessee 37996-0248.

A project of the Office of the University Registrar, 209 Student Services Building, Knoxville, Tennessee 37996-0200.
Publication Authorization Number E17-0405-002-002-06.
THE GRADUATE CATALOG

The Graduate Catalog represents the offerings and requirements in effect at the time of publication, but there is no guarantee that they will not be changed or revoked. The course offerings and requirements of the institution are continually under examination and revision. However, adequate and reasonable notice will be given to students affected by any change. This catalog is not intended to state contractual terms and should not be regarded as a contract between the student and the institution. The institution reserves the right to change any provision, offering, or requirement to be effective when determined by the institution. These changes will govern current and readmitted students. Enrollment of all students is subject to these conditions. The current catalog should be referred to during each year of study. The university further reserves the right to dismiss a student from the university for cause at any time.

STUDENT RESPONSIBILITY

Graduate students must assume full responsibility for knowledge of rules and regulations of the Graduate Council and departmental requirements for the chosen degree program. Any exceptions to the policies stated in the Graduate Catalog must be approved by the Dean of Graduate Studies. Individual colleges and departments may have requirements beyond the minimum established by the Graduate Council. A calendar of deadlines, policies and procedures for graduate programs is found on the Graduate Studies Web page (http://web.utk.edu/~gsinfo). A statement of graduate students' rights and responsibilities is included with the admission notification. Additional copies are available at the Office of Graduate and International Admissions.

</table>

*There is no commencement ceremony in the summer.

This date is the official graduation date that will appear on the transcript of graduating students.

The Academic Calendar is available on the Web site of the Office of the University Registrar

http://registrar.utk.edu/academic_calendar.shtml
THE UNIVERSITY OF TENNESSEE

BOARD OF TRUSTEES

Ex-Officio Members
Governor, State of Tennessee
Commissioner of Education
Commissioner of Agriculture
President, The University of Tennessee
Executive Director, Tennessee Higher Education Commission

From Knox County
From Hamilton County
From Davidson County

From Anderson, Bedford, Coffee, Franklin, Lincoln, Moore, and Warren Counties
J. Steven Ennis 1988 May 31, 2006
Spruell Driver, Jr. 2005 May 31, 2011
Susan Richardson-Williams 1995 May 31, 2007

From Shelby County

From Weakley County

Student Members
Amy Prevost 2005 June 30, 2006
Joseph M. Sturdivant 2005 June 30, 2007

Faculty Members
Lawrence M. Pfeffer 2005 June 30, 2007
Richard Rice 2005 June 30, 2006

Officers of the Board
Governor Phil Bredesen, Chairman
Dan C. Stansberry, Jr., Vice Chairman

UNIVERSITY OF TENNESSEE ADMINISTRATION

John D. Petersen, BS, PhD, President
Lofton Stuart, BS, Executive Assistant to the President
Jack H. Britt, BS, MS, PhD, Executive Vice President
Brice Bible, BS, MBA, Interim Chief Information Officer
Loren W. Crabtree, BA, MA, PhD, Chancellor, Knoxville
Sylvia S. Davis, BS, MS, CPA, Vice President for Administration and Finance
Joseph DiPietro, BS, MS, DVM, Vice President of Agriculture
Hank Dye, BS, Vice President, Public and Governmental Relations
Robert Levy, BA, MA, PhD, Vice President for Academic Affairs
David Milhorn, BS, PhD, Vice President for Research
Catherine S. Mizell, BA, JD, Vice President, General Counsel, and Secretary
Henry Nemcik, BS, MPA, Vice President for Development and Alumni Affairs
William F. Owen, Jr., BS, MD, Vice President for Health Affairs and Chancellor, Health Science Center
Charles M. Peccolo, Jr., BS, MAcc, CPA, CCM, Vice President and Treasurer
Theotis Robinson, Vice President for Equity and Diversity
Gary W. Rogers, BS, PhD, Chief Financial Officer

KNOXVILLE CAMPUS ADMINISTRATION

Loren W. Crabtree, BA, MA, PhD, Chancellor, Knoxville
Denise Barlow, BS, CPA, MBA, Vice Chancellor for Finance and Administration
Linda Davidson, BA, Vice Chancellor for Development (and Associate Vice President for Development)
Anne Mayhew, BA, PhD, Vice Chancellor for Academic Affairs and Dean of Graduate Studies
Tom Milligan, BA, Vice Chancellor for Communications
W. Timothy Rogers, BA, MA, JD, Vice Chancellor for Student Affairs
Clifton Woods, III, BS, MS, PhD, Vice Chancellor for Research

DEANS

Thomas Klindt, BS, MS, PhD, Interim Dean, College of Agricultural Sciences and Natural Resources and the Tennessee Agricultural Experiment Station
John M. McRae, BArch, MArch, Dean, College of Architecture and Design
Bruce E. Bursten, SB, PhD, Dean, College of Arts and Sciences
Jan R. Williams, BS, MBA, PhD, Dean, College of Business Administration
Gregory D. Reed, BS, MS, PhD, Interim Dean, College of Communication and Information
Robert Rider, BS, MAT, PhD, Dean, College of Education, Health, and Human Sciences
Way Kuo, BS, MS, PhD, Dean, College of Engineering

INDEPENDENT DEPARTMENTS

Colonel Owen Ragland, MS, U.S. Air Force, Professor of Aerospace Studies, Air Force Reserve Officers Training Corps
Lieutenant Colonel Marshall N. Ramsey, BS, MPA, U.S. Army, Professor of Military Science and Leadership, Army Reserve Officers Training Corps

**INDEX** .......................... 303
Below is a list of all graduate degree programs offered at the University of Tennessee, Knoxville. A degree or certificate is awarded upon completion of a specified program of study in a major field. Degree titles are posted on transcripts and diplomas. Major titles are posted on transcripts. A formally approved subcomponent of a degree program is a concentration.

- Dual JD-MPA
- Dual MS-MBA
- Dual MS-MPH
- Specialist in Education
- Doctor of Audiology
- Doctor of Jurisprudence
- Doctor of Philosophy
- Doctor of Veterinary Medicine

---

**DEFINITION OF GRADUATE TERMS**

- **Cognate** — A limited block of courses or hours required outside the unit in which the major is offered.
- **Concentration** — A collection of courses within a major that focuses on a particular subject area. The term concentration describes the nature of the set of courses.
- **Major** — The principal educational interest of a student as represented by one of the curricula prescribed by the various units at the University of Tennessee, Knoxville. The major specifies the minimum requirements for a degree.
- **Minor** — An area of interest secondary to the major that is represented by a specified set of hours and/or courses. Differs from concentration in that a minor is not a subdivision of the major.
- **Option** — The means of designating thesis/non-thesis requirements.
- **Specialization** — A sub-collection of courses within a concentration that focuses on specific subject matter. The term “specialization” describes the nature of the set of courses.
- **Tool** — A limited block of courses or hours required to enhance research or methodological expertise.
- **Track** — A separate route leading to the same degree but with different requirements.
### THE GRADUATE STUDIES ADMINISTRATION

Anne Mayhew, BA, PhD, Vice Chancellor for Academic Affairs and Dean of Graduate Studies  
Mary E. Papke, BA, MA, PhD, Special Assistant to the Chancellor and Associate Dean  
S. Kay Reed, BS, MS, MA, PhD, Assistant to the Dean  
Alan Hollis, BA, MS, Thesis/Dissertation Consultant

### THE GRADUATE COUNCIL (MEMBERSHIP AUGUST 1, 2005)

**Chair:** Dr. Stefanie Ohnesorg  
**Ex Officio Members**  
- Dr. Anne Mayhew, Vice Chancellor for Academic Affairs and Dean of Graduate Studies  
- Dr. Mary Albrecht, College of Agricultural Sciences and Natural Resources  
- Prof. Barbara Klinkhammer, College of Architecture and Planning  
- Dr. William Dunne, College of Arts and Sciences  
- Dr. Sarah Gardial, College of Business Administration  
- Dr. Sally McMillan, College of Communication and Information  
- Dr. Thomas W. George, College of Education, Health, and Human Sciences  
- Dr. Masood Parang, College of Engineering  
- Prof. John L. Sobieski, Jr., College of Law  
- Dr. Jan Lee, College of Nursing  
- Dr. Geraldine Faria, College of Social Work  
- Dr. Robert Moore, College of Veterinary Medicine  
- Prof. Barbara Dewey, Dean of Libraries  
- Thomas Handler, Chairman of the Research Council  
- Dr. George Hoemann, University Outreach and Continuing Education  
- Dr. K.C. Reddy, UT Space Institute

</table>
The University of Tennessee is the land-grant institution of the State of Tennessee with its main campus in Knoxville. UT is the state's largest and most comprehensive institution and is a Carnegie One Research Extensive Institution. The University of Tennessee is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone 404-679-4501) to award the bachelor's, master's and doctoral degrees.

A wide range of graduate programs leading to master's and doctoral degrees is available. The university offers master's programs in 79 fields, the Educational Specialist degree, doctoral work in 47 fields, two professional programs, and several graduate certificate programs. More than 6,000 graduate and professional students are enrolled on and off campus under the tutelage of 1,500 faculty members.

Graduate programs bring together faculty and graduate students as a community of scholars with a common interest in creative work and advanced study. Programs are available to individuals desiring work toward the master's and doctoral degrees or professional certification, those interested in continuing education for updating and broadening their knowledge, and those pursuing postdoctoral research. Serving the needs of students engaged full-time in intensive study and pursuit of a degree continues to be a major emphasis of the University of Tennessee, Knoxville's, graduate effort. Increasingly the university employs a variety of modes, traditional and nontraditional, in offering quality programs designed to serve a diverse student clientele.

Graduate programs are administered by the Graduate Council; the Graduate Studies administrative organization, composed of the Dean's Office and the Office of Graduate Student Services; administrators of the various graduate programs; the faculty; and the graduate student body.

The Graduate Council is composed of elected faculty representatives from each college, the Space Institute, and the Graduate Student Association. Ex-officio members include the Dean of Graduate Studies, the Chair of the Research Council, the Dean of Libraries, the Dean of Continuing Education, and the administrative officer having primary responsibility for the graduate curriculum in each college or school.

The Graduate Council is responsible for standards of admission, retention and graduation, and for curricular matters in graduate programs; the development of interdisciplinary programs; approval of new graduate programs; approval of individuals to direct doctoral dissertation research; financial support of graduate students; and all other matters of educational policy pertaining to graduate programs. Standing committees include academic policy, appeals, credentials, curriculum, professional development, and the Graduate Deans Group.

The Office of Graduate Student Services, in conjunction with Enrollment Services, develops procedures to implement policies formulated by the council. Much of the day-to-day administration of graduate study is conducted by department heads or faculty advisors and committees responsible for particular programs. In addition to departmental units, numerous interdisciplinary programs, institutes and centers have been developed on campus and in locations throughout the state.

The graduate student body is composed of those persons admitted to graduate study upon recommendation of the academic unit, and who are currently enrolled in graduate programs. Graduate education has been conducted at the University of Tennessee, Knoxville, since 1821. The first master's degree was awarded in 1827. Although a PhD degree was awarded in 1886 and in 1887, formal doctoral programs were not instituted until 1929 for biological sciences at Memphis and 1943 for chemistry on the Knoxville campus. A Committee on Graduate Study was appointed in 1904 and coordinated the graduate program until the Graduate Council was formed in 1949.

ADMISSION REQUIREMENTS

Admission to graduate study requires a bachelor's degree with a satisfactory grade point average from a college or university accredited by the appropriate regional accrediting agency or foreign equivalent.

The Graduate Council requires a minimum grade point average of 2.7 out of a possible 4.0, or a 3.0 during the senior year of undergraduate study. Applicants with previous graduate work must have a grade point average of 3.0 on a 4.0 scale or equivalent on all graduate work. Many programs require a higher average. Applicants with work experience or who are entering graduate study after a number of years away from an educational institution, usually five years, will be given consideration with greater flexibility relative to GPA. An international student graduating from a United States institution must meet the same requirements as those for domestic students.
An applicant whose GPA falls between 2.5 and 2.7 may be admitted on probation, upon recommendation of an academic unit. The probationary status will be removed after completion of 9 or more hours of graduate credit with a minimum GPA of 3.0. Failure to maintain a 3.0 while in this status will result in dismissal. An international student may not be admitted on probation.

The stated criteria are the minimums. The actual averages required for admission may be higher, depending on the number and the qualifications of applicants.

When a student is admitted to graduate study prior to having received the baccalaureate degree, that degree must be awarded before the date of first registration in graduate courses.

The Office of Graduate and International Admissions must be notified of any change in the entering date after admission has been granted. Individual departments and colleges may have further restrictions on admission dates. For this information, students should contact the department they wish to enter. If a student does not enroll within one year after the requested admission, the application process must be repeated.

Enrollment in graduate programs is a privilege which may be withdrawn by the university, or any area of graduate study, if it is deemed necessary by the Dean of Graduate Studies to safeguard the university’s standards.

Application Procedures

Anyone with a bachelor’s degree from a regionally accredited institution or foreign equivalent who wishes to take courses for graduate credit, whether or not the person desires to become a candidate for a degree, must make formal application for admission to graduate study or apply for transient status. No action is taken until a file is complete. The applicant will be notified by mail of the action taken.

To apply for admission, the following materials must be sent to Graduate and International Admissions:

- The completed Graduate Application for Admission (http://admissions.utk.edu/graduate).
- A $35 non-refundable application fee.
- One official transcript from all colleges and universities attended.
- Scores from Test of English as a Foreign Language (TOEFL) if native language is not English (refer to section on English Certification).

Additional departmental/program requirements may include:

- Departmental application. Contact the program for forms.
- Reference letters or rating forms. All program forms should be sent to the college or department.
- Scores from the Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT).

Application forms for the GRE, GMAT and TOEFL can be obtained by contacting Educational Testing Service Princeton, New Jersey 08450 http://www.ets.org

Examination results reach the university in approximately three weeks.

All documents submitted become the property of the university and will not be returned.

For international graduate student application procedures, see Admission of International Students.

Admission Classifications

Degree Admission

Admission to a degree program requires that a person meet the minimum admission requirements and any additional program requirements (see Admission Requirements). Refer to the appropriate department for specific requirements for admission to the degree program.

In addition to meeting the minimum requirements, applicants at the doctoral level must have demonstrated a potential for superior academic performance. To be considered are such criteria as performance in prior undergraduate and/or graduate study, achievement on graduate admission tests, letters of recommendation from professors familiar with the applicant’s capabilities, and other evidence of scholarly achievement.

A student must maintain a 3.0 grade point average to continue enrollment in a degree program (see Academic Standards).

An applicant may not be admitted simultaneously to more than one degree program. Two or more applications cannot be considered concurrently. For admission to dual programs, applications are processed consecutively.

Non-Degree Admission

Applicants may apply for non-degree status who, for example:

- Need additional time to fulfill application requirements for a degree program.
- Do not wish to pursue a degree program.

Minimum requirements (see Admission Requirements) must be met for admission to non-degree status. Some departments do not permit non-degree students to register for graduate courses.

A major area must be declared if the intent is to seek an advanced degree. If no degree is desired, a major area need not be declared. Students anticipating long-term enrollment as non-degree students are advised to apply as undergraduate students in non-degree status. Students holding a degree who are taking additional work as undergraduate non-degree students may be allowed to take 600-level courses for undergraduate credit with the approval of the instructor.

Before accumulating 15 hours of coursework in graduate non-degree status, the student must apply and be admitted to a specific degree program (see Revision of Admission Classification for procedures).

A maximum of 15 graduate hours may be taken in graduate non-degree status. If admitted into a degree program, no more than 15 graduate hours may be applied toward a degree, if approved by the student's committee. Courses applied toward any graduate degree must fall within the time limit specified for the degree.

Every graduate student must meet with an academic advisor at least once each semester to discuss his/her program. For non-degree students with a declared major, the advisor must be from the appropriate academic unit. If no advisor has been assigned, the department head or designee is the advisor. For a non-degree student who has no declared major, the Dean of Graduate Studies, or designee, is the advisor.

A student must maintain a 3.0 grade point average to continue enrollment in non-degree status (see Academic Standards).

Admission to non-degree status does not constitute admission to a degree program. The student who seeks to enter a degree program will be directed to the appropriate department.

An international student on a student visa may not enroll in the non-degree status.

Graduate Certificate

Admission to a graduate certificate program requires that a person meet the minimum admission requirements and any additional program requirements (see Admission Requirements). Refer to the appropriate department for specific requirements for admission to the certificate program.

Admission to a graduate certificate program does not constitute admission to a degree program. To receive a graduate certificate, students must be admitted to a certificate program or a degree program.

Transient Admission

A student who is enrolled in good standing in a graduate degree program at another institution and who wishes to take courses for transfer to that institution may be admitted after submitting a completed Graduate Application for Admission, the $35
application fee, and a Transient Student Certification form 10 days prior to registration. Only one semester, or a maximum of 12 hours, of coursework can be taken in transient status. Necessary forms may be obtained from the Office of Graduate and International Admissions.

Postdoctoral Admission

Persons who hold an earned doctoral degree and desire to take graduate courses may be admitted in the postdoctoral status. A completed Graduate Application for Admission, the application fee, and confirmation of the doctorate are required for admission. Admission in the postdoctoral status does not constitute admission to a degree program. The student who seeks to enter a degree program must meet all admission requirements and be recommended by the program.

Admission of International Students

For admission to a graduate program, an international student must have an equivalent 4-year bachelor’s degree with at least a B average on all previous coursework and a B+ on all previous graduate work. On various grading scales, this corresponds to:

- 14 on a 20-point scale.
- 80.0 from Taiwanese institutions.
- 1st Class or Division from Indian institutions.
- Upper 2nd Class Honors on various British systems.

If graduating from a U.S. institution, the minimum is the same as that for domestic students (see Admission Requirements). Other grading systems are evaluated, upon receipt of transcripts, in accordance with standard recommendations. Many departments require a higher average than the minimum.

International students may apply for admission any semester, but normally enter the fall semester. The deadlines for submission of applications to the Office of Graduate and International Admissions are:

- Fall: 1 February
- Spring: 15 June
- Summer: 15 October

The Office of Graduate and International Admissions must be notified of any change in entering date after admission has been granted.

Individuals applying online must pay the application fee by credit card. The following items must be received before admission will be considered:

- A completed Graduate Application for Admission.
- A $35 non-refundable processing fee. Payment should be made in United States dollars by a cashier’s check, money order, or personal check payable to the University of Tennessee, Knoxville. If payment is by personal check, it must be drawn on a United States bank to be honored in United States currency. Checks drawn on overseas banks are not accepted. International money orders are suggested.
- Official or attested university records, with certified translations if the records are not in English (notarized copies are not accepted).
- Confirmation of degree(s). Confirmation must be received by the Office of Graduate and International Admissions at least 2 months prior to term of first enrollment.
- Certification of English proficiency. Refer to section on English Certification.
- Documented evidence of financial resources sufficient to support the student, as stated on the financial statement form supplied to the applicant. This form is available at the Graduate and International Admissions Web site: http://admissions.utk.edu/admissions/graduate.shtml or will be sent to the applicant after receipt of application.

- Additional departmental/program requirements.
- Departmental application. Contact the program for forms.
- Reference letters or rating forms. All program forms should be sent to the college or department.
- Scores from the Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT).

Admission must be granted, and financial documentation and degree confirmation must be received prior to issuance of an I-20 or DS-2019 form needed to obtain a visa. The university will not issue these forms after the following dates:

- Fall: 15 May
- Spring: 1 October
- Summer: 15 February

An international student may not enroll as a non-degree student nor be on probation.

English Certification

Any person whose native language is not English must submit results of the Test of English as a Foreign Language (TOEFL). A minimum score of 213 on the computer-based test, 550 on the paper test, or 80 on the Internet-based Test typically with a score of 20 on each of the sections of the test (reading, listening, writing, and speaking) is required for admission consideration. Some programs require higher scores. The score must be no more than two years old from the requested date of entry. Applicants who have received a degree from an accredited U.S. institution within the past two years are exempt from the TOEFL requirement.

All students whose native language is not English must take an English proficiency examination after arrival at the University of Tennessee, Knoxville. Refer to section on English Proficiency.

Fees for Sponsored International Students

An administrative management fee will be charged to sponsoring agencies of international students whose programs require special administrative or management services beyond those normally provided. Fees are $250 per semester and $100 per summer session.

Admission of Faculty and Staff Members

If admitted to graduate study, members of the faculty or staff located in Knoxville may take courses as graduate students.

Faculty members of the University of Tennessee, Knoxville, or the Institute of Agriculture at the rank of assistant professor or above and members of the administrative staff at the university and the Institute of Agriculture will not normally be admitted to an EdD or PhD degree program at UT Knoxville. Exceptions may be granted on an individual basis upon petition to the Dean of Graduate Studies. Petitioners must present their request in writing, providing adequate assurance that the residence requirement will be met and that there will be no conflict of academic or administrative interest. Written endorsements must be provided by the respective deans and department heads of the units in which members are employed and in which the doctoral degrees are to be pursued.

Readmission

A student who has not registered for graduate courses at the University of Tennessee, Knoxville, for three consecutive terms (including summer) must apply for readmission. A readmission application should be submitted to the Office of Graduate and International Admissions at least two weeks prior to the desired reentry date. A student who has attended another institution since enrollment at the University of Tennessee, Knoxville, must submit one official transcript showing all coursework and any degrees earned at that institution. The student will be notified when action has been taken by the department/program and the Office of Graduate and International Admissions. A student who is per-
mitted to enroll and is subsequently denied readmission will receive credit for courses completed successfully. Future registration will not be allowed until readmission is granted.

Revision of Admission Classification

A student who wishes to change a major program of study must complete a Request for Change of Graduate Program form, which can be obtained online or from the Office of Graduate and International Admissions. The form requires the signature of the head of the department in which admission was previously granted. No signature is needed if a student requests to change from non-degree status to a degree program or from one degree to another within the same department.

The student must be in good standing for a revision to be processed. Acceptance into a new degree program is contingent upon review and recommendation by that department. If the student is not accepted into the program requested, he/she remains in the former program. The results of each request for program change are communicated to the student by mail.

REGISTRATION AND ENROLLMENT REQUIREMENTS

Graduate Credit

To earn graduate credit, a student must be admitted by the Dean of Graduate Studies and enrolled in an appropriate status as a graduate student. The registration must reflect the desire for graduate credit, and the course must have been approved by the Graduate Council. Coursework taken in any other status is unacceptable for graduate credit and cannot be changed retroactively to graduate credit. Special privileges are accorded University of Tennessee seniors and professional students, as stated in the section on Undergraduates and Professional Students.

Courses numbered at the 500 level, as well as those 400-level courses approved for graduate credit, must be taught by faculty members who (1) meet the criteria of an assistant professor or above as defined in the Faculty Handbook and (2) have been designated by the department head as being appropriate. Graduate teaching associates are ineligible to teach courses approved for graduate credit.

Consistent with the accreditation requirements of the Southern Association of Colleges and Schools (SACS) that graduate curricula must be substantially different from undergraduate curricula, classes at the 400 level in which both graduate and undergraduate students are enrolled must be structured so as to reflect this distinction. That is, course requirements for graduate credit will be more rigorous and will exceed expectations for undergraduates. Graduate and undergraduate completion of the same course will not be considered equivalent. Petitions for retroactive changing of undergraduate to graduate credit will not be accepted.

Courses at the 600 level are taught by faculty who have been approved by the college or by departments, where the college has given them that responsibility. All departments/colleges have a statement of criteria used in eligibility to teach at the 600 level.

Undergraduate and Professional Students

University of Tennessee Seniors

Subject to approval by the Dean of Graduate Studies, a senior at the University of Tennessee, Knoxville, who needs fewer than 30 semester hours to complete requirements for a bachelor’s degree and has at least a B average (3.0) may enroll in graduate courses for graduate credit, provided the combined total of undergraduate and graduate coursework does not exceed 15 credit hours per semester. Senior privilege is extended only to those students working toward a first bachelor’s degree. Students who have met all requirements for graduation are not eligible for senior privilege. Approval must be obtained each semester at the Office of Graduate Student Services. A maximum of 9 hours of graduate credit at the 400 and 500 level can be obtained in this status. Some departments do not permit seniors to register for graduate courses without prior permission.

University of Tennessee Veterinary Medicine Students

A student in good standing in the College of Veterinary Medicine may enroll in the University of Tennessee, Knoxville, graduate courses under the following conditions:

• The student’s advisor must approve in advance the student’s enrollment in each course.
• The student may take a maximum of 10 semester hours of graduate courses during the Doctor of Veterinary Medicine program.
• Approval must be obtained each semester at registration through the Office of Graduate Student Services. The student’s progress is subject to review and approval each semester by the Associate Dean, College of Veterinary Medicine.

Courses taken for graduate credit may not be used toward both the Doctor of Veterinary Medicine degree and a graduate degree.

University of Tennessee Law Students

Subject to approval by the Dean of Graduate Studies and the College of Law, a law student at the University of Tennessee, Knoxville, may enroll in graduate courses for graduate credit. Approval must be obtained each semester at the Office of Graduate Student Services.

Courses taken for graduate credit may not be used toward both the Doctor of Jurisprudence degree and a graduate degree. Use of such courses toward the JD degree is subject to guidelines approved by the law faculty.

Law Courses

A graduate student may take up to 6 hours of law courses and apply them toward a graduate degree, upon approval of the College of Law and the student’s major professor. The graduate student must register for law courses during the registration period at the College of Law and request a Satisfactory/No Credit only grade. If the student earns a 2.0 or better, an S will be recorded on the transcript. Below 2.0, a No Credit will be recorded, and the course cannot be used toward meeting degree requirements. Grades for law courses will not be reflected in the cumulative grade point average, as law courses do not carry graduate credit.

Different rules apply to students enrolled in the Dual JD-MBA and JD-MPA programs. Grades must be earned according to the grading system of the respective colleges, e.g. numerical grades for law courses, letter grades for graduate courses. Refer to sections on business administration, political science, and law under Departments and Courses of Instruction for grades acceptable to meet degree requirements.

A student enrolled in the PhD in Business Administration program may use 8 semester hours or more of law courses for the supporting area via the arrangement described under Business Administration.

Graduate Certificate Programs

A graduate certificate may be earned by successful completion of a series of specific courses. A candidate for a graduate certificate program must be a fully admitted graduate student who has satisfactorily completed (minimum 3.0 grade point average) the minimum requirements for certificate programs are listed under the academic department offering the certificate. A candidate must be a graduate student in good standing and comply with all other applicable policies. Graduate certificate programs require a minimum of 12 semester credit hours taken at the University of Tennessee, Knoxville. Use of credits to fulfill require-
ments for a graduate degree will be at the discretion of the academic department.

To receive the certificate, students must submit a Completion of Certificate Program Form endorsed by the academic department to the Office of the University Registrar. Only those certificate programs that are officially approved by the Graduate Council will be posted on student transcripts. To receive a graduate certificate, students must be admitted to a certificate program or a degree program.

Senior or Disabled Citizens

Legislation gives Tennessee citizens who are 60 years of age or older, 30-year state retirees, or those who are totally disabled, the opportunity to attend credit and non-credit courses at the university at no charge on an audit, space available basis. Legal verification of any of these conditions is required for enrollment. Students who are 65 or over, or who are totally disabled, and who desire to receive university credit for their courses, may pay a reduced rate.

Auditors and Audited Courses

Persons who wish to attend certain classes regularly, without taking examinations or receiving grades or credit, may do so by completing a graduate application as a non-degree student, paying the application fee, registering as an auditor, and paying regular fees. Graduate students paying regular fees also are entitled to audit courses.

The names of all auditors properly registered will appear on the electronic grade rolls, but will be removed from the final grade report. No record of audited coursework will appear on the permanent record.

Persons may not attend class without being properly admitted to the university and registered in the class.

Courses in Non-Standard Format

The university offers a wide variety of short courses, workshops and other courses in non-standard format for graduate credit. Minimum criteria acceptable for such credit are as follows.

• The number of contact hours should never be fewer than the equivalent of one hour per week during the term for each hour of credit awarded, i.e., 15 hours per semester hour.

• For every contact hour, there should be at least 2 hours of student preparation.

• For each hour of graduate credit under the semester system, there should be a minimum elapsed time of one week.

The workload in a short course of several weeks’ duration need not be distributed evenly. However, substantive and meaningful interaction between the faculty member and student should be maintained throughout. Graduate credit should not be awarded for courses considered inappropriate as part of a graduate degree program.

The Curriculum Committee of the Graduate Council monitors the policy. Each new course or change in a current course must be approved in both content and format.

Correspondence Study

No graduate credit is accepted at the University of Tennessee, Knoxville, for work done by correspondence study at any university.

Proficiency Examinations

A proficiency examination may be given in academic courses offered for graduate credit. Applications for proficiency examinations are available in the Office of the University Registrar, 209 Student Services Building. To be eligible, a student must be admitted to graduate study. The request for examination must be approved by the head of the department offering the course. A student applying for this privilege must present evidence to the department head that he/she has the knowledge and abilities expected of graduate students who have taken the same course. Upon passing the examination with a minimum grade of B, the student will receive graduate credit. A maximum of one-fourth of the total credit hours in a master's degree program may be earned by this method, subject to approval by the student's graduate committee. A fee of $7 per credit hour must be paid before each examination. Proficiency examinations may not be used to raise the grade or change the credit in a course previously completed, nor may such an examination be repeated. Proficiency examinations taken at other institutions are not transferable.

English Proficiency

Applicants whose native language is not English must pass an English proficiency examination given by the university prior to initial registration. Students whose performance on the examination indicates a need for additional English study must enroll immediately for English 121 English Grammar Review for Non-Native Speakers or another course assigned by the English Department for undergraduate credit and pass with a grade of C or better. A student may not take more than 9 additional hours of coursework while enrolled in English 121. Students whose scores indicate that they are not prepared to enter English 121 will be referred to a program of intensive English study prior to enrolling in an academic program.

Applicants whose native language is not English must pass an oral test in English (the SPEAK Test) before they can be assigned to classroom duties in connection with their assistantships. The SPEAK Test is administered on campus as part of the programs offered by Graduate Student Services. Scores from the Test of Spoken English (TSE) may be accepted in place of the SPEAK Test.

Prerequisites

Graduate work in any program must be preceded by sufficient undergraduate work in the major and related areas to satisfy the department that the student can do graduate work successfully in the chosen field. Individual undergraduate records are examined and evaluated by the appropriate department before admission to a degree program is granted. Questions about program prerequisites should be addressed to the advisor.

Advisor/Major Professor

Every graduate student must have an advisor from the major department. This professor advises the student about courses, supervises the student’s research, and facilitates communication within the major department, to other departments and with the Dean of Graduate Studies. The advisor must approve the student’s program each semester. Many departments assign a temporary advisor to direct the entering student’s work during the period in which the student is becoming acquainted with the institution and determining the focus of research interests, and in which the department is forming a judgment concerning the student’s promise as a scholar. As early as appropriate, the student requests a professor in the major department to serve as the advisor. This major professor and the student together select a graduate committee. The student is expected to maintain close consultation with the major professor and other members of the graduate committee with regard to progress in the program. Other responsibilities of the advisor/major professor are explained under individual programs.

Departmental Liaison

One faculty member in most academic departments has been designated as a liaison. The liaison acts as a contact to assist non-departmental students with course selection and other academic matters.
Registration

Registration is required of all graduate students when using university facilities and/or faculty time. The minimum number of hours for registration is one. Registration allows use of services such as library checkout, laboratories, and recreation facilities not open to the public.

Information concerning registration is available at Circle Park Online (http://cpo.utk.edu) or in the Timetable of Classes each term. Registration is accomplished via Web. During priority registration, a bill is mailed to the registrant. Payment is due by the deadline noted on the bill. A graduated late fee is assessed to any student who fails to register during priority registration. Additional information can be obtained from the Office of the University Registrar, (865) 974-2101.

Failure to pay tuition and fees before the deadline, as noted each semester on the bill (VolXpress statement), will result in cancellation of the schedule. Retroactive registration is not allowed.

Non-degree students in unrestricted programs may obtain permission to register from the Office of Graduate Student Services. Non-degree students with no declared major must obtain permission from the department/program head to register for courses in restricted fields.

Conditional Registration

Applicants who appear to meet the admission requirements for graduate study may be allowed to register for an initial term after submitting the Graduate Application for Admission form and application fee. Time is allowed to obtain transcripts and additional requirements for admission. Students who fail to gain admission within seven weeks after registration will not be permitted to register again until all admission requirements are met.

International students may not register conditionally.

Registration for Use of Facilities

Students using university facilities, services or faculty time, including summer term, must be registered. Normally, students are registered for coursework or thesis/dissertation credit. Students who are not taking coursework and are not yet eligible to register for thesis or dissertation hours, must register for course 502 (Use of Facilities) if they wish to have borrowing privileges in the University Library or to use computer labs, other labs, or other university resources.

Change in Registration

The permanent record will show all courses for which the student has registered except those audited and those from which the student has withdrawn on or before the "Drop Course without W" deadline.

Students who fail to attend the first class meeting without prior arrangement with the department may be dropped from the course to make space available to other students. Students have the responsibility to assure that they have been dropped. Otherwise they may receive a grade of F in the course.

Type of Change for Full Term Classes Fall/Spring Deadline
Add or Drop a Course without a W or Change credit/grading ...10 days Between 11 and 42 days with instructor's and advisor's signature ...42 days Drop Course with W ..................................................84 days

The periods for add, drop, change of credit/grading for sessions within the full term, summer, and mini term are determined based on a percentage of the equivalent deadline within the full term. See Timetable of Classes each term for exact dates on the Circle Park Web site at http://cpo.utk.edu. Deadline dates will be moved to the next business day if the deadline falls on a holiday, weekend day, or fall/spring recess. Within the change of registration period, a student may change registration at Circle Park On-

line (http://cpo.utk.edu). If additional permission is necessary, a student must execute a change of registration at the Office of the University Registrar, with approval of the instructor, advisor, and Office of Graduate Student Services. Total withdrawal from registration for a semester must be processed through the Office of the University Registrar.

Course Loads

The maximum load for a graduate student is 15 hours, and 9 to 12 hours are considered a full load. For the summer term, graduate students may register for a maximum of 12 hours in an entire summer term or for a maximum of 6 hours in a five-week summer session. Students may enroll in only one course during a mini-term session.

Students holding a one-half time assistantship normally should enroll for 6-11 hours. A one-fourth time graduate assistant normally should take 9-13 hours. A student on a one-half time assistantship who takes 6 hours will be considered full time. Refer to the Policy for the Administration of Graduate Assistantships for additional information.

Students receiving financial aid should consult with the department/program head concerning appropriate course loads. Courses audited do not count toward minimum graduate hours required for financial assistance.

Registration for more than 15 hours during any semester, or for more than 12 hours in the summer term, is not permissible without prior approval. The academic advisor may allow registration of up to 18 hours during a semester if the student has met the standard expected of graduate students. No more than 12 hours are permissible in the summer term without prior approval.

Grade Point Average and Grades

A cumulative grade point average of 3.0 is required on all graduate coursework taken at the University of Tennessee, Knoxville, to remain in good standing and to receive any graduate degree or certificate from the university. All coursework taken for graduate credit is computed into the GPA.

Grades in graduate study have the following meanings.

A (4 quality points per semester hour) superior performance.
B+ (3.5 quality points per semester hour) better than satisfactory performance.
B (3 quality points per semester hour) satisfactory performance.
C+ (2.5 quality points per semester hour) less than satisfactory performance.
C (2 quality points per semester hour) performance well below the standard expected of graduate students.
D (1 quality point per semester hour) clearly unsatisfactory performance and cannot be used to satisfy degree requirements.
F (no quality points) extremely unsatisfactory performance and cannot be used to satisfy degree requirements.
I (no quality points) a temporary grade indicating that the student has performed satisfactorily in the course but, due to unforeseen circumstances, has been unable to finish all requirements. An I is not given to enable a student to do additional work to raise a deficient grade. The instructor, in consultation with the student, decides the terms for the removal of the I, including the time limit for removal. If the I is not removed within one calendar year, the grade will be changed to an F. The course will not be counted in the cumulative grade point average until a final grade is assigned. No student may graduate with an I on the record.
S/NC (carries credit hours, but no quality points) S is equivalent to a grade of B or better, and NC means no credit earned. Courses in which NC is received may be repeated for a grade of S. A grade of Satisfactory/No Credit is allowed only where indicated in the course description in the Graduate Catalog. The number of Satisfactory/No Credit courses in a student’s program is limited to one-fourth of the total credit hours required.

P/NP (carries credit hours, but no quality points) P indicates progress toward completion of a thesis or dissertation. NP indicates no progress or inadequate progress.

W (carries no credit hours or quality points) indicates that the student officially withdrew from the course.

The grading system available for a course is based on the level of the course. Courses numbered 100-499 are graded letter grade or Satisfactory/No Credit, except where noted otherwise in the catalog. Courses numbered 500-699 are graded letter grade only, except where the Graduate Catalog indicates Satisfactory/No Credit only or optional Satisfactory/No Credit or letter grade. Veterinary Medicine courses are letter grade only except where noted otherwise. There are restrictions regarding the use of Satisfactory/No Credit for graduate courses, including the number of hours that may be used toward any degree program.

No graduate student may repeat a course for the purpose of raising a grade already received, with the exception of No Credit. A graduate student may not do additional work nor repeat an examination to raise a final grade. A change of grade may occur only in cases of arithmetic or clerical error. An instructor may not initiate a change of grade as a result of a reevaluation of the quality of the student’s performance nor as a result of additional work performed by the student.

Refer to law courses under Registration and Enrollment Requirements and in the College of Law section of this catalog.

Academic Standards

Graduate education requires continuous evaluation of the student. This includes not only periodic objective evaluation, such as the cumulative grade point average, performance on comprehensive examinations and acceptance of the thesis or dissertation, but also judgments by the faculty of the student’s progress and potential. Continuation in a program is determined by consideration of all these elements by the faculty and the head of the academic unit.

The academic records of all graduate students are reviewed at the end of each semester, including the summer term. Graduate students must maintain a cumulative grade point average (GPA) of at least 3.0 on all graduate courses taken for a letter grade of A-F. Grades of S/NC, P/NP, and I, which have no numerical equivalent, are excluded from this computation.

Departments and programs may have requirements for continuation or graduation in addition to the minimum requirements set forth in this catalog for all graduate programs. It is the student’s responsibility to be familiar with the special requirements of the department or program.

Academic Probation

Upon completion of 9 hours of graduate coursework, a graduate student will be placed on academic probation when his/her cumulative GPA falls below 3.0. A student will be allowed to continue graduate study in subsequent semesters if each semester’s grade point average is 3.0 or greater. Upon achieving a cumulative GPA of 3.0, the student will be removed from probationary status.

Dismissal

If a student is on academic probation, the degree or non-degree status will be terminated by the Dean of Graduate Studies if the student’s semester GPA falls below 3.0 in a subsequent semester. When the particular circumstances are deemed to justify continuation, and upon recommendation of the appropriate academic unit and approval of the Dean of Graduate Studies, a student on probation whose semester GPA is below 3.0 may be allowed to continue on a semester-by-semester basis.

Dismissal of a graduate student by a department or program is accomplished by written notice to the student, with a copy to Graduate Student Services. In those cases where the department’s requirements for continuation are more stringent than university requirements for graduate programs, the Dean of Graduate Studies will evaluate the student’s record to determine whether the student is eligible to apply for a change of status and register in another area of study. Registration for courses in a department from which a student has been dismissed will not be permitted, except by written authorization from that department.

Academic Honesty

Academic integrity is a responsibility of all members of the academic community. An honor statement is included on the application for admission and readmission. The applicant’s signature acknowledges that adherence is confirmed. The honor statement declares:

An essential feature of the University of Tennessee, Knoxville, is a commitment to maintaining an atmosphere of intellectual integrity and academic honesty. As a student of the university, I pledge that I will neither knowingly give nor receive any inappropriate assistance in academic work, thus affirming my own personal commitment to honor and integrity.

Plagiarism

Students shall not plagiarize. Plagiarism is using the intellectual property or product of someone else without giving proper credit. The undocumented use of someone else’s words or ideas in any medium of communication (unless such information is recognized as common knowledge) is a serious offense subject to disciplinary action that may include failure in a course and/or dismissal from the university. Some examples of plagiarism are:

• Using without proper documentation (quotation marks and a citation) written or spoken words, phrases, or sentences from any source.

• Summarizing without proper documentation (usually a citation) ideas from another source (unless such information is recognized as common knowledge).

• Borrowing facts, statistics, graphs, pictorial representations, or phrases without acknowledging the source (unless such information is recognized as common knowledge).

• Submitting work, either in whole or in part, created by a professional service and used without attribution (e.g., paper, speech, bibliography, or photograph).

Extreme caution should be exercised by students involved in collaborative research to avoid questions of plagiarism. If in doubt, students should check with the major professor and the Dean of Graduate Studies about the project. Plagiarism will be investigated when suspected and prosecuted if established.

Appeals Procedure

The Graduate Council Appeal Procedure can be obtained at the Office of Graduate Student Services, or at http://gradstudies.utk.edu/GraduateCouncil/AcadPol/appealprocedure.pdf. Normally, grievances should be handled first at the department level through the student’s academic advisor, the graduate liaison, or the department or program head. Further appeal may be made to the dean of the respective college, the Graduate Council through the Associate Dean of Graduate Studies, and ultimately to the Dean of Graduate Studies.

Appeals may involve the interpretation of and adherence to university, college, and department policies and procedures as they apply to graduate education and the issuance of grades based on specific allowable reasons stipulated in the Graduate Council Appeal Procedure.
Appeal procedures in regard to allegations of misconduct or academic dishonesty are presented in *Hilltopics* under “Disciplinary Regulations and Procedures.” Students with grievances related to race, sex, color, religion, national origin, age, disability or veteran status should file a formal complaint with the Office of Equity and Diversity.

**DEGREE PROGRAM REQUIREMENTS**

A complete list of programs is found under the Graduate Degrees, Majors, and Certificate Programs Chart. For specific degree requirements, consult individual program descriptions. Department policies and procedures, which are specific to degree programs and exceed those in the Graduate Catalog, are provided in the *Graduate Student Handbook* available in each academic department.

The following are the Graduate Council’s minimum requirements for degree programs. Refer to the college and academic department for additional program requirements.

**Minors**

For the master’s degree at the University of Tennessee, Knoxville, a minor is defined as 6-12 semester hours in one field outside the major. Usually, the minor courses are within a single teaching discipline that also offers a major.

Three interdisciplinary minors are available: statistics and gerontology at both the master’s and doctoral levels, and environmental policy at the master’s level only.

The minor area must be approved by the major and minor academic units and a member from the minor unit must serve on the graduate committee.

**Transfer Credits**

Courses taken at another institution may be considered for transfer into a master’s or EdS program as determined by the committee and approved by the Dean of Graduate Studies. At the doctoral level, courses are not officially transferred although they may be used to meet degree requirements. Where a requirement has been met through coursework in another program, the student may petition the academic unit for a waiver of the requirement at the doctoral level. Official transcripts must be sent directly to the Office of the University Registrar from all institutions previously attended before any credit will be considered.

To be transferred into a master’s or EdS program at the University of Tennessee, Knoxville, a course must

- Be taken for graduate credit.
- Carry a grade of B or better.
- Be a part of a graduate program in which the student had a B average.
- Not have been used for a previous degree.
- Be approved by the student’s graduate committee and the Dean of Graduate Studies on the Admission to Candidacy form.

Courses transferred to any graduate program will not affect the minimum residence requirements for the program, nor will they be counted in determining the student’s grade point average. Credits transferred from universities outside the University of Tennessee system cannot be used to meet the thesis or dissertation requirements or 600-level coursework requirements. Credit for extension courses taken from other institutions is not transferable, nor is credit for any course taken at an unaccredited institution.

**Master’s Degree**

A majority of the total hours required for a master’s degree must be taken at the University of Tennessee, Knoxville. Transferred courses must have been completed within the six-year period prior to the receipt of the degree. The courses must be listed on the Admission to Candidacy form and will be placed on the student’s university transcript only after admission to candidacy.

**Specialist in Education Degree**

A maximum of 6 semester (9 quarter) hours of coursework beyond the master’s degree may be transferred to an EdS program. Transferred courses in the most recent 30 hours taken for the degree must have been completed within the six-year period prior to the receipt of the degree. The courses must be listed on the Admission to Candidacy form and will be placed on the student’s university transcript only after admission to candidacy.

**Doctoral Degree**

Coursework taken prior to admission to a doctoral program may be used toward the degree, as determined by the student’s doctoral committee. Although the courses are used as part of the requirements toward the degree and are listed on the admission to candidacy, they are not officially transfer courses and are not placed on the student’s university transcript.

**Theses and Dissertations**

All theses and dissertations are submitted in paper or electronic format to the Thesis/Dissertation Consultant in the Office of Graduate Student Services for examination. (Refer to Dissemination of Final Copies regarding different submission processes.) The consultant will review the material and assure that it is appropriately presented, free of technical errors in format, suitable for binding or for electronic submission, and reflects credit upon graduate education at the University of Tennessee, Knoxville. If the thesis or dissertation is not accepted, the student must make corrections and resubmit the material.

The student, major professor and committee share responsibility for the accuracy and professionalism of the final product of the student’s research. The student should confer with the Thesis/Dissertation Consultant regarding problems and questions in advance of preparing the final copy. The *Guide to the Preparation of Theses and Dissertations* (available on the Graduate Studies Web site) provides the correct format for theses or dissertations. Workshops are held periodically throughout the academic year. The date for each workshop is announced on the Graduate Studies Web site.

**Foreign Language**

The thesis/dissertation normally should be written in English. Under exceptional circumstances, another language may be used if prior approval is obtained from the Dean of Graduate Studies. A request to write in a language other than English should be submitted to the Dean of Graduate Studies by the student’s thesis committee, with endorsement by the department head and dean of the college, prior to Admission to Candidacy for the degree sought. The request should include a proposal and justification for the exception. In all cases, one thesis/dissertation abstract must be written in English.

**Classified Research**

A basic principle in graduate education is that theses and dissertations produced by graduate students will be published and made available to other researchers in the field. When a graduate student is involved in classified or proprietary research, and such research is intended to lead toward a thesis or dissertation, prior approval should be secured from the department head and dean, and from the Dean of Graduate Studies. Should the research become classified in the course of a project, these same persons should be notified immediately so that proper procedures can be assured. Failure to comply with these requirements may lead to rejection of a thesis or dissertation manuscript.

**Dissemination of Final Copies**

Paper copies approved for final submission will be sent to the University Libraries bindery one month after conferral of the graduate degree. One of the bound copies will be placed on the shelf in Hodges Library for circulation, the second bound copy will be placed in Library Archives. The circulation copy will appear in the library catalog and on the shelf approximately one year after conferral of the graduate degree. A student must, as a condition of a degree award, grant royalty-free permission to the university to re-
produce and publicly distribute, including by electronic and digital
technologies now known or developed in the future, on a non-
commercial basis, copies of the thesis or dissertation. Electronic
copies approved for final submission will be catalogued and
placed on the ETD Web site (http://etd.utk.edu) approximately
four weeks after the conferral of the graduate degree. At this time,
the electronic copies will be publicly distributed.

Graduation
A student planning to graduate must submit an application for
graduation no later than the last day of classes of the term prior
to the term he/she intends to graduate. The graduation applica-
tion begins the final checking of degree requirements and is used
in order the diploma. If the student does not graduate that term,
a new graduation application must be submitted for the appropri-
ate term. The form is submitted to the Office of the University Registrar. Deadlines and steps to graduation are available on the
Graduate Studies Web site. Commencement and graduate hood-
ing ceremonies are held in fall and spring terms. There is no cer-
cemony in summer term. Summer graduates may participate in
the fall graduate hooding ceremony. Students who need 12 hours
or fewer to complete a non-thesis program may participate in the
spring graduate hooding ceremony.

Master's Degree
The master's degree is evidence of successful completion of a
body of coursework, advanced understanding, and the ability to
apply knowledge within a major field. As part of a master's degree,
and in addition to a final comprehensive examination, a culminating
(capstone) experience is expected. Examples of culminating
experiences include an advanced seminar, exhibit, independent
project, integrated case study or simulation, internship, practicum,
recital or thesis. Through this experience, the student will demon-
strate skills associated with the particular degree program, such as
applied performance, critical analysis, organization and writing.

Master's degree programs are available with thesis and non-
thesis options. These programs require 30 or more graduate
hours of coursework. In addition to the Master of Arts and Mas-
ter of Science degrees, other degrees are offered, including the
Master of Business Administration and the Master of Science in
Social Work.

Course Requirements
A candidate for a master's degree must complete a minimum of
30 hours of graduate credit in courses approved by the stu-
dent's master's committee. In thesis programs, 6 semester hours of
credit in the major (9-12 in some approved programs) must be
earned in course 500 while the student is preparing the thesis.
Hours applied to the master's degree may be entirely from one
major subject or may be distributed to include one or two minor
areas. In a 30-hour program, the major subject must include at
least 12 hours of graduate coursework, exclusive of course 500,
and a minor must include not fewer than 6, nor more than 12
hours of graduate credit.

At least two-thirds of the minimum required hours in a mas-
ter's degree program must be taken in courses numbered at or
above the 500 level. Only 6 thesis hours may be counted toward
this requirement.

For coursework taken at other institutions, refer to section on
Transfer Credits.

Second Master's Degree
For a second master's degree, the student must have fulfilled
all major requirements applicable to the first master's degree, in-
cluding the thesis, if appropriate. Coursework applied to one
master's degree program may not be applied toward a second.

Master's Committee
A committee composed of the major professor and at least two
other faculty members, all at the rank of assistant professor or
above, should be formed as early as possible in a student's pro-
gram, and must be formed by the time a student applies for admis-
sion to candidacy (refer to Advisor/Major Professor). The respons-
bility of this committee is to assist the student in planning a pro-
gram of study and carrying out research, and to assure fulfillment
of the degree requirements. If the student has a minor, one mem-
ber of the committee must be from the minor department.

Admission to Candidacy
Admission to candidacy indicates agreement that the student
has demonstrated ability to do acceptable graduate work and
that satisfactory progress has been made toward a degree. This
action usually connotes that all prerequisites to admission have
been completed and a program of study has been approved.

The application for the master's degree is made as soon as
possible after the student has completed any prerequisite cours-
es and 9 hours of graduate coursework with a 3.0 average or
higher in all graduate work. The Admission to Candidacy form
must be signed by the student's committee and all courses to be
used for the degree must be listed, including transfer coursework.

A student must submit this form to the Office of the University Registrar no later than the last day of classes of the semester pre-
ceding the semester in which he/she plans to graduate.

Thesis Registration
A student must be registered for course 500 each semester
during work on the thesis, including a minimum of 3 hours the se-
mester in which the thesis is accepted by Graduate Student Ser-
dices. Six hours of 500 are required for the thesis option. After re-
ceiving the master's degree, a student is no longer permitted to
register for Thesis 500.

Thesis
The thesis represents the culmination of an original research
project completed by the student. It must be prepared according
the most recent Guide to the Preparation of Theses and Dis-
sertations, available at http://web.utk.edu/~thesis. Paper or elec-
tronic submission will be approved by the student's committee
prior to final preparation of the thesis. Two paper copies or an
 electronic copy of the thesis must be accompanied by two ap-
proval sheets, signed by the members of the master's commit-
tee. The approval sheets reflect the final format for submission.
The approval sheets certify that the committee members have
examined the final copy of the thesis and have found that its form
and content are satisfactory.

Final Examination for Thesis and Problems in Lieu of Thesis
A candidate presenting a thesis or problems in lieu of thesis
must pass a final comprehensive oral (or oral and written) exam-
ination on all work offered for the degree. The examination,
which is concerned with coursework and the thesis or problems,
measures the candidate's ability to integrate material in the major
and related fields, including the work presented in the thesis or
problems. The final draft of the thesis must be distributed to all
committee members at least two weeks prior to the date of the
final examination. Except with prior approval from the Dean of
Graduate Studies, the examination must be given in university-
approved facilities. This examination should be scheduled
through the academic department at least two weeks prior to the
examination. This examination must be held at least two weeks
before the final date for acceptance and approval of thesis by the
Office of Graduate Student Services on behalf of the Graduate
Council. The major professor must submit the results of the de-
fense by the thesis deadline. In case of failure, the candidate
may not apply for reexamination until the following semester. The
result of the second examination is final.

Final Examination for Non-Thesis Students
Each non-thesis student must pass a final comprehensive
written examination. A department may require an additional oral
examination. The examination is not merely a test over course-
work, but a measure of the student's ability to integrate material
in the major and related fields. Except with prior approval from
the Dean of Graduate Studies, the examination must be given in
university-approved facilities. It should be scheduled through the
academic department at least two weeks prior to the examina-
tion. Students taking the final examination but not otherwise using university facilities may pay a fee equal to one hour of graduate credit instead of registering. In case of failure, the candidate may not apply for reexamination until the following semester. The result of the second examination is final.

**Time Limit**

Candidates have six calendar years to complete the degree, starting at the beginning of the semester of the first course counted toward the degree. Students who change degree programs during this six-year period may be granted an extension after review and approval by the Dean of Graduate Studies. In any event, courses used toward a master's degree must have been taken within six calendar years of graduation.

**Specialist in Education Degree**

The Specialist in Education (EdS) degree is offered with a major in educational administration, instructional technology and educational studies, school counseling, school psychology, and teacher education.

Admission to the Specialist in Education program requires acceptance by the Office of Graduate and International Admissions and review and acceptance by the department or area in which the student is majoring. It is recommended that students who apply for the EdS have at least one year of related work experience. Additional information on admission requirements can be obtained from academic units offering the degree.

**Course Requirements**

The student's program involves a minimum of four semesters of study totaling not fewer than 60 semester hours of graduate credit beyond the baccalaureate degree. A minimum of 6 hours is required outside the concentration.

A student admitted to the program with a master's degree, or with acceptable work beyond the master's degree, may have program requirements modified upon recommendation of the student's committee. However, no modifications will be permitted in examination and research requirements, or in the minimum 6 graduate hours required outside the concentration.

All prior coursework accepted toward the degree must be related to the student's program objectives. A maximum of 6 hours beyond the master's degree may be transferred from another institution to a Specialist in Education program (refer to section on Transfer Credits).

Courses numbered at the 400 level required for certification through the University of Tennessee, Knoxville, may not be taken for graduate credit and used as coursework in the major. At least one-half of the last 30 semester hours of work, exclusive of thesis courses, must be in 500- or 600-level courses.

**Specialist in Education Committee**

A committee of at least three faculty members is assigned to each student. A minimum of two members of this committee must represent the unit or major area. Its responsibilities include formulating the student's program of coursework, supervising progress, recommending admission to candidacy, directing research, and coordinating the qualifying and final examinations.

**Admission To Candidacy**

Admission to Candidacy indicates agreement that the student has demonstrated ability to do acceptable graduate work and that satisfactory progress has been made toward a degree. This action usually connotes that all prerequisites to admission have been completed and a program of study has been approved.

The Admission to Candidacy form must be signed by the student's committee and list all courses to be used for the degree, including transfer coursework. This form is submitted to the Office of the University Registrar before the student has completed 15 hours of coursework in the Specialist in Education program. A qualifying examination may be required for admission to candidacy if the student has a master's degree earned six years or more prior to admission to the program. This examination may be written and/or oral.

**Research Requirements**

See the program descriptions of individual departments for list of thesis, problems in lieu of thesis, and non-thesis options. Some departments offer only a thesis program.

In the non-thesis program, a candidate will study research methods and findings and will demonstrate skill in adapting them to professional needs as defined by the major department.

In the thesis program, or problems in lieu of thesis, 6 hours of research credit (518 or 503) must be earned in preparation of an acceptable piece of work. The student must continue to register for thesis or problems while working on the project, including the semester it is accepted by the Office of Graduate Student Services on behalf of the Graduate Council. The thesis must be prepared according to the most recent *Guide to the Preparation of Theses and Dissertations* (http://web.utk.edu/~thesis), and approved by the student's committee prior to submission to Graduate Student Services for final approval and acceptance.

**Final Examination**

A candidate presenting a thesis, or problems in lieu of thesis, must pass an oral examination covering the student's research and program of study. A non-thesis student must pass a final written, or written and oral examination, on all work offered for the degree. The examination is not merely a test over coursework, but a demonstration of the candidate's ability to integrate materials in the major and related fields. Each examination should be scheduled through the academic department at least two weeks prior to the examination and will be conducted in university-approved facilities by the student's committee. In case of failure, the candidate may not be reexamined until the following semester. The result of the second examination is final.

**Time Limit**

Candidates have six calendar years from the time of entry into the last 30 hours of their degree programs to complete the Specialist in Education degree.

**Doctoral Degree**

Two doctoral degree programs are available – Doctor of Au-
diology (AuD), and Doctor of Philosophy (PhD). For a list of pro-
grams, see the Graduate Degrees, Majors, and Certificate Pro-
grams chart. For specific degree requirements, consult individual pro-
gram descriptions listed in this catalog.

The doctoral degree is evidence of exceptional scholarly at-
tainment and demonstrated capacity in original investigation. Re-
quirements for the degree, therefore, include courses, examina-
tions, and a period of resident study, as well as arrangements which guarantee sustained, systematic study and superior com-
petency in a particular field.

**Program of Study**

The student's program of study is subject to Graduate Coun-
cil policies and individual program requirements. The program of study as listed by the student on the Admission to Candidacy form must be approved by the doctoral committee. Doctoral pro-
grams include a major field or area of concentration and, fre-
quently, one or more cognate fields. Cognate fields are defined as a minimum of 6 semester hours of graduate coursework in a given area outside the student's major field.

A candidate for a doctoral degree must complete a minimum of 24 hours of graduate coursework beyond the master's degree, which is a prerequisite for entry into most doctoral programs. If the doctoral program does not require a master's degree, the candidate must complete a minimum of 48 hours of graduate coursework beyond the baccalaureate degree. A minimum of 12 of the 24 hours, or 30 of the 48 hours, must be graded A-F. A mini-
um of 6 hours of the student's coursework must be taken in University of Tennessee courses at the 600 level, exclusive of dissertation.

In addition, 24 hours of course 600 Doctoral Research and Dis-
sertation are required (see Registration for Course 600 and Con-
tinuous Registration).
For coursework taken prior to admission to the doctoral program, refer to section on Transfer Credits.

Doctoral Committee

The major professor directs the student's dissertation research and chairs the dissertation committee. The student and the major professor identify a doctoral committee composed of at least four faculty members holding the rank of assistant professor or above, three of whom, including the chair, must be approved by the Graduate Council to direct doctoral research. At least one member must be from an academic unit other than that of the student's major field. Students are encouraged where appropriate to seek a fifth member in the field of specialization from outside the university to serve on their dissertation committee. This committee is nominated by the department head or college dean and approved by the Dean of Graduate Studies.

A doctoral student should begin to form the committee during the first year of study. Subject to Graduate Council policies and individual program requirements, the committee must approve all coursework applied toward the degree, certify the student's mastery of the major field and any cognate fields, assist the student in conducting research, and recommend the dissertation for approval and acceptance by Graduate Student Services.

Doctoral Examinations

Departments may, at their option, administer diagnostic and/or qualifying examinations in the early stages of the student's doctoral program. Successful completion of a comprehensive examination and a defense of dissertation is required for all doctoral degrees. Registration is required the term in which examinations are taken.

Diagnostic Examination

A student on admission to a doctoral program may be given a written and/or oral diagnostic examination to help determine the student's level of preparation, areas of strengths and weaknesses, and general background. The diagnostic examination is designed to aid in the selection of courses and to determine the student's preparation to continue doctoral studies at the University of Tennessee, Knoxville.

Qualifying Examination

A written and/or oral qualifying examination may be given near the end of the student's first year in the doctoral program. Qualifying examinations are designed to test the student's progress, general knowledge of fundamentals of the field, and fitness to continue with the more specialized aspects of the doctoral program.

Comprehensive Examination

The comprehensive examination (or the final part of this examination, when parts are given at different times) is normally taken when the doctoral student has completed all or nearly all prescribed courses. Thus, its successful completion indicates that, in the judgment of the faculty, the doctoral student can think analytically and creatively, has a comprehensive knowledge of the field and the specialty, knows how to use academic resources, and is deemed capable of completing the dissertation. The comprehensive examination must be passed prior to admission to candidacy. A written examination is required, and an oral examination is encouraged.

The faculty of the graduate program and/or the student's doctoral committee will determine the content, nature and timing of the comprehensive examination and certify its successful completion. The department or committee may at its discretion subdivide the examination, administering portions of the examination at several times during the student's course of study. Students should review carefully the written statement from each doctoral degree program which details the timing, areas covered, grading procedures, and provisions for repeating a failed examination.

Defense of Dissertation Examination

A doctoral candidate must pass an oral examination on the dissertation. The dissertation, in the form approved by the major professor, must be distributed to the committee at least two weeks before the examination. The examination must be scheduled through the Office of the University Registrar at least one week prior to the examination and must be conducted in university-approved facilities. The examination is announced publicly and is open to all faculty members. The defense of dissertation will be administered by all members of the doctoral committee after completion of the dissertation and all course requirements. This examination must be passed at least two weeks before the date of submission and acceptance of the dissertation by Graduate Student Services. The major professor must submit the results of the defense by the dissertation deadline.

Language Requirement

Candidates for the Doctor of Philosophy may be required to demonstrate a reading knowledge of at least one foreign language in which there exists a significant body of literature relevant to the major field of study. Please refer to the descriptions of individual programs. The doctoral committee will determine the specific language (or languages) required. When the student is prepared to take a language examination, he/she should complete an Application for Doctoral Language Examination at the Office of the University Registrar in accordance with the dates and times for the examinations listed online.

Satisfactory completion (grade of B or better) of German 332 or French 302 may be substituted for a language examination.

Some programs may accept a computer language in lieu of a foreign language.

Residence Requirement

Residence is defined as full-time registration for a given semester on the campus where the program is located. The summer term is included in this period. During residence, it is expected that the student will be engaged in full-time on-campus study toward a graduate degree.

For the doctoral degree, a minimum of two consecutive semesters of residence is required. Individual doctoral programs may have additional residence requirements.

A statement as to how and during what period of time the residence requirement has been met will be presented with the Application for Admission to Candidacy along with signatures of approval from the major professor and the department head/program director. More information about the rationale for the residence requirement may be obtained from the Graduate Council report available on the Graduate Studies Web page.

Admission to Candidacy

Admission to candidacy indicates agreement that the student has demonstrated the ability to do acceptable graduate work and that satisfactory progress has been made toward a degree. This action usually connotes that all prerequisites to admission have been completed and a program of study has been approved.

A student may be admitted to candidacy for the doctoral degree after passing the comprehensive examination, fulfilling any language requirements (for Doctor of Philosophy), and maintaining at least a B average in all graduate coursework. Each student is responsible for filing the admission to candidacy form, which lists all courses used for the degree, including courses taken at the University of Tennessee, Knoxville, or at another institution prior to admission to the doctoral program, and is signed by the doctoral committee. Admission to candidacy must be applied for and approved by the Office of the University Registrar at least one full semester prior to the date the degree is to be conferred.

Registration for Course 600 and Continuous Registration

Course 600 is reserved for doctoral research and dissertation hours. Initial registration for 600 should be determined by each department and generally corresponds to the time at which a student begins work actively on dissertation research. From this time on, students are required to register continuously for at least
Dissertation
The dissertation represents the culmination of an original major research project completed by the student. The organization, method of presentation, and subject matter of the dissertation are important in conveying to others the results of such research.

A student should be registered for the number of dissertation hours representing the fraction of effort devoted to this phase of the candidate’s program. Paper or electronic submission will be approved by the student’s committee prior to final preparation of the dissertation. Two paper copies or an electronic copy of the dissertation (prepared according to the regulations in the most recent Guide to the Preparation of Theses and Dissertations, available at http://web.utk.edu/~thesis) must be submitted to and accepted by the Office of Graduate Student Services on behalf of the Graduate Council. Each dissertation must be accompanied by two approval sheets, signed by all members of the doctoral committee. The approval sheets reflect the final format for submission. The approval sheets certify to the Office of Graduate Student Services that the committee members have examined the final copy and found that its form and content demonstrate scholarly excellence. Doctoral Dissertation Agreement Form, Survey of Earned Doctorates, and Abstract form are also submitted at this time. The student should check with the department head concerning additional required copies of the dissertation.

Time Limit
Comprehensive examinations must be taken within five years, and all requirements must be completed within eight years, from the time of a student’s first enrollment in a doctoral degree program.

FEES AND FINANCIAL ASSISTANCE
Residency Classification for the Purpose of Paying University Fees and for Admission Purposes
Initial residency classification is determined by an admissions processor from information included on the University of Tennessee Graduate Application for Admission. Notice of classification is sent at the time the applicant is notified of admission. Students who would like their residency classification reconsidered may submit an appeal to the residency classifier listed at http://registrar.tennessee.edu/.

The application for reclassification with supporting documentation must be filed no later than last day of registration in order to have the reclassification effective for the upcoming semester. Classification will be determined and the applicant will be notified by mail. Additional information regarding the State of Tennessee regulations for classification may be found at the Office of the University Registrar Web site http://registrar.tennessee.edu/.

University Fees

For the most current listing of tuition and fees at the University of Tennessee, Knoxville, see http://www.utk.edu/bursar.

University fees and other charges are determined by the Board of Trustees and are subject to change without notice. All student fees are due in advance.

All charges and refunds will be made to the nearest even dollar. All charges are subject to subsequent audit and verification. The university reserves the right to correct any error by appropriate additional charges or refunds.

All students must confirm their attendance by making the minimum payment; signing a Confirmation of Attendance form; or setting their Confirmation of Attendance on the Web at CPO.UTK.EDU if no fees are due.

If the student does not owe fees due to a waiver (staff, GA, GTA, GRA, etc.), financial aid including scholarships, or if fees are paid by another source, a signed Confirmation of Attendance Form must be received by the Bursar’s Office or the student must set their confirmation on the Web at CPO.UTK.EDU on or before the due date published on the Bursar’s Office Web site each semester. The schedule will be canceled if one of the above is not accomplished each term on or before the published due date. This includes graduate assistants, teaching assistants, teaching associates, research assistants, staff and others whose fees may be billed, prepaid, or waived. Late registration fees are applicable to students who register during late registration.

The university is authorized by statute to withhold diplomas, grades, transcripts, and registration privileges from any students until their debts and obligations owed to the university are satisfied.

Part-time students may elect to pay fees computed by the semester hour credit (or audit) at the rates shown on the above Web site, with the total charge not to exceed the regular maintenance fee for in-state students or the maintenance fee plus tuition for out-of-state students.

All students both in and out-of-state are required to pay the established maintenance fee. In addition, tuition is required of all students who are classified as non-residents for fee assessment purposes.

Application Fee
Each graduate application for admission must be accompanied by a non-refundable fee of $35 before it will be processed (fee not required if (1) former University of Tennessee graduate student; (2) paid to the University of Tennessee Graduate Admissions within the previous 12 months; or (3) paid and attended graduate school within the University of Tennessee System).

If a student applies but does not enter graduate school within twelve months after date of requested admission, the file will be destroyed, and it will be necessary to resubmit the application fee and a new application. This fee is not refundable.

VOLXpress
VOLXpress is the University of Tennessee, Knoxville’s, centralized accounting system. Students may pay their fees via the mail, in person, or on the Web at CPO.UTK.EDU. Through VOLXpress, statements are mailed to each student’s billing address that include class schedules, current tuition and fees, fee waiver information, fines and past-due amounts, pending financial aid that can be credited toward fees, any excess funds from scholarships and/or loans, and choices about how to receive them.

VOLXpress is a convenient method for students to take care of business from home. Students who register and pay early will receive the greatest benefit if the payment deadlines are observed.

Each student must submit any change of address on the Web at CPO.UTK.EDU to ensure timely receipt of a VOLXpress Statement. Failure to receive a statement does not relieve the student of their obligation to pay on or before the due date.

University Program and Services Fee
http://www.utk.edu/bursar/volxfees.html
The purpose of the University Programs and Services Fee (UPSF) is to provide non-instructional facilities and programs of an educational, cultural, social, recreational, and service nature for the University of Tennessee, Knoxville, students. The fee has three components which include program, health, and capital. The health portion of the fee is included only with the payment of the full UPSF (refer to Student Health Insurance and Student Health Services for additional information).
Students enrolled in 9 or more hours are assessed the full-time University Programs and Services Fee. Students enrolled for less than 9 hours are assessed a pro-rated fee based on the highest number of hours for which the student is enrolled at any time during the semester. The fee is non-refundable.

Graduate, teaching, and research assistants, teaching associates, and fellowship students must pay the University Programs and Services Fee even if they have a waiver of fees (tuition and/or maintenance).

Any part-time student (minimum of 3 hours) may elect to pay the health portion of the UPSF in addition to the standard pro-rated assessment. Part-time students enrolled in 6 or more hours may elect to pay the full-time UPSF instead of the standard pro-rated assessment.

**Technology Fee**

The purpose of the Technology Fee is to provide all students with improved access to the technological infrastructure, resources, and services at the University of Tennessee, Knoxville.

Graduate, teaching, and research assistants, teaching associates, and fellowship students, who may have a waiver of fees (tuition and/or maintenance), must pay the appropriate Technology Fee.

The Technology Fee is mandatory and may be refunded on the same percentage scale as maintenance and tuition charges.

**Facilities Fee**

The Facilities Fee is used to provide students with upgraded classroom facilities, expand information technology into the classroom, and assist in funding a backlog of campus and classroom projects that will enhance the university’s facilities.

**Transportation Fee**

The Transportation Fee is a mandatory fee assessed to all students enrolled in credit and audit courses. The fee is used to provide students with a convenient method of movement around campus. The fee will subsidize the costs associated with the new comprehensive campus transit system.

**Special Course Fees**

Academic areas, such as art, biology, chemistry, engineering, music, and physical education, charge fees for certain courses. Refunds on these fees are determined by the department or on the same percentage as maintenance and tuition.

**Graduation Fee**

Master’s Degree Candidates ........................................... $30
Doctoral Degree Candidates ........................................... $75

The graduation fee is non-refundable and is valid for two semesters after the semester in which it is paid. There are no additional charges for diploma, binding, or microfilming. Additional or duplicate diplomas may be ordered through the office of the University Registrar, Graduation office. Contact the Graduation Office for the application and cost of ordering an additional or duplicate diploma.

**Fees for Courses Not Taken for Credit**

Fees for courses audited are the same as for courses taken for credit. For fee purposes, courses listed for 0 credit hours are considered as 1-hour courses.

**Late Registration Fee**

Assessed to students who register during Late Registration (including those who were canceled during Priority Registration). Payment of fees or a Confirmation of Attendance form must be turned in to one of the Bursar’s Office locations by the Late Registration payment due date. This due date will be published on the Bursar’s Office Web site. The Late Registration Fee is non-refundable.

See the Bursar’s Office Web site for the dates and fees to be assessed during Late Registration.

**Late Fee**

VOLXpress (fee) accounts which have a balance one month prior to the end of a term will be assessed a late fee. The account balance must be paid in order to access registration services, receive a transcript, grades, or a diploma.

**Returned Check Fee**

All checks are deposited the day they are received. A $30 service charge will be assessed when checks fail to clear the bank on which they are drawn. Returned checks will not be redeposited. Cash or certified funds are required for payment of the returned check and service charges.

Any student who does not respond within two weeks from the date of the first notice may be assessed an additional $10 Service Charge.

Failure to clear returned checks will result in the forfeiture of all university services, including the receipt of grades, transcripts, schedule of classes and check cashing/writing services. Failure to pay may also result in additional late fees, collection costs and reasonable attorney fees.

**Deferred Payment Fee**

Students in good financial standing will be offered a deferment of up to 50% of the total charges on their VOLXpress statement. All financial aid must be applied toward fees before a deferment will be considered. A deferred payment service fee is assessed when any portion of tuition, fees, and other charges are deferred with the approval of the Bursar’s Office. An additional late payment fee will be assessed on each installment not paid on or before the due date. Failure to receive a statement does not relieve students of their obligation to pay on or before the due date. An additional late fee will be assessed if fees are not paid by one month prior to the end of the term.

**Refunds**

Refunds are defined as the portion of maintenance and/or tuition and university housing/meal charges due as a rebate when a student withdraws or drops a portion of class hours. Refunds are also processed as a rebate on some fines/penalties paid such as parking fines, library fines, etc. Once a refund is determined to be appropriate, all amounts will be applied toward other outstanding fees/fines owed to the university at the time the refund is issued, including outstanding fees due on the Deferred Payment Plan. Any remaining refund balance will be refunded to the credit card charged or mailed to the student’s billing address.

**Refund/Charge of Fees for Withdrawal (Drop All Classes)**

After payment of fees and/or a Confirmation of Attendance Form has been submitted by the student, withdrawal for the semester must be by official notification to the Office of the University Registrar, 209 Student Services Building. Failure to attend class does not automatically withdraw or drop a student from college or class.

The effective date of the withdrawal is the date the appropriate withdrawal office is notified by completion of the official withdrawal request form. The appropriate percentage of fees (maintenance and tuition, facility, transportation, and technology fees only) will be charged unless this action is completed by the close of the day before the first official day of classes for the semester. Failure to notify the appropriate withdrawal office promptly when withdrawing could result in a larger fee assessment. Withdrawal does not cancel fees and charges already incurred. All charges and refunds will be made to the nearest even dollar.

Any student who does not respond within two weeks from the date of the first notice may be assessed an additional $10 Service Charge.

Failure to clear returned checks will result in the forfeiture of all university services, including the receipt of grades, transcripts, schedule of classes and check cashing/writing services. Failure to pay may also result in additional late fees, collection costs and reasonable attorney fees.

**Returned Check Fee**

All checks are deposited the day they are received. A $30 service charge will be assessed when checks fail to clear the bank on which they are drawn. Returned checks will not be redeposited. Cash or certified funds are required for payment of the returned check and service charges.

Any student who does not respond within two weeks from the date of the first notice may be assessed an additional $10 Service Charge.

Failure to clear returned checks will result in the forfeiture of all university services, including the receipt of grades, transcripts, schedule of classes and check cashing/writing services. Failure to pay may also result in additional late fees, collection costs and reasonable attorney fees.

**Deferred Payment Fee**

Students in good financial standing will be offered a deferment of up to 50% of the total charges on their VOLXpress statement. All financial aid must be applied toward fees before a deferment will be considered. A deferred payment service fee is assessed when any portion of tuition, fees, and other charges are deferred with the approval of the Bursar’s Office. An additional late payment fee will be assessed on each installment not paid on or before the due date. Failure to receive a statement does not relieve students of their obligation to pay on or before the due date. An additional late fee will be assessed if fees are not paid by one month prior to the end of the term.

**Refunds**

Refunds are defined as the portion of maintenance and/or tuition and university housing/meal charges due as a rebate when a student withdraws or drops a portion of class hours. Refunds are also processed as a rebate on some fines/penalties paid such as parking fines, library fines, etc. Once a refund is determined to be appropriate, all amounts will be applied toward other outstanding fees/fines owed to the university at the time the refund is issued, including outstanding fees due on the Deferred Payment Plan. Any remaining refund balance will be refunded to the credit card charged or mailed to the student’s billing address.

Failure to clear returned checks will result in the forfeiture of all university services, including the receipt of grades, transcripts, schedule of classes and check cashing/writing services. Failure to pay may also result in additional late fees, collection costs and reasonable attorney fees.
ment and distributing the correct amount back to the financial aid program(s) according to the Refund/Repayment Allocation Policy.

Refund/Charge of Fees for Dropped Courses (Continue with a Reduced Course Load)

Students who drop courses and continue with a reduced load are eligible for a refund only if the sum of charges computed at the semester-hour rate for the hours continued, plus the percentage assessed for the hours dropped, results in an amount less than that paid. A course on a student’s schedule is officially dropped, and the drop becomes effective, on the date the charge of registration form is processed or the date the drop was entered on the registration telephone system or on CPO.UTK.EDU. Any refund due for dropped courses will be made after the drop deadline. See the Bursar’s Office Web site for the drop charge/percentage refund for the semester in question.

Waiver of Fees

Graduate assistants, teaching assistants and associates, research assistants, staff and others whose fees are billed, prepaid, waived, or partially waived must confirm their attendance by making payment or signing a Confirmation of Attendance Form by the due date as published on the Bursar’s Office Web site or their schedule will be canceled. If an appointment terminates during the term, the student owes the appropriate fees from the termination date until the end of the term.

Graduate students are not eligible for the University of Tennessee employee spouse/dependent discounts.

Graduate Student Employee Insurance

All Graduate Assistants, Graduate Teaching Assistants or Associates, and/or Graduate Research Assistants who are employed at least 25% FTE will automatically be enrolled in the Graduate Student Employee Insurance Program. These students will have 100% of the premium paid by the university. The health insurance benefit applies to nine-month and 12-month appointments. These students may elect to add spouse or dependent coverage at their own expense. If students already have insurance coverage through another insurance carrier, this policy functions as additional coverage.

The Student Health Clinic will manage the Graduate Student Employee Health Insurance Program.

Student Health Insurance

The university makes available, by contract with an insurance company, group health insurance expressly for students who do not have a graduate assistantship. The program is designed to supplement the care provided by the campus Student Health Service and provide basic benefits at low group premium rates. Primary emphasis is placed on hospitalization benefits, since in-patient care is not provided on campus. Students not otherwise covered are urged to avail themselves of this or comparable insurance, since paying for hospital care is the student’s responsibility.

Information about the insurance is mailed by the company to the student’s home, and participation is solicited. Enrollment in the plan (or alternative coverage) is mandatory for international students. Students may obtain applications from the Student Health Service. Except for international students, enrollment for insurance is not part of registration for classes. NOTE: The family health insurance policy should be carefully reviewed, since most family policies do not cover a dependent child after a given age, some as early as nineteen.

VolCard

The VolCard is issued to a new student after admission at the appropriate university level or anytime during the year to all students. The VolCard is used in nearly all aspects of campus life to obtain services including meals, vending machines, computers, laundry machines, check cashing, sporting events, cultural attractions, residence halls access, library, recreational facilities and equipment, University Bookstore, and much more. Many students have established debit or charge accounts which are accessed through use of the VolCard ID. These cards are non-transferable and may not be duplicated. The VolCard must be carried at all times for purposes of identification. Students are responsible for the safekeeping of this card and must immediately report it lost or stolen if the card is not in their possession. Failure to notify the VolCard office will make the student liable for any unauthorized charges to the debit on charge accounts the student may have.

To obtain a new VolCard or replace a lost or stolen card, report to the VolCard Office, Room 472, South Stadium Hall (between gates 12 and 13 at Neyland Stadium) on Stadium Drive. There is a minimum charge of $10.00 for replacement of a VolCard.

Financial Assistance

The University of Tennessee offers several types of financial assistance for which graduate students may apply.

Assistantships

Graduate assistantships, scholarships, traineeships, and some fellowships are offered through many departments and colleges. Information concerning these types of assistance can be obtained from the department in which the student plans to study. All assistantships are governed by the Policy for the Administration of Graduate Assistantships.

Academic Common Market

The Academic Common Market is an agreement among Southern states for sharing unique programs. Participating states can make arrangements for their residents who are fully admitted to specific programs at the University of Tennessee to enroll on an in-state tuition basis if these programs are not available in the state of residence.

Cooperating states in the Academic Common Market are Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia.

Residents of member states who seek further information on approved programs should contact the Southern Regional Educational Board, 592 Tenth Street, N.W., Atlanta, GA 30318-5790, (404) 875-9211, FAX (404) 872-1477, http://www.sreb.org; or Norma Harrington, Office of Undergraduate Admissions, (865) 974-2184.

Fellowships

The Office of Graduate Student Services administers several fellowship programs, including the J. Wallace and Katie Dean Graduate Fellowships and the Herman E. Spivey Graduate Fellowships. These awards are for full-time study at the University of Tennessee and awardees are selected on the basis of high achievement, broad intellectual ability and potential for significant career contributions. Candidates from any field of study may be nominated by the academic program for the J. Wallace and Katie Dean Fellowships. Candidates for graduate study in the humanities may be nominated by the academic program for the Herman E. Spivey Fellowships. Information is available on the Graduate Studies Web site.

Employment

The Office of Financial Aid and Scholarships coordinates the Federal Work Study Program which provides part-time off- and on-campus jobs for U.S. citizens or permanent residents who have demonstrated financial need by completing the Free Application for Federal Student Aid (FAFSA). A wide range of jobs is available in academic units, administrative offices, and non-profit agencies.

Graduate Student Travel Award

The University Program and Services Fee (UPSF) Graduate Student Travel Award is administered by the Office of the Dean of Students in cooperation with the Graduate Student Senate and the Dean of Graduate Studies. Allocations from this fund are utilized to provide travel awards for University of Tennessee
graduate students attending professional meetings. The awards are made on the basis of merit, not need, and allow for partial reimbursement of transportation, lodging and registration expenses.

Travel award requests must be filed using the current UPSF Graduate Student Travel Fund application. Applications can be picked up at the Office of the Dean of Students (413 Student Services Building) or downloaded from the GSS Web site at http://web.utk.edu/~gss. Applications must be submitted to the Office of the Dean of Students by the following deadlines:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer Term</td>
<td>April 15</td>
</tr>
<tr>
<td>Fall Semester</td>
<td>September 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>January 15</td>
</tr>
</tbody>
</table>

Loans

Students must apply through the Office of Financial Aid and Scholarships for all loan programs. Loans are limited to U.S. citizens and certain permanent residents. Additional paperwork is required on subsidized/unsubsidized Stafford Loans, including the Free Application for Federal Student Aid (FAFSA). Students must be admitted into a degree program and be enrolled for a minimum of 6 credit hours each semester to receive student loans.

Four types of loan programs are administered by the Financial Aid office.

<table>
<thead>
<tr>
<th>Type</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Federal Perkins Loan</td>
<td>(FAFSA must be on file).</td>
</tr>
<tr>
<td>Subsidized Federal Stafford Loan</td>
<td>(FAFSA must be on file).</td>
</tr>
<tr>
<td>Unsubsidized Federal Stafford Loan</td>
<td>(FAFSA must be on file).</td>
</tr>
<tr>
<td>The University of Tennessee Loan</td>
<td></td>
</tr>
</tbody>
</table>

Processing time varies from one loan program to another. All students receiving financial aid are expected to maintain satisfactory academic progress standards to remain eligible to receive aid. In addition, all students receiving federal financial aid must have a social security number. Information on these standards, applications, and additional information are available from the Office of Financial Aid and Scholarships, 115 Student Services Building.

Veteran’s Benefits

Veterans, reservists and widows or children of certain deceased or disabled veterans, who have been admitted to a degree program, may apply for benefits by contacting the Veterans Affairs Office in Room 209, Student Services Building. Maximum benefits are paid by the Department of Veterans Affairs for course loads of 9 or more graduate hours each semester.

SPECIAL FEDERAL AND STATE LAWS AND UNIVERSITY POLICIES

Family Educational Rights and Privacy Act

The Family Educational Rights and Privacy Act provides for confidentiality of student records. However, it also provides for basic identification of persons at the University of Tennessee, Knoxville, without the consent of the individual. Release of information to third parties includes directory information such as is contained in the campus telephone book and sports brochures. Such information may include name, address, telephone number, date and place of birth, major, dates of attendance, degrees and awards, the most recent previous educational agency or institution attended, participation in school activities and sports, and weight and height (for special activities).

Notice of the categories to be contained in a publication will be given in advance. A period of one week is provided during which a student may request that such information not be released.

Social Security Number Use

The University of Tennessee, Knoxville, requires the assignment of a unique student number for internal identification of each student’s record. Prior to January 1, 1975, students’ Social Security Numbers were used as student identification numbers; therefore, Federal law allows the continued use of the SSN as the unique student identifier. In December 2004, the university began assigning individual student identification numbers to newly admitted students; new students will no longer use their Social Security Numbers to conduct business or access their records.

Student identification numbers are used for university business only. The university complies with FERPA guidelines when releasing student identification numbers.

Students requiring a correction or change to their student identification numbers or to their Social Security Numbers should contact Student Data Resources at (865) 974-2108.

EEO/Title IX/Section 504 Statement

The University of Tennessee, Knoxville, does not discriminate on the basis of race, sex, color, religion, national origin, age, disability, or veteran status in provision of education programs and services or employment opportunities and benefits. This policy extends to both employment by and admission to the university.

The university does not discriminate on the basis of race, sex, or disability in the education programs and activities pursuant to the requirements of Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990.

Inquiries and charges of violation concerning Title VI, Title IX, Section 504, ADA, the Age Discrimination in Employment Act (ADEA), or any of the other above referenced policies should be directed to the Office of Equity and Diversity (OED); 1840 Melrose Avenue; Knoxville, Tennessee 37996-3560; telephone (865) 974-2498 (TTY available). Requests for accommodation of a disability should be directed to the ADA Coordinator at the Office of Human Resources; 600 Henley Street; Knoxville, Tennessee 37996-4125.

The University of Tennessee, Knoxville, in its efforts to ensure a welcoming environment for all persons, does not discriminate on the basis of sexual orientation in its campus-based programs, services, and activities. Inquiries and complaints should be directed to the Office of Equity and Diversity.

Security Information

In accordance with the Tennessee College and University Security Information Act of 1989 and the Student Right-To-Know and Campus Security Act (1999 Clery Act), the University of Tennessee has prepared a report containing campus security policies and procedures, data on campus crimes and other related information. The UT Security Brochure for the Knoxville campus is available on the Office of the Dean of Students Web page at http://web.utk.edu/~homepage, where you may print the entire document for your use. In addition, a free printed copy of this report may be obtained by any student, employee, or applicant for admission or employment from the Office of the Dean of Students, 413 Student Services Building.

Drug-Free Campus and Workplace

In support of the Drug-Free Workplace Act of 1988 (Public Law 100-690) and the Drug-Free Schools and Communities Act of 1989, the University of Tennessee, Knoxville, is notifying all students, faculty, and staff of the following university policy approved by the University of Tennessee, Knoxville, Board of Trustees on 21 June 1990.

It is the policy of the University of Tennessee, Knoxville, to maintain a safe and healthful environment for its students and employees. Therefore, university policy prohibits the unlawful use, manufacture, possession, distribution, or dispensing of
drugs (controlled substances as defined in the Controlled Substances Act, 21 U.S.C. 812 et seq.) and alcohol on university property or during university activities.

Violation of this policy is grounds for disciplinary action — up to and including immediate discharge for an employee and permanent dismissal for a student. Federal and state laws provide additional penalties for such unlawful activities, including fines and imprisonment (21 U.S.C. 841 et seq.; T.C.A. 39-6-401 et seq.). Local ordinances also provide various penalties for drug and alcohol-related offenses. The university is bound to take all appropriate actions against violators, which may include referral for legal prosecution or requiring the individual to participate satisfactorily in an approved drug use/alcohol abuse assistance or rehabilitation program.

Aside from any university policy considerations, the use of illicit drugs and/or the abuse of alcohol may be harmful to your health. Some of the health risks associated with such use/abuse are described below.

Individuals who are paid by the University of Tennessee, Knoxville, from federal grants or contracts must notify the university of any criminal drug statute conviction for a violation occurring in the workplace within five days after such conviction. The university is, in turn, required to inform the granting or contracting agency of such violation within ten days of the university’s receipt of notification.

Employees and their families needing treatment information should call their local Personnel Office, Employee Assistance Program, or the State of Tennessee Employee Assistance Program (800-867-6811). Students needing treatment information should contact their campus Student Affairs Office, student health center or counseling center.

Alcohol Abuse Health Risks
- Liver damage — cirrhosis, alcoholic hepatitis.
- Heart disease — enlarged heart, congestive heart failure.
- Ulcers and gastritis.
- Malnutrition.
- Cancer — of the mouth, esophagus, stomach, liver.
- Brain damage — memory loss, hallucinations, psychosis.
- Damage to fetus if pregnant mother drinks.
- Death — 50% of fatal auto accidents involve alcohol; 31% of suicides are alcoholics.

Drug Use Health Risks
- Overdosing — psychosis, convulsions, coma, death.
- Long-term use — organ damage, mental illness, malnutrition, death.
- Casual use — heart attack, stroke, brain damage, death.
- Needles — infections, hepatitis, AIDS, death.
- If a pregnant mother uses drugs, her baby can be born addicted or dead.

POLICY FOR THE ADMINISTRATION OF GRADUATE ASSISTANTSHIPS

A brochure containing this policy is available in the Office of Graduate Student Services, P105 Andy Holt Tower.

STUDENT SERVICES

The Black Cultural Center

Minority Student Affairs
http://web.utk.edu/~omsa/

Minority Student Affairs and Black Cultural Center are an integral part of the University of Tennessee, Knoxville. Minority Student Affairs provides academic, cultural and social outlets through programs and services as an on-going part of the university’s retention efforts. The Tutorial, Book Loan and Early Alert Programs, along with the library, computer lab, student lounge, and multi-purpose area, serve as an extension to services provided across campus. The Center houses several student organizations that plan activities ranging from success skills workshops, Black History Month events, Hispanic Heritage Month events, Welcome Week activities, and festivals to renown speakers such as Maya Angelou, Dr. Kweisi Mfume, Cornel West, John Singleton, and Alice Walker.

The new Black Cultural Center opened in June 2002 and is located at 1800 Melrose Avenue. It is a testament to the university’s commitment to the entire student population and is a unique, landmark structure. The Center continues to receive local, regional and national attention that most recently earned the university the honor of hosting the 13th Annual Conference for the Association for Black Culture Centers. The university community is encouraged to visit the facility and take advantage of the opportunities. The Black Cultural Center is truly a place for all students.

Career Services
http://career.utk.edu

The mission of Career Services is to help students identify and pursue career goals by providing quality information and services reflecting attention to individuals’ needs, use of technology, adaptability, and a positive attitude.

Career Services, located in Dunford Hall, 974-5435, is a university-wide department providing career-related assistance to University of Tennessee students through a wide range of programs and services. Included in the services offered are

- Individual career counseling, career interest inventories, and information on majors and careers.
- Several annual career fairs providing opportunity to speak informally with representatives from over 100 different companies about their entry-level jobs, part-time positions, and internships.
- An online resume database that allows students to submit resumes for hundreds of on-campus interviews, view job postings, and participate in a Web resume book.
- A Web site including valuable links to hundreds of other career-related Internet resources.
- A part-time employment service for students seeking such positions.
- Resources that help students identify and locate internships and summer employment.
- Workshops providing instruction in skills and tactics for successful interviewing, resume preparation, business and dining etiquette, and other topics.

Students can contact Career Services for more information or to schedule an appointment.
The Center for International Education (CIE), located at 1620 Melrose Avenue, promotes and supports all aspects of international education and international exchanges at the University of Tennessee, Knoxville, both for American students and faculty and for students and faculty from other countries. CIE coordinates the administration of official linkage agreements between the University of Tennessee, Knoxville, and institutions of higher education in other countries.

Programs Abroad. The University of Tennessee, Knoxville, strongly encourages students to undertake a semester, summer, or academic year of study outside of the United States. Significant time spent abroad increases students’ ability to appreciate other cultures, helps them better understand their own country and its place in the world, and can bolster their resumes. In addition, students gain confidence as they successfully face the unique challenges of living abroad.

The Programs Abroad Office (PAO) can help students find opportunities that meet their needs. Study programs are available in many countries, vary in length from 10-days to a full academic year, and sometimes cost only a little more than it would cost to attend the University of Tennessee, Knoxville. Financial Aid can be used and credits can often transfer back to fulfill university requirements. Advanced planning helps assure that study abroad does not delay graduation. Throughout the academic year, information sessions are held every weekday at 2:00 PM at the PAO.

In addition to formal study abroad, the PAO has information about other types of opportunities for graduate students to enjoy significant international experiences. These include volunteer programs and such work-based experiences as teaching English abroad, internships, and experiential learning. Students are encouraged to visit the PAO to learn more about the international opportunities available to them.

International Scholarships. CIE coordinates campus administration of such international grants and scholarships for students as the Fulbright, Rhodes, Marshall, David L. Boren NSEP, W.K. McClure, and provides information about other sources of funding for overseas study and research, including the Rotary Foundation and German Academic Exchange Service (DAAD) grants. CIE also administers the University of Tennessee, Knoxville, portion of the University of Bonn’s Transatlantic Summer Academy (TASA) for graduate students and upper-division undergraduates. Within its library on study, work and travel abroad, CIE has information on student summer job programs in seven countries.

International Students and Scholars. CIE provides information and assistance in matters relating to United States visa issues and U.S. Department of Homeland Security regulations. It produces The Link, an on-line newsletter for the University of Tennessee, Knoxville’s, international students and scholars, and administers the insurance policy required of all international students at the university. International student advisors are available to discuss academic and personal concerns. Student orientation programs conducted at the beginning of each semester facilitate adjustment to the campus and community and provide essential information related to U.S. laws for international students. For visiting J-1 and H-1B scholars there are extensive advising, assistance and weekly orientation sessions.

The International House. The “I-House,” 1623 Melrose Avenue, is CIE’s on-campus social, recreational and programming center and serves as a meeting place for international and U.S. students, faculty and staff. Culture Nights, formal discussions on global topics, language tables and cooking classes are regular features on the I-House calendar.

Contacts. Contacts for general inquiries to CIE are cie@utk.edu, phone (865) 974-3177, Web site http://www.UTInternational.org. The I-House Web address is http://www.UTI-house.org and the phone (865) 974-4453.

Counseling Center
http://www.tennessee.edu/counselingcenter

The Student Counseling Services Center provides services designed to help students with educational, vocational, personal, and social problems. Professional counselors work with students in a setting that allows for confidential discussion of concerns. Services include: crisis intervention, group therapy, individual therapy, couples counseling, academic classes, consultation with faculty/staff/students, and various workshops and presentations.

To access services, students may come to the center during walk-in hours Monday-Friday from 10:00-11:30 a.m. and 1:00-3:30 p.m. If schedules will not accommodate these times, students can call the center to schedule an appointment. Anyone experiencing a crisis during the week is seen immediately between 8:00 a.m. and 5:00 p.m. After these hours, students are encouraged to go to the University of Tennessee Medical Center emergency room.

The center is located at 900 Volunteer Boulevard and can be reached at (865) 974-2196.

Disability Services
http://ods.utk.edu/

The University of Tennessee is committed to ensuring equal access to all programs for people with disabilities. All students with disabilities are encouraged to identify themselves to our office, regardless of whether or not they use our services.

The Office of Disability Services provides appropriate accommodations to all students with documented disabilities. We are here to assist in arranging for accommodations, as well as working with faculty and staff to ensure that needs are met throughout a student’s college career. Students are encouraged to register with the office as early as possible.

Eligibility must be established before services can be provided. No services can be provided until registration occurs and it is confirmed that the documentation meets required standards. Accommodations are not retroactive.

The Office of Disability Services is located at 2227 Dunford Hall, Knoxville, TN 37996-4020. Phone (865) 974-6087 V/T. Fax (865) 974-9552. E-mail ods@tennessee.edu.

Graduate Student Senate
http://web.utk.edu/~gss

The Graduate Student Senate is the official campus-wide organization that represents graduate and professional students at the University of Tennessee. Each graduate and professional department of study has a representative elected/selected by his or her fellow students and/or program director in the respective program. The GSS President and Vice-President are elected in the annual SGA elections. GSS has representation on various university-wide and Faculty Senate committees.

For more information on the Graduate Student Senate, call (865) 974-2377, e-mail gss@utk.edu, or check the Web site.

Hearing and Speech Center

The Hearing and Speech Center, located at 1600 Peyton Manning Pass, offers complete diagnostic and treatment services to all university students with speech and language disorders/differences and/or hearing disorders.

The center serves as a clinical observation and education facility for students majoring in speech-language pathology and audiology. It also serves as a community hearing and speech center providing diagnostic and treatment services for persons of all ages exhibiting communication disorders/differences.

For speech-language services (865) 974-5451, fax (865) 974-4839.

For audiology services (865) 974-5453, fax (865) 974-1792.
Student Health Service
http://web.utk.edu/~kgivens/

Health services provided by the university are available to any student who has paid the health fee (either through paying the full University Programs and Services Fee or, if taking fewer than 9 but at least 3 hours, paying the optional health fee). These outpatient services are available continually throughout every term. The health clinic located at 1818 Andy Holt Avenue is open from 8:00 am to 4:30 pm, Monday through Friday. While urgent-care needs may be handled on a walk-in basis, appointments should be made in most instances. The Student Health Service will cooperate with students and family physicians in ensuring the continuity of quality health care during the university career.

The State of Tennessee has three immunization requirements for students attending state colleges and universities.

• Measles, mumps and rubella – all students born after January 1, 1957, must provide proof of immunization with two doses of measles, mumps, and rubella vaccine.
• Hepatitis – New incoming students must be vaccinated against Hepatitis B or complete a waiver form acknowledging that they have elected not to be vaccinated.
• Meningitis – New incoming students, who live in on-campus housing, must be vaccinated against meningococcal disease or complete a waiver form acknowledging that they have elected not to be vaccinated.

This documentation must be provided to the Student Health Service. In addition, Student Health Service recommends that entering college students assure immunity to tetanus/diphtheria, polio, and chicken pox.

Veteran’s Education Benefits
http://registrar.utk.edu/veterans_affairs.shtml

Basic military placement credit may be given on the basis of previous honorable active duty to students who are eligible for the Montgomery G.I. Bill Education Benefits. For more information, please contact the Veterans Administration Assistant in 209 Student Services Building, Monday through Friday, or visit our Web site for more information.

Service members, veterans, and dependents of veterans who are eligible beneficiaries of United States Department of Veterans Affairs education benefits or other governmentally funded educational assistance, subject to the conditions and guidelines set forth in Tennessee Code Annotated 49-7-104 as amended, may elect, upon formal application, to defer payment of required tuition and fees until the final day of the term for which the deferment has been requested. Application for the deferment must be made no later than 14 days after the beginning of the term, and the amount of the deferment shall not exceed the total monetary benefits to be received for the term. Students who have been granted deferments are expected to make timely payments on their outstanding tuition and fees balance once education benefits are being delivered, and eligibility for such deferment shall terminate if the student fails to abide by any applicable rule or regulation, or to act in good faith in making timely payments. This notice is published pursuant to Public Chapter 279, Acts of 2003, effective July 1, 2003.

Women’s Center

The Women’s Center provides essential informational and referral services to University of Tennessee, Knoxville, students and faculty. The library’s specialized collection provides books, journals, and brochures about issues and concerns of women from both a current and historical perspective. Information is available on a variety of topics including racism, violence against women, spirituality, and sex roles. The Women’s Coordinating Council is the programming branch of the Center responsible for educational, social, and cultural events pertaining to women’s issues. The Women’s Center is located in 301 University Center. If you need more information or are interested in volunteering, please call 974-1029 or e-mail wcc@utk.edu.
The College of Agricultural Sciences and Natural Resources began in 1869 when the university was designated as Tennessee’s Federal Land-Grant Institution. As such, the university was enabled for the first time to offer instruction in agriculture. Graduate instruction began as early as 1889. The college is not only an academic unit of the University of Tennessee, Knoxville, but is (with the Agricultural Experiment Station, UT Extension and the College of Veterinary Medicine) one of the four units of the University of Tennessee’s Institute of Agriculture.

There are many shared resources and positive interactions between various units of the Institute. Most of the faculty in the College of Agricultural Sciences and Natural Resources hold joint appointments in the Agricultural Experiment Station and are actively involved in significant basic and applied research in agriculture and the associated natural resources. On campus and field research laboratories are utilized in the instructional programs of the college; extension and research activities provide many students excellent opportunities. The Agricultural Experiment Station provides graduate research assistantships to support graduate students.

The unique association the college has with the University of Tennessee and the other units of the Institute of Agriculture makes it possible for the college to offer comprehensive, high-quality graduate programs.

The graduate student is expected to demonstrate a thorough knowledge of the subject matter in his/her specialized field of study and its relationship to the sociological, economic, and environmental impact on society. The student must demonstrate the ability to plan, conduct, analyze, and report original research. Emphasis is given to intellectual growth and the development of scholarly habits of study, reasoning and analysis so that the graduate will continue to grow and develop professionally throughout his/her career.

Master of Science Programs

Programs of graduate study leading to the Master of Science degree are offered through all departments in the College of Agricultural Sciences and Natural Resources. The graduate program may be entirely in one major subject or may include subject matter areas related to the major.

Both majors and minors are available in agricultural economics, agricultural and extension education, animal science, biosystems engineering, biosystems engineering technology, entomology and plant pathology, environmental and soil sciences, food science and technology, and plant sciences. Majors only are available in forestry and wildlife and fisheries science, and minors are available in general agriculture. The minor in general agriculture requires 12 hours of coursework. A complete listing of majors is shown on the Graduate Degrees, Majors, and Certificate Programs Chart.

Doctoral Programs

Graduate study leading to the Doctor of Philosophy degree with majors in animal science; biosystems engineering; food science and technology; natural resources; and plants, soils, and insects is offered in the college.

AGRICULTURAL AND EXTENSION EDUCATION PROGRAM

MAJOR DEGREE

Agricultural and Extension Education MS
Agricultural education concentration
Agricultural extension education concentration

The Agricultural and Extension Education program is designed primarily for teachers of Agricultural Education and staff employed by UT Extension. However, due to the flexibility of the program, it would be of value to any student interested in agriculture or adult and continuing education. The program may be completed under a thesis or non-thesis option. Candidates for the master’s degree must meet the general requirements of the Graduate Council and those stipulated by the department.
MASTER OF SCIENCE
AGRICULTURAL AND EXTENSION EDUCATION MAJOR

Requirements

Thesis Option
A candidate for the master’s degree who elects the thesis option must successfully complete the following requirements.

- A minimum of 30 hours of graduate credit in courses approved by the student’s advisory committee. Six hours of thesis may be counted toward this requirement.
- A minimum of 20 hours of graduate credit in courses numbered at or above the 500 level.
- A minimum of 12 hours of graduate credit in courses appropriate to the area of concentration taught in the department and a minimum of 6 hours taught from outside the department.
- A minimum of 3 hours of graduate credit in coursework in either research methodology or statistics.
- A final oral examination.

Non-Thesis Option
A candidate for the master’s degree who elects the non-thesis option must successfully complete the following requirements.

- A minimum of 36 hours of graduate credit in courses approved by the student’s advisory committee.
- A minimum of 24 hours of graduate credit in courses numbered at or above the 500 level.
- A minimum of 12 hours of graduate credit in courses appropriate to the area of concentration taught in the department and a minimum of 6 hours taught from outside the department.
- A minimum of 3 hours of graduate credit in coursework in either research methodology or statistics.
- A creative component designed by the student and approved by the student’s advisory committee for 3 hours of graduate credit.
- A written and oral comprehensive examination.

MAJOR DEGREE

Agricultural Economics

MAJOR

Agribusiness concentration
Agricultural economics concentration

MASTER OF SCIENCE
AGRICULTURAL ECONOMICS MAJOR

Requirements

The MS program may be completed under a thesis option with a concentration in agricultural economics. A non-thesis option is available with concentrations in agribusiness or agricultural economics. For specific information, contact the department head.

AGRIBUSINESS CONCENTRATION

The MS agribusiness concentration is designed to prepare students to succeed in the public or private sectors of agriculture, including product manufacturing and marketing, natural resource management, farm management, and financial analysis. A candidate must complete a minimum of 31 hours of graduate credit in courses approved by the student’s master’s committee. At least 28 hours must be earned in courses numbered at or above the 500 level. Sixteen hours of agricultural economics, 3 hours of economic theory, 6 hours of quantitative methods, 6 hours of business, statistics, or communications electives, and 6 hours of internship are required. Each student must pass both written and oral comprehensive examinations.

AGRICULTURAL ECONOMICS CONCENTRATION

Thesis Option
The MS thesis option in agricultural economics is designed to prepare students for analytical and research careers in the public and private sectors and to prepare students interested in entering a PhD program. A candidate must complete a minimum of 31 hours of graduate credit in courses approved by the student’s master’s committee. At least 28 hours must be earned in courses numbered at or above the 500 level. In the thesis option, 16 hours of agricultural economics, 6 hours of economic theory, 6 hours of quantitative methods, and 6 hours of thesis are required. Each student must pass a final oral examination.

Non-Thesis Option
The MS non-thesis option in agricultural economics is designed to prepare students for analytical and research careers in the public and private sectors. A candidate must complete a minimum of 36 hours of graduate credit in courses approved by the student’s master’s committee. At least 33 hours must be earned in courses numbered at or above the 500 level. In the non-thesis option, 30 hours of agricultural economics courses and 6 hours of directed electives are required. Each student must pass both written and oral comprehensive examinations.

Agricultural Economics Minor
A minor will include 6 hours of coursework in the department, with at least 3 hours in 500-level courses. The student’s committee must include a member of the faculty from the department who will be responsible for designating courses required for the minor.
Environmental Policy Minor

The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

DOCTOR OF PHILOSOPHY
NATURAL RESOURCES MAJOR

Students interested in pursuing doctoral studies in the area of natural resource economics and policy may do so under the PhD major in natural resources located administratively within the Department of Forestry, Wildlife and Fisheries (see Department of Forestry, Wildlife and Fisheries catalog entry for detailed information). The student’s doctoral committee will assist the student in developing a program of graduate coursework that will meet the requirements for the PhD with a major in natural resources while drawing heavily from the Department of Agricultural Economics and the Department of Economics.

MAJOR DEGREES
Animal Science

Animal Science

The Department of Animal Science offers graduate programs leading to the Master of Science and Doctor of Philosophy with a major in animal science. Areas of emphasis are animal genetics, nutrition, health and well-being, physiology, and reproduction with orientation towards agriculturally important animal species and research models. For specific information, contact the department head.

All first- and second-year Master of Science students are required to enroll in 596 each spring term and all first- and second-year doctoral students are required to enroll in 696 each spring term.

MASTER OF SCIENCE
ANIMAL SCIENCE MAJOR

Admission

For admission to the Master of Science program, a student must have obtained a 3.0 grade point average on a 4.0 scale (or a 3.0 each term during the junior and senior years) in a completed undergraduate degree program in animal science or in a related area. The student must submit evidence (letters of recommendation, personal interview, etc.) that indicates ability to complete requirements for the Master of Science. Prerequisite courses may be required if the student has insufficient undergraduate background. If the student has an unsatisfactory grade point average, acceptance may be on a probationary (non-degree) basis and a minimum of 9 hours of graduate coursework must be completed the first term with a minimum grade point average of 3.0 for admission to the Master of Science program.

Requirements

The program requires the writing of a thesis based on original research; the completion of a minimum of 24 hours of graduate coursework, of which at least 14 hours must be in courses numbered at or above the 500 level; and 6 hours of thesis. Included in the course requirements are 1 hour of Agriculture and Natural Resources 512 and a minimum of 3 hours in statistics. Statistics courses must be chosen from the 500- or 600-level courses approved for use in the Intercollegiate Graduate Statistics Program (IGSP). The remainder of coursework will be selected jointly by the student and the major professor depending on the student’s area of emphasis and professional objectives.

The advisory committee will consist of the major professor, a Department of Animal Science faculty member who will act as chairperson of the committee, and a minimum of two other faculty members, one of whom may be outside of the department. The advisory committee approves the student’s coursework and research problem and conducts the final oral examination, which consists of a comprehensive oral examination and a defense of the thesis.

DOCTOR OF PHILOSOPHY
ANIMAL SCIENCE MAJOR

Requirements

The doctoral program requires a minimum of 48 hours of coursework beyond the Bachelor of Science and a minimum of 24 hours of doctoral research and dissertation. The following are required.

- A minimum of 16 hours in related fields outside of animal science.
- At least 24 hours credit at the 500- and 600-level, exclusive of doctoral research and dissertation, of which a minimum of 6 hours must be at the 600-level.
- A minimum of 1 hour of Agriculture and Natural Resources 512 in addition to that required at the Master of Science level.
- A minimum of 6 hours of 500- or 600-level statistics courses approved for the IGSP.

A minimum of five faculty members will constitute the student’s advisory committee, of which at least one must be outside animal science. The major professor will be the chairperson. The student and major professor select the program of study depending on the student’s area of emphasis and professional goal. The advisory committee approves the program of study and dissertation research proposal, and conducts the comprehensive written and oral examination and final dissertation defense examination.

MAJORS DEGREES
Biosystems Engineering MS
Biosystems Engineering PhD
Environmental and Soil Sciences MS
Plants, Soils, and Insects PhD

Graduate programs leading to the Master of Science and Doctor of Philosophy with a major in biosystems engineering are available to graduates of a recognized curriculum in engineering, mathematics, or one of the physical or biological sciences. A graduate program leading to the Master of Science with a major in biosystems engineering technology is available to graduates in a recognized curriculum in agriculture or other related fields. These programs emphasize the application of engineering and engineering technology to agricultural and other biological systems. Major focus areas of the program are machinery systems; environmental quality and resource conservation; instrumentation, sensor, and control systems; and bioprocessing. Prerequisite courses may be required depending upon the applicant’s academic background and interest area within the program.

A graduate program leading to a Master of Science with a major in environmental and soil sciences is offered to graduates of recognized curricula in physical or biological sciences. The department also participates in the plants, soils, and insects doctoral program that is administered jointly by the departments of Biosystems Engineering and Soil Science, Plant Sciences, and Entomology and Plant Pathology. For concentrations offered by these other departments, please see their sections in this catalog. Faculty in the Biosystems Engineering and Soil Science Department administer the environmental and soil sciences master’s program and the environmental and soil sciences concentration in the plant, soils, and insects PhD program. The master’s and doctoral programs are broad-based, emphasizing the application of chemical, biological, and physical principles to understand, manage, and manipulate the terrestrial environment. Within the concentration, students may select an agricultural or non-agricultural focus area in soil and water chemistry; nutrient and elemental cycling; land management and reclamation; pedology; climatology; soil biology and biochemistry; contaminant transport; and soil physical processes.

A significant aspect of graduate education beyond formal courses and thesis projects is active participation in the professional community which exists within academic departments at universities. Student/faculty seminars are one of the professionally rewarding activities of the community. Accordingly, all graduate students are encouraged to participate in Biosystems Engineering 503 and other departmental seminars regardless of whether they are registered for seminar credit.

Admission

A completed departmental data sheet and three completed Graduate Rating Forms are required in addition to the Application for Graduate Admission. Students must submit from the Graduate Record Exam. Each applicant will be advised about any prerequisite courses before entering a program. The student’s program of study must be approved by his/her advisory committee and must comply with the requirements of the Graduate Council.

MASTER OF SCIENCE
Biosystems Engineering Major

Requirements

Applicants accepted into the program must complete at least 30 hours to earn a degree. Of these 30 hours, 20 must be in courses numbered 500 or above (6 hours of thesis plus 14 hours of other courses). Biosystems Engineering 503 must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation. Other specific requirements for the 30 hours are.

| Hours Credit | Biosystems Engineering 503 (3 times-1 hour), 519, 543, and other major subject coursework | 12 |
| Program Electives | 6 |
| Thesis 500 | 6 |
| Total 30 |

1 Mathematics, computer science, statistics, or any course containing appropriate computational components that may be approved by the department.

In addition to completing the 30 hours, master’s students must pass a final oral examination covering the thesis, related areas, and graduate coursework.
MASTER OF SCIENCE
BIOSYSTEMS ENGINEERING TECHNOLOGY MAJOR

Requirements
Thesis Option
Applicants accepted into the program must complete at least 30 hours to earn a degree. Of these 30 hours, 20 must be in courses numbered 500 or above (6 hours of thesis plus 14 hours of other courses). Biosystems Engineering Technology 503 must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation. Other specific requirements for the 30 hours are listed below.

<table>
<thead>
<tr>
<th>Hours Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biosystems Engineering Technology 503 (3 times-1 hr), 506, and other major subject coursework</td>
</tr>
<tr>
<td>1Coursework in computational methods</td>
</tr>
<tr>
<td>Program electives</td>
</tr>
<tr>
<td>Thesis 500</td>
</tr>
<tr>
<td><strong>Total 30</strong></td>
</tr>
</tbody>
</table>

1 Mathematics, computer science, statistics, or any course containing appropriate computational components that may be approved by the department.

In addition to completing the 30 hours, master’s students must pass a final oral examination covering the thesis, related areas, and graduate coursework.

Non-Thesis Option
A non-thesis option in biosystems engineering technology is available to qualified students. Applicants accepted into the program must complete at least 33 hours to earn a degree. Of these 33 hours, 20 must be in courses numbered above 500. Biosystems Engineering Technology 503 must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation. Other specific requirements for the 33 hours are listed below.

<table>
<thead>
<tr>
<th>Hours Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Biosystems Engineering Technology 503 (3 times-1 hour), 506, and other major subject coursework</td>
</tr>
<tr>
<td>1Coursework in computational methods</td>

</tr>
<tr>
<td>Capstone Experience (project and report, typically 508)</td>
</tr>
<tr>
<td><strong>Total 33</strong></td>
</tr>
</tbody>
</table>

1 Mathematics, computer science, statistics, or any course containing appropriate computational components that may be approved by the department.

In addition to completing the 33 hours, non-thesis students must pass a comprehensive written final examination covering the graduate program, including the capstone experience. At the discretion of the candidate’s committee, an oral examination may also be required.

MASTER OF SCIENCE
ENVIRONMENTAL AND SOIL SCIENCES MAJOR

Students seeking a Master of Science degree with a major in environmental and soil sciences will generally concentrate their studies in one of the environmental and soil sciences focus areas. The focus areas include soil and water chemistry; nutrient and element cycling; land management and reclamation; pedology, genesis, and classification; environmental climatology; soil biology and biochemistry; and soil physical processes. Both thesis and non-thesis options are available. For additional information, see the environmental and soil sciences master’s concentration homepage http://bioengr.ag.utk.edu/graduate/ or contact the environmental and soil sciences program’s graduate liaison.

Admission
Applicants having a bachelor’s degree in fields that are related or unrelated to environmental and soil sciences may apply although acceptance may be contingent upon the completion of prerequisite coursework. Submit application, official transcripts, scores from the general portion of the Graduate Record Examination, and fee to the Office of Graduate and International Admissions. Submit curriculum vitae, three letters of reference (or three Graduate Rating Forms), and a short statement of professional goals and reasons for applying to Environmental and Soil Sciences Master’s Program Coordinator, Biosystems Engineering and Soil Science Department, The University of Tennessee, 2506 E.J. Chapman Drive, Knoxville, Tennessee 37996-4531.

Requirements
To obtain a Master of Science degree, the student must meet the following requirements in addition to those of the Graduate Council (as specified in the Master’s Degree section at the front of this catalog).

Thesis Option
Upon consultation with the department head, the student will be assigned a major professor who acts as chair of the student’s advisory committee. The student and the major professor will assemble a graduate advisory committee consisting of the major professor and a minimum of two additional faculty, each holding the rank of assistant professor or above. At least one-half of the committee members must hold teaching appointments. The advisory committee must be formalized by the end of the second semester of graduate study.

An approved program of study must be developed and submitted by the end of the second semester of graduate study. A minimum of 24 hours of graduate coursework is required in the program of study, exclusive of 6 hours of 500 Thesis. The program of study is subject to the approval of the student’s advisory committee, and must meet the following requirements.

<table>
<thead>
<tr>
<th>Hours Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1Environmental and Soil Sciences 503 (3 times-1 hour)</td>
</tr>
<tr>
<td>Courses numbered above 503</td>
</tr>
<tr>
<td>2Courses within the major (excluding courses numbered 503 and below)</td>
</tr>
<tr>
<td>500 Thesis</td>
</tr>
<tr>
<td><strong>Total 30</strong></td>
</tr>
</tbody>
</table>

1 Must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation.

2 Courses that are in the major include those in environmental and soil sciences, Geology 510, and Environmental Engineering 535. The student’s committee may require additional coursework beyond the 24 hours if the student’s progress or background indicates a need or deficiency.
During the first two semesters of graduate study, the student must develop a research problem and present the written proposal to his/her committee. This must be done prior to enrollment in 500.

The student must pass a final oral exam (administered by the advisory committee) that integrates the student’s thesis and coursework. The student is expected to be conversant in the soil and environmental sciences, particularly in the thesis and allied areas.

A student who has started a degree program under the thesis option is not eligible to transfer to the non-thesis option after the end of the first semester of graduate study or after receiving a graduate assistantship stipend for more than one semester.

Non-Thesis Option

A student desiring the non-thesis option must declare his/her intention before the beginning of the second semester of study. The student must meet the following requirements, in addition to those of the Graduate Council (as specified in the Master’s Degrees section at the front of this catalog).

Upon consultation with the department head, the student will be assigned a major professor who acts as chair of the student’s advisory committee. The student and the major professor will assemble a graduate advisory committee consisting of the major professor and a minimum of two additional faculty, each holding the rank of assistant professor or above. At least one-half of the committee members must hold teaching appointments. The advisory committee must be formalized by the end of the second semester of graduate study.

An approved program of study must be developed and submitted by the end of the second semester of graduate study. A minimum of 33 hours of graduate coursework is required in the program of study. The program of study is subject to the approval of the student’s advisory committee, and must meet the following requirements.

**Hours Credit**

1. Environmental and Soil Sciences 503 (3 times-1 hour) ................. 3
2. 593 Special Problems in Environmental and Soil Sciences ............ 3
3. Courses numbered above 503 (exclusive of 593) .................. 18
4. Courses within the major (excluding 500 and 502) .............. 12

1. Must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation.
2. Courses that are in the major include those in environmental and soil sciences, Geology 510, and Environmental Engineering 535. The student’s committee may require additional coursework beyond the 33 hours if the student’s progress or background indicates a need or deficiency.

In lieu of a thesis, students are required to complete 3 hours of 593 by participating in a single research program for a period of twelve weeks. The advisory committee approves the research problem. Satisfactory completion of this requirement requires a written, original research report that is acceptable to the student’s committee.

A comprehensive written examination that integrates the student’s coursework and research problem must be passed. The exam is developed and administered by the advisory committee.

A student who has started a degree program under the non-thesis option may transfer to the thesis option upon approval of a potential major professor and the department head.

**DOCTOR OF PHILOSOPHY**

**PLANTS, SOILS, AND INSECTS MAJOR**

**ENVIRONMENTAL AND SOIL SCIENCES CONCENTRATION**

A doctorate with a major in plants, soils, and insects and a concentration in environmental and soil sciences is offered under a multi-departmental doctoral program. Three departments participate – Plant Sciences, Entomology and Plant Pathology, and the soils faculty in Biosystems Engineering and Soil Science. Other concentrations within the Plants, Soils, and Insects doctoral program include bioactive natural products, crop sciences, entomology, horticulture, integrated pest management, plant improvement, plant pathology, and weed biology. Focus areas in the environmental and soil sciences concentration include soil and water chemistry; nutrient management; pedology, genesis and classification; environmental climatology; soil biology and biochemistry; and soil physical processes. See the environmental and soil sciences doctoral concentration home page for additional information, http://bioengr.ag.utk.edu/graduate/, or contact a faculty member in the area of interest.

**Admission**

Submit application, fee, official transcripts, and scores from the general portion of the Graduate Record Examination to the Office of Graduate and International Admissions. Submit resume, three letters of reference (or three Graduate Rating Forms), photocopy of Graduate Record Examination scores and a statement of professional goals and reasons for applying to Environmental and Soil Sciences Doctor of Philosophy Program Coordinator, Biosystems Engineering and Soil Science Department, The University of Tennessee, Knoxville, 2506 E.J. Chapman Drive, Knoxville, Tennessee 37996-4531. In the statement letter and application, interest in the environmental and soil sciences concentration should be stated.

**Requirements**

The student and the major professor will select a minimum of three additional faculty, holding the rank of assistant professor or above, to serve on the student’s doctoral committee. The major professor and two committee members must be approved to direct doctoral research by the Graduate Council and at least half of the committee must hold teaching appointments. At least one member of the committee must be from outside the department. The doctoral committee must be formalized by the end of the second semester of graduate study.

An approved program of study must be submitted by the end of the second semester of graduate study. A candidate for the doctoral degree must complete a minimum of 24 hours of graduate coursework (numbered 503 or higher) beyond the master’s degree. Candidates not having a master’s degree must complete a minimum of 48 hours of graduate coursework beyond the baccalaureate degree, 24 hours of which must be numbered 503 or higher. A minimum of 12 of the 24 hours, or 30 of the 48 hours, must be graded A-F. At least 9 hours of the student’s coursework must be from outside the Plants, Soils, and Insects major and a minimum of 6 hours of courses numbered 601 or higher must be taken at University of Tennessee, Knoxville. In addition, 24 hours of course 600 Doctoral Research and Dissertation are required.

Satisfactory preparation of a written dissertation proposal and an oral defense to the student’s committee are required. This must be completed during the first two semesters of graduate study and before enrollment in 600.

Both written and oral sections of the comprehensive examination must be passed. The candidate will be tested on his/her knowledge of the proposed dissertation and related fields. The student is expected to be conversant in the wide area of soil and environmental sciences.

Environmental and Soil Sciences 603 must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation.

Preparation of a written dissertation and its oral defense to the student’s doctoral committee are required.

Please see the Degree Program Requirements/Doctoral Degrees section at the front of this catalog for additional information.
DOCTOR OF PHILOSOPHY
BIOSYSTEMS ENGINEERING MAJOR

Admission

Students applying for admission into the doctoral program must submit evidence of ability to perform and report independent research to the satisfaction of the faculty of the department. An approved master’s thesis will usually be acceptable for this purpose.

Requirements

To earn a degree, each doctoral student must complete at least 75 hours of approved graduate credit (beyond the baccalaureate degree) in biosystems engineering and supporting areas (engineering, computational methods, agricultural and biological sciences, and other related areas). Of the 75 hours, 48 must be in courses numbered greater than 500 (including 24 hours of course 600) and 6 hours of courses at the University of Tennessee, Knoxville, numbered greater than 600. Other specific requirements for the minimum 75 hours are listed below.

<table>

</table>

1 Mathematics, computer science, statistics, or any course containing appropriate computational components that may be approved by the department.
2 Must be taken three times during the course of the program, the last of which must be in the student’s final semester before graduation.

In addition to completing the minimum 75 hours of graduate credit required for a degree, each doctoral student must also pass a comprehensive examination as required by the Graduate Council.

MAJOR DEGREES

Entomology and Plant Pathology

Entomology concentration
Plant pathology concentration

Plants, Soils, and Insects

Bioactive natural products concentration
Entomology concentration
Integrated pest management concentration
Plant pathology concentration

The Department of Entomology and Plant Pathology offers a graduate program leading to the Master of Science with a major in entomology and plant pathology and the Doctor of Philosophy through the interdisciplinary plants, soils and insects program. Students in the entomology concentration may specialize in crop entomology, medical and veterinary entomology, insect biology, insect pest management, or biological control. Students in the plant pathology concentration may specialize in foliar and stem fungus diseases, soilborne pathogens, disease physiology, biocontrol, plant nematology, or virology. For specific information, contact the department head.

MASTER OF SCIENCE
ENTOMOLOGY AND PLANT PATHOLOGY

MAJOR

Admission

For admission to the Master of Science program, a student must meet all requirements of the University of Tennessee, Knoxville, Graduate Council and must have completed (1) general botany or biology, 8 hours; (2) advanced biological sciences, 8 hours; (3) general inorganic chemistry, 6 to 8 hours; (4) organic chemistry, 3 hours. In addition, three completed rating forms and a written statement of career goals and interest in entomology or plant pathology should be submitted to the department. Submit application, fee, official transcripts, and scores from the general portion of the Graduate Record Examination to the Office of Graduate and International Admissions.

Requirements

The program requires a written thesis based on original research and the completion of a minimum of 24 hours of coursework for graduate credit, approved by the student’s advisory committee. Included in the course requirements are two acceptable seminar presentations for 1 hour each. An oral final exam must be passed to the satisfaction of the advisory committee after the thesis has been completed. A minor is not required but may be selected at the option of the student. The minor will include at least 6 hours and not more than 10 hours of graduate-level credit in the minor department. The student’s committee shall include a member of the faculty from the minor department to assist in designating courses required for the minor.
DOCTOR OF PHILOSOPHY
PLANTS, SOILS, AND INSECTS MAJOR
BIOACTIVE NATURAL PRODUCTS
CONCENTRATION
ENTOMOLOGY CONCENTRATION
INTEGRATED PEST MANAGEMENT
CONCENTRATION
PLANT PATHOLOGY CONCENTRATION
A Doctor of Philosophy degree with a major in plants, soils and insects and concentrations in bioactive natural products, entomology, integrated pest management, and plant pathology is offered under a multi-departmental doctoral program. Three departments participate — Plant Sciences, Entomology and Plant Pathology, and the soils faculty in Biosystems Engineering and Soil Science. Other concentrations within the plants, soils, and insects major include crop sciences, environmental and soil sciences, horticulture, plant improvement, and weed biology. Please see the doctoral program links on the homepage of the Department of Entomology and Pathology for additional information, http://eppserver.ag.utk.edu/, or contact a faculty member in the area of interest.

Admission
Submit application, fee, official transcripts, and scores from the general portion of the Graduate Record Examination to the Office of Graduate and International Admissions. Submit resume, three letters of reference (or three Graduate Rating Forms), photocopy of Graduate Record Examination scores and a short statement of professional goals and reasons for applying to Entomology and Plant Pathology Doctor of Philosophy Program Coordinator, Department of Entomology and Plant Pathology, 2431 Joe Johnson Drive, 205 Plant Sciences Building, The University of Tennessee, Knoxville, Tennessee, 37996-4560. In the statement letter and application, the concentration of interest and intended major professor should be indicated.

Requirements
The student and the major professor will select a minimum of three additional faculty, holding the rank of assistant professor or above, to serve on the student’s doctoral committee. The major professor and two committee members must be approved to direct doctoral research by the Graduate Council and at least half of the committee must hold teaching appointments. At least one member of the committee must be from outside the department. The doctoral committee must be formalized by the end of the second semester of graduate study.

Submission of an approved program of study by the end of the second semester of graduate study is required. A candidate for the doctoral degree must complete a minimum of 24 hours of graduate coursework numbered 503 or higher beyond the master’s degree. Candidates not having a master’s degree must complete a minimum of 48 hours of graduate coursework beyond the baccalaureate degree, 24 hours of which must be numbered 503 or higher. A minimum of 12 of the 24 hours, or 30 of the 48 hours, must be graded A-F. At least 9 hours of the student’s coursework must be from outside the plants, soils, and insects major, and a minimum of 6 hours of courses numbered 601 or higher must be taken at the University of Tennessee. In addition, 24 hours of course 600 Doctoral Research and Dissertation are required.

Satisfactory preparation of a written dissertation proposal and an oral defense to the student’s committee are required. This must be completed during the first two semesters of graduate study and before enrollment in 600.

Both written and oral sections of the comprehensive examination must be passed. The candidate will be tested on his/her knowledge of the proposed dissertation and related fields.

Presentation of at least two departmental seminars (2 hours of Entomology and Plant Pathology 640), and an exit seminar (no credit) are required.

Satisfactory preparation of a written dissertation and an oral defense to the student’s doctoral committee are required.

See the Degree Program Requirements/Doctoral Degrees section at the front of this catalog for additional information.

Emeritus Faculty
Penfield, M.P., PhD ........................................ Tennessee

MAJOR DEGREES
Food Science and Technology MS
Food Science and Technology PhD
Food chemistry concentration
Food microbiology concentration
Food processing concentration
Sensory evaluation of foods concentration

Students in the doctoral program may choose research in the concentration areas of food chemistry, food microbiology, food processing, or sensory evaluation of foods. Commodity interests (meats, dairy, fruits, vegetables, bakery products) can be emphasized in any of the areas by careful selection of courses and the research topic. Minors are available in cognate fields. For detailed information, contact the department head.

Admission
Admission requirements of the Graduate Council of the University of Tennessee, Knoxville, apply. In addition, applicants must submit scores from the general section of the Graduate Record Exam, a written statement of educational and career goals, and Graduate Rating Forms or letters of recommendation from at least three people familiar with the applicant’s scholastic ability and professional potential. Admission to the program is contingent upon faculty evaluation of the applicant’s undergraduate/graduate grade point average, Graduate Record Examination scores, rating forms, relevant work experience, and scores from the Test of English as a Foreign Language (TOEFL), if applicable.
MASTER OF SCIENCE
FOOD SCIENCE AND TECHNOLOGY MAJOR

Applicants must have a Bachelor of Science in food technology, food science, or a related scientific field.

Requirements

Thesis Option

- Prior to research for the thesis, the student must develop a detailed written research plan. Registration for 6 hours of 500 Thesis is required.
- In addition to the thesis requirement, a minimum of 24 hours of graduate coursework is required. This work must be approved by the student’s committee and a minimum of 14 hours must be courses numbered above 500. The committee may require additional coursework if the student’s progress or background indicates such need.
- All students are required to take 2 hours of 501 Seminar in their program and are expected to attend this course and participate in discussions during their master’s program. Completion of 510 or equivalent is also required.
- An oral, final examination covering the thesis and coursework is required.

Non-Thesis Option

- In lieu of a thesis, students are required to complete a problem in cooperation with their employer (company or governmental agency) and their faculty committee. Students working on a problem must register for 6 hours of 503.
- In addition to the requirement for 6 hours of 503, a minimum of 24 hours of graduate coursework is required. This work must be approved by the student’s committee and a minimum of 14 hours must be courses numbered above 500. The committee may require additional coursework if the student’s progress or background indicates such need.
- All students are required to take 2 hours of 501 Seminar in their program and are expected to attend this course and participate in discussions during their master’s program. Completion of 510 or equivalent is also required.
- Students will be required to take a written comprehensive examination covering their coursework. In addition, an oral, final examination covering the problem and coursework is required. The oral examination will be held on the Knoxville campus.

DOCTOR OF PHILOSOPHY
FOOD SCIENCE AND TECHNOLOGY MAJOR

Requirements

- Completion of a master’s degree in the field, or a closely related field, or passing a special qualifying examination is required for admission.
- A dissertation is required for the Doctor of Philosophy degree. Each student must develop a detailed written plan for the dissertation research.
- A minimum of 72 hours beyond the bachelor’s degree, excluding credit for the master’s thesis, is required. Of this, 24 hours must be 600 Doctoral Research and Dissertation.
- At least 24 hours of coursework numbered above 500, exclusive of doctoral research and dissertation, are required. At least 6 of the 24 hours must be courses numbered above 600.
- A minimum of 6 hours of courses for graduate credit must be taken outside the Department of Food Science and Technology.
- All candidates must complete 601 (2 hours) and are expected to attend 601 during their PhD.
- Each candidate must pass both written and oral comprehensive examinations prior to admission to candidacy. Major professors will advise candidates on competencies expected. A final oral examination is required that includes a defense of the dissertation and subject matter that the student’s committee considers appropriate.

MAJORS DEGREES
Forestry                MS
Wildlife and Fisheries Science   MS
Natural Resources        PhD

The mission of the Department of Forestry, Wildlife and Fisheries is to advance the management, utilization, and appreciation of natural resources in Tennessee, the region and beyond through programs in teaching, research and extension.
MASTER OF SCIENCE
FORESTRY MAJOR
WILDLIFE AND FISHERIES SCIENCE MAJOR

Admission
For admission, the student must have a bachelor's degree from an accredited institution in forestry, wildlife, fisheries, or other natural resource area. Applicants must take the general Graduate Record Examination with minimum scores required. Graduate Rating Forms or letters of recommendation from three individuals familiar with the applicant's academic ability are required. The department also has an application that must be submitted at the time of application to the Office of Graduate and International Admissions.

Requirements
Both thesis and non-thesis options are available for the major in forestry; a thesis is required in the wildlife and fisheries science major.

Thesis Option
- Prior to research for the thesis, the student is required to develop a detailed written research proposal. Registration for 6 hours of thesis (Forestry 500 or Wildlife and Fisheries Science 500) is required.
- A graduate committee of no fewer than three faculty members must be selected by the second semester of residence. At least one member shall be from outside the department. In addition to the thesis requirement, a minimum of 24 hours of graduate coursework is required. This work must be approved by the student's committee and no more than 10 hours of the minimum 30 can be below the 500 level. The committee may require additional coursework if the student's progress or background indicates such need.
- All students are required to include Forestry 512 or Wildlife and Fisheries Science 512 Seminar, in their programs. This is required of each graduate student in residence fall semester.
- An oral examination covering the thesis and coursework is required.

Non-Thesis Option (Forestry major only)
- 35 hours of graduate coursework of which 23 must be at the 500 level or above is required.
- A graduate committee of no fewer than three faculty members will be selected. At least one member shall be from outside the department. The committee will meet and schedule the student's program during the first semester in residence.
- Three hours of Forestry 511 are required.
- Nine hours of coursework in the department must be at the 500 level or above, exclusive of Forestry 511.
- Final comprehensive written and oral examinations shall be taken upon completion of no fewer than 28 hours of approved study.

DOCTOR OF PHILOSOPHY
NATURAL RESOURCES MAJOR

The doctoral program with a major in natural resources emphasizes interdisciplinary research approaches toward understanding and management of natural resources in a broad context. Areas of study include forest, wildlife, and fisheries biology; ecosystem function and structure; natural resource economics and policy; human dimensions of natural resource management; natural resource organization administration and management; wood sciences; and multidisciplinary natural resources management.

Admission
Applicants to the PhD program normally should have completed a master's degree prior to beginning the doctoral program. Specific admission requirements include
- A minimum grade point average of 3.0 on a 4.0 scale.
- A minimum composite score from the general Graduate Record Examination on the verbal, quantitative, and analytical sections of 1650, with a minimum of 1100 on the verbal and quantitative sections.
- A statement of professional goals, natural resource management philosophy, and reasons for applying to the program.
- Three letters of reference from individuals capable of evaluating the applicant's potential for graduate work in interdisciplinary natural resource management.

Requirements
A candidate for the doctoral degree must complete 72 hours of coursework beyond the bachelor's degree. Forty-eight hours must be in graduate coursework approved by the student's doctoral committee. Up to 24 hours of master's-level coursework may be applied to the 48-hour requirement. A minimum of 6 hours must be taken in university courses at the 600 level, exclusive of dissertation hours. Specific requirements are listed below.

Research Methods and Analysis (9 hours in at least two of the subject areas)
- Research/Experimental Design.
- Statistics/Econometrics/Biometrics.

Core Subject areas (33 hours to be determined by doctoral committee)

Professional Development (7 hours)
- Teaching – All students will be expected to complete Forestry, Wildlife and Fisheries 601 and assist in teaching a course during their tenure in the program.
- Problem Solving – Forestry, Wildlife and Fisheries 610 will be required of all doctoral students. This course will include participation in an interdisciplinary team to address a significant national or regional natural resource issue.
- Professional Communication – All students will be required to complete Forestry, Wildlife and Fisheries 612 two times as part of their program of study. Part of the seminar requirement will consist of assisting in the development and conduct of Forestry 512 and Wildlife and Fisheries 512.

Forestry, Wildlife and Fisheries 600 Doctoral Research and Dissertation (24 hours)
A doctoral committee consisting of at least four faculty members must be identified by the student and major professor. At least two of the committee members must be from the Department of Forestry, Wildlife and Fisheries and one member must be from an academic unit other than Forestry, Wildlife and Fisheries. Three of the committee members, including the major professor, must be approved by
the Graduate Council to direct doctoral research. The committee should be formed during the first year of the student's program.

All students are required to successfully complete an oral and written examination on all coursework completed as part of the Doctor of Philosophy requirements. The exam is scheduled when the student has completed all or nearly all of the coursework. The Doctor of Philosophy committee will determine the content, nature, and schedule of the comprehensive exam and certify the results.

During the first year, the student should develop a research prospectus that outlines the research problem to be addressed as part of his/her doctoral research. The prospectus is presented to the student's committee and the committee will approve the research topic and approach.

All students are required to complete, present, and defend a dissertation. The student should provide each member of the committee a copy of the dissertation at least two weeks prior to the scheduled defense. All students are required to present a seminar on their dissertation as part of the degree requirements. The seminar can be part of the dissertation defense or presented before the formal defense.

Environmental Policy Minor

The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

DEPARTMENT OF PLANT SCIENCES

MAJORS

Plant Sciences MS

Plants, Soils, and Insects PhD
Crop sciences concentration
Horticulture concentration
Plant improvement concentration
Weed biology concentration

The Department of Plant Sciences offers two graduate degrees – the Master of Science with a major in plant sciences and the Doctor of Philosophy with a major in plants, soils, and insects. For additional information, please visit the departmental homepage. Inquiries may be directed to the Chair, Graduate Committee, Department of Plant Sciences, The University of Tennessee, Knoxville, Tennessee 37996-4561, or uthort@utk.edu.

MASTER OF SCIENCE

PLANT SCIENCES MAJOR

Both thesis and non-thesis options are available for the major in plant sciences, each guided by a graduate committee consisting of the major professor and two or more other faculty members. Studies are possible in a wide variety of commodities and subject areas, including fruits, vegetables, weeds, cereals, grains, turfgrass, woody ornamentals, and public horticulture. Students may specialize in one or more disciplines, including plant protection, molecular biology, breeding, genetics, biotechnology, physiology, ecology, culture, and management.

Admission

Students should have a bachelor's degree from an accredited college or university with evidence of ability to do work of graduate quality. Applicants are expected to have a minimum cumulative grade point average of 2.7 on a 4.0 scale.

Application must be made to both the Office of Graduate and International Admissions and the Department of Plant Sciences. The departmental application requires three letters of reference (or three Graduate Rating Forms) from persons capable of assessing the applicant's suitability for graduate work in plant science, resume, and a statement of professional goals and reasons for applying to the program. Applicants are also required to submit scores from the general Graduate Record Examination to Graduate and International Admissions (send photocopy to department). Successful applicants will usually have a composite score on the verbal, mathematical and analytical sections of the Graduate Record Examination of at least 1400. Prior undergraduate coursework in mathematics, biology and chemistry is recommended.

Requirements

- Approval of the academic program by the master's committee.
- Successful completion of 12 hours of coursework in the major at the graduate level (400 or above), exclusive of Plant Sciences 510, 502, and 503. Two of these hours must be Plant Sciences 504. Six of these hours may be satisfied by Biochemistry and Cellular and Molecular Biology 404, 522, 523; Animal Science 571; Environmental and Soil Sciences 434, 444, 516, Ecology and Evolutionary Biology 414, 433, 560; Information Sciences 560; Art 481; or Geography 439.
• Presentation of at least two departmental seminars. Please see the Degree Program Requirements/Master’s Degrees section at the front of this catalog for additional information.

Thesis Option
• Satisfactory preparation of a written thesis proposal and its oral defense to the student’s committee.
• Successful completion of 30 hours of graduate credit, which must include 6 hours of 500. At least 14 of these hours must be numbered 501 or above.
• Preparation of a written thesis and its oral defense.

Non-Thesis Option
• Successful completion of 34 hours of graduate credit, which must include 2-4 hours of Plant Science 503. At least 22 of these hours must be at the 500 level or above.
• Completion of a project and preparation of a written report summarizing the project.
• Passing written and oral examinations covering the project and coursework.

DOCTOR OF PHILOSOPHY
PLANTS, SOILS, AND INSECTS MAJOR
CROP SCIENCES CONCENTRATION
HORTICULTURE CONCENTRATION
PLANT IMPROVEMENT CONCENTRATION
WEED BIOLOGY CONCENTRATION

The Doctor of Philosophy with a major in plants, soils and insects, and concentrations in crop sciences, horticulture, plant improvement, and weed biology is offered under a multi-departmental doctoral program. Three departments participate – Plant Sciences, Entomology and Plant Pathology, and the soils faculty in Biosystems Engineering and Soil Science. Other concentrations within the Plants, Soils, and Insects major include bioactive natural products, entomology, environmental and soil sciences, integrated pest management, and plant pathology. Please see the Plant Sciences homepage for additional information, http://plantsciences.utk.edu, or contact a faculty member in the area of interest.

Students may select a formal concentration as a focus of study but this is not a requirement. We recognize that modern research approaches in plant sciences often overlap. Students may specialize in one or more approaches, including plant biotechnology, molecular biology, breeding, genetics, physiology, ecology, culture and management. Research may feature fruits, vegetables, turfgrass, weeds, woody ornamentals, cereals, grains, fiber, public horticulture or model plant systems.

Admission
Submit application, fee, official transcripts, and scores from the general portion of the Graduate Record Examination to the Office of Graduate and International Admissions. Submit resume, three letters of reference (or three Graduate Rating Forms), photocopy of Graduate Record Examination scores and a short statement of professional goals and reasons for applying to Plant Sciences Doctor of Philosophy Program Coordinator, Department of Plant Sciences, 2431 Joe Johnson Drive, 252 Plant Sciences Building, The University of Tennessee, Knoxville, Tennessee 37996-4561. In your statement letter and application, please indicate your concentration of interest and intended major professor.

Requirements
To obtain the doctorate, the student must meet the following requirements.

The student and the major professor will select a minimum of three additional faculty, holding the rank of assistant professor or above, to serve on the student’s doctoral committee. The major professor and two committee members must be approved to direct doctoral research by the Graduate Council, and at least half of the committee must hold teaching appointments. At least one member of the committee must be from outside the department. The doctoral committee must be formalized by the end of the second semester of graduate study.

An approved program of study must be submitted by the end of the second semester of graduate study. A candidate for the doctoral degree must complete a minimum of 24 hours of graduate coursework numbered 503 or higher before the master’s degree. Candidates not having a master’s degree must complete a minimum of 48 hours of graduate coursework beyond the baccalaureate degree, 24 hours of which must be numbered 503 or higher. A minimum of 12 of the 24 hours, or 30 of the 48 hours, must be graded A-F. At least 9 hours of the student’s coursework must be from outside the plants, soils, and insects major, and a minimum of 6 hours must be taken in courses numbered 601 or higher at the University of Tennessee. In addition, 24 hours of course 600 Doctoral Research and Dissertation are required.

Satisfactory preparation of a written dissertation proposal and an oral defense to the student’s committee are required. This must be completed during the first two semesters of graduate study and before enrollment in 600. Both written and oral sections of the comprehensive examination must be passed. The candidate will be tested on his/her knowledge of the proposed dissertation and related fields.

Presentation of at least two departmental seminars (2 hours of Plant Sciences 504), in addition to an exit seminar (no credit) are required.

Satisfactory preparation of a written dissertation and an oral defense to the student’s doctoral committee are required.
College of Architecture and Design

John M. McRae, Dean
Barbara Klinkhammer, Acting Assistant Dean
Max A. Robinson, Director, School of Architecture

http://www.arch.utk.edu

The graduate program in architecture is relatively new, with its first class entering in 1993. However, the School of Architecture, with its professional Bachelor of Architecture program, celebrated its thirty-fifth birthday in 2000. In addition to the undergraduate and graduate programs in architecture, the college also offers an undergraduate major in interior design. All professional programs in the college are fully accredited, enabling graduates to pursue licensure throughout the United States.

The graduate program in architecture is a first professional degree program. It is designed to accommodate students who come from a variety of academic backgrounds and interests. This includes students who have had little or no previous formal study in the field of architecture but have discovered a deep and abiding interest in the subject. The program also accommodates students who have received an architectural education but have not completed the requirements for a professional degree. These students may receive advanced standing in the program.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes two types of degrees: the Bachelor of Architecture and the Master of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards. Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The Master of Architecture program at the University of Tennessee received a full six-year accreditation as a result of its last NAAB accreditation review in 2002.

The graduate program in architecture defines architecture broadly as the creation of human habitats. Architecture at Tennessee is more than the design of individual buildings. Rather, it is dedicated to the shaping of community in the fullest sense of the word. The curriculum reflects the program’s recognition that architecture is fundamentally shaped by environmental and cultural forces. As such, the humanities, social sciences, arts, and applied sciences are all brought to bear on the discipline of architecture. It is through design that such issues can be thoughtfully explored and given physical form. Thus, design plays a central role in this comprehensive and creative process.

As a professional program, the college is committed to help students obtain the requisite knowledge and skills needed to enter and fully participate in the profession of architecture. At the same time, it attempts to maintain a wide vision and critically reach beyond the profession without losing contact with the realities of everyday architectural practice. Designed to be challenging and provocative, the program allows students the opportunity to develop discernment and judgment, enabling them to find their own voices as designers who are accountable contributors to the built environment.

The offices of the graduate program and college administration are located at 224 Art and Architecture Building.

MASTER OF ARCHITECTURE
ARCHITECTURE MAJOR

The School of Architecture offers two tracks leading to the Master of Architecture degree. Track 1 is for students seeking the first-professional degree who already hold a bachelor’s degree or an advanced degree in another field. Track 2 is for students with an accredited first-professional degree who seek to develop an area of specialization. Contact the school for additional information.

Admission

In addition to meeting the Graduate Council’s minimum requirements, the following specific admission requirements to the Master of Architecture program must be met.

For Track 1 applicants, a bachelor’s degree with a 3.0 GPA from an accredited college or university is required. International applicants must have an equivalent four-year degree and 3.0 GPA. Candidates with a GPA less than 3.0 may be considered for conditional admission when evidence of exceptional promise is identified. Undergraduate work must include at least 12 semester hours of humanities, a basic understanding of physical principles, systems and analytical procedures and an understanding of mathematical principles and analytical procedures, as well as a general understanding of the use of computers. The school requires an essay and three letters of recommendation. Submission of a portfolio illustrating evidence of visual creativity and/or graphic capabilities is highly recommended. A personal on-site interview is desirable but not mandatory. For those applicants from accredited 4+2 architecture programs, a portfolio is required in addition to the above requirements.

For Track 2 applicants, a Bachelor of Architecture degree from an NAAB accredited program or foreign equivalent is required. Candidates with a GPA less than 3.0 may be considered for conditional admission when evidence of exceptional promise is identified. Submission of a portfolio, an essay, and three letters of recommendation are also required. A personal on-site interview is desirable but not mandatory.

The general portion of the Graduate Record Examination is required of all applicants. Applicants should take the GRE at least one semester in advance of application for admission.

Requirements

Track 1 requires a minimum of 48 semester hours of undergraduate preparation and 60 semester hours of graduate coursework, taking approximately three and a half years of full-time study. A minimum of 4 hours of architectural electives or approved electives from another discipline must be taken at the 500 level or above.

Track 2 requires a minimum of 30 semester hours of graduate coursework.

Both tracks require 6 hours of Thesis 500 with a public presentation and oral defense of the thesis. Retention in the program is contingent upon evidence of satisfactory progress toward the degree. Student’s progress will be reviewed each semester by the Graduate Program Head. Any questions regarding progress will be reviewed by the Graduate Program Advisory Committee.

For further information, contact the School of Architecture.
The University of Tennessee began as a liberal arts institution. Before the turn of the century, less emphasis was placed on the liberal education. However, the liberal arts continued to thrive, emerging as a college in 1904. Thus, the College of Liberal Arts (now known as the College of Arts and Sciences) is one of the oldest established colleges in the university.

The College of Arts and Sciences consists of a wide array of academic disciplines and interdisciplinary programs. The central purposes of a liberal education include the encouragement of intellectual tolerance, a dedication to the quest for knowledge as a worthwhile goal in and of itself, and the cultivation of a responsible, creative individual mind. These qualities enable one to develop an ability to reason and to express oneself clearly, an incentive to absorb emerging knowledge, and a competence to confront the uncertainties of human experience. Faculty research and creative activity is the foundation on which education in this college is built. As a result of that endeavor, the lives of students are enriched and the world’s body of knowledge grows.

The College of Arts and Sciences offers programs in twenty-seven academic disciplines leading to nine advanced degrees: Doctor of Audiology, Doctor of Philosophy, Master of Arts, Master of Fine Arts, Master of Mathematics, Master of Music, Master of Public Administration, Master of Science, Master of Science in Planning.

Facilities for research and service include the Center for Applied and Professional Ethics, the Center for Environmental Biotechnology, the Center for Psychoanalysis and the Humanities, the Center for Quaternary Studies of the Southeastern United States, the Center for the Study of War and Society, the Child Behavior Institute, the Forensic Anthropology Center, the Psychological Clinic, the Science Alliance, and the Social Science Research Institute.

The Department of Anthropology offers both the Master of Arts and Doctor of Philosophy with a major in anthropology and concentrations in archaeology, biological anthropology, cultural anthropology, and zooarchaeology. A concentration in Mediterranean archaeology is available on the master’s level. Additional information on the anthropology graduate program may be obtained from the departmental brochure (see the department’s Web site) or by contacting the department.

**MASTER OF ARTS**

**ANTHROPOLOGY MAJOR**

**Admission**

Students wishing to enter the Master of Arts program with a major in anthropology should have an undergraduate GPA of 3.5 in the major, 3.3 overall, and hold a bachelor’s degree from an accredited university with a major in anthropology. Applicants with a major in a related field (biology, sociology, geology, classics or geography) will be considered only if they have a formal minor in anthropology or its equivalent (at least five upper-division anthropology courses).

In cooperation with the Classics and History Departments, the Department of Anthropology is able to offer a concentration in Mediterranean archaeology. Students who apply in this area should have completed appropriate undergraduate courses in archaeology or anthropology. An anthropology minor is preferred.

All prospective MA students must make formal application to the University of Tennessee, Knoxville, Office of Graduate and International Admissions. Copies of the application form, transcripts, and GRE scores that are sent to Graduate and International Admissions should also be sent directly to the Department of Anthropology at the same time. In addition, the department requires a letter of intent from the applicant indicating career goals and reasons for selecting the University of Tennessee, Knoxville, and three letters of recommendation and one sample of the prospective student’s written work (a class paper or research report). These materials should be sent directly to the Graduate Secretary, Department of Anthropology, South Stadium Hall 250, The University of Tennessee, Knoxville, Tennessee 37996-0720.

Graduate applications are considered once a year by the Graduate Committee. All application materials must be received in the department by January 15 for admission the following fall. Because of the structure of first-year studies, MA students should plan to begin their studies in the fall semester.

**Requirements**

The program leading to the MA is a general curriculum that allows for concentration after completion of a core course sequence. Formal requirements include the following.

- Selection of an MA advisor. This should be done as soon as possible in the student’s program but must be done no later than the end of the first semester in residence. The department graduate secretary must be informed in writing of each student’s advisor.
- A minimum of 30 hours in graduate courses. Twenty-four hours must be in coursework graded A-F. Coursework must include three core classes taken in the first year.
- 510 Method and Theory in Cultural Anthropology.
- 560 Theory in Archaeology.
- 590 Method and Theory in Biological Anthropology.
- Additional coursework should be selected in consultation with the student’s advisor and must include one additional course from two anthropology concentrations besides the student’s primary concentration. At least 20 hours of coursework must be at the 500 level or higher. Students concentrating in Mediterranean archaeology, in consultation with their advisor, should select their additional 18 hours from courses offered in the Anthropology, History, or Classics departments.
- During the first year, comprehensive graduate evaluation examinations are required of all MA students and are based on the content of the core courses. These examinations are given during regularly-scheduled final periods in each core class and are graded by all faculty within the appropriate sub discipline for each course. At the end of the first year, all MA students are evaluated by the entire faculty and will either be retained or dropped from the program based on their first year’s performance and scores from the department’s Graduate Evaluation Examination.
- All MA students must attend the graduate section of the visiting lecturer program. To insure compliance with this requirement, each student is required to register for 1 hour of Anthropology 550 in the fall semester of each year and fulfill all requirements for the course as defined by the instructor. Materials covered by visiting lecturers may appear on the Graduate Evaluation Examination.
- A graduate-level introductory statistics course, usually Statistics 537.
- In the second year of the program, students pursue their concentration area and undertake thesis research. Coursework will be determined through consultation with the student’s advisor and committee (composed of the advisor and at least one other member of the anthropology faculty along with other mutually-agreed upon members).
- Successful completion of the thesis and final oral examination. Normally, students will complete and defend their theses during the spring semester of their second year.
- Two copies of the thesis are required by the Office of Graduate Student Services. In addition, bound copies of the thesis are to be provided to the department and to all members of the student’s MA committee.
In addition to the requirements listed above, MA students have the option of completing a minor in statistics. The statistics minor requires 9 hours of coursework, normally Statistics 537 and 538 plus one additional course from an approved list.

DOCTOR OF PHILOSOPHY
ANTHROPOLOGY MAJOR

In addition to the Graduate Council requirements, requirements for the PhD with a major in anthropology, in the appropriate sequence of completion, are as follows.

Admission

Admission to the PhD program is contingent upon completion of all requirements prior to that level. Master’s thesis candidates at the University of Tennessee, Knoxville, who are conditionally accepted into the PhD program can enroll as doctoral students the semester following conferral of the MA. Students holding master’s degrees from other institutions must apply by January 15 for admission the following fall and must begin their studies in the fall semester.

Admission to the PhD program is based upon the applicant’s academic record and credentials, but also on fit between an individual’s interest and faculty areas of research. Applicants will not be admitted to the PhD program unless appropriate faculty members are available to chair and serve on the doctoral committee. Doctoral program applicants should communicate directly with the potential chairperson and two additional members of the anthropology faculty who will be asked to serve on the committee.

Applicants to the PhD program should meet the same academic standards as MA program applicants and furnish the same materials (see Admission under Master of Arts). Admission to the program requires either

- Acceptance of a master’s in anthropology.
- Acceptance of a master’s in another discipline with the provision that the student will follow the first-year program with entering MA students, i.e., complete the core courses (510, 560, 590) and pass the graduate evaluation examinations.

Requirements

Doctoral Committee

A doctoral committee is appointed following admission to the program. In consultation with this committee, the student defines the future program of studies. When the student and committee have agreed upon the specific fields of specialized competence over which the student will be examined, a brief delineation of the fields by the student, approved by the members of the committee, is presented to the department head and the student’s major professor. As early as possible, but no later than a full semester after admission to candidacy, the student shall formally present a written dissertation proposal to the department head and advisor.

Residence and Coursework

Every potential PhD candidate must complete two consecutive semesters of full-time residence prior to taking the doctoral comprehensive examination. The student must complete the minimum coursework requirements of the Graduate Council, including at least 9 hours of 500- or 600-level courses outside of anthropology, chosen in consultation with the doctoral committee, particularly the outside member who represents the cognate area. Outside coursework may be taken in a single discipline or be distributed across two or more disciplines as appropriate to the individual’s program of study.

Statistics

Demonstration of competence in statistics by completing Statistics 537 and 538 with a grade of B or better is required.

Language

Students must demonstrate knowledge of one foreign language. This language should normally be French, German, Russian or Spanish, but another language may be substituted at the committee’s discretion. This requirement may be met by either

- Successful performance on a language examination administered by the appropriate language department. A student electing this alternative should consult with the advisor.
- Completion of the second semester of specialized reading courses for graduate students with a grade of B or better.

The department does not accept completion of the intermediate (200 level) sequence of a language as a formal option for fulfilling the language requirement.

Doctoral Comprehensive Examination

Students must successfully complete a written and oral comprehensive exam.

- Comprehensive Written Examination – When the PhD aspirant has completed all of the foregoing requirements and is judged by the committee to be prepared in the field(s) of concentration, the student will be required to take a comprehensive written examination. The exam will consist of three sections and be given by the student’s committee. All three sections must be taken within seven consecutive days.
- Comprehensive Oral Examination – This examination follows shortly after successful completion of the comprehensive written exam. The major professor acts as chairperson of the committee.

Admission to Candidacy

Upon successful completion of the comprehensive exam and with the formal approval of the Dean of Graduate Studies, the student is admitted to candidacy for the PhD degree. The formal dissertation prospectus must be filed no later than one full semester after advancement to candidacy.

Dissertation Research

This period of research and writing will be under the direct guidance of the candidate’s major professor. The major professor will act as chairperson of the candidate’s committee. The candidate must earn a minimum of 24 hours in Anthropology 600 and maintain continuous registration until the dissertation is accepted. The option of presenting publishable papers as a dissertation is not a formal option for the Anthropology Department.

Defense of Dissertation Examination

When the dissertation has been tentatively accepted by the committee, a final oral examination will be held. The committee conducts the exam, which is ordinarily held as a colloquium in which the candidate will expound on the nature and significance of his/her contribution to anthropological knowledge as set forth in the dissertation.

MAJOR DEGREE
Art MFA*

- Ceramics concentration
- Drawing concentration
- Graphic design concentration
- Media arts concentration
- Painting concentration
- Printmaking concentration
- Sculpture concentration

* The Master of Fine Arts is the terminal degree in studio art.

MASTER OF FINE ARTS

ART MAJOR

Admission
To become a candidate, the applicant must be admitted by the Office of Graduate and International Admissions and approved by the School of Art. In addition to the minimum admission requirements, the School of Art specifically requires the following:
- A detailed letter of intent including statement requesting assistantship, if desired.
- Three letters of recommendation from former professors or professionals in the field.
- An undergraduate major in art or evidence of equivalent proficiency.
- A portfolio to be evaluated by the faculty.
Further information is available by writing to the School of Art.

Requirements
A minimum of 60 hours to include the following.
- Successful completion of 20 hours of studio in a concentration area. An inter-area program must be approved by the graduate faculty only after the second semester in residence. Ten hours of concentration must be in second year courses.
- A minimum of 9 hours of graduate-level academic (non-studio) courses of which at least 6 hours are to be in art history.
- 11 hours of electives which may consist of any combination of courses offered by the university for graduate credit.
- Project in Lieu of Thesis (20 hours). A third year of semi-independent study. Student must have completed all other coursework prior to registration.

Four semesters (normally the first 40 hours) beyond the bachelor’s degree are required in residence. An exception is made for working professional designers who may complete their first 20 hours, with the permission of the faculty, on a part-time basis. Residence is defined by the School of Art as a minimum enrollment of 6 hours per semester and use of School of Art facilities so that students are available for discussion and criticism.

The candidate’s committee will consist of a minimum of three members and a maximum of six members and will be appointed prior to registration for 599. The committee must consist of one faculty member from the candidate’s concentration area (designated as chairperson) and a faculty member from outside the concentration area. The inclusion of an art history faculty member on each committee is encouraged.

Exhibition and oral examination: With the completion of all requirements for the MFA, the student must produce an exhibition and, in the presence of that work, must satisfactorily complete an oral examination.

Academic Standards
- First-year evaluation. At the end of the first two semesters in residence, the student must present a portfolio for evaluation by the faculty and receive permission to continue in the program.
- Second-year evaluation. With completion of all coursework, the student must present work for evaluation by the faculty and receive permission to register for Projects in Lieu of Thesis.
- If, in a review by the student’s major area faculty, the student’s progress is deemed insufficient, the faculty may recommend a work period without advancement toward the degree, probation with specific goals set for a specific time, or dismissal.

Art History Minor
A graduate minor in art history may be arranged during the student’s first semester of study with the consent of the student’s area instructors and the art history faculty. Students must complete a minimum of 12 hours in art history that is agreed upon by the art history faculty after review of previous undergraduate coursework. A reading knowledge of French, German, or Italian is a prerequisite, unless waived by the art history faculty. Graduate Council policy stipulates that a member from the minor unit must serve on the thesis committee.
DOCTOR OF AUDIOLOGY

AUDIOLOGY MAJOR

The Doctor of Audiology (AuD) program is designed to prepare individuals for professional careers in audiology. The degree program is clinically oriented, with primary emphasis on processes involved in hearing, vestibular function, and communication. The program is designed to meet the entry-level requirements for the practice of audiology established by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. Students will be expected to demonstrate competencies in the following areas:

- Prerequisite knowledge and skills for the practice of audiology.
- Foundations of practice for audiology.
- Prevention and identification of auditory, vestibular, and related communication disorders.
- Evaluation of auditory, vestibular, and related communication disorders.
- Treatment of auditory, vestibular, and related communication disorders.

The program will normally consist of four calendar years of study beyond the baccalaureate degree with the first three years being devoted primarily to formal coursework, and the last year to a full-time externship in the practice of clinical audiology.

Requirements

A minimum of 112 hours, including a minimum of:
- 67 hours of academic coursework at the 500- and 600-levels.
- 3 hours of directed research in audiology, vestibular, or related communication disorders.
- 24 hours of clinical practice in audiology.
- 18 hours of externship in audiology.
- A qualifying examination.
- A comprehensive examination.

AURAL HABILITATION CONCENTRATION

(see section below)

MASTER OF ARTS

SPEECH PATHOLOGY MAJOR

Admission to this graduate program is competitive. This graduate program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

Requirements

The master’s program in speech pathology is a two year program and consists of the completion of 42 hours of academic content courses (including thesis) plus practicum.

The required courses are 506, 511, 518, 526, 527, 539 or 541, 540, 561, 582, and at least one seminar from 522, 523, 531, 562, or 661. At least 12 hours of elective courses with no more than 6 hours below the 500 level. Undergraduate coursework may not be substituted for seminar courses. Students who have not completed an undergraduate course in speech sound disor-
DOCTOR OF PHILOSOPHY

SPREAD AND HEARING SCIENCE MAJOR

The PhD program with a major in speech and hearing science seeks to develop individuals for professional careers in a variety of positions including research and college teaching in the concentration areas of audiology, hearing science, speech and language pathology, or speech-language science. The degree program is research oriented with primary emphasis on processes involved in normal, or disordered speech, language and hearing. Students will be expected to demonstrate their knowledge in areas related to the concentrated field of study. These areas include

- Basic speech, hearing, or language processes.
- Basic speech, hearing, or language disorders or differences.
- Related disciplines providing insight into human communication processes.
- Technical skills in instrumentation and experimental design which enable the student to investigate problems pertaining to speech and hearing processes.

Requirements

The doctoral program requires successful completion of coursework, research projects, a comprehensive examination and dissertation. The total program includes a minimum of 60 hours with a minimum of

- 6 hours in a research tool.
- 6 hours in a cognate field outside the department.
- 24 hours in the major area of study (6 hours must be at the 600 level within the department). These will include
  a. A minimum of 6 hours on the topic of major interest.
  b. A minimum of 6 hours earned through participation in two different research projects.
  c. 3 hours of Audiology and Speech Pathology 611 (Experimental Design) course (or equivalent).
  d. 3 hours of Audiology and Speech Pathology 655 supervised teaching experience.
- 24 hours in dissertation, course 600 enrollment.

To complete the doctoral program, students must prepare a dissertation and defend it successfully. Students must pass a comprehensive examination with both a written and an oral component before being advanced to candidacy. The doctoral program should be developed in the first year of study and is the responsibility of the student and the doctoral committee.

MAJOR

Biochemistry and Cellular and Molecular Biology MS, PhD

Admission

Applicants for graduate study are expected to have a background equivalent to that required of undergraduate majors in this department. This includes a knowledge of the basic principles of biochemistry, cell biology, genetics and physiology. Requirements for admission are

- One year of general biology or the equivalent.
- A minimum of 8 hours of approved biology courses beyond the introductory level and including the subject areas of genetics, cell biology and physiology.
- Two years of chemistry including one year of general chemistry and one year of introductory organic chemistry with laboratory.
- At least one semester of biochemistry.
- One year of calculus.
- One year of physics.
- Graduate Record Examination scores.
- A minimum grade point average of 3.0 out of 4.0.

Otherwise superior students, deficient in one or more of the above requirements, may be admitted at the discretion of the department’s Graduate Recruiting Committee.
MASTER OF SCIENCE
BIOCHEMISTRY AND CELLULAR AND MOLECULAR BIOLOGY MAJOR

Requirements
- Biochemistry and Cellular and Molecular Biology 511, 512, and 515, and 6 hours of 516.
- Completion of course requirements as determined by the candidate’s faculty committee.
- Achievement of a 3.0 or better GPA in all courses taken for graduate credit.
- Participation in 601 and 603 during the entire period of residence. Participation in at least one journal club chosen from among 605-608 for three semesters.
- 6 hours of master’s research and a thesis.
- A final examination that covers both the thesis endeavor and the subject matter of the course requirements.

DOCTOR OF PHILOSOPHY
BIOCHEMISTRY AND CELLULAR AND MOLECULAR BIOLOGY MAJOR

Requirements
- Biochemistry and Cellular and Molecular Biology 511, 512, 515, and 6 hours of 516.
- At least two additional approved graduate courses in the life sciences or chemistry, or physics, or other physical science to be determined upon consultation with the mentor and the dissertation committee. No survey courses will be accepted.
- At least 6 hours of topics offered in 615 or its equivalent.
- Participation in 601 and 603 during the entire period of residence. Participation in at least one journal club chosen from among 605-608 for 6 semesters.
- Comprehensive examination, taken before the end of the third year of study.
- A dissertation reporting the results of original and significant research carried out during the term of candidacy.
- A final oral examination which will be concerned primarily with the student’s dissertation.

Petitioning for Master’s Degree

Students who have passed the comprehensive examination in the PhD program and have completed at least 30 hours of approved coursework for graduate credit, at least two-thirds of which must be at or above the 500 level, may petition the department for award of a master’s degree. The additional requirements for such a degree are
- Preparation of a research manuscript suitable for submission for publication in a major scientific journal and oral defense of that manuscript before an examining committee of three faculty members appointed by the head of the department, at least two of whom shall be members of the department.
- Publication of at least one full-length paper in a major scientific journal as senior author.

MAJOR DEGREES

Chemistry
MS
- Analytical chemistry concentration
- Environmental chemistry concentration
- Inorganic chemistry concentration
- Organic chemistry concentration
- Physical chemistry concentration
- Polymer chemistry concentration

PhD
- Analytical chemistry concentration
- Chemical physics concentration (with Physics Department)
- Environmental chemistry concentration
- Inorganic chemistry concentration
- Organic chemistry concentration
- Physical chemistry concentration
- Polymer chemistry concentration
- Theoretical chemistry concentration

The faculty of the Department of Chemistry at the University of Tennessee, Knoxville, seek to prepare their students to join the international ranks of professional chemists in fundamental areas of chemistry as well as cross-disciplinary sciences in which chemical expertise plays a critical role in the development of new knowledge and technologies. Students planning to major in chemistry for the master’s or doctoral degree will ordinarily have attained a satisfactory record in the traditional areas of chemistry. The department, however, recognizes that modern chemistry transcends traditional disciplinary divisions. Therefore, it encourages students with undergraduate majors in chemical engineering, the biological sciences, physics, mathematics, computer science, or other fields to apply for admission to our program.
Admission

Admission to the graduate program and a student’s course of study in graduate school are decided on a case-by-case basis, taking into consideration an applicant’s undergraduate record (traditionally including one year, each, of general, analytical, organic, and physical chemistry, and one-half year of inorganic chemistry), performance on national graduate school tests, and departmental diagnostic exams. All applicants are required to take the general Graduate Record Examination.

MASTER OF SCIENCE CHEMISTRY MAJOR

CONCENTRATIONS

The department offers concentrations in six areas for the MS – analytical chemistry, environmental chemistry, inorganic chemistry, organic chemistry, physical chemistry, and polymer chemistry.

Requirements

The requirements for the MS with a major in chemistry consist of the satisfactory completion of the following requirements.

• Research and a thesis to give 6 to 12 hours of graduate credit in Chemistry 500.
• Participation in seminar (Chemistry 501) during the entire period of graduate study, including the presentation of at least one seminar. (No more than 2 hours may be applied to the course requirements.)
• Prescribed courses based on performance on diagnostic examinations.
• Sufficient graduate coursework in chemistry (at the 400 level or above) and/or a related field to make an overall total of 30 hours, including one of the following sequences – 510-511-512; three of 530-531-532-533; 550-551-552-553 and 570-572-573 and 590-594-595. At least 14 hours of this graduate coursework must be at the 500 level or above.
• A final oral examination.

DOCTOR OF PHILOSOPHY CHEMISTRY MAJOR

CONCENTRATIONS

The department offers concentrations in eight areas for the PhD with a major in chemistry – analytical chemistry, chemical physics (in cooperation with the Department of Physics), environmental chemistry, inorganic chemistry, organic chemistry, physical chemistry, polymer chemistry, and theoretical chemistry.

Requirements

The requirements for the PhD in chemistry (except for the chemical physics concentration) consist of the satisfactory completion of the following requirements.

• Research and a dissertation to give at least 24 hours of graduate credit in Chemistry 600. Registration must be continuous from the beginning of research.
• Participation in seminar (Chemistry 501) during the entire period of graduate study, including the presentation of at least one seminar.
• Prescribed courses based on performance on diagnostic examinations.
• Completion of the comprehensive examination series and defense of an original research proposal to give 2 hours of credit in Chemistry 601.
• 18 additional hours in courses at the 500 level or above including at least one course above 601 and one of the following sequences – 510-511-512; 530-531-532-533; 550-551-552-553-554; 570-571-572-573; and 590-594-595.
• A final oral examination.

The PhD program with a concentration in chemical physics is conducted jointly with the Department of Physics. Requirements depend on the choice of the major department. Chemistry departmental requirements include passing the above degree requirements in chemistry with concentration in physical chemistry plus 6 additional hours in physics at the 500 level or above. Three of the additional physics hours can be used to satisfy the 18 hours requirement listed above.

DEPARTMENT OF CLASSICS

MAJOR

DEGREES

Computer Science

MS, PhD
MASTEr of ScIENCE
COMPUTER SCIENCE MAJOR
Admission
Two semesters of calculus plus two additional semesters of college mathematics (e.g., linear algebra, differential equations, probability) and a course in formal languages as well as in systems programming are required for admission.

Requirements
For the master's degree, 30 hours of graduate credit are required, 24 of which must be 500 level or above. Computer Science 530, 560 and 580 or 581 are required for the degree. Graduate courses taken outside the department are sometimes allowed but must be approved by the Graduate Committee before enrollment.

Thesis Option
The student must reach agreement on a thesis topic with a faculty advisor and pass an oral exam on the problems before a committee of three or more faculty members, of whom at least two must be computer science faculty.

Non-Thesis Option
The student must take coursework in an area to prepare for the non-thesis master's examination. The student's advisor must verify that an acceptable set of courses has been taken before the student may schedule the examination. Information concerning the examination is available in the departmental office.

Problems in Lieu of Thesis Option
The student must reach agreement on the problem topic with a faculty advisor and pass an oral exam on the problems before a committee of three or more faculty members, of whom at least two must be computer science faculty.

DOCTOR OF PHILOSOPHY
COMPUTER SCIENCE MAJOR
Admission
A student seeking admission to the PhD program is expected to meet the following requirements.
- The student should have three letters of recommendation sent directly to the department head from individuals capable of assessing the student's potential for advanced work in computer science (for example, college teachers or employers for whom the student has worked after earning a bachelor's degree). The department reserves the right to contact these individuals or other knowledgeable people if additional information is deemed necessary or desirable.
- The student is expected to have taken the GRE verbal and quantitative general test within the past three years and to have these scores sent to the Office of Graduate and International Admissions.
- The student should satisfy the same background requirements as for the master's program. See the departmental brochure for details.

Requirements
Original research reported in a dissertation of high quality is emphasized. The minimum hour requirements are 24 hours of course 600 Doctoral Research and Dissertation and 24 hours of graduate courses beyond the equivalent of a master's degree (i.e., beyond 30 graduate hours) graded A-F. Computer Science 530, 560 and 580 or 581 are required for the degree. At least 6 hours of 600-level graded courses must be taken in computer science at the University of Tennessee, Knoxville. The student's advisor and committee will establish the specific course requirements. The comprehensive examination consists of a departmental written examination and a subsequent oral examination conducted by the student's committee.

Computer Science Minor
The graduate minor consists of any two of the four core courses (530, 560, 580, 581) plus an additional 3 hours of graded computer science graduate-level courses at or above the 400 level.

MAJOR DEGREES
Geology
MS, PhD

The Department of Earth and Planetary Sciences offers both the Master of Science and Doctor of Philosophy with a major in geology. Persons interested in these programs should contact the Director of Graduate Admissions in the department.

Admission
For admission, an applicant must provide transcripts of previous university work, two rating forms or letters of recommendation, and GRE scores (general). Students are not normally admitted under non-degree status.

Prerequisite for both degrees is a bachelor's degree, including coursework in mineralogy, optical mineralogy, petrology, stratigraphy, paleontology, structural geology, and field geology. One year each of coursework in calculus and chemistry and one year of coursework in biology, physics, or statistics are also required. Applicants lacking any of these may be admitted, but the deficiencies must be removed within the first year without graduate credit. Substitutions may also be allowed.
DOCTOR OF PHILOSOPHY

GEOLgy MAJOR

Requirements

The department offers the thesis option in the major’s program. Graduation requires successful oral defense of a written thesis and a minimum 3.0 GPA in all graduate coursework.

Course requirements are a minimum of 30 hours, including:

- 6 hours of Thesis 500.
- Registration in 595 during the first two years in residence. Two hours may be counted toward the 30-hour minimum. This requirement may be waived in unusual circumstances.
- 16 hours of geology courses, with at least 14 hours at the 500 or 600 level, including at least one course from any of the following five groups.
  1. 410, 460, 475, 480, 530, 563, 565, 568.
  2. 450, 545, 546, 556, 557.
  3. 470, 570, 572, 575, 576.
  5. Any 400- or 500-level courses with graduate credit from related departments (allied sciences, mathematics, and engineering), selected with approval of the advisor.
- 8 hours of additional graduate coursework.

MAJOR DEGREES
Ecology and Evolutionary Biology  MS, PhD
Behavior concentration
Ecology concentration (including mathematical ecology)
Evolutionary biology concentration

Admission

Applications are accepted once a year. The deadline for receipt of all application materials is 6 January for those applicants wishing to enroll in the following fall or spring semesters. Applications incomplete as of that date, or received after that date, will not be considered. Applicants are expected to have an academic background consistent with a bachelor’s degree in one of the life sciences. They are expected to have completed a minimum of one year of general biology, two years of chemistry including one year of general chemistry, one year of physics, and one year of college-level calculus. Occasionally, applicants who are highly qualified otherwise but lack one of these courses or course sequences will be admitted with the expectation that the deficiency will be made up within the first year of graduate study. Applicants are required to submit scores from the general Graduate Record Examination (GRE) and successful applicants will usually have a composite score on the verbal, mathematical and analytical sections of the GRE of at least 1850. Submission of scores on ap-
appropriate (e.g., biology, mathematics) advanced GRE examinations is recommended but not required. Applicants are also expected to have an overall grade point average of at least 3.0, and 3.0 or above for all science and mathematics courses, on a 4.0 scale (successful applicants will usually have grade-point averages well above these minima).

Application must be made to both the Office of Graduate and International Admissions and the department. The departmental application requires three letters of reference from persons capable of assessing the applicant’s suitability for graduate work in biology and a statement of professional goals and reasons for applying to this program. Applicants for the doctoral degree are expected to have made prior contact with potential research advisors in the department’s graduate program and this approach is recommended for applicants for the master’s degree program as well. Inquiries should be directed to the Chair, Graduate Committee, Department of Ecology and Evolutionary Biology, The University of Tennessee, Knoxville, Tennessee 37996-1010.

**MASTER OF SCIENCE**

**ECOLOGY AND EVOLUTIONARY BIOLOGY MAJOR**

**Requirements**

In addition to general requirements of the Graduate Council, aspirants for the Master of Science are expected to:

- Take a prescriptive diagnostic examination during the first semester in residence which covers major concepts in ecology and evolutionary biology. The examination may be taken twice and must be passed before the student is admitted to candidacy.
- Complete course requirements as determined by the department and the student’s faculty thesis research committee.
- Satisfactorily complete and defend a research thesis.

**DOCTOR OF PHILOSOPHY**

**ECOLOGY AND EVOLUTIONARY BIOLOGY MAJOR**

**Requirements**

In addition to general requirements of the Graduate Council, aspirants for the Doctor of Philosophy degree are expected to:

- Take a prescriptive diagnostic examination covering major concepts in ecology and evolutionary biology. The examination may be taken twice and must be passed before the student is admitted to candidacy.
- Complete course requirements as determined by the department and the student’s faculty dissertation research committee.
- Pass a written and oral comprehensive examination designed to test for adequate knowledge in those areas essential to the student’s research program.
- Satisfactorily complete and defend a dissertation.

The department does not require a reading knowledge of a foreign language, but this may be imposed by the student’s faculty dissertation research committee. If so, the student has the option of demonstrating reading knowledge of the prescribed language by either (a) passing the official reading examination given by the language department or (b) earning a grade of at least a B in the second semester of a special language reading course for graduate students.

**Environmental Policy Minor**

The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

The Department of English offers the Master of Arts and the Doctor of Philosophy degrees with a major in English. Thesis and non-thesis options are available for the MA, as well as a special concentration in writing. The department also offers a creative writing dissertation option in the doctoral program.

Detailed information about the master’s and doctoral programs and individual graduate courses may be obtained by writing the Director of Graduate Studies in English, 306 McClung Tower. A prospective student may contact the department for application forms and procedures or may download them from the departmental graduate Web site at http://web.utk.edu/~english/graduate.php. For additional information, please visit the graduate Web site through the College of Arts and Sciences home page at www.artsci.utk.edu.

The Department of English does not accept students in non-degree or provisional status. A student who wishes to enter the department must apply in degree-seeking status for his/her application to receive consideration for admission to any graduate program in English.

MASTER OF ARTS
ENGLISH MAJOR

Requirements
A minimum of 24 hours in English beyond the BA to include 6 hours at the 600 level; 12 additional hours at the 500-600 level (only 3 hours of 593 Independent Study may be applied toward the MA); and 6 hours for graduate credit at any level, including the 400-level. In this coursework, students must maintain at least a 3.0 GPA.

Thesis Option
Written under the direction of a faculty member of the department and approved by a committee of two other faculty members. Six hours of credit will be given.

Non-Thesis Option
Six hours of additional courses at the 500-600 level, making a total of 30 hours of required coursework.

Language Requirement
Evidence of proficiency in one foreign language, to be fulfilled in one of the following ways:

- Completion of the second year of a language at college level with a grade of C or better.
- Completion of French 302 or German 332 at the University of Tennessee, Knoxville, with a grade of B or better.
- Passing of the regular PhD foreign language examination as currently administered at the University of Tennessee, Knoxville.

Final Examination
A candidate presenting a thesis must pass a 1-hour oral examination; a candidate presenting a creative project must pass a ninety-minute oral examination. The examination consists of a short thesis defense, but chiefly of questions covering the general history of English and American literature, not merely the coursework taken. A reading list of primary works designed to help the student prepare for these questions is available in the office of the Director of Graduate Studies in English.

A non-thesis student must pass a written examination, followed by a 1-hour oral examination, both consisting of the same sort of questions as the examination taken by the thesis student.

Residence Requirement
There is no residence requirement for the MA, but students should attempt to pursue a full-time program whenever possible.

WRITING CONCENTRATION
The master’s program with writing concentration is intended for those students who plan to do freelance or creative writing, specialize in teaching writing courses at the college level, work as professional editors or writers in business or industry, or pursue doctoral studies.

The requirements for the writing concentration are the same as those for the thesis option above with the following exceptions.

Coursework
Writing students may substitute two 400-level writing courses for two 500-level courses. Students must take at least 9 hours in writing and 9 in literature, the remaining 6 to be selected from any English courses at the proper level. Of the courses in writing, at least 3 hours must be taken at the 500 level; additional 500-level courses are strongly recommended.

Writing Project
One of the following writing projects for 6 hours of credit is required.

- A thesis, using research to analyze some aspect of writing or rhetorical theory.
- A creative project, such as a collection of poems or short stories, a short novel, a play, or a creative work of non-fiction prose.

The nature and length of each project will be determined by the Director of Graduate Studies after consulting with the student and the project director. In addition to the director, two other Department of English faculty members will supervise and approve the project; at least one should be from the literature faculty.

Final Examination
The reading list may be modified by the MA examining committee, meeting as a body with the student, to reflect the candidate’s particular writing emphasis. However, most of the oral examination should focus upon the literature outlined in the original reading list.
DOCTOR OF PHILOSOPHY
ENGLISH MAJOR

Requirements

A student must successfully complete a program of study, normally six full semesters as outlined below, approved by the candidate’s committee or the Director of Graduate Studies in English.

Coursework

At least 54 hours beyond the BA (of which at least 30 hours must be beyond the MA) to include at least 21 hours at the 600 level; at least 15 hours at the 500 level or above (only 3 hours of 593 Independent Study may be applied toward the MA and 3 after the MA); a 3-hour course in teaching composition; and 15 additional hours at any level approved for graduate credit (including a maximum of 12 hours at the 400 level if approved by the Director of Graduate Studies).

Up to 6 of these additional hours may be taken in some cognate field or fields such as history, philosophy, and French. These courses must be drawn from those approved for graduate credit. All other coursework must be in the English department. In this coursework, students must normally maintain a 3.5 GPA.

Dissertation

Twenty-four hours of dissertation. These represent the research for and writing of the dissertation. The research and dissertation will be directed by a faculty member of the department and approved by a doctoral committee of three or four other faculty members.

Language Requirement

A language requirement met in one of the following ways.

- Two languages approved by the Director of Graduate Studies in English. The requirement for each language may be fulfilled by (a) completion of French 302 or German 332 with a grade of B or better; (b) completion at the University of Tennessee, Knoxville, of any two courses on the 300 level or above in the foreign language or literature with at least a grade of B in each course; (c) passing of the regular PhD foreign language examination as currently administered at the University of Tennessee, Knoxville.

- One modern language approved by the Director of Graduate Studies in English. This requirement must be fulfilled by a passing grade on the language examination given by the University of Tennessee, Knoxville, and completion of two courses given in the foreign language at the 400 level or above, at least one course to be at the 500-600 level. A minimum grade of B must be received in each course.

- One modern language approved by the Director of Graduate Studies in English and intensive study of the English language. This requirement must be fulfilled by completion of (a), (b), or (c) for one foreign language; and completion of 6 hours in English language courses with grades of B or better, at least 3 of which must be from English 508 or 509 History of the English Language (offered in alternate years only). For the other 3 hours, the student may either complete the history of the language sequence or choose one other course in language taught in the Department of English at the 500-600-level and approved by the Director of Graduate Studies in English. These courses will not count toward the minimum number of courses for the PhD, and anyone electing this language option may not take the comprehensive examination in linguistics.

Examinations

- A 4-hour qualifying examination taken before the end of the first year of PhD coursework. This examination is given three times a year with the MA written examination.

- A comprehensive written examination which may be divided as the department directs; see the English Department graduate student Web site. The comprehensive examination is given twice a year, normally in March and September. Before a student may take it, he/she must have completed all coursework required. A student must also have met all requirements for foreign languages before beginning the first part of the examination.

Dissertation Defense

A one-hour examination on the dissertation and other related areas.

Residence Requirement

Two consecutive semesters as a full-time student. For students not on teaching assistantships, full-time consists of 9 or more hours of coursework and/or dissertation hours each semester. For students on assistantships, full-time consists of at least 6 hours of courses and/or dissertation hours and 3 hours of teaching each semester.

Tankersley, R.D., PhD .................................. Tennessee
Zanetta, M.C., PhD ...................................... Ohio State

MAJOR DEGREES

Geography  MS, PhD

The master’s degree emphasizes development of professional competence as a geographer and offers opportunities to gain substantial depth in a concentration or a major technique. An emphasis in geographic information science is available for students who have appropriate backgrounds in mathematics and computer science. The doctoral program is for those who have demonstrated proficiency in conducting independent research. The department is particularly well-qualified to direct graduate work in location analysis, transportation geography, urban and rural geography, cultural ecology, and the geography of the natural environment (especially biogeography and geomorphology). The faculty is qualified to direct students from a variety of approaches ranging from historical and humanistic to rigorously analytic and GIS-based.
MASTER OF SCIENCE
GEOGRAPHY MAJOR

Requirements
The department offers the thesis and non-thesis options for the Master of Science. Both options require a minimum of 30 hours beyond the completion of a sound undergraduate major program. The MS program requires students to have background in quantitative methods equivalent to the course content of Geography 415, and some familiarity with key themes and approaches in both physical and human geography. At least two-thirds of the total hours in the degree program must be at or above the 500 level and must include 501 (at each offering during residency), 504, and 3 hours at the 600 level. In the thesis option, 6 hours must be Thesis 500. A final examination is required in both programs.

DOCTOR OF PHILOSOPHY
GEOGRAPHY MAJOR

The doctorate is a research degree and is granted only to those who demonstrate proficiency in conducting independent research. Students must have a broad foundation and understanding of the discipline; these should have been achieved in a comprehensive master's program.

Requirements
Course requirements for the degree shall be determined by the student's faculty committee in accordance with specific interests and needs. The program must include 504, 515, 599, 9 hours of 600-level seminars, and (at each offering during residency) 501. A minimum of 9 hours must be earned in collateral fields, with courses selected for their relevance to the special fields. PhD students whose master's-level work was in a field other than geography and for whom the master's area remains close to their PhD specialty areas may petition to substitute geography hours in courses outside of their specialty areas for up to three of the nine required outside hours. Competency in quantitative methods and basic human and physical geography is required. Additional tools, including languages, will be required as appropriate to the student's areas of research specialization.

Examinations required for admission to candidacy include a written comprehensive examination, comprised of two written examinations in which the student will be tested on his/her knowledge of two special fields, and related areas of geography; an oral examination on the student's program, the special fields and related areas, and the dissertation proposal. All parts of the written comprehensive examination should be taken within the same semester.

Environmental Policy Minor
The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

DEPARTMENT OF HISTORY

MAJOR DEGREES
History
MA
History
PhD

American history concentration
European history concentration

The MA program includes a thesis and non-thesis option. The doctoral program has concentrations in American and European history with special focuses in the areas identified under Group II doctoral fields and Group III teaching fields.

Detailed information may be obtained from the Director of Graduate Studies in History who also advises all incoming students.

MASTER OF ARTS
HISTORY MAJOR

Admission

• Successful completion of a baccalaureate degree from an accredited institution, preferably with a major in history.
• Acceptable scores on the Graduate Record Examination (general).

Requirements
Complete 510 and a 600-level research seminar normally during the fall and spring semesters of the first year in the graduate program. Complete 521 in preparation for the MA examination. As many as 9 graduate hours taken elsewhere may be applied to the MA degree. Except by prior approval of the Director of Graduate Studies, a student's coursework must be at the 500 level or above.

Thesis Option
24 hours of coursework and 6 hours of Thesis 500 for a total of 30 hours are required. Thesis students are required to select one MA field and write a thesis. At the end of the program the thesis student will take a two-hour oral examination on both the thesis and the field.

Non-Thesis Option
A total of 30 hours of coursework is required. At least 6 hours must be completed in each of two MA fields. The primary field is examined by a two-hour written followed within one week by a one-hour oral examination with the single grade of pass/fail given at the conclusion of the oral examination. No examination is given on the secondary field.
Master of Arts Fields
- United States (colonial to present).
- Premodern Europe.
- Modern Europe.
- Asia.
- Retention and Termination.

A 3.0 overall grade point average is required to remain in good standing. MA students must take the MA examination no later than the semester following the completion of 30 hours. A student who fails the MA examination must repeat the examination no later than the following semester. A student who fails the examination a second time or does not take the examination when required will be dropped from the graduate program.

DOCTOR OF PHILOSOPHY
HISTORY MAJOR

Admission
- Successful completion of the MA degree from an accredited institution.
- Acceptable scores on the Graduate Record Examination (general).

Requirements
Before being admitted to doctoral candidacy, a student must fulfill the following requirements.
- Complete History 510 at the University of Tennessee, Knoxville, (may be waived for comparable experience elsewhere).
- Spend two consecutive semesters in residence.
- Complete 9 hours in one Group I doctoral field. There is no minimum hours requirement for a Group II field. Complete 9 hours in one Group III field, including the appropriate 511, 512, or 513 course and two additional courses at the 500 level. The Group III field must be in a different geographic area from the Group II field. Courses taken to fulfill MA degrees may be counted toward all field requirements.
- Fulfill the foreign language requirement.
- Complete two 600-level research seminars. (One must be completed at the University of Tennessee, Knoxville.) Students who have completed a master’s thesis need complete only one research seminar (must be taken at the University of Tennessee, Knoxville), and History 621.
- Maintain a 3.0 overall grade-point average in graduate work attempted.
- Complete 24 hours of graduate coursework (21 hours graded A-F) at the University of Tennessee, Knoxville, beyond that required for the MA. Up to 6 hours may be taken outside of the department.
- Except by prior approval of the Director of Graduate Studies, a student’s coursework must be at the 500 level or above.

Language Requirement
Students must demonstrate competence in one foreign language through coursework or examination. The student’s doctoral committee may specify any other languages or research tools, such as statistics, essential for the student’s preparation. The foreign language requirement must be fulfilled before taking the comprehensive examination.

Group III (Teaching Field) Examination
This is a one-hour oral exam that must be completed at any time before the comprehensive examination is taken. If a student fails the exam, he or she may retake the exam one time only and must do so the following semester. European and U.S. history courses may not be used for the Group III World History field.

Comprehensive Examination
The comprehensive examination consists of a written exam (Group I) and an oral exam (Group II) and must be taken no later than the semester following the semester in which the student completes the residence, coursework, and language requirement (summer excluded). Failure to take the comprehensive examination within the required time will be counted as a failure on the examination. No student will be permitted to take the comprehensive examination unless he or she has passed the Group III examination (see above) and has an overall grade point average of at least 3.0. Qualified students will be examined in one field selected from the Group I list below and one field selected from the Group II list below. The two exams are taken in the same semester. The Group I is an eight-hour written exam. It must be passed before the Group II can be taken. The Group II is a two-hour oral exam. A student who fails either exam must repeat it the following semester (summer excluded). A second failure on either exam will cause the student to be dropped from the history graduate program. A student who does not repeat a failed exam within the required time will likewise be dropped from the program.

Admission to Candidacy
Upon successful completion of the above requirements, a doctoral student may be admitted to candidacy.

Doctoral Fields
**Group I.** Pre-modern Europe; Modern Europe; United States (colonial to present).

**Group II.** To be defined by the student’s doctoral committee from within one of the following fields.

- United States – Colonial and Early Republic; 19th century; 20th century; Regional; Military and Foreign Relations; Social and Cultural; American Political.
- European – Ancient; Medieval; Early Modern; Modern; Political and Diplomatic; Intellectual and Cultural; Social and Economic; National Fields.

**Group III (Examined Teaching Field).** World History; Western Civilization; U.S. Civilization.

Dissertation and Defense
Original research forms the basis for the dissertation. Doctoral candidates must register for a minimum of 3 hours of 600 Dissertation Research each semester and must complete 24 hours of dissertation credit. A final oral defense is given on the dissertation in its historical context. The program must be completed within eight years from admission as a potential candidate.
INTERDISCIPLINARY PROGRAMS
Don Richard Cox, Associate Dean,
College of Arts and Sciences, Director

The College of Arts and Sciences offers a series of interdisciplinary undergraduate majors and minors through its interdisciplinary programs. These programs include Africana studies, American studies, Asian studies, cinema studies, comparative literature, environmental studies, global studies, Judaic studies, Latin American studies, legal studies, linguistics, medieval studies, and women’s studies.

Certain courses within these programs are available for graduate credit as listed below. See the Undergraduate Catalog for program descriptions and directors.

LINGUISTICS
Ilona Leki, English, Chair

GRADUATE CERTIFICATE IN LINGUISTICS

The linguistics program offers a graduate certificate designed to meet the needs of individuals wishing to apply linguistics in various professional fields. It draws upon the strengths of faculty members in applied linguistics, sociolinguistics, and theoretical linguistics. The requirements focus upon the central aspects of the discipline of linguistics and aim to develop students’ basic knowledge and skills in the core disciplinary areas.

Upon successful completion of this program, students should have an understanding of the basic theoretical concepts and approaches of the discipline and have gained experience in the use of analytic and research techniques. It is also designed to meet the specific needs of those students who are preparing to teach foreign language at the high school/junior college level and/or to obtain advanced level proficiency in linguistics and cultural knowledge.

Prospective candidates for the certificate may take up to 6 hours of certificate classes before making application for admission to the certificate program. Once admitted to the program they must maintain a GPA of at least 3.0. Application to the certificate program must be made to the Chair of the Linguistics Program by submitting a letter of application and copies of undergraduate transcripts (and graduate transcripts, if applicable). A minimum of 15 hours is required; all courses must be selected in consultation with a program advisor, who approves their selection. A certificate cannot be earned without program approval by the advisor.

Requirements

- At least one of the following courses – French 512, German 512, Spanish 512, Linguistics 423, 425.
- Additional courses from the following list for a total of 15 credits:
  - French 410, 429, 540, German 410, 429, 540, Italian 401, 402, Spanish 531, 532, Philosophy 520, 620, Political Science 475.
  - Topics and special topics courses, where appropriate, may be substituted for the courses listed above with the permission of the Chair of the Linguistics Program.
- A 3-hour capstone project, normally the preparation of a paper for presentation at a professional conference or for publication in a journal, planned and completed in consultation with a program advisor.

MEDIEVAL STUDIES
Robert Bast, History, Chair

GRADUATE CERTIFICATE IN MEDIEVAL STUDIES

The medieval studies program offers a graduate certificate enabling students with an interest in medieval topics to acquire a broad foundation in the interdisciplinary approaches to medieval research and to begin putting these approaches into practice. For students earning MAs or PhDs in traditional disciplines, the program will augment their training and may make them more attractive candidates for academic positions.

Prospective candidates for the certificate may take up to 6 hours of certificate classes before making application for admission to the certificate program. Once admitted to the program they must maintain a GPA of at least 3.0. Application to the certificate program must be made to the Chair of the Medieval Studies Program by submitting a letter of application and copies of undergraduate transcripts (and graduate transcripts, if applicable). A minimum of 15 hours is required; all courses must be selected in consultation with a program advisor, who approves their selection. A certificate cannot be earned without program approval by the advisor.

Requirements

- Medieval Studies 510.
- 12 additional hours chosen from at least two disciplines. A minimum of 6 hours must be taken in one discipline. Students may choose from the following courses – Art History 425, 431, 441, 451, 571, English 401, 402, 508, 513, 514, 610, 611, 620, 621, French 410, 429, 540, German 541, History 531, Italian 401, 402, Spanish 531, 532, Philosophy 520, 620, Political Science 475.
- Topics and special topics courses, where appropriate, may be substituted for the courses listed above with the permission of the Chair of the Medieval Studies Program.
- Demonstration of competency in reading medieval Latin, either by earning an A or B in Classics 435, or by passing the University of Toronto’s MA Medieval Latin exam, given on campus in fall and spring semesters. Where appropriate, students may substitute competency in reading medieval Greek, Hebrew, or Arabic. The chair of Medieval Studies, in conjunction with the Medieval Studies committee, will establish standards for determining competency in these languages as need arises.
- A non-credit capstone project, usually a paper. The paper should be interdisciplinary in its approach to its topic and may be an outgrowth of a seminar paper in another course. This capstone paper must be presented to an audience of Medieval Studies committee members and other interested faculty and graduate students before the certificate is granted.
WOMEN’S STUDIES
Cheryl Brown Travis, Psychology, Chair

GRADUATE CERTIFICATE IN WOMEN’S STUDIES

The women’s studies program offers a graduate certificate, enabling students to develop critical thinking about the economic, social, and legal factors influencing women’s roles in contemporary and historical societies, and to evaluate those roles in the widest possible perspectives. Students may examine representations of women in the arts and the media, evaluate how science and medicine view women as objects of study, and study how women work as practitioners and researchers in these fields.

The program is designed to provide a supplementary perspective for students already enrolled in graduate programs, to provide an entry into graduate study for those who are exploring a number of disciplinary approaches, to provide enrichment for members of the community who have a bachelor’s or an advanced degree, and to develop skills for professionals in various fields.

Prospective candidates for the certificate may take up to 6 hours of certificate classes before making application for admission to the certificate program. Once admitted to the program they must maintain a GPA of at least 3.0. Application to the certificate program must be made to the Chair of the Women’s Studies Program by submitting a letter of application and copies of undergraduate transcripts (and graduate transcripts, if applicable). A minimum of 15 hours is required: all courses must be selected in consultation with a program advisor, who must approve all courses for individual students prior to their being taken, except that, as noted above, up to 6 hours may be accepted from candidates upon admission. Students will satisfy the requirements of the certificate program by selecting 15 hours from the following lists, provided that those courses are selected in consultation with a program advisor, who approves their selection. A certificate cannot be earned without program approval by the advisor.

Requirements

- Women’s Studies 510.
- 12 additional hours, drawn from at least two different disciplines. For students enrolled in an MA program, no more than two of the certificate courses may be drawn from that program or the department in which the MA program is housed. Students are encouraged to select from courses at the 500 level and above. Students may choose from the following list – Anthropology 517; Cultural Studies in Education 512, 548, 609; English 584; Health 420, 520; Public Health 585; Law 849, 862, 958; Sport Studies 543; Women’s Studies 400, 410, 422, 425, 434, 469, 483, 510, 593.
- A capstone experience such as presenting research results to a professional group, submitting a work for publication, arranging an exhibit, or presenting a performance to a group approved by the individual advisor and the chair of Women’s Studies.

LIFE SCIENCES
(Interdepartmental)
John Koontz, Interim Chair

MAJOR
Life Sciences
Genome science and technology concentration
Plant physiology and genetics concentration

DEGREES
MS, PhD

The program leading to the Master of Science and Doctor of Philosophy with a major in life sciences is interdepartmental and intercollegiate and is designed to augment offerings of individual departments in two concentrations: genome science and technology, and plant physiology and genetics. Students interested in these areas should contact either the Life Sciences chairperson or the director of the area of interest. Each concentration is administered separately and has unique admission requirements.

GENOME SCIENCE AND TECHNOLOGY CONCENTRATION
Cynthia Peterson, Director

The University of Tennessee-Oak Ridge National Laboratory Graduate School of Genome Science and Technology (GST) is a unique and multidisciplinary program for full time graduate study leading to the Master of Science or Doctor of Philosophy degree. The program focuses on developments in the biological and computational sciences relating to genome sequences, and the program is designed to take advantage of collaboration of the University of Tennessee, Knoxville, and the Oak Ridge National Laboratory. Students are trained in emerging areas of genome science, with emphasis on mammalian genomics, structural biology, proteomics, computational biology and bioinformatics, and bioanalytical technologies. Scientists from both campuses participate in teaching. Research projects pursued for either the MS or PhD are mentored jointly by a faculty member from each campus. A year-long introductory course in Genome Science and Technology focuses on inquiry conducted on a genome-wide scale. Laboratory rotations during the first year offer students hands-on experience in a variety of focus areas.

Applicants are expected to have a background in the biological, physical, or computational sciences. Requirements for admission are one year of general biology or the equivalent; two years of chemistry, including one year of general chemistry and one year of introductory organic chemistry with laboratory; one year of calculus; one year of physics; at least 8 hours in cognate sciences related to the program; a combined GRE score of 1800 for the verbal, quantitative, and analytical sections is highly desirable; three letters of recommendation; and a minimum grade point average of 3.0 out of 4.0. Coursework in genetics, cell biology and computer sciences is advantageous. Superior students, deficient in one or more of the above requirements, may be admitted at the discretion of the program admissions committee. Deficiencies will be made up as a part of the courses taken by the individual student.

Requirements for the PhD are satisfactory completion of the genome science and technology core courses, (Life Sciences 505, 515-516, 520-521, 540-541; Biochemistry and Cellular and Molecular Biology 511 and 512); three semesters of GST laboratory, satisfactory completion of formal advanced courses in the areas of the student’s interest, passing both written and oral comprehensive examinations, a dissertation reporting the results of original and significant scientific research (a minimum of 24 hours of course 600 is required), a final oral/written examination on the dissertation, and a formal seminar presentation of the dissertation research. Participation in at least one seminar during each semester of residence after the first year is strongly recommended. The master’s degree requires a minimum of 30 hours of study approved by the student’s committee, a thesis, and an oral examination.
PLANT PHYSIOLOGY AND GENETICS
CONCENTRATION
Otto J. Schwarz, Director

This program provides the opportunity for intensive training and research experience in areas transcending the usual boundaries of botany, biochemistry, and agricultural plant sciences. Solutions of problems concerning the interactions of physiology and genetics in applied and fundamental aspects of plant science are the focus.

Admission requirements are a BA with a major in a biological, behavioral, or physical science; GRE (general) score; three letters of recommendation; and coursework including a year of calculus (differentiation and integral), one year of chemistry and a year of physics. Specific course deficiencies may be corrected during the first year.

Required courses are Life Sciences 510; Biochemistry and Cellular and Molecular Biology 511, 512; 521, 522, Plant Sciences 471 or Ecology and Evolutionary Biology 560; Microbiology 410. The master’s degree requires a minimum of 30 hours of study approved by the student’s committee, a thesis, and an oral examination. The minimum requirements for the doctoral degree include at least 6 hours above the 600 level, 24 hours of course 600, courses approved by the student’s committee, a comprehensive examination, a doctoral dissertation, and a defense of dissertation.

MAJOR DEGREES
Mathematics IMath
Mathematics MS

Mathematics
Applied mathematics concentration
PhD
Mathematical ecology/evolution concentration

The Mathematics Department has three graduate degrees—the Master of Mathematics degree, intended primarily for teachers; the Master of Science degree, designed to prepare students for industrial employment and for teaching; and the Doctor of Philosophy degree, designed to prepare students for industrial employment and for college and university teaching and research. Contact the department office for additional information.

A student offering mathematics as a minor for the master’s degree is required to obtain at least 6 hours of resident graduate credit in courses numbered above 400 and approved by both the major department and the Department of Mathematics.

For additional information, please visit the graduate Web site on the Department of Mathematics’ homepage at www.math.utk.edu.

MASTER OF MATHEMATICS
MATHEMATICS MAJOR

Before admission to the Master of Mathematics program, the applicant must have either (a) certification for teaching secondary mathematics in at least one state, or (b) three years of elementary school, secondary school, or community college teaching experience. Applicants must have successfully completed one year of calculus (141-142 or equivalent) and a course in matrix algebra (251 or equivalent).

Requirements

The following requirements must be met.

• Complete 30 hours of coursework of which 21 must be at the 500 level. The coursework must include 504, 505, 506, 507, and 6 hours in 509. At most, 6 hours may be taken outside the Department of Mathematics (selected in consultation with the advisor).
• Pass a final examination upon completion of all coursework.

In exceptional circumstances, part of admission requirement (b) might be satisfied concurrently with coursework. Normally, Master of Mathematics degree students will start the program by taking 504 during the summer.
MASTER OF SCIENCE
MATHEMATICS MAJOR

Requirements

The department offers two options for the Master of Science degree. The first option requires a thesis for which 6 hours must be earned along with 24 additional hours of work in acceptable courses numbered above 400. Of the additional hours, 6 must be in an area outside the department and 15 must be in courses in mathematics numbered above 500.

After one semester of graduate study, a student whose advisory committee gives its approval may choose the non-thesis option, for which 30 hours in courses numbered above 400 are required. Of these, 21 hours (at least 15 of which must be in mathematics) must be in courses numbered above 500. Of the 30 hours, 9 in courses approved by the advisory committee may be taken in fields other than mathematics. For this option it is also required that a written final examination be passed and that credit be received for a reading course (598) in which a term paper or project is required.

APPLIED MATHEMATICS CONCENTRATION

Requirements

For this concentration, available under the thesis or the non-thesis option, the student must complete the following.

- Prerequisites – Numerical Algorithms 371 or Numerical Analysis 471 or Numerical Algebra 472; Methods in Applied Mathematics 512 or both Differential Equations II 431 and Partial Differential Equations 435; Honors Advanced Calculus 447-448 or Advanced Calculus I, II 445-446; Matrix Algebra II 453.
- One hour of Seminar in Applied Mathematics 519 or Seminar in Mathematical Ecology 589.

DOCTOR OF PHILOSOPHY
MATHEMATICS MAJOR

Requirements

For the PhD program in mathematics, the student must meet the following five requirements in addition to those of the Graduate Council.

- Demonstrate competency in Advanced Calculus and Linear Algebra by either a satisfactory performance on a Diagnostic Examination or by passing the appropriate 400-level course with a grade of B or better by the end of the student’s first year of graduate school. The appropriate course for advanced calculus is the 447-448 sequence and for linear algebra is the 457-458 sequence or 453.
- Satisfy either the standard program or the interdisciplinary mathematical ecology/evolution concentration. A student intending to work in mathematical ecology/evolution may complete either, but is encouraged to complete the interdisciplinary mathematical ecology/evolution concentration.
- Take at least two different one-semester research seminars and 599.
- Pass an examination in the field of specialization after requirements in bullets 1-3 have been met. This examination will be given by a committee appointed by the department head. A student may take this specialty examination at most twice.

**MAJOR DEGREES**

Microbiology

- MS, PhD

The Department of Microbiology offers both the Master of Science and Doctor of Philosophy. Students have the option of selecting from a variety of graduate research programs. For a departmental brochure, contact the department head.

**Admission**

Students are expected to have completed an undergraduate program with a 3.0 or better GPA on a 4.0 system, included in the undergraduate course credits should be a full year of general biological science; one year of calculus; two years of chemistry, including one year of organic; one year of physics; and an introductory course in microbiology. In many cases, deficiencies in requirements may be removed by taking appropriate courses during the first year of graduate study. The department also requires the general portion of the Graduate Record Examination. A satisfactory score on each part is 550 or higher with rare exceptions. Three letters of recommendation should be submitted by current or former faculty members.

Each new graduate student meets with an advisory committee chaired by the departmental Director of Graduate Studies to plan a program of study for the first one or two semesters until a research advisor is selected. All first-year students participate in a laboratory rotation program during the first semester of study. This program allows the student to adjust smoothly to the research programs of the department, to develop a background of research procedures and concepts, and to facilitate the selection of a research professor. Usually the student selects a research professor toward the end of the laboratory rotation period. The major professor assists in the selection of and carrying out of a suitable research program and in the naming of a thesis or dissertation committee.

**MASTER OF SCIENCE**

**MICROBIOLOGY MAJOR**

The program leading to the MS is designed to provide the student with broad basic knowledge, to permit the acquisition of technical competence in the fundamentals of research, and to encourage creative and independent thinking.

**Requirements**

Two to three calendar years are usually needed for the course of study that has the following requirements.

- 30 hours including 6 thesis hours.
- A 3.0 GPA in all courses taken for graduate credit after 12 hours have been earned in courses graded on the A-F system.
- A 3.0 GPA in courses taken in the department.
- A complete course sequence in biochemistry or molecular biology.
- Presentation of a research thesis and its oral defense.

**DOCTOR OF PHILOSOPHY**

**MICROBIOLOGY MAJOR**

The program leading to the PhD is designed to develop the student's ability to pursue independent and original research in microbiology and allied fields, to teach both oral and written communication of the results of research to the scientific community, and to train effective teachers. Students may enter the program after receiving either a bachelor's or master's degree. Students who enter with a bachelor's degree usually receive the PhD after four or five years; those with the master's degree usually take three or four years to complete the degree.

**Requirements**

Departmental requirements are as follows.

- A 3.0 GPA in all courses taken for graduate credit after 12 hours have been earned in courses graded on the A-F scale.
- A 3.0 GPA in courses taken in the department.
- Satisfactory performance in at least one semester as a teaching assistant.
- One semester of physical chemistry.
- One course in statistics.
- Two semesters of biochemistry or molecular biology.
- Satisfactory performance in a comprehensive examination that must be attempted before the end of the fifth semester in the program and passed before admission to candidacy.
- The presentation of a research dissertation and its oral defense.

MAJORS DEGREES

French MA  
German MA  
Spanish MA  
Modern Foreign Languages PhD

First concentration  
French  
German  
Spanish

Second concentration  
Applied linguistics  
French  
German  
Italian  
Portuguese  
Russian  
Spanish

The Department of Modern Foreign Languages and Literatures offers graduate programs leading to the Master of Arts degree with majors in French, German and Spanish, and the Doctor of Philosophy degree with a major in modern foreign languages. Inquiries should be addressed to the graduate liaison.

MAJOR OF ARTS
FRENCH MAJOR

Thesis Option
- Completion of a minimum of 24 hours in coursework plus at least 6 hours in course 500 Thesis. French 501 is required. A maximum of 6 hours may be taken at the 400 level, the rest at the 500 level, and under certain conditions the student may take 600-level seminars. If the student chooses to have a minor (such as Italian or Portuguese), at least 24 hours (including 6 hours of thesis) must be taken in the major, 6 in the minor.
- A thesis, with a minimum of 6 hours in course 500.
- A written examination covering the coursework and selected items from a master reading list.
- A final oral examination covering the thesis.

Non-Thesis Option
- Completion of at least 30 hours, with a maximum of 9 at the 400 level, the rest at the 500 level, including French 501. Under certain conditions, the student may take 600-level seminars. If the student chooses to have a minor (such as Italian or Portuguese), at least 24 hours must be taken in the major, 6 in the minor.
- A research paper from a course, which the candidate substantially expands with the approval of the committee.
- A written examination covering the coursework and selected items from a master reading list.
- A final oral examination to discuss the research paper.

GERMAN MAJOR

Thesis Option
The minimum requirements are 24 hours of coursework and 6 hours of Thesis 500. German 510 and 519 are required, as are three courses on German literature or culture, one of which may be at the 400 level. In addition, students must take three further courses, only one of which may be chosen from 411-412 or 485. All graduate teaching assistants should take 512, and other candidates may take 512 or any other course above 500. A maximum of three 400-level courses may be counted toward the 24 hours of course credit. An exam over the designated reading list is required, as is a thesis defense and a standardized language exam, such as the Zentrale Mittelstufenprüfung. Students who are interested in future PhD-level study are strongly advised to choose the thesis option.

Non-Thesis Option
The minimum requirements are 30 hours of coursework, including at least one 600-level course, for which a seminar paper is required. German 510 and 519 are required, as are three courses on German literature or culture, one of which may be at the 400 level. In addition, students must take three further courses, only one of which may be chosen from 411-412 or 485. All graduate teaching assistants should take 512, and other candidates may take 512 or any other 500-level course. A maximum of three 400-level courses may be counted toward the 30 hours of coursework. A common written exam over the designated reading list is required, as is a standardized language exam, such as the Zentrale Mittelstufenprüfung. Each non-thesis MA candidate will have a committee of three faculty members in German to whom the student will submit a dossier consisting of the seminar paper and one paper previously submitted in a graduate course. The length and type of the papers is described in greater detail in the Manual for Graduate Students in German.
SPANISH MAJOR

Thesis Option
- Completion of a minimum of 24 hours in coursework plus at least 6 hours in course 500 Thesis. Spanish 550 is required. A maximum of 6 hours may be taken at the 400 level, the rest at the 500 level, and under certain conditions the student may take 600-level seminars. If the student chooses to have a minor (such as Italian or Portuguese), at least 24 hours (including 6 hours of thesis) must be taken in the major, 6 in the minor.
- A thesis, with a minimum of 6 hours in course 500.
- A written examination covering the coursework and selected items from a master reading list.
- A final oral examination covering the thesis.

Non-Thesis Option
- Completion of at least 30 hours, with a maximum of 6 at the 400 level, the rest at the 500 level, including Spanish 550. Under certain conditions, the student may take 600-level seminars. If the student chooses to have a minor (such as Italian or Portuguese), at least 24 hours must be taken in the major, 6 in the minor.
- Three term papers that have been accepted by the student's advisory committee.
- A written examination covering the coursework and selected items from a master reading list.

DOCTOR OF PHILOSOPHY
MODERN FOREIGN LANGUAGES MAJOR

The PhD with a major in modern foreign languages requires advanced training in a major language (French, German, Spanish) and either a second language (French, German, Italian, Portuguese, Russian, Spanish) or applied linguistics.

Admission
Applicants must have completed a BA in French, German or Spanish to be accepted into this program. Both graduates of institutions in the United States and those with undergraduate degrees from institutions outside the United States must have a grade point average of at least 3.0. Consideration will also be given to applicants who do not have an undergraduate degree in one of the three foreign languages but do have the equivalent of an undergraduate major in one of them.

Requirements
Candidates must complete a minimum of 63 hours of coursework beyond the bachelor's degree in addition to 24 hours of doctoral research and dissertation.

For candidates with French or Spanish as a first concentration, two tracks are available.
- **Track I.** The coursework for Track I must be distributed as follows: at least 39 hours in the first concentration; at least 18 hours in the second concentration; and at least 6 hours in a cognate field or in either the first or second concentration as approved by the student's graduate committee.
- **Track II.** The coursework for Track II must be distributed in this way: at least 45 hours in the first concentration; at least 12 hours in the second concentration; and at least 6 hours in a cognate field or in either the first or second concentration as approved by the student's graduate committee. Because Track II students will have taken 12 graduate hours instead of 18 hours in the second concentration, they will normally not be eligible to teach that field at institutions which follow SACS guidelines for college foreign language teaching.

The coursework for all concentrations must be distributed as follows.
- **First Concentration:** German. A minimum of 39 hours of German courses beyond the bachelor's degree, distributed as follows.
  - **400 level** – A maximum of 6 hours of 400-level classes taken for the MA may be applied.
  - **500 level** – A minimum of 21 hours must be taken. These must include German 512, 519, and 560. Thesis hours are excluded. If 512 is used as part of a second concentration in applied linguistics, another course must be substituted in the first concentration.
  - **600 level** – A minimum of 12 hours must be taken, exclusive of dissertation hours.

- **First Concentration:** French or Spanish. A minimum of either 39 (Track I) or 45 (Track II) hours of French or Spanish courses beyond the bachelor's degree, distributed as follows.
  - **400 level** – A maximum of 6 hours of 400-level classes taken for the MA may be applied.
  - **500 level** – A minimum of 21 (Track I) or 27 (Track II) hours must be taken. These must include French 512, 519, 584 or Spanish 512 and 550. Thesis hours are excluded. If 512 is used as part of a second concentration in applied linguistics, another course must be substituted in the first concentration.
  - **600 level** – A minimum of 12 hours must be taken, exclusive of dissertation hours.

- **Second Concentration.** A minimum of 18 (German or Track I) or 12 (Track II) hours beyond the bachelor's degree, taken in the field of applied linguistics or in a second language, either French, German, Italian, Portuguese (Track II only), Russian or Spanish. For Track I and German, 12 of these hours must be at the 500 level or above. For Track II, 3 of these hours must be at the 500 level or above.
  - **French students choosing applied linguistics** must take French 421 or 429; 425; 512; and 9 (Track I) or 3 (Track II) hours of appropriate electives in English or French.
  - **German students choosing applied linguistics** must take German 425, 435 or 510, 512, 3 hours of German linguistics, such as 426, 436, 631, or 632, and 6 hours of linguistics electives in English or German.
  - **Spanish students choosing applied linguistics** must take Spanish 421 or 429; 425; 512; and 9 (Track I) or 3 (Track II) hours of appropriate electives in English or Spanish. The student's graduate advisor must approve the electives chosen.

Cognate Field. Six hours in graduate courses numbered 400 and above in a field outside the department or language family of the first concentration but related to the student’s principal area of research. Students choosing applied linguistics as a second concentration are strongly urged to take their cognate work in a second language. With the consent of the student's graduate committee, the 6 hours in the cognate field may be substituted by 6 hours in either the first or second concentration.

- **Additional requirements.** For any languages taken as a first or second concentration, a student must demonstrate competence by taking a test. The test will include reading, writing, listening, and speaking, and should be completed by the time the student reaches 40 hours of study beyond the bachelor's degree. Standardized examinations that may be used for this purpose include applicable portions
of either the National Teachers Examination, the MLA Examination for Teachers and Advanced Students, or the proficiency standards of the United States Foreign Service Institute (FSI).

For students choosing applied linguistics as an area of second concentration, reading competence in a second language is required. Competence will be determined by translation of a text from the foreign language into English, the test will be administered by the department.

A comprehensive examination on the language and literature of the first and second concentrations must be passed before the student may be admitted to candidacy. The candidate is required to defend his/her dissertation in an oral examination. Central emphasis is put on the doctoral dissertation as a final test of the candidate's scholarly qualifications.

Graduate Teaching Assistants with a second concentration in another language should have the opportunity and will be strongly encouraged to instruct in the languages of both their first and second concentration, subject to staffing needs.

Doctoral students are strongly encouraged to reside and study abroad and will be assisted in identifying potential sources of financial support (e.g., Fulbright, McClure, Rotary fellowships).

Mission Statement

The mission of the School of Music is to provide the highest quality instruction in the musical arts and to cultivate creative activity and research in the areas of composition, education, musicology, pedagogy, performance, and theory. As part of its mission, the school enriches the musical and educational lives of its students, the university community and citizens of Tennessee. In support of this mission, the school's curricula and course offerings are designed to

- Develop technical and artistic abilities in performance.
- Foster individual and collaborative work.
- Promote an understanding of theoretical, historical and cultural studies of music.
- Provide skills in teaching and the knowledge of educational principles.
- Encourage interpretive, creative and scholarly expression. Such preparation enables students to be competitive in music careers and related fields and to continue study at an advanced level.

To foster a greater understanding of music, the faculty regularly engage in artistic, educational, and scholarly activities through performances, workshops, publications, and participation in professional organizations.

The school fulfills its service mission to enrich the educational and cultural life of the university community at large by offering a broad range of courses, performance opportunities, as well as public concerts, recitals, and musical productions.

The school also aims to promote a greater understanding of cultural diversity among faculty and students; build a diverse student and faculty community; and offer curricula that require students to engage with the musical richness of our world and develop their own musical identities within an increasingly interconnected globe.
MASTER OF MUSIC

MUSIC MAJOR

Applicants must have completed an undergraduate degree that is approximately equivalent in music requirements to degrees conferred by the University of Tennessee, Knoxville, with a major appropriate to the applicant’s prospective area of concentration on the master’s level.

Applicants who plan to pursue the concentration in performance or music education are required to audition for the appropriate area faculty. Applicants for admission to the program in composition must submit scores and tape recordings of representative works. Applicants for the concentration in jazz, if appropriate, must audition in jazz improvisation and jazz piano proficiency and interview with members of the faculty in this area. Other applicants are required to have an interview with members of the faculty of the prospective area of concentration.

All entering master’s degree students are required to take Diagnostic Examinations in music theory, ear-training, and music history/literature. These examinations are given by the School of Music at the beginning of each semester.

Requirements

A minimum of 33 hours of coursework is required for the Master of Music degree. These hours are specifically distributed according to the area of concentration. All concentrations require coursework in music bibliography, music history/literature and music theory and allow for elective courses. Specific curricula are available from the school. All concentrations require a written and oral final examination.

A thesis is required of students in composition, musicology, and music theory. A graduate recital or performance project is given in lieu of thesis by students with concentrations in performance, pedagogy, jazz, accompanying, choral conducting, and instrumental conducting.

The concentration in music education is designed for persons who hold a bachelor’s degree in music or music education and certification to teach music in the public schools. Both thesis and non-thesis options are available.

ARTIST CERTIFICATE IN MUSIC

The Artist Certificate in Music is a full-time graduate performance program designed to prepare the most talented, outstanding keyboard and string performers for careers as professional performing musicians. Students accepted into this certificate program must demonstrate the ability to perform advanced repertoire with technical and artistic mastery and have the potential for success at major competitions or auditions for major orchestras, or want to begin a professional career. Students will take courses that build the repertoire, artistry, and performance skills necessary for a professional performer.

Admission

Applicants to this graduate certificate program must hold a minimum of the bachelor’s degree or equivalency, and follow the procedures and regulations for applying for admission to graduate study at the University of Tennessee, Knoxville, and the Graduate Division of the School of Music. Required credentials for admission to the School of Music include an application, university application fee, official transcripts of all post-secondary studies, two letters of recommendation, and a repertoire list. Students whose first language is not English must submit TOEFL results of 550 (paper-based test), 213 (computer-based test), or 80 (Internet-based Test) or higher to be considered for admission.

Final admission to the certificate program is granted following successful completion of a thirty-minute Artist Certificate audition. The audition repertoire should include selections demonstrating the student’s ability to perform in various musical styles. If distance to the audition is a hardship, applicants may submit a thirty-minute videotape/DVD (public performance preferred); the student must also present a live audition before a designated faculty committee during the first semester of residence.

Once accepted, all students are required to take the diagnostic examinations in musicology, area literature, music theory, and ear training before registering for courses. The examinations are given on the first day of registration each semester, beginning at 9:00 a.m. and concluding at approximately 4:00 p.m. Each entering student should notify the graduate secretary to indicate the semester that s/he intends to enter and take the examinations.

Program of Study

Students may specialize in string or keyboard performance. To receive the Artist Certificate in Music, the student must successfully complete an artist certificate curriculum of at least 19 hours (see School of Music Graduate Handbook, available in 211 Music Building) with a cumulative GPA of 3.0 or better. The curriculum is centered on intensive activities related to performance, including private lessons, large and small ensembles, recitals, and courses in area literature, performance practices, and repertoire. Courses chosen for music electives should be lecture courses. All required recitals are to be performed in public with a committee of the School of Music faculty in attendance. Enrollment for a minimum of two semesters is required with a maximum of two years allowed for completion of the program. The School of Music may require additional hours. All course requirements must be completed at the University of Tennessee, Knoxville.

MAJOR DEGREES

Philosophy
Religious studies concentration

Philosophy
PhD

The MA program includes thesis and non-thesis options and offers a concentration in religious studies. Detailed information may be obtained from the Director of Graduate Studies in Philosophy. Details concerning the religious studies concentration may be obtained from the Director of Graduate Studies in the Department of Religious Studies.
MAJOR OF ARTS
PHILOSOPHY MAJOR
Requirements
Thesis Option
The course requirements for an MA with thesis are 30 hours, including 6 hours in Philosophy 500. Of non-thesis hours, at least two-thirds must be in courses at or above the 500 level. See the department's graduate student handbook for more specific details.
Non-Thesis Option
The non-thesis MA requires 30 hours of coursework of which at least two-thirds must be in courses at or above the 500 level. Students seeking the non-thesis option must also pass a final written examination on all work offered for the degree. An additional oral examination may be required. As a part of the master's degree, and in addition to a final comprehensive examination, a culminating (capstone) experience is expected. Examples of culminating experiences include presenting a paper at a refereed national or regional philosophy conference, or presenting a paper at a departmental colloquium.

DOCTOR OF PHILOSOPHY
PHILOSOPHY MAJOR
Requirements
Students will ordinarily hold an MA with a major in philosophy or an equivalent degree when entering the PhD program. However, highly qualified applicants without an advanced degree may be admitted directly to the PhD program if that is their preference. For students taking an MA in our department, 24 hours of additional coursework beyond those applied to the MA degree are required. For students admitted directly into the program without an advanced degree, 48 hours of coursework are required. For those admitted with advanced degrees in other fields, the number of hours required will be determined by the Graduate Committee. In all cases, this does not include credit hours for work on the dissertation (Philosophy 600) and the student's dissertation committee may require additional coursework at its discretion. See the department's graduate student handbook for more specific requirements.

Students must normally demonstrate a reading knowledge of one living foreign language in which there exists a significant body of philosophical literature. (In special circumstances relating to the area of dissertation research, the Graduate Committee may approve a language not satisfying these conditions, or the requirement of a foreign language may be waived in favor of other appropriate research skills, if approved by the Graduate Committee upon recommendation by the Director of Graduate Studies.)

PHILOSOPHY MAJOR
Requirements
Students must normally demonstrate a reading knowledge of one living foreign language in which there exists a significant body of philosophical literature. (In special circumstances relating to the area of dissertation research, the Graduate Committee may approve a language not satisfying these conditions, or the requirement of a foreign language may be waived in favor of other appropriate research skills, if approved by the Graduate Committee upon recommendation by the Director of Graduate Studies.)
A student who intends to present physics as a graduate minor will have completed an undergraduate minor in physics or its equivalent. Physics 311 and 431-432 constitute the minimum coursework prerequisite to a minor in physics.

In addition to meeting the Graduate Council’s minimum requirements, applicants are strongly encouraged to submit scores from the Graduate Record Examination (general and subject).

All first-year graduate students are required, for advising purposes only, to take a diagnostic examination in undergraduate physics during the fall semester registration period.

**MASTER OF SCIENCE**

**PHYSICS MAJOR**

**Requirements**

**Thesis Option**

The course requirements include 24 hours of physics courses, of which at least 12 hours are taken from Physics 506, 511-512 or 513-514, 521-522, 531, 541, 571, 573. Each candidate must present an acceptable thesis, 6 hours of 500, and pass an oral examination on course material and thesis.

**Geophysics concentration.** The department offers an MS thesis program with a concentration in geophysics. Program requirements are: 12 hours from Physics 506, 513-514, 521-522, 531, 541, 571, 573; a minimum of 12 additional hours in geology, geophysics, and/or physics, as approved by the student's committee; and the presentation of an acceptable thesis, 6 hours of Physics 500, and the passing of an oral examination on course material and thesis.

**Project Option**

The course requirements include a minimum of 30 hours of graduate credit in courses composed of Physics 506, 511-512; 6 hours from Physics 593, 594 for a Project in Lieu of Thesis; 9 hours from 411-412, 421, 431-432, 461-462, 507, 508, 521-522, 531, 541, 555, 571, 573 (at least 3 hours above the 500 level); and 6 hours from a single minor field outside of the Physics Department, such as computer science, mathematics, engineering, chemistry, biology, education, business, or law.

The candidate must pass an oral examination on course material and on the project representing the culmination of an original research project completed by the student. A written report must be approved and accepted by the Physics Graduate Committee and the department head. An electronic version of the written report must also be submitted to the permanent electronic archive of the Physics Department available to the Internet.

**Non-Thesis Option**

Students seeking the non-thesis option must apply to the department’s graduate committee for permission to enroll under this program. The requirements are the satisfactory completion of 30 hours of coursework composed of 18 hours from Physics 506, 511-512 or 513-514, 521-522, 531, 541, 571, 573; 6 hours in a minor field; and 6 hours from other courses numbered above 400 (preferably of advanced laboratory nature.) At least 20 hours must be taken at the 500-level or above. In addition, the candidate must pass a written examination administered by his/her committee.

**DOCTOR OF PHILOSOPHY**

**PHYSICS MAJOR**

**Requirements**

All students are expected to take the graduate core curriculum in physics consisting of Physics 521-522, 531, 541, 551, and 571. Students concentrating in chemical physics may substitute Chemistry 572 for Physics 551, and should complete at least 6 hours from Chemistry 530, 570, 571, 573, 595, 630, 670, and 690. Students must take a minimum of 15 hours of 600-level courses, with 6 of these hours in their concentration area. Physics 601-602 are normally required of students concentrating in atomic physics; Physics 621-622 of students in nuclear physics; Physics 626-627 of students in elementary particle physics (and/or Physics 611-612 for students concentrating in theoretical elementary particle physics); Physics 615-616 of students in astrophysics and cosmology; and Physics 671-672 of students in condensed matter and surface physics.

Students concentrating in nanomaterials must take a minimum 15 hours of 600-level courses, of which at least 6 hours are offered by the department and at least 6 hours are from a list of courses offered by several departments which are appropriate for a concentration in nanomaterials. This list is available from the Director of the Graduate Program. In addition to the departmental core curriculum listed above, they must take additional courses at the 400- through 500-level, with at least 6 hours offered by the department and 6 hours from the list.

To be admitted to PhD candidacy students must fulfill all general requirements by the Graduate Council; pass the qualifying examination; have at least a 3.0 GPA on the graduate core curriculum in physics; form a doctoral committee; and pass the comprehensive examination.

The qualifying examination is designed to test the student’s general knowledge of the fundamentals of physics. The performance needed to pass this examination corresponds to a mature command of the material typically included in the undergraduate physics major curriculum. The qualifying examination should be passed after the student’s first year of study. Based on the student’s performance on the qualifying examinations; the coursework; the GRE scores; and optional research participation, the faculty will decide if the student will be allowed to continue in the PhD program.

Students are required to find a research advisor and form a doctoral committee before the end of the second year of study. This committee is responsible for advising the student and monitoring his/her progress toward the doctoral degree.

The comprehensive examination is designed to test the student on specific knowledge and skills in the areas essential to the student’s research program; capability to successfully complete the doctoral dissertation; and general knowledge of the graduate core curriculum. The most essential component of this examination is the presentation and defense of an original research proposal. The comprehensive examination must be passed before the end of the third year of study. It contains both a written and an oral component and is conducted by the student’s doctoral committee and an additional faculty member appointed by the department head.

The dissertation topic will be chosen with reference to one of the fields in which research facilities can be made available either at the University of Tennessee laboratories in Knoxville; the University of Tennessee Space Institute at Tullahoma, Tennessee; the Oak Ridge National Laboratory, Oak Ridge, Tennessee; or at other research facilities used by the university faculty.

MASTER OF PUBLIC ADMINISTRATION

PUBLIC ADMINISTRATION MAJOR

The MPA program is intended to prepare students for public service careers by acquainting them with management principles, analytical tools, and the ethical dilemmas they will face as public administrators. It consists of a total of 39 hours, including a core program, an elective specialization and a recommended internship.

Admission

Applicants for admission to the program must have a bachelor’s degree or its equivalent. Normally, an overall average of 3.0 and an average of 3.2 in the last two years of political science or social science courses are required. In addition, a composite score of 1100 on the verbal and quantitative parts of the GRE is desired.

Students must demonstrate proficiency in the use of software applications for the personal computer. This requirement can be fulfilled by achieving a satisfactory grade in Political Science 596. Exceptions to this requirement will be considered on an individual basis.

Requirements

The MPA is a non-thesis program requiring 39 hours. Specific requirements include the following.

Core Curriculum (24 hours)

General Perspectives (9 hours) – 550, 552, and one from 442, 539, 540, 548, 558, or 566.

Analytical skills (6 hours) – 512, 514.

Management skills (9 hours) – 560 and two from 556, 562, 564.

Specialization (9 hours) – A specialization is designed by the student in consultation with the coordinator of the MPA program. Possible specializations include general government, public health, budgeting and finance, planning, natural resources, program evaluation, criminal justice, public relations, personnel, and others.

Recommended Internship (6 hours) – Internships are arranged in consultation with the coordinator of the MPA program.

Final Examination – A written final examination, which may be followed by an oral examination, is required.

DUAL JD-MPA

The College of Law and the Department of Political Science in the College of Arts and Sciences offer a coordinated dual degree program leading to the conferral of both the Doctor of Jurisprudence and Master of Public Administration degrees. In this program, a student may earn the MPA and JD in about four years rather than the five years that otherwise would be required. Students pursuing the dual degree program should plan to be enrolled in coursework or an internship for one summer term in addition to taking normal course loads for four academic years.

Admission

Applicants for the JD-MPA program must make separate application to, and be independently accepted by, the College of Law for the JD and the Department of Political Science and the Office of Graduate and International Admissions for the MPA degree. Applicants must also be accepted by the dual degree committee. All applicants must submit a Law School Admission Test (LSAT) score. An applicant’s LSAT score may be substituted for the Graduate Record Examination (GRE) score, which is normally required for admission to the MPA program. Application may be made prior to or after matriculation in either the JD or the MPA.
program, but application to the dual program must be made prior
to entry into the last 29 hours required for the JD and prior to
entry into the last 15 hours required for the MPA.

Requirements
A dual degree candidate must satisfy the requirements for
both the JD and the MPA degrees, as well as the requirements
for the dual program. The College of Law will award a maximum
of 9 hours of credit toward the JD degree for successful comple-
tion of approved graduate level courses (500 or 600 level) of-
fered in the Department of Political Science. The MPA program
will award a maximum of 9 hours of credit toward the MPA de-
gree for successful completion of approved courses offered in
the College of Law. All courses for which such cross-credit is
awarded must be approved by the JD-MPA coordinators in the
College of Law and the Department of Political Science. All can-
didates for the dual degree must successfully complete Admin-
istrative Law (Law 821). An internship is strongly recommended for
students in the dual degree program, as it is for all MPA candi-
dates, but an internship is not required.

During the first two years in the dual program, students will
spend one academic year completing the required first year of
the College of Law curriculum and one academic year taking
courses solely in the MPA program. During those first two years,
students may not take courses in the opposite area, without the
approval of the JD-MPA coordinators in both academic units. In
the third and fourth years, students are strongly encouraged to
take both law and political science courses each semester.

Dual degree students who withdraw from the program before
completion of the requirements for both degrees will not receive
credit toward either the JD or the MPA degree for courses taken
in the other program except as such courses qualify for credit
without regard to the dual program.

Awarding of Grades
For grade recording purposes in the College of Law and the
Department of Political Science, grades awarded in courses in
the other unit will be converted to either Satisfactory or No Cred-
it and will not be computed in determining a student’s GPA or class
standing. The College of Law will award a grade of Satis-
factory for an approved MPA course in which the student earns a
grade of B+. The College of Law will award a grade of No Credit for
any lower grade. The Political Science Department will award a grade of
Satisfactory for an approved law course in which the student earns a
grade of 2.3 or higher and a grade of No Credit for any lower
grade. The official academic record of the student main-
tained by the Office of the University Registrar shall show the ac-
tual grade assigned by the instructor without conversion.

Masters of Science in Planning

PLANNING MAJOR
The Master of Science in Planning (MSP) degree is the nor-
mal route for entry into professional positions in urban and re-
gional planning or related fields. Graduates are candidates for
positions in regional, city, county, and metropolitan planning
agencies; in local, state, and federal agencies concerned with
physical, economic, and administrative planning; in private busi-
ness and organizations dealing with development problems; and
in private consulting. The Planning Accreditation Board, a joint
undertaking of the American Institute of Certified Planners and
the Association of Collegiate Schools of Planning, accredits the
MSP program.

Admission
Applicants for admission to the program must have a bache-
lor’s degree or its equivalent. Normally, an overall grade point av-
erage of 3.0 and an average of 3.2 in the last two years of under-
graduate courses are required. In addition, a composite score of
1100 on the verbal and quantitative parts of the GRE is desired.
Students must demonstrate proficiency in the use of software ap-
lications for the personal computer, as well as in statistics. Tak-
ing an undergraduate statistics course can satisfy the latter.
Achieving a satisfactory grade in Political Science 596 can fulfill
the software applications requirement. Exceptions to this require-
ment will be considered on an individual basis.

Requirements
The MSP is a non-thesis program requiring 43 hours. Specif-
ric requirements include the following.

• Core Curriculum (28 hours) – 514, 531, 560, 581, 582,
583, 584, 585, 589, and 596 (1 hour). Students should
plan to enter the program in the fall term to take core
courses in the proper sequence.

• Concentration (9 hours) – Each student must choose a
concentration from the subject area.

• Comprehensive Exam – Each student must pass a final
comprehensive exam. Successful completion of a com-
prehensive exam is required before graduation. The exam
will normally be taken after completion of the core require-
ments in the second year. Based on the material general-
ly used by the American Institute of Certified planners
(AICP), this requirement provides an additional capstone
experience as well as preparation for meeting AICP pro-
fessional certification requirements.

DOCTOR OF PHILOSOPHY

POLITICAL SCIENCE MAJOR
The PhD program prepares students for careers in college
teaching, as well as careers in other occupations related to serv-
vice in the public or private sectors.

Admission
Applicants for admission to the program should normally have
completed a master’s degree in political science or a related field
with a 3.5 GPA and have earned a composite score of at least
1100 on the verbal and quantitative parts of the Graduate Record
Examination.

Requirements
Doctoral students admitted to the program must complete 84
hours beyond the bachelor’s degree, including 24 hours of
coursework beyond the master’s degree, graded A-F, must suc-
cessfully pass written comprehensive examinations in two broad
sub fields of political science, and must pass a final oral exami-
nation on the dissertation.

In addition, students must satisfy a research tool requirement.
Usually, students meet this requirement by completing 12 hours of
coursework numbered above 500 in empirical theory and re-
search methodology. However, if a student’s advisor and pro-
gram committee certify that competency in a foreign language is
Environmental Policy Minor

The department houses a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. The program is designed to give master's and doctoral level graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. While administered through the Political Science Department, the program is coordinated by a committee of representatives from the following participating departments and programs – Agricultural Economics; Civil and Environmental Engineering; Ecology and Evolutionary Biology; Economics; Forestry, Wildlife and Fisheries; Geography; Management; Political Science; and Sociology.

Students may request admission to the minor following admission to a graduate program in one of the participating departments. Students in good standing in one of these programs may apply for admission to the minor in environmental policy. The coordinating committee will consider the admission of interested students. Applicants should have a background in both natural and social sciences evidenced by prior coursework or experience.

Requirements

One course in environmental studies from the student’s major discipline and one course in quantitative methods are required. These requirements may be fulfilled before or after admission to the minor. All students admitted to the minor will be required to register for Political Science 549, and to complete successfully the following:

• A choice of Ecology and Evolutionary Biology 421 or 484 or another Ecology and Evolutionary Biology course with the consent of the program coordinating committee; or Geography 433 or approved equivalent as determined by the program coordinating committee.
• 6 hours of coursework outside the major discipline approved by the coordinating committee.

Doctoral students seeking a minor in environmental policy must also complete, in addition to above, a policy-relevant dissertation approved by the coordinating committee.
Requirements

All students must complete 32 hours of graduate level courses in psychology. These hours must include 515, 521-522, or Statistics 531-532 or an equivalent sequence; 565 or 420; 6 hours of Thesis 500; and 12 hours of 500- or 600-level foundation courses; plus additional graduate level hours to reach the 32-hour requirement. Students must earn a grade of B or better in all courses that are to count toward the 32-hour total. Students must also propose, conduct and successfully defend an original piece of research in the form of a master’s thesis.

DOCTOR OF PHILOSOPHY

PSYCHOLOGY MAJOR

A student with a BA or BS may apply to the Department of Psychology for admission to the doctoral program with a concentration in clinical psychology, counseling psychology, or experimental psychology. All students must submit scores from the Graduate Record Examination (general and subject).

CLINICAL PSYCHOLOGY CONCENTRATION

This program is designed to lay the groundwork for a career as a clinical psychologist capable of working in both academic and applied settings. The program emphasizes the theoretical foundations of psychology as well as supervised experience oriented toward the development of practical skills. The program embodies a model of clinical psychology in which practice and research are integrated.

Requirements

After forming the doctoral committee, each student must pass a comprehensive examination administered and evaluated by the committee. Clinical program students must complete a pre-dissertation research project by the end of the second year.

The comprehensive examination is organized around a research case study of one client who has been assessed and/or treated by the student in the departmental psychological clinic. In addition to the case presentation, the paper presents the student’s comprehensive review of relevant research and theory as a context for procedure, results, and discussion of the case. All doctoral students must complete a minimum of 78 hours of graduate level courses, including courses required by their program; at least 6 hours in courses outside of psychology; and at least 24 hours of dissertation research (Psychology 600). Finally, students must complete an acceptable doctoral dissertation and conduct a satisfactory oral defense of the dissertation.

Requirements are as follows.

- Apprenticeship with one faculty member during the first year, two days each week.
- Pre-dissertation research project completed before forming a doctoral supervisory committee, reported in written form acceptable to two members of the faculty or, if reviewed and accepted for publication or external presentation, by one member of the faculty.
- Supervised clinical placement two days (16 hours) each week during the second year, and the following option during the third and fourth years – continued two day clinical placement in the third and fourth years; or teaching assistantship in the department in either the third or fourth year and two-day clinical placement in the other year.
- Satisfactory completion of listed courses (or equivalents) in the following categories.
  1. Foundations of Psychology: Biological Factors, Perception, Learning, Thinking, Motivation (513).
  2. Interviewing and Observation (558) and Laboratory (559).
  3. Research Practicum (509), 4 hours.
  4. Life-Span Development (512) or Developmental Psychology (511).
  5. Personality: Theory and Research (570) and Developmental Psychopathology (597).
  8. Psychological Assessment I and II (594-595) and Laboratory (596).
  9. Analysis of Variance for Social Sciences (521) and Multiple Regression for Social Sciences (522).
  11. Field Placement in Clinical Psychology (695), 18 hours.
  13. Psychometrics (555).
  15. Psychodynamic Psychotherapy I and II (670-671) and Laboratory (673), 4 hours.
  16. Doctoral Research and Dissertation (600), 24 hours.

- Students who choose a teaching assistantship in the third or fourth year must have satisfactorily completed 528 College Teaching in Psychology.
- Satisfactory completion of a one-year clinical internship at a site approved by the program.

COUNSELING PSYCHOLOGY

CONCENTRATION

The counseling psychology program is based upon the scientist-practitioner model of training, which stresses both research and practice. It is designed to enable students to become behavioral scientists, skilled in psychological research and its application. Students are trained to work with people who have generally integrated or intact personalities, to focus on these individuals’ strengths and assets, and to use relatively brief interventions to further enhance these strengths or to remediate deficiencies within them. While working with others, counseling psychologists tend to focus on the interactions of the personal, educational and vocational environments of the individuals, groups, families and organizations with whom they work.

Requirements

The counseling psychology program consists of a minimum of 107 hours of graduate credit. This includes 83 hours of coursework and 24 hours of dissertation research (see below).

Students are assigned a temporary faculty advisor upon admission to the program. By the end of their first calendar year students are expected to have selected an advisory committee. Prior to taking their comprehensive examinations, students must form and meet with their doctoral committee, present an acceptable program of study to the doctoral committee, and have their research competency approved by the program’s research review committee. The examinations cover the counseling psychology core and the student’s cognate.

In addition to approving a student’s program of study, the doctoral committee approves the student’s dissertation proposal and verifies that the student’s dissertation is acceptable for the doctoral degree. The doctoral dissertation is original research that is theoretically based and psychological in nature. It must fulfill the requirements and procedures as stated in the University of Tennessee, Knoxville, Graduate Catalog, current edition.
The following are required of all students.

- Students must accumulate a minimum of 600 hours in practicum experience. Students are required to have three semesters of individual practicum and one semester of group practicum. Practicum sites include the University of Tennessee, Knoxville, Counseling Center; community agencies; the University of Tennessee, Knoxville, Career Resources Center; and area schools. Opportunities for additional practicum experiences exist in the community.
- In addition to coursework, students must demonstrate competency in research methodology and academic scholarship prior to the doctoral committee's approval of the student's dissertation proposal. The research project is to be initiated after the student has entered the counseling psychology program.
- Satisfactory completion of the following curriculum.

**A. Psychological Foundations – minimum of 21 hours.**
1. History and Systems of Psychology.
2. Biological Bases of Behavior.
4. Social Basis of Behavior.
5. Individual Behavior – minimum of 6 hours.
6. Life Span or Developmental Psychology.

**B. Quantitative and Research Skills – minimum of 15 hours.**
1. Statistics – minimum of 6 hours.
2. Qualitative Research – minimum of 3 hours.

**C. Counseling Psychology Core – minimum of 39 hours.**
1. Prepracticum in Career Development.
2. Vocational Theory and Practice.
3. Practicum – minimum of 9 hours.
5. Cross-cultural Counseling.
7. Assessment – minimum of 6 hours.
8. Group Counseling.

**D. Departmental Seminar.**
- Students are also required to complete a 2000-hour internship prior to graduation. In consultation with the student and the student's doctoral committee chair, the Training Director approves the internship site, which must meet APA Guidelines.
- Students who wish to have experiences as a teaching assistant must first satisfactorily complete department's teaching practicum course.

**EXPERIMENTAL PSYCHOLOGY CONCENTRATION**

The PhD program in psychology with a concentration in experimental psychology is designed to allow students to select from a variety of specializations oriented toward careers in research, teaching, and application of psychology in academic, institutional, or industrial settings. The program is flexible, individualized, and emphasizes a professional apprenticeship model of training.

**Requirements**

- 12 hours of statistics and research (521-522 or Statistics 531-532 or equivalent and 6 additional hours in research methods or design).
- 15 hours in experimental psychology (565 or equivalent and four courses from the following – 510, 511 or 512, 513, 543, 546 or 547, 550, 560, and 570 or 571).
The Sociology Department offers graduate study leading to the Master of Arts and the Doctor of Philosophy. The MA program includes a thesis and non-thesis option.

The criminology concentration includes 505, 551, 653 and 655. The environmental sociology concentration includes 560, 661 and 665. The political economy concentration includes 504, 541, 543, 644, and 645.

Both the master’s and the doctoral program allow for the construction of individualized programs of study. Detailed information may be obtained from the Programs and Curriculum Committee in Sociology. New students are admitted in fall semester only. Applications must be received by the Office of Graduate and International Admissions by February 1.

Admission

- Acceptable scores on the general Graduate Record Examination (verbal, quantitative, and analytical) are required.
- Overall undergraduate grade point average (GPA) of 3.0 or higher.
- Three letters of recommendation (forms may be obtained from the department).
- Completion of the appropriate previous degree (baccalaureate, preferably with a major in one of the social sciences, for the MA program; master’s degree in one of the social sciences for the doctoral program).

MAJOR MLM DEGREES
Sociology MA, PhD
- Criminology concentration
- Environmental sociology concentration
- Political economy concentration

The Sociology Department offers graduate study leading to the Master of Arts and the Doctor of Philosophy. The MA program includes a thesis and non-thesis option.

The criminology concentration includes 505, 551, 653 and 655. The environmental sociology concentration includes 560, 661 and 665. The political economy concentration includes 504, 541, 543, 644, and 645.

Both the master’s and the doctoral program allow for the construction of individualized programs of study. Detailed information may be obtained from the Programs and Curriculum Committee in Sociology. New students are admitted in fall semester only. Applications must be received by the Office of Graduate and International Admissions by February 1.

Admission

- Acceptable scores on the general Graduate Record Examination (verbal, quantitative, and analytical) are required.
- Overall undergraduate grade point average (GPA) of 3.0 or higher.
- Three letters of recommendation (forms may be obtained from the department).
- Completion of the appropriate previous degree (baccalaureate, preferably with a major in one of the social sciences, for the MA program; master’s degree in one of the social sciences for the doctoral program).

MASTER OF ARTS SOCIOLOGY MAJOR

Requirements

THESIS OPTION

A minimum of 30 hours beyond the baccalaureate degree, including 24 hours of coursework and 6 hours of Thesis 500, is required. Students must complete Sociology 521, 531, Statistics 531, and one foundation course (504, 505, or 560). At or near the end of all coursework, the student must take an oral examination on course material and thesis. The examination will be administered by the student’s committee.

Non-Thesis Option

A minimum of 30 hours of coursework is required, including Sociology 521, 531, Statistics 531, and one of the following: 504, 505, or 560. Sociology 534, 622, and Statistics 532 are recommended. A student’s plan of study should follow one of these approaches.

- **Plan 1** – 6 hours in one of the department’s concentrations and 6 hours in a second area, including areas outside the department, subject to the approval of the student’s committee.
- **Plan 2** – 12 hours in a special area of study approved by the student’s committee and the department Programs and Curriculum Committee. Students are encouraged to prepare a seminar synthesizing their knowledge of the concentration(s). Students who incorporate supervised field experience in their programs are encouraged to prepare a report based on those experiences that demonstrates their understanding of research, theory, and report writing. All students must take final written and oral examinations that include questions on their general coursework in theory and methods and on their special areas of study.

Subject to approval by the student’s committee, up to 12 hours may be taken in courses outside the department for either program. Sociology courses at the 400 level may also be taken with the approval of the student’s committee.

DOCTOR OF PHILOSOPHY SOCIOLOGY MAJOR

Requirements

Twenty-four hours of coursework beyond the master’s degree are required (exclusive of Satisfactory/No Credit credits). Twelve hours of course credit in Sociology at the 600 level are required. Students who enter the program without the courses required for the MA (Sociology 521, 531, Statistics 531) or their equivalents must take them as remedial work, which does not apply to their residence. Students must complete Sociology 622; 534, 633, or 636; and Statistics 532 or another advanced course in statistics. Completion of 9 hours in each of two concentrations is encouraged. A student who cannot achieve his/her educational goals within the department’s concentrations may construct an individualized course of study subject to the approval of the student’s doctoral committee and the Curriculum Committee. Sociology courses at the 400 level may not be taken without the consent of the student’s advisor and the Curriculum Committee. Six hours may be taken in related fields without petitioning for approval. The student’s program may include a minor or cognate field.

Comprehensive Examinations

Written examinations in four areas are required (sociological theory, research methodology, and two substantive areas). Doctoral students are eligible to take the theory and methodology examinations whenever offered. Substantive examinations may be taken upon completion of theory and methodology examinations. Detailed information on examinations and examination options may be obtained from the department.

Dissertation and Final Examination

A dissertation based on original research must be completed (24 hours). The candidate must pass an oral defense of the dissertation, including the theory and methodology related to the research, in accordance with the deadlines specified by the Office of Graduate Student Services.

Environmental Policy Minor

The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

Intercollegiate/Interdisciplinary Gerontology Minor

Graduate students in the Department of Sociology may pursue an intercollegiate/interdisciplinary minor in gerontology. The gerontology minor gives the student an opportunity for combining knowledge about aging in American society with his/her major concentration.

Core courses and a practicum are offered by the College of Social Work and selected departments within the Colleges of Education, Health, and Human Sciences and Arts and Sciences. A cross-listed seminar between contributing programs is designed to integrate experiences from different sources and to demonstrate the multi-faceted nature of working within an aging society. Please refer to the College of Education, Health, and Human Sciences for specific requirements.

MAJOR DEGREE

Theatre
- Costume design concentration
- Dramaturgy concentration
- Lighting design concentration
- Performance concentration
- Scene design concentration

UT Theatre maintains an active presence on the international theatre scene through the engagement of distinguished guest artists, touring to foreign theatre festivals, participation in international conferences, and other educational initiatives.

Applicants must have completed undergraduate degrees approximately equivalent in requirements to those specified for degrees conferred by the University of Tennessee, Knoxville.

Admission
Three letters of recommendation and interviews with appropriate faculty are required of all applicants. Applicants for admission to the MFA design/technical theatre programs must submit samples of their work. Auditions are required of MFA degree performance applicants. Not all areas of concentration accept applicants every year.

For detailed information about the graduate program, contact the Director of Graduate Studies, Department of Theatre.

MASTER OF FINE ARTS
THEATRE MAJOR

Requirements
At least 60 hours, 40 of which must be at the 500 level or above, are required for the Master of Fine Arts with a major in theatre, which is normally to be completed in three consecutive years of full time residence. Theatre 501 is required the first year of residence. Three additional hours at the 500 level are required from history, literature, or dramaturgy. Students in the MFA degree program are evaluated annually by juried performance or portfolio submission. Continuation in the program is with the approval of the faculty committee for the MFA degree program. Theatre 599 (Projects in Lieu of Thesis) and an oral defense of the project must be completed satisfactorily before the degree is conferred.

In addition to the core requirements listed above, each area of concentration has specific requirements.

DESIGN CONCENTRATION
Required courses are at least 12 hours of Theatre 580 and at least 6 hours in the projects courses. Theatre 503 is required in the first year of residence.

DRAMATURGY CONCENTRATION
Required courses include Theatre 430, 510 (9 hours), 512, 585 (12 hours), 6 hours in theory and literary criticism, plus electives from music, film, art, and business. Dramaturgy students must also satisfy a foreign language requirement (proficiency in one language or reading knowledge of two).

PERFORMANCE CONCENTRATION
At least 12 hours each of 520, 523, and 525. Coursework in this concentration is conducted in a conservatory environment. In the third year, students are expected to intern with either the resident professional Clarence Brown Theatre Company or another regional professional theatre.

REQUIREMENTS FOR A SECOND MASTER’S DEGREE
Students admitted to the MFA program who have already earned a master’s or a doctoral degree may apply up to 12 credit hours from the previous graduate program to the MFA degree with approval of the student’s committee, the Dean of the College of Arts and Sciences, and the Dean of Graduate Studies. Any such credits applied from a previous graduate program would be from courses that are directly relevant to the student’s MFA curriculum and must have been earned within the time limit (6 years) established for completion of the MFA.
Awards are generally made on the basis of scholarship and remission of fees and tuition as well as a monthly stipend. Through the departments of the college. Remuneration includes requests from ten to twenty hours of service per week are available from the administration.

The College of Business Administration offers programs leading to five advanced degrees – the Doctor of Philosophy with majors in economics; the Master of Science with majors in human resource development, management science, and statistics; the Master of Accountancy; and the Master of Business Administration. A limited number of teaching and other assistantships that require from ten to twenty hours of service per week are available through the departments of the college. Remuneration includes remission of fees and tuition as well as a monthly stipend. Awards are generally made on the basis of scholarship and performance on the appropriate (GMAT or GRE) admission test. Application forms may be obtained in any of the departments. Information on college-administered fellowships is available from the appropriate department or office. Applications must be received by March 1 for consideration of assistantships and fellowships to be awarded for the following fall term.

Facilities for research and service include the Center for Business and Economic Research, and the Center for Executive Education.

Academic Standards

A graduate student in the College of Business Administration whose grade point average falls below 3.0 will be placed on probation. A student on probation will be dropped from the program unless his/her cumulative graduate grade point average is 3.0 or higher at the end of the probationary period. The probationary period is defined as the next semester’s coursework as established by the degree program.

MASTER OF BUSINESS ADMINISTRATION

BUSINESS ADMINISTRATION MAJOR

Two tracks are available for the MBA – the regular, full-time program and the executive program.

The full-time MBA is for students seeking a full-time, weekday program that follows the traditional academic format. The nature of this program precludes students from simultaneously working full-time outside of school. In addition to the regular full-time program, there are three full-time dual-degree programs – the JD-MBA with the College of Law, the MS-MBA with the College of Engineering, and the College of Education, Health and Human Sciences. Descriptions of these dual-degree programs follow the description of the executive tracks of the MBA.

For students who wish to continue working full-time while they earn their MBA degree, there are three programs within the executive track of the MBA. In these programs, students carry a full academic course load in addition to their full-time jobs. Each of these programs is designed to serve a different group of students. Descriptions of the MBA programs in the executive track follow the description of the regular, full-time program.
To obtain an MBA application for the full-time program, contact the MBA Program Office, 527 Stokely Management Center, College of Business Administration, The University of Tennessee, Knoxville, Tennessee 37996-0552, Phone (865) 974-5033; e-mail mba@utk.edu. The application may also be downloaded from the Web site at http://mba.bus.utk.edu. For the executive programs, contact the Center for Executive Education, 708 Stokely Management Center, College of Business Administration, The University of Tennessee, Knoxville, Tennessee 37996-0575; Phone (865)974-5001.

Full-Time MBA

The full-time MBA program is designed for students with undergraduate degrees in a wide variety of fields, including the social and natural sciences, the humanities, and professional fields such as engineering, business, agriculture, and architecture. In addition, most students in this program should have two or more years of work experience beyond their undergraduate degree(s). The MBA program is a seventeen-month program with students beginning in late July of each year and graduating in December of the following year. During the summer between the second and third semesters, students must complete an internship with a company using the skills acquired during the first year of the MBA program.

The MBA program consists of a common core (29 hours) and a selection of concentration and elective courses (15 hours). The first-year core develops a general management foundation upon which specialization is developed in the concentration area.

The objective of the seventeen-month program is to develop leaders able to enhance the success of their global organizations. Specific emphasis is placed upon competency in the area of integrated value chain management. This managerial perspective acknowledges that an organization’s success is strongly related to its ability to function effectively and efficiently within a larger network of allied businesses. Managers must understand how to integrate business functions within their organizations, as well as across the other organizations within their value chain. Integrated value chain management rests upon a foundation including supply chain management, information management, resource management, and customer relationship management. In addition, students will pursue concentrations and careers in a variety of areas, including finance, logistics, marketing, operations management, and a secondary concentration in innovation and entrepreneurship.

Admission

Applications are accepted for fall semester only. The application deadline for fall semester is February 1. Applications by United States citizens and permanent residents received after February 1 will be considered as space allows.

To be considered for admission, the applicant’s file must be complete. A completed file includes the Application for Graduate Admission, transcripts of prior college work, an MBA program application, two completed applicant recommendation forms, and the Graduate Management Admission Test (GMAT) score report.

Additional information is required by Graduate Admissions for international students.

For admission to the MBA program, consideration is given to (1) applicant’s academic record with particular attention to the last two years of undergraduate work and previous graduate studies; (2) scores on the GMAT and the Test of English as a Foreign Language (TOEFL) for those whose native language is not English; (3) quality of work experience and other activities that demonstrate potential for leadership; and (4) recommendations from professors and work supervisors. The admission decision is based on all factors that make up the total application; therefore, there is no automatic cut-off for either grade point averages or GMAT scores. However, admission preference will be given to applicants with full-time work experience after obtaining the undergraduate degree.

Prerequisites

There are no specific course prerequisites for admission, however, we recommend that non-business undergraduates take an introductory course in accounting, finance or statistics prior to entry. Undergraduate courses and work experience should demonstrate ability with both qualitative and quantitative work.

Requirements

MBA Core

The MBA core (29 hours) consists of a 3-hour foundations course taken during the three weeks prior to the beginning of fall semester, a 15-hour core course and a 1-hour career development course taken in the first semester (fall 1), a 9-hour core course taken in the second semester (spring 1), and a 1-hour capstone in the third semester (fall 2). The topics introduced within these courses follow three major themes. The first theme covers what every manager needs to know, and includes such functional topics as finance, economics, strategy, decision tools, global business, environmental analysis, and leadership skills development. The second theme focuses on functions involved in the flows of product, information, and finances within a globally integrated value chain, to include, but not limited to, operations management, logistics management, demand management, customer relationship management, supplier management, and resource management. The third theme involves integrating the content of the other two themes using information technology. Throughout all three themes, significant emphasis is placed on learning the topics in an integrated fashion. Students will understand how various business functions are integrated within an organization, as well as how integration should occur across organizations within the context of a value chain.

Students in the first-year core undertake active learning within a team-based environment. Many core requirements are experiential exercises in which self-discovery within a team setting is an important element of the learning process. Individualized support is provided for developing both written and oral communication skills.

Concentration and Electives

A concentration area may be indicated on the MBA Program Application or this declaration may be deferred until after matriculation. In any event, selection should be made after the first semester and must be made after completion of the first year. Requests for changes in concentration areas must be submitted for approval to the MBA Program Office.

Among the 15 hours in the concentration/electives block, 9 hours must be taken in one of the primary concentrations. For the specific courses required in primary concentration areas, see the appropriate department.

Finance, logistics, marketing, and operations management represent primary concentrations. A secondary concentration, innovation and entrepreneurship, can be taken in conjunction with one of the primary concentrations.

The first course in each concentration is designed to provide a foundation upon which the concentration can be built. These courses will be delivered in the latter part of the spring semester of the first year after the spring core course has been completed. They are intended to prepare students for their summer internships. However, these courses should not be thought of as simply the first 3 hours in a 9-hour elective. Rather, these courses are self-contained, intensive introductions to a specialty area of business. Students choose two of these courses in the spring semester, which will permit them flexibility for choosing concentrations in the second year of the program. Two additional courses in the concentration area will be taken in the second fall semester to meet the 9-hour requirement for a concentration.

Elective courses may be chosen from any 500-level courses in the College of Business Administration. Courses outside the college as well as courses listed in The Graduate Catalog numbered below 500 may be included as an elective only with written prior permission via formal petition to the MBA Program Office.
Secondary Concentration - Innovation and Entrepreneurship

Innovation and entrepreneurship is a secondary concentration (9 hours) that must be taken in conjunction with one of the other MBA concentrations. The secondary concentration makes the MBA concentration/electives block 18 total credit hours. It provides the skills to launch a new business and to function successfully within an established corporation that employs entrepreneurial management strategies. It teaches how to assess entrepreneurial opportunities, apply strategic consultingative thinking to problem solving, assess the commercial potential of an idea or innovation, develop strategic, business and financial plans, develop effective presentations, and serve as an effective member of an entrepreneurial/innovation team. Minimum course requirements are Business Administration 520, plus two from Business Administration 595, Finance 551, Management 551.

Transfer Credits

Graduate-level courses taken at other institutions accredited by the Association to Advance Collegiate Schools of Business that otherwise conform to university policy may be credited toward MBA degree requirements within the following limits.

- Concentration area – 6 hours (provided at least 6 hours of work at this institution are included in the concentration area).
- Elective Area – 3 hours.

Because of the fully integrated nature of the first-year curriculum, no credit hours are transferred into this core curriculum. The maximum number of hours that may be transferred to elective and concentration areas is 6 semester hours. Transfer credit will be considered upon formal petition to the Dean of the MBA Program and must meet all requirements of the Graduate Council.

Other Requirements

The Application for Admission to Candidacy must be approved by three faculty members in the student’s area of concentration and the Associate Dean for Academic Programs. It should be submitted to the Office of the University Registrar at least one full semester prior to the date the degree is conferred. (Admission to candidacy for the MBA degree must be submitted in the spring semester for graduation in the following fall semester.)

To qualify for the degree, the student must achieve a B average (3.0) or above in MBA core courses required in his/her program, a B average or higher in courses comprising the concentration area, and a B average or higher in the overall program.

EXECUTIVE MBA PROGRAMS

Each of the four programs of the executive track is designed to serve the needs of a different student group.

The programs share a common course structure of 36 credit hours of classroom learning (Business Administration 551, 552, 553) and 9 credit hours of projects applied within the student’s business organization (Business Administration 561, 562 and 563). Students carry a full, 15 credit-hour load each semester. In each program, all participants begin and complete the program together.

The courses are functionally integrated, and the broad curriculum objectives are similar in each of the executive track programs. All are oriented toward applied learning and are highly interactive, making extensive use of experiential learning techniques. Emphasis and depth of subject material within the curriculum varies somewhat from program to program depending on the intended student group. All programs result in the same Master of Business Administration degree as the full-time MBA.

Admission

Primary consideration is given to the applicant’s professional achievements and recommendations from the applicant’s organization. Applicants must meet the minimum requirements of the Graduate Council and submit transcripts of all undergraduate and graduate work. Applicants may need to take the Graduate Management Admission Test (GMAT) (see specific program descriptions). No cut-off score exists for either grade point averages or GMAT scores; however, admission is competitive, and applicants will be evaluated on their ability to operate on a par with other high achieving participants. Students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) unless they are United States citizens or have earned a degree from an accredited United States college or university within the past two years. A minimum TOEFL score of 213 on the computer-based test, 550 on the paper test, or 80 on the Internet-based Test is required for admission to graduate study.

Prerequisites

Although there are no specific course prerequisites for admission, undergraduate studies and professional experience should demonstrate ability with both qualitative and quantitative work.

Transfer Credit

Because of the integrated nature of the executive track curriculum, no credit hours may be transferred as substitutes for program curriculum.

Other Requirements

Other requirements are the same as those for the full-time MBA program.

Aerospace Executive MBA Program

The aerospace executive MBA is provided for a national audience of managers from defense and commercial aerospace organizations. The students for whom this program is designed have five to ten years of work experience and are currently employed in the aerospace sector. The emphasis in this program is providing a solid grounding in the broad range of business functions. However, much of this coverage will be delivered within the context of the aerospace industry. Beyond a basic grounding in business fundamentals, this program will offer advanced concepts especially relevant to managing the complex value streams that produce today’s most advanced aircraft. Advanced coverage and emphasis will be given to value stream integration, lean manufacturing, and industrial statistics in particular. This mix of topical coverage is ideal for engineers and others with technical backgrounds that are transitioning into program management where business and leadership skills are critical.

The program starts each fall semester and is completed in three consecutive semesters spread over twelve months. Classes are held during six residency periods, lasting from eight to eleven days each. Between residency periods, formal coursework continues with bi-weekly distance learning through live, Internet cyber classes. Additional graded work includes a number of large-scale projects completed under faculty supervision, resulting in significant written reports and oral presentations.

Applications to this program are accepted for a fall entry only. The early application deadline is May 15, and the final application deadline is August 1, each year. Scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required as part of a complete application. The program will not be offered in those years in which the enrollment is not sufficient.

Physician Executive MBA Program

The physician executive MBA is provided for an international audience of physicians. The students for whom this program is designed have an MD, MBBS or DO degree with five or more years of work experience. The curriculum objectives are the same as those for the executive MBA, but in the physician executive MBA, many of the functional skills are taught in the con-
text of the health care industry with specialized content related to the health care environment. The physician executive MBA is the right choice for physicians who want to have a voice in the health care industry, in their own careers, and are seeking a program that allows them to continue their practice while earning their MBA degree.

The physician executive MBA is three consecutive semesters completed in twelve months. The class meets in Knoxville for eight-day residence periods in January, April, August and December. Between residence periods, live distance learning classes are held each Saturday morning, and there are asynchronous internet assignments each week.

Applications are accepted for January entry only. Applicants are accepted throughout the year. The final application deadline is November 1. Applicants to the physician executive MBA are not required to take the GMAT test.

Additional information on the physician executive MBA can be found at www.emba.utk.edu.

Professional MBA Program

The weekend professional MBA is provided for fully-employed professionals within commuting distance of the University of Tennessee, Knoxville. The group of students for whom this program is designed has approximately five years of work experience. The emphasis in this program is to provide a good grounding in the quantitative and qualitative tools of various business functions and a good basis in strategic thinking. Learning is expanded through applying these tools within the student’s own organization through a structured project each semester. The professional MBA is the right choice for individuals who wish to enhance their position within their organization by broadening their business knowledge beyond the functional area in which they are currently employed.

The professional program is three consecutive semesters completed in sixteen months. Classes meet all day on Saturdays and via live, distance learning classes on Tuesday evenings. The program begins in August with an intensive week of classes, then continues with weekend classes. The final fall semester also includes an intensive week of courses in addition to weekend classes. Graduation is in December.

Applications are accepted for fall semester only. The application priority deadline is April 10.

Additional information on the professional MBA can be found at http://promba.utk.edu.

Senior Executive MBA Program

The senior executive MBA is provided for a national audience of managers holding middle- and upper-level positions in organizations that support their attainment of an MBA degree. The students for whom this program is designed have at least ten years of work experience and are currently in management positions. Typical students bring a greater knowledge of business fundamentals than is true of other MBA programs. The senior executive MBA places considerable emphasis on global business and on individual skills of leadership. The program also has a heavy emphasis on strategic thinking and leading-edge management concepts. The senior executive MBA is the right choice for individuals who are in positions of broad responsibility or who have been designated to fulfill such roles within their organizations in the future.

The senior executive MBA is three consecutive semesters completed in twelve months. The class meets in Knoxville for 11-day residence periods in alternate months starting in January and ending in December. The May residence period is a global business seminar of two weeks and is held in South America, Asia or Europe. Off-campus work includes distance learning classes and requires substantial and regular contact with faculty and other participants. The project work in the senior executive MBA is a large-scale management project running throughout the year. Students work with managers in their own organizations to choose a project of significant scale and scope. Each project has a faculty advisor.

Applications are accepted for January entry only. The early application deadline is June 1, and the final application deadline is September 15. The GMAT may be waived depending on work experience. Students will receive materials for study in mid-November preceding the January start date.

Additional information on the executive MBA can be found at www.emba.utk.edu.

Dual JD-MBA Program

The College of Business Administration and the College of Law offer a coordinated dual program leading to the conferment of both the Doctor of Jurisprudence and the Master of Business Administration. The dual program saves the student approximately 15 hours (one semester) over the time that would be required to earn both degrees independently.

The establishment of the dual program recognizes the increasingly complex body of knowledge necessary to the creative conduct of business and business-related law practice, the complementary nature of many aspects of the graduate programs of the College of Law and the College of Business Administration, and the intellectual benefits inherent in the concurrent study of both business and business-related law. The program is designed to accommodate the interests of students who (a) contemplate a career in public service and want to acquire the skills and perspective of the lawyer and the business-oriented manager, (b) contemplate a career in business management and want to acquire the skills and perspective of a lawyer, or (c) contemplate a career as a lawyer specializing in business-related law and want to acquire the skills and perspective of the business-oriented manager.

Admission

Applicants for the JD-MBA program must make separate application to, and be competitively and independently accepted by, the College of Law for the JD, Graduate and International Admissions and College of Business Administration for the MBA degree, and by the Dual Program Committee.

Students who have been accepted by both colleges may apply for approval to pursue the dual program anytime prior to, or after, matriculation in either or both colleges. Such approval will be granted, provided that dual program studies are started prior to entry into the last twenty-eight semester hours of JD coursework and prior to the third semester of the MBA program. Students interested in entering the dual degree program should submit a letter of application to the Dual Program Committee. Upon receipt of the application, the Dual Program Committee will determine eligibility and assign students to advisors who will be responsible for course approval and supervision of the student’s progress through the dual program.

Requirements

A dual program candidate must satisfy the graduation requirements of each college. Students withdrawing from the dual program before completion of both degrees will not receive credit toward graduation from either college for courses in the other college, except as such courses qualify for credit without regard to the dual program.

The College of Law will award up to 9 semester hours of credit toward the JD for acceptable performance in approved graduate-level courses offered by the College of Business Administration. The College of Business Administration will award up to 6 semester hours of credit toward the MBA for acceptable performance in approved courses offered in the College of Law. The approval of courses is the responsibility of the student’s assigned advisors.

Students may begin their studies in either the JD or the MBA program, but may not enroll in MBA coursework while completing the first year of the law curriculum and may not enroll in JD
coursework while completing the first year of the business curriculum. During the first year in the JD program, students register through the College of Law. During the first year in the MBA program, students register as graduate students. After the first two years, any term in which students take law courses or a mixture of law and graduate courses, they are classified and registered as law students. If taking only graduate courses, they are classified and registered as graduate students.

Approved Dual Credit

MBA courses in which the student has earned a B grade or higher and are to be counted toward the JD program must include 9 semester hours approved by the College of Law. The 6 hours of law courses in which the student has earned a 2.3 or C+ grade or higher and are to be counted toward the MBA must be selected from those approved by the director of the MBA Program.

**Dual MS–MBA Program (Engineering)**

The College of Business Administration and the College of Engineering offer an integrated program leading to the conferral of the Master of Business Administration degree with a major in business administration (concentration in operations management) and the Master of Science degree in one of the following engineering majors – aerospace, biomedical, chemical, computer, electrical, engineering science, industrial, materials science, mechanical, and nuclear engineering. (Refer to each major for specific information and requirements).

The establishment of the dual program addresses the critical need for personnel trained in both engineering and management who can integrate an increasingly complex body of knowledge for rapid introduction of new products to the marketplace. The objective of the dual degree program is to prepare graduates to take a leading management role in companies that must react quickly to a dynamic market where forces of competition require rapid changes via short cycles in design, manufacturing, and product development. Since the development of a commercial product is a central part of the program, this program is also for students who wish to become an entrepreneur.

**Admission**

Applications are accepted for fall semester only. Applicants for the MS-MBA program must make separate application to, and be competitively and independently accepted by, Graduate and International Admissions for the Master of Business Administration and the Master of Science in one of the following engineering majors – aerospace, biomedical, chemical, computer, electrical, engineering science, industrial, materials science, mechanical, or nuclear engineering, and by the Dual Program Committee. Students will initially apply for the MBA program, indicating on their application the intent to pursue the dual MS-MBA program and the appropriate engineering major (refer to the MBA program for separate instructions). Students accepted for both the MBA and one of the engineering degree programs will be assigned to Dual Program Committee advisors, who will be responsible for course approval and supervision of the students’ progress through the dual program.

Applications by United States citizens and permanent residents received after the MBA application deadline (February 1) will be considered as space allows. Additional information is required and different application dates are established by Graduate and International Admissions for international students.

**Requirements**

All engineering students enrolled in the dual program must complete common coursework designed to provide them with an integrated, multidisciplinary teamwork experience. The MBA curriculum consists of 30 hours of common coursework in the College of Business Administration and 12 hours of common coursework in the College of Engineering. Engineering common coursework includes a culminating 3-hour integrated project course requiring a comprehensive report, and a final examination as required by the Dual Program Committee, to be taken during the first session of summer following the second year.

During the second year, dual degree candidates will take courses in their engineering major. The coursework for each option is designed to provide students with a concentration in their major and advanced skills to accomplish their teamwork assignments.

Dual degree candidates enrolled in engineering science option are required to take 18 hours of graduate level engineering courses during the second year of the program. This option requires a coursework plan, approved by the Dual Program Committee, including a concentration such that the student can accomplish his/her team work assignments.

terprises requires the application of business fundamentals, analytical techniques, and management skills within the specific context of the sports industry. The objective of the dual degree program is to train individuals in sport management and business management to integrate both sport and management and to prepare them to undertake leadership roles in this growing, dynamic, and competitive industry.

Admission
Applications are accepted for fall semester only. Applicants for the MS-MBA program must make separate application to, and be competitively and independently accepted by, Graduate and International Admissions for the Master of Business Administration program and for the Master of Science sport studies major (sport management concentration).

Students will initially apply for the MBA program, indicating on their application the intent to pursue the dual MS-MBA program. Students accepted for both the MBA and MS programs will be assigned to Dual Program Committee advisors, who will be responsible for course approval and supervision of the students' progress through the dual program.

Applications by U.S. citizens and permanent residents received after the application deadline (February 1) will be considered as space allows. Additional information is required and different application dates are established by Graduate and International Admissions for international students.

Requirements
The MBA curriculum consists of 31 hours of common coursework in the College of Business Administration. Dual degree candidates enrolled in sport management are required to take 30 hours of graduate level Sport Management courses and internship.

The dual degree candidate must satisfy the curriculum and graduation requirements of the sport management concentration and the College of Business Administration. Students withdrawing from the dual degree program before completing both degrees will not receive credit toward graduation in either degree program for courses taken in the other degree program, except as such courses qualify for credit without regard to the dual degree program.

The MBA and MS degrees will be awarded upon successful completion of the requirements of the dual program.

**DOCTOR OF PHILOSOPHY**

**BUSINESS ADMINISTRATION MAJOR**

The primary objective of the PhD with a major in business administration is to prepare a select number of qualified students for careers in university-level teaching and research and for responsible positions in business and government.

Admission

Students seeking a PhD must be recommended for acceptance by the College of Business Administration to the Office of Graduate and International Admissions. Actual admission is based on the applicant's overall standing compared with other applicants and with the number of vacancies in each department. The Graduate Council requires the Graduate and International Admissions Application, transcripts from all previous college work, and additional information from international students. The college requires the PhD application, scores from the GMAT, and four written recommendations. All materials should be received by the College of Business Administration no later than March 1. Late applications are considered only if space is available.

Under exceptional circumstances, a student may be considered for acceptance into the PhD program without having a master's degree. An applicant in this situation should have an outstanding undergraduate background and should represent a deep and sincere commitment to the pursuit of a career in research and instruction.

Overview

The PhD normally requires four years of intensive study and research beyond the master's degree. Typically, the first two years of a student's program consist of coursework, writing, and research. The third and fourth years require completion of courses, the comprehensive exam, and completion of the dissertation. It is emphasized that the PhD program of study is structured for full-time students only. Upon acceptance of a student by a particular departmental faculty, the student is expected to remain in residence until the dissertation has been completed and all requirements are met for completion of the PhD.

Since the program focuses on the development of competent scholars, heavy emphasis is placed on both teaching and research skills. As part of the doctoral program, each student is required to serve as a teaching assistant to an undergraduate business class or as a research assistant to a senior faculty member. Students with strong teaching skills may be assigned their own classes. Typically, the College of Business Administration offers financial support for doctoral students during their tenure in the program.

The PhD program is highly flexible, offering a wide array of concentrations and cognates. Moreover, heavy emphasis is placed on individualized instruction and close student-faculty interaction. Instruction takes the form of regular classes, doctoral seminars, and independent study and research. Students are also encouraged to attend lectures and discussions by visiting scholars throughout the year.

The six concentrations offered in the PhD program are accounting, finance, human resource development, logistics, marketing, and statistics.

More detailed information concerning these specific areas is available by writing directly to each department or by accessing the College of Business Administration Web page.

Requirements

Doctoral students must file a program of study that has been approved by their doctoral committee within one year of completing their first year of doctoral studies. This committee is nominated by the department chairperson in a student's intended area of concentration, subject to the Graduate Council's policies and procedures.
Students must complete at least three years of full-time coursework beyond the baccalaureate degree, with two years of residence on the Knoxville campus.

Students are required to have a sound and broad base on which to build their PhD coursework. The departmental doctoral advisor will work with the student to determine what, if any, courses need to be completed. All such work is subject to approval by the temporary doctoral advisory committee and the Dean of the MBA Program. Specific concentrations may have prerequisites.

Research Tools. A minimum of 9 semester hours of graduate research methods must be completed. At least 6 semester hours in statistics courses beyond Statistics 531 are required. The remaining 3 semester hours may be completed in additional statistics courses (not to include Statistics 531) or in other areas such as research methodology, management science, computer science, econometrics, and psychometrics.

Concentrations – accounting, finance, human resource development, logistics, marketing, and statistics. The concentration is the focal point of the PhD program. Students are expected to master the literature and research techniques in the concentration area and to do quality research as evidenced by the preparation of an acceptable dissertation. A minimum of 12 semester hours of coursework is required, including at least 9 hours of doctoral seminars. Graduate work taken in the concentration at other institutions is considered by the temporary doctoral advisory committee in approving the specific coursework required. See the appropriate departments for specific course requirements.

A minimum of 9 semester hours of graduate coursework is required in an area outside, but complementary to, the concentration. The student may choose the cognate from one of the following— one of the six concentration areas listed above, economics or a related area in another school or college of the university. Hybrid cognates combining courses from multiple disciplines are permitted with the approval of the doctoral advisor and the temporary doctoral advisory committee.

Comprehensive Examinations

Comprehensive written examinations over the concentration area are required of each person seeking candidacy for the PhD. This examination is administered in two sessions of approximately 4 hours each. Students qualify in the cognate area by completing a one-session, 4-hour examination or an equivalent jointly approved by the student’s major professor and the student’s advisor in the cognate area. Comprehensive examinations are generally offered during the fall and spring terms. Comprehensive examinations must be taken within five years of matriculation.

When either the concentration or cognate area examination is passed, the remaining examination must be passed within the next thirteen months.

Doctoral Committee

A doctoral student is advised to give serious attention early in the program to the composition of his/her doctoral committee. In accordance with Graduate Council policy, the student and the major professor identify a doctoral committee composed of at least four faculty members, three of whom, including the chair, must be approved by the Graduate Council to direct doctoral research. When the doctoral committee has been formed, the temporary doctoral advisory committee ceases to exist.

Admission to Candidacy

Students may apply for admission to candidacy for the PhD after maintaining at least a B average in coursework, successful completion of comprehensive examinations, and acceptance of a research proposal for the dissertation by the student’s doctoral committee.

Admission to candidacy must be approved at least one full semester prior to the date the degree is conferred. (Admission in the fall permits graduation in the following spring semester.) Application for admission to candidacy must include a listing of all courses taken in each of the fields required for the degree (business functional areas, basic disciplines, concentration and cognate area). Graduate courses accepted from other institutions must be included. Under “Other Requirements,” the date of acceptance of the research proposal by the doctoral committee should be indicated. The application must be approved by the student’s doctoral committee and the Associate Dean before submission to the Office of the University Registrar.

Dissertation (24 hours minimum)

The student must complete a dissertation embodying the results of original research demonstrating the ability to do scholarly writing. The dissertation is supervised by the candidate’s doctoral committee, which must certify its completion and acceptability after oral defense of the candidate’s research effort.

The dissertation normally must be completed within three years of the student’s advancement to candidacy.

MASTER OF ACCOUNTANCY
ACCOUNTING MAJOR

The objective of the Master of Accountancy program is to prepare individuals who have a high level of ability and motivation for successful careers in professional accounting and industry. This nationally recognized program uses active learning methods to engage students in global business planning, practices, and strategies. The program offers students the breadth of a broad business perspective and exposure to cutting-edge management issues. It also provides students with the technical depth required for a career that begins in auditing or taxation. Coursework includes a particular focus on the development of analytical skills, communication skills (both oral and written), and research skills.

The Master of Accountancy program is a full-time, weekday program. The nature of the program precludes students from simultaneously working full-time outside of classes. UT’s accounting undergraduate and graduate programs are accredited by AACSB International and are among the first programs in the nation to receive this accreditation.

Admission

Students may begin graduate coursework for the MAcc only in fall semester. The application deadline is March 1 (February 1 for international students) and applications received after that date will be considered as space allows.

The program is designed both for students who have completed an accredited baccalaureate degree program with a major in accounting and others. Students with an accounting degree from an accredited baccalaureate degree program normally meet all prerequisites for the program. Students with outstanding undergraduate records in areas other than accounting may enter the MAcc program, (which starts in the fall semester) by completing coursework in introductory accounting and economics, and the following prerequisite undergraduate courses – Accounting 311, 321, 411, 414, and 431; Information Management 341; and Finance 301, or their equivalents as approved by the Director of the MAcc program. All prerequisites must be completed prior to the start of graduate coursework in fall semester.

In addition to the general admission requirements, MAcc applicants are required to take the Graduate Management Admissions Test (GMAT) and submit information on forms provided by the Department of Accounting and Information Management. Applicants whose native language is not English must submit results of the Test of English as a Foreign Language (TOEFL).

For admission to the MAcc program, consideration is given to:

- Applicant’s academic record with particular attention to the last two years of undergraduate work.
- Scores on the GMAT, and TOEFL for those whose native language is not English.
- Internships and/or work experience and other activities that demonstrate potential for leadership.
- Recommendations from professors and/or work supervisors.

The admission decision is based on all factors that make up the total application; therefore, there is no automatic cutoff for either grade point average or GMAT scores.

Students will be expected to have a laptop computer for use in the classroom and for assignments. Additional details concerning the hardware and software configurations required are posted on the departmental Web site.

Requirements

A student’s program encompasses a minimum of 30 semester hours of graduate coursework. Specifically, the student must complete courses in accounting and other areas as indicated below. Each course is 3 semester hours of graduate credit.

Students take 12 hours each semester and 6 hours in the first summer session. Program requirements are:

- Business Core (12 hours) Business Administration 521, 522, 523, 524.
- Concentration (18 hours).

Two concentrations are available.

Audit and Controls
Accounting 507, 518, 519, 531; Information Management 541, 543
Taxation
Accounting 531, 532, 533, 534, 539, and an additional course.

Students may further modify their programs with approval of the Director of the MAcc program.

Transfer Credits

A maximum of 6 semester hours taken at other AACSB accredited institutions that otherwise conform to the transfer policy of the Graduate Council may be credited toward MAcc requirements.

Other Requirements

To qualify for the degree, a student must maintain a B average (3.0) or above in the program. The student must satisfactorily demonstrate his/her ability to recognize, analyze, and solve accounting policy problems and integrate concepts from the various areas of accounting by passing a comprehensive written examination. This examination is included in the capstone courses (Accounting 519 for the audit and controls concentration and Accounting 539 for the taxation concentration).

DOCTOR OF PHILOSOPHY
BUSINESS ADMINISTRATION MAJOR
ACCOUNTING CONCENTRATION

This degree provides a research-oriented terminal qualification for those seeking entry-level faculty positions in accounting. Students take approximately three years of coursework beyond the bachelor’s degree, including a doctoral sequence designed to expose students to various areas of accounting research. Courses in accounting and other areas are selected to supplement the student’s individual background and to prepare the student in an area of accounting specialization (financial, managerial, auditing, tax or systems). The final year is normally spent completing the doctoral dissertation. Minimum course requirements are 12 hours including 611, 612, 619, and one other accounting course to be approved by the PhD accounting program advisor.

DEGREES
MA, PhD
ECONOMICS MAJOR

Academic Standards
A graduate student whose grade point average falls below 3.0 will be placed on probation. A student on probation will be dropped from the program unless his/her cumulative graduate grade point average is 3.0 or higher at the end of the probationary period. The probationary period is defined as the next semester’s coursework established by the degree program for full-time students and the next two semesters’ coursework as established by the degree program for part-time students.

Student's Right to Petition
Graduate students in good academic standing have the right to petition the department for modification of departmental degree requirements and redress of grievances. Petitions must be in writing and addressed to the Director of Graduate Studies.

MASTER OF ARTS
ECONOMICS MAJOR

Admission to the MA program is based on undergraduate academic performance and on scores from the general portion of the GRE. The student may choose either the thesis or non-thesis option.

Requirements
Non-Thesis Option
Thirty hours of coursework at the 400 level or above. Of these, at least 24 hours (at least 18 hours of which are in economics) must be at the 500 level or above. Of the minimum of 18 hours in economics at the 500 level or above, 12 hours must consist of 511, 512 and 513, 514, and the remaining 6 hours must be in one field of economics. Of the 30 hours, a maximum of 9 hours in courses approved by the department may be taken in fields other than economics. Students electing the non-thesis option are required to pass a final comprehensive examination.

Thesis Option
Thirty hours of coursework at the 400 level or above, including at least 24 hours at the 500 level or above, 6 hours of which may be thesis hours. Of the remaining 18 hours at the 500 level or above, at least 15 hours must be in economics and must include 511, 512, 513, and 514. A maximum of 6 hours may be in an area other than economics.

DOCTOR OF PHILOSOPHY
ECONOMICS MAJOR

Admission to the PhD program is based on promise of outstanding scholarship as demonstrated by previous academic performance, by scores achieved on the general portion of the GRE, and by recommendations.

Requirements
The program requires a minimum of 48 hours of coursework beyond the bachelor's degree or 24 hours beyond the master's degree, plus at least 24 hours of 600 Doctoral Research and Dissertation, and successful completion of the following.

Quantitative Methods
Microeconomic theory and macroeconomic theory by a qualifying exam taken not later than the beginning of the fourth semester of study.

Economic Theory
Completion of 581, 582 and 583 with grades of B or better, or by qualifying examination.

Other Requirements
Students failing a qualifying examination must retake the examination the next time offered. A qualifying examination may be taken a third time only with approval of the department. Failing a qualifying examination for a third time will result in dismissal from the doctoral program.

Students are required to demonstrate competence by comprehensive examination in at least two fields of specialization in economics. Students failing a comprehensive examination must retake the examination the next time offered. A comprehensive examination in a specific field may be taken a third time only with approval of the department.

Students are required to complete with a grade of B or better two elective courses in economics at the 500 level or above, outside the core subject areas and outside the fields of specialization.

Students are required to complete a doctoral dissertation and to defend it successfully before the faculty.

DEPARTMENT OF FINANCE
http://bus.utk.edu/finance
James W. Wansley, Head
Phillip R. Daves, Doctoral Program Advisor

Professors
Black, H.A. (James F. Smith, Jr. Professor), PhD (Ohio State)

Wachowicz, J.R. (AmSouth Scholar), PhD (Illinois)
Wansley, J.W. (Clayton Homes Chair of Excellence), PhD (South Carolina)
DOCTOR OF PHILOSOPHY
INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY MAJOR

Admission

Applicants for admission should request information and application forms from both the Office of Graduate and International Admissions, 218 Student Services Building; and the Director, Industrial and Organizational Psychology Program, 408 Stokely Management Center, The University of Tennessee, Knoxville, Tennessee 37996-0545.

Two separate applications must be completed. One Graduate Application for Admission (apply for major in industrial and organizational psychology) and one application for admission to the industrial and organizational psychology major. New students are admitted in fall semester only. Applications must be received by Graduate and International Admissions by February 1.

The master’s degree with a major in industrial and organizational psychology is generally not required of individuals pursuing a doctoral degree.

At least one year of college mathematics and one course in statistics are required. Ordinarily, an undergraduate grade point average of 3.7 or above is required with no evidence of special weakness in mathematics and physical sciences.

Test scores on each section of the general portion (verbal and quantitative) of the Graduate Record Examination (GRE) are required. Customarily, those students admitted to the program have performed at or above the 69-79th percentile on the general tests. (This corresponds to a raw score of approximately 600 on each of the tests.)

Requirements

The PhD with a major in industrial and organizational psychology can be completed with a minimum of 90 semester hours in the major. Students must be in residence full time for one year; must maintain an overall 3.0 grade point average with no more than one grade below B in the Industrial/Organizational Psychology, General Psychology, and Research Core; must complete an applied research project prior to beginning dissertation work; must pass a comprehensive examination; and must pass a final oral examination on their dissertation research.

MAJORS DEGREES

Business Administration
Human resource development concentration

Human Resource Development
PhD

MAJORS DEGREES

BUSINESS ADMINISTRATION MAJOR
HUMAN RESOURCE DEVELOPMENT CONCENTRATION

Admission

Applicants for admission should request information and application forms from both the Office of Graduate and International Admissions, 218 Student Services Building and the Human Resource Development Program, 408 Stokely Management Center, The University of Tennessee, Knoxville, Tennessee 37996.

Applicants are to submit an application for admission to Graduate and International Admissions. Additionally, applicants are to submit an application, three letters of reference from individuals familiar with their potential for success in academic work, and a statement describing personal career objectives directly to the Human Resource Development Program. Applicants must hold a bachelor’s degree from an accredited institution and present evidence of ability to do graduate work, including a GPA of 3.0 on a 4.0 scale for the last two years of undergraduate work. Any student below this level of academic quality must justify admission via other exceptional credentials. If the applicant has prior work experience in human resource development, a reference letter should be provided by the work supervisor. Applicants without an undergraduate degree in an area related to human resource development, previous human resource employment experience, or a statistical background may be required to complete additional coursework as part of their program. Recent Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores are required of all applicants. Deadline – new students are admitted in fall semester only. Applications must be received by the Graduate and International Admissions Office by February 1 and the Human Resource Development Program by March 1.

Requirements

The human resource development master’s non-thesis program is 39 hours. All students must take the program core of 18 hours, consisting of Human Resource Development 510, 556, 557, 559, 561, and 563. In addition to the program core, all students must complete Management 521 and 6 hours of 400- and/or 500-level courses in human resource management. For the remaining 12 hours, students will select four out of the five following courses – Human Resource Development 511, 517, 518, 519, or 520.

DOCTOR OF PHILOSOPHY

HUMAN RESOURCE DEVELOPMENT CONCENTRATION

Admission

Applicants for admission should request information and application forms from both the Office of Graduate and International Admissions, 218 Student Services Building, and the Human Resource Development Program, 408 Stokely Management Center, The University of Tennessee, Knoxville, Tennessee 37996.

Applicants are to submit an application for admission to Graduate and International Admissions. Additionally, applicants are to submit an application, three letters of reference from persons familiar with their potential for success in doctoral work, and a statement describing personal career objectives directly to the Human Resource Development Program. New students are admitted in fall semester only. Applications must be received by the Graduate and International Admissions Office by February 1 and the Human Resource Development Program by March 1.

Applicants must hold a master’s degree from an accredited institution and present evidence of ability to do PhD work, including having maintained a graduate GPA of 3.3 or better, on a 4.0 scale. Applicants without a graduate degree in an area related to human resources may be required to complete additional coursework as part of their program. If the applicant has prior work experience in human resource development, human resource management, or a related occupational area, a reference letter should be provided by the work supervisor. Recent Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores are required of all applicants. Any person whose native language is not English must submit results of the Test of English as a Foreign Language (TOEFL).
Requirements

The Doctor of Philosophy degree with a major in business administration and a concentration in human resource development is for graduate students who seek careers in higher education or as managers/administrators of human resources. The curriculum, a minimum of 60 hours, is designed to enable students to achieve professional objectives, develop needed competencies, and gain desirable experiences and understanding of human resource development. Students not possessing a master's degree before acceptance to the program may be required to complete additional coursework before enrolling into any courses associated with the doctoral program. Students must be in residence full time for one year and must maintain an overall 3.0 grade point average with no more than one grade below B in the human resource development courses, research core, and business core. Students who did not complete a thesis in their master’s program must complete a pre-doctoral research project prior to beginning dissertation work. All students must pass a comprehensive examination and a final oral examination on their dissertation research. Detailed information regarding the PhD concentration program of study may be obtained from the program liaison. Course equivalencies and substitutions must be approved by the student’s doctoral committee and program liaison.

For the latest updates check the home page of the Human Resource Development Program through the College of Business Administration’s Web site.

  Industrial statistics concentration
Statistics MS

Graduate Certificate Program
  Applied Statistical Strategies Certificate

MASTER OF BUSINESS ADMINISTRATION
BUSINESS ADMINISTRATION MAJOR
OPERATIONS MANAGEMENT CONCENTRATION

Minimum course requirements are Operations and Management Science 540, 541; and one course from Management Science 526, 551, Statistics 566, Industrial Engineering 522, 526, or an applicable course approved by designated faculty.

MANAGEMENT SCIENCE

MASTER OF SCIENCE
MANAGEMENT SCIENCE MAJOR

The Master of Science degree with a major in management science is designed as preparation for a career in the application of quantitative techniques for the solution of complex problems. The program's flexibility also makes it appropriate as preparation for doctoral study in management science.

Management science coursework will expose students to both the theoretical development of quantitative techniques and their application to managerial decision making. In addition to the development of sufficient mathematical maturity for creative use of quantitative skills, the program requires concentrated study in a supporting area.

Supporting areas are available in other departments of the College of Business Administration as well as in computer science, public administration, geography, health, and other areas, subject to approval by the Management Science Committee.

Admission

The master's program requires three applicant recommendation forms and the GRE or GMAT. Applications are encouraged from all majors, but a mathematics background equivalent to the completion of at least two years of college calculus and proficiency in a computer language is required. The program is designed to be completed in four semesters by full-time students. However, students may start the program in any semester and may pursue the Master of Science degree with a major in management science on a part-time basis.

Requirements

1. Core Requirements ................................................. 21
2. Applied Statistics Course ................................ ...... 3
3. Applied Specialization Area (as approved by advisor) ......... 6
4. Information Systems Elective (as approved by advisor) ......... 3
5. Free Elective (as approved by advisor) .......................... 3

Total 36

1 Management Science 531, 532, 533, 534, 551; Statistics 563; Management 541.
2 Choose from Statistics 566, 571, 572, 573, 574, 575.

A thesis option is available to qualified students. The Management Science Committee will work closely with the student in tailoring a program to his/her needs. The committee must approve a tentative overall program during the student's first semester and must approve all courses on a semester-by-semester basis.

Recognizing the diverse backgrounds and needs of management science MS students, the Management Science Committee is prepared to waive some of the above requirements on an individual basis. The total course load will remain 36 hours for all students.

DOCTOR OF PHILOSOPHY
MANAGEMENT SCIENCE MAJOR

The PhD with a major in management science is designed to prepare students for research related to the application of mathematical tools to complex decision making. Three primary objectives of the program are

• To provide, through management science coursework, a thorough knowledge of common management science/operations research mathematical models and their uses.

• To provide sufficient advanced study in a supporting area to qualify the graduate for a joint-faculty position in the supporting area and management science. The candidate may choose from the business functional areas (accounting, finance, marketing, management, and transportation and logistics) or other disciplines (e.g., computer science, forestry, ecology, and public administration).

• To develop in the student, through coursework in mathematics, statistics and computer science, a high degree of mathematical maturity to enhance a potential career in management, research, or teaching.

Admission

The doctoral program requires three applicant recommendation forms and the GRE or GMAT, in addition to the Graduate Council’s requirements.

Requirements

A minimum of 48 semester hours of coursework taken for graduate credit (exclusive of thesis or dissertation) is required. Some of the hours may be the coursework from a master’s program, although a master’s is not a prerequisite for the doctorate. The candidate must complete a minimum of 24 hours at the University of Tennessee, Knoxville, at least 6 of which must be at the 600 level. Both of these requirements are exclusive of thesis or dissertation credits. Entering students who have completed graduate studies in applicable fields will be granted course credits for work that is equivalent to required courses in the program.

The program includes approximately 16 to 20 semester hours of coursework in the applied area.
Qualifying Examinations

The student must demonstrate mastery of probability theory and statistical inference (Statistics 563, 564) by passing a written qualifying examination.

Mastery of 12 to 14 semester hours in mathematics coursework must be demonstrated by passing a written qualifying examination. Topics normally include numerical analysis (either Mathematics 471, 472, 453, and 571, or 571-572) and real analysis (Mathematics 445-446). Other options may be approved. In exceptional circumstances, the faculty will consider waiving the mathematics and/or statistics qualifying examinations.

These requirements generally are completed by the end of the first year of the program.

There is no foreign language requirement.

Comprehensive Examination

Prior to admission to candidacy for the degree, and normally after completion of the second year of the program, the student must pass a written comprehensive examination covering the theory of deterministic and stochastic management science models. Topics included in this examination are determined on an individual basis. Students will be expected to demonstrate an integrative ability that goes beyond simple mastery of course content.

Research and Dissertation

The student must complete 24 hours of Management Science 600 (Doctoral Research and Dissertation), through which he/she is expected to make a significant contribution to the science. A final oral examination is conducted over the dissertation and such other segments of the program that the faculty committee deems appropriate. This effort, which is beyond the minimum 48 hours of coursework, normally is completed in the third year of the program.

Academic Standards

A graduate student in the College of Business Administration whose grade point average falls below 3.0 will be placed on probation. A student on probation will be dropped from the program unless his/her cumulative graduate grade point average is 3.0 or higher at the end of the probationary period. The probationary period is defined as the next semester’s coursework as established by the degree program for full-time students and the next two semester’s coursework as established by the degree program for part-time students.

Prerequisites for Management Science Courses

The management science program is interdisciplinary and students in other degree programs are encouraged to enroll in management science courses. Course prerequisites are designed to indicate the level at which courses are taught. Interested students whose prior coursework does not match the prerequisites are encouraged to seek the instructor’s guidance and consent to enroll.

STATISTICS

MASTER OF SCIENCE

Statistics Major

The Master of Science with a major in statistics provides students with the foundation in theory and practice required for careers in applied statistics. In addition to the education traditionally offered in such a program, the department offers a concentration in industrial statistics, which provides unique opportunities for experiences in practical applications of statistics. Through involvement in the University of Tennessee Practical Strategies for Process Improvement Institute and related programs, department faculty participates in a variety of consulting and research projects in industry. Students may supplement their classroom study with an industrial internship and participation in research projects dealing with industrial problems. Department faculty also collaborates with researchers from many academic disciplines.

Statistics graduate students may gain consulting experience by working with faculty involved in these consulting activities. All students are encouraged to participate in supervised internship or consulting activities as part of their graduate program.

Individuals with undergraduate or graduate degrees in other disciplines are encouraged to enter the program. The candidate’s mathematical background should include differential and integral calculus of several variables. Individuals with limited mathematical background should seek departmental guidance regarding specific ways in which they may prepare themselves for the program by taking coursework as non-degree students. Requests for application forms and further information may be sent to the Director of Graduate Studies, Department of Statistics, Operations and Management Science, Stokely Management Center, The University of Tennessee, Knoxville, Tennessee 37996-0532 or fguess@utk.edu or http://stat.bus.utk.edu.

Admission

Applicants for statistics must submit results of the Graduate Record Examination (GRE) general portion, although GMAT exam scores may be substituted. Applicants for the statistics program must have completed at least two years of college-level mathematics, including the calculus of several variables and matrix algebra, and be proficient in a computer language. Applicants whose native language is other than English must submit results of the Test of English as a Foreign Language (TOEFL).

Requirements

A minimum of 33 hours must be completed for the master’s degree. Six hours in statistical methods, 6 hours in statistical theory and 1 hour in statistical computing are required of all students. Students must complete a minimum of 21 hours in approved statistics courses, exclusive of consulting, internship, independent study, or thesis.

Thesis or Independent Study

The thesis option for the master’s degree requires the student to complete 6 hours for the thesis. Alternatively, the non-thesis option requires a minimum of 3 hours for an independent study project.

Comprehensive Examination

Students must pass a two-part written comprehensive examination covering theory and methods. Upon failing either part of the examination, the student may retake it. The result of the second examination is final. For students writing a thesis, this examination must be passed before the thesis is defended.

INTERCOLLEGIATE GRADUATE STATISTICS PROGRAM

The Intercollegiate Graduate Statistics Program (IGSP) is a formal University of Tennessee, Knoxville, academic program established to enable students to earn either a minor or an MS in statistics simultaneously with a master’s or doctoral degree in another department. Approved coursework taken to meet doctoral requirements in the student’s home department may also be credited toward the MS in statistics. Similarly, approved coursework in statistics taken to meet the requirements for a master’s or doctoral degree in another department may also count toward the minor in statistics. The program is open to graduate students in all departments, which have an approved minor, and/or MS joint major curriculum offered through the program. The program is administered by an executive committee, consisting of college representatives from all colleges with approved programs, with advisory input from the program faculty.
Requirements

Degree Program                  Hours in Approved IGSP Courses
Master's in home department, minor in statistics .......... 9
Master's in home department, MS in statistics* ............. 24
Doctorate in home department, minor in statistics ......... 15
Doctorate in home department, MS in statistics* .......... 24

* The MS in statistics requires 33 hours.

Course options consist of courses in statistics, offered either by the Department of Statistics, Operations and Management Science or by other departments, which have been reviewed and approved by the IGSP Executive Committee. Students taking an MS with a major in statistics must pass the two-part comprehensive examination covering statistical theory and methods. Students taking a minor in statistics in conjunction with a doctorate in another field must pass a written comprehensive examination in statistics, constructed and evaluated by the student's examination committee. No formal comprehensive examination is required of students earning a statistics minor along with a master's in another field beyond questions which the home department wishes to include as part of the comprehensive examination for the master's degree.

Procedures

The student's home department must have approved a program of courses with the executive committee. That program will specify the sequences of statistics courses, chosen from the IGSP approved list, that are considered appropriate by the home department. Students who wish to participate in this program should contact their college representative or the Chair of IGSP in the Department of Statistics, Operations and Management Science.

The student's graduate committee must include a member of the IGSP faculty. For students seeking doctoral degrees or the Master of Science with a major in statistics, the committee member must be a faculty member in the Department of Statistics, Operations and Management Science.

The student's Admission to Candidacy form must contain all courses required for the chosen degree program set off in a group and labeled, "Statistics courses required for the minor or MS in statistics." Should the student decide not to apply for admission to the program until after completion of some of the courses, the student's major professor should file a program change with the cooperating departments and assist the student in obtaining a Department of Statistics, Operations and Management Science faculty member to serve on the student's graduate committee.

Successful completion of the statistics MS or minor is recognized by appropriate documentation on the student's transcript. Students who do not complete the requirements of the minor or MS will still receive academic credit for the statistics courses they have successfully completed.

For information contact msyounger@utk.edu or http://www.bus.utk.edu/stat/igsp.

DOCTOR OF PHILOSOPHY
BUSINESS ADMINISTRATION MAJOR
STATISTICS CONCENTRATION

This concentration provides students with a broad knowledge of the field of statistics, the ability to apply statistics in practical situations to problems of business and industry and the ability to develop new statistical methods; all of which takes place while students are exposed to coursework in the basic functional areas of business.

Minimum course requirements are 592, 662, 663, 664, 691, and two courses chosen from 666, 673, 674, 679.

GRADUATE CERTIFICATE IN APPLIED STATISTICAL STRATEGIES

The Department of Statistics offers a graduate certificate in applied statistical strategies. The program is designed for the part-time student and several of the courses are offered through distance education.

The 12-hour certificate is available by completing two required courses, 571-572, and two electives selected from 573, 575, 579, and 585 or 566 or other graduate statistics courses as approved by the Statistics Graduate Program Committee Chair.
The College of Communication and Information fosters among students and the larger community a sense of the legal and ethical responsibilities of access to information and the exercise of expression in a democratic society. Additionally, the college serves the professional goals of preparing students for careers in the communication and information professions.

The college includes four schools – School of Advertising and Public Relations, School of Communication Studies, School of Information Sciences, and School of Journalism and Electronic Media. These programs came together as a single College of Communication and Information in 2002. The college offers two master’s and one doctoral degree.

The Master of Science with a major in communication and information is a college-wide degree offering multiple concentrations that typically are housed within one of the schools. These concentrations have a core curriculum that focuses on theory and research. Students then take coursework supporting the concentration as well as electives. They also engage in a capstone experience. Concentrations in advertising, journalism and electronic media, and public relations are accredited by the Accrediting Council on Education in Journalism and Mass Communication.

The Master of Science with a major in information sciences is designed primarily for librarians and information professionals. That program is coordinated by the School of Information Sciences and involves both on-campus and distance education coursework. This program is accredited by the American Library Association and the National Council for Accreditation of Teacher Education. More details on this degree are provided in the listing for the School of Information Sciences, which follows information about college-wide degrees.

The Doctor of Philosophy with a major in communication and information builds on core courses that focus on knowledge creation across the disciplines represented by the college. Additional required coursework in a primary and cognate area will be selected by the student and his/her program committee. Communication and information is available as a secondary area for students majoring in other departments.

Facilities for research and service include the Center for Information Studies (CIS) and the Communication Research Center (CRC).

Academic Standards
A student in the College of Communication and Information whose graduate grade point average, not including incomplete grades, is below 3.0 at any time after the end of 12 hours of graduate credit will be placed on probation. A student on probation will be dropped from the program unless his or her cumulative graduate grade point average is 3.0 or higher at the end of the probationary period. The probationary period is defined as the next 12 semester hours of graduate coursework attempted that is specified in the student’s degree program. Exceptions to this policy may be made only with the approval of the Associate Dean for Academics of the College of Communication and Information on the recommendation of the student’s faculty committee.

Admission and Assistance for College-Wide Degrees
Applicants must meet admission requirements of the Graduate Council. In addition, they must complete the Graduate Record Examination, rating forms, and application forms as required by the College of Communication and Information. All application materials are screened by an admissions committee authorized by the faculty of the College of Communication and Information.

New students normally begin classes in the fall semester. Applications for both admission and financial aid are due on February 1.

Graduate assistantships are available for students in college-wide programs. Assistantships may be for teaching or research. Assistantships are highly competitive and carry a waiver of tuition and fees as well as a stipend and require that recipients work 10-20 hours per week in the college.

For application forms and other information about college-wide graduate programs in Communication and Information, write to Associate Dean for Academics, College of Communication and Information, 420 Communications Building, the University of Tennessee, Knoxville, Tennessee 37996-0347 or go to http://www.cci.utk.edu/gradstudies.
**MASTER OF SCIENCE COMMUNICATION AND INFORMATION MAJOR**

The Master of Science with a major in communication and information is intended for students who desire careers related to a variety of communication, information, or media fields, and those who seek a deeper understanding of the role of communication and information in organizations, media, and society. Both thesis and non-thesis options are available. See catalog listings for the School of Advertising and Public Relations, School of Communication Studies, and the School of Journalism and Electronic Media for information about concentrations and the courses offered.

**Admission**

A baccalaureate degree in communication, information sciences, or a related field is recommended. Admission is possible with other baccalaureate degrees. However, all applicants without the appropriate background may be required to take up to 18 semester hours of prerequisite and corequisite courses as determined by the school in which the student is enrolled. Master’s students who have had no courses in their major area of concentration may expect to spend four or more full-time semesters in the program.

Minimum requirements normally include a 3.0 (4.0 system) grade point average in undergraduate studies and scores at or above the fiftieth percentile in verbal, quantitative, and analytical aptitude on the Graduate Record Examination.

**Requirements**

The MS program combines a cross-disciplinary core in theory and methods with a concentrated set of courses in a primary area and electives from outside the concentration. Both thesis and non-thesis options require a minimum of 34 hours of approved graduate work.

**Core (7 hours)**

Communication and Information 501 (Orientation, 1 hour), Communication and Information 540 (Theory, 3 hours), and a research methods course (Advertising 530, Communication Studies 505, Information Sciences 540, or Journalism and Electronic Media 512) to be taken during the first two semesters of the student’s program, except with the written approval of the Associate Dean of Academics of the college.

**Concentration (15 hours)**

Concentrations are typically housed within one of the academic units. Students may also construct their own coherent set of courses for a concentration with the approval of the Associate Dean for Academics for the college. At least 6 hours of the concentration must be at the 500 level or above.

**Approved Electives**

Six hours of electives for students in the thesis option, or 9 hours of elective for students in the non-thesis option.

**Thesis or Project**

Six hours of thesis work, or a 3-hour project.

**Other Requirements**

All students must take courses from at least two of the schools in the College of Communication and Information.

Additional hours may be required for those who do not have academic prerequisites.

Students interested in subsequent entry into a doctoral program are advised to pursue the thesis option and to take additional courses in communication theory and research, subject to advisor’s approval. After completion of the formal program of coursework and research for the thesis option, the student must pass an oral examination conducted by his/her graduate committee.

Students interested in pursuing careers as communication and information practitioners are advised to complete a project.

This non-thesis option requires a written comprehensive examination and an oral defense of the project.

**DOCTOR OF PHILOSOPHY COMMUNICATION AND INFORMATION MAJOR**

The PhD with a major in communication and information is intended to prepare scholars for teaching, research, administration, and service in the fields of communication and information. The goal of the PhD program is to prepare graduates for positions in research-intensive institutions. This preparation will also enable them to work at other types of educational institutions and industry positions. Doctoral students develop publishable research in their coursework, and provide evidence of publishable research prior to taking comprehensive exams. Graduates are expected to be competent in using at least one research method and should be literate in statistics. The program includes training in the foundational origins and contemporary literature of communication and information theories and professions. The program offers the opportunity for students to learn to be good teachers and to participate in service and outreach activities.

The program is interdisciplinary, consisting of a required core curriculum and primary and cognate areas of study. Core courses begin in the fall semester. The first fall and spring semesters must be spent in residence (i.e., enrolled as a full-time student). Attendance at a fall orientation session is required.

**Admission**

The master’s degree is required for entry into the doctoral program. Students lacking academic or professional experience in communication and information may be required to take prerequisite courses.

The following are normally minimal requirements for admission to full potential candidate status.

- A 3.0 (4.0 system) grade point average in undergraduate studies, and 3.5 for graduate work.
- At or above the fiftieth percentile in verbal, quantitative and analytical aptitude on the Graduate Record Examination.
- Recommendation letters from at least three former teachers or professional colleagues.
- A statement of the applicant’s goals and reasons for pursuing the doctorate. Personal interviews with members of the PhD Admissions Committee are recommended and may be required. Professional experience in some field of communication and/or information is a highly desirable criterion for admission.
- For students whose native language is not English and who have not earned an earlier degree at an American college or university, the Test of English as a Foreign Language is required. Students should show mastery of the English language.

**Requirements**

A minimum of 61 hours of approved graduate work is required for the PhD.

**Core courses (16-18 hours)**

Communication and Information 610 and 615; 3 hours of statistics; and 1 to 3 hours of Communication and Information 620.

**Primary Concentration**

Twelve hours in a primary concentration as defined by the student and his/her program committee.

**Cognate Area**

Nine hours in a cognate area as defined by the student and his/her program committee.

**Dissertation**

Twenty-four hours of dissertation.
Other Requirements

Within the primary concentration and cognate areas, a total of 6 credit hours must be from theory-intensive courses and 6 hours must be from methods-intensive classes. Courses both inside and outside the college (including graduate-level courses in the schools) may be identified as theory- and/or method-intensive. A list of eligible courses will be provided for students. Students may also submit courses to their program committee for consideration as theory- and/or method-intensive.

All courses require the approval of the student’s program committee. The program committee is assembled in the first semester of the student’s studies. A program plan must be submitted no later than the end of the second semester of study. The program plan may be subsequently revised as needed.

Admission to candidacy must be attained at least two semesters prior to graduation and requires successful completion of a written comprehensive examination.

Each doctoral student’s progress will be reviewed annually by the Graduate Committee of the College of Communication and Information in conjunction with the program committee chair. Results will be reported to the student by his/her program committee chair, who will convey the graduate committee’s recommendation concerning the student’s status in the program and suggestions for improvement in performance.

Planned course offerings in the College of Communication and Information for a full calendar year are available the preceding November. This information is available from the Graduate Studies Office, 420 Communications Building, 865-974-6651. Also see courses listed under the following academic disciplines – advertising, communication studies, information sciences, journalism and electronic media, and public relations.

MAJORS DEGREES
Communication and Information MS, PhD
Communication studies concentration

The School of Communication Studies offers a concentration area for the Master of Science with a major in communication and information and participates in the interdisciplinary doctoral program.

Graduate courses in communication studies also provide opportunities for students in a variety of disciplines to investigate how messages can effect changes in the knowledge, the understanding, the ideas, the attitudes, or the behavior of other human beings.

The School of Communication Studies provides a program leading to the preparation of librarians and information professionals for work in all types of libraries and information centers. The program of study includes a graduate curriculum leading to the Master of Science degree. The program is accredited by the American Library Association. The School of Information Sciences also participates in the interdisciplinary doctoral program.

Admission

Applicants to the information sciences program must have a minimum undergraduate grade point average of 3.0 or a satisfactory graduate degree grade point average for admission as a potential candidate for the MS.
The verbal, quantitative and analytical aptitude portions of the Graduate Record Examination (GRE) are required of all applicants unless a graduate degree has been completed prior to application for admission. Applicants should take the GRE at least one semester in advance of application for admission and are expected to score 1500 points or better.

A personal data sheet and three recommendation forms (obtained from the School of Information Sciences) should be returned to the admissions office of the school. Foreign applicants are required to take the Test of English as a Foreign Language.

**MASTER OF SCIENCE INFORMATION SCIENCES MAJOR**

The program leading to the Master of Science degree with a major in information sciences requires 42 semester hours of graduate courses, including 3 courses required of all students. Either a thesis or a non-thesis option is available, with 6 hours required for thesis credit. At least 33 hours must be taken within the School of Information Sciences curriculum, and up to 9 hours outside of the school can be taken, including a maximum of 6 hours outside the college. No more than 6 hours may be taken from another university.

**Requirements**

Three courses are required of all students – 510, 520, 530. (Students seeking licensure see track requirements below.) These courses address the evolving information environment, organization and representation of information, and information access and retrieval. The courses 510, 520, and 530 are prerequisites to all courses for students enrolled in the MS program.

The faculty regards the following courses as vital to professional success – 540, 550, 560. These courses address research, management and leadership in information organizations, and the concepts of developing and managing collections. One course, 550, serves as a prerequisite to courses in academic, corporate and public library management.

**Individualized Curriculum Approach**

Students, in consultation with their advisor, may wish to pursue a curricular focus to develop an individualized program of study. Graduates of the school have prepared themselves for a variety of careers, including positions as corporate information specialist, public librarian, records manager/archivist, Web page designer, indexer/abstractor, online information retrieval specialist, medical or law librarian, reference librarian, youth services specialist, and many others. Students are encouraged to take advantage of the individualized curricular approach.

Whatever individualized curriculum is chosen, all students who complete the program receive a MS accredited by the American Library Association (ALA).

For those pursuing Tennessee Department of Education licensure as a school library information specialist, stipulated requirements apply. See the following section.

**Tennessee State Department of Education School Library Information Specialist Requirements**

The Tennessee State Department of Education requires School Library Information Specialists to hold the master’s degree. The School of Information Sciences offers four tracks for school library information specialist endorsement.

**Initial Endorsement for Non-Licensed Teachers with no Master’s Degree in Library or Information Sciences**

For those students who do not hold the master’s degree, the requirements for initial endorsement include the three required courses plus 551, 567, 571, 572, 585, 596 (which must be taken twice). Upon completion of the requirements, students will earn a Tennessee State Department of Education license as a School Library Information Specialist.

**Initial Endorsement for Non-Licensed Teachers with a Master’s Degree in Library or Information Sciences**

For those students who hold an ALA-accredited master’s degree and have approval of the faculty advisor, the requirements are a maximum of 24 hours within the school’s program, including the required Information Sciences 595. In addition, students must complete three corequisite courses from the College of Education, Health, and Human Sciences (6 credit hours) beyond the required 24 hours. Upon completion of the requirements, students will earn a Tennessee State Department of Education license as a School Library Information Specialist.

**Additional Endorsement for Licensed Teachers with a Master’s Degree**

The requirements include the three required courses plus 551, 567, 571, 572, 585, and 596 (which must be taken twice). Upon completion of the requirements, students will earn a Tennessee State Department of Education additional endorsement as a School Library Information Specialist.

**Additional Endorsement for Licensed Teachers without a Master’s Degree**

The requirements include the three required courses plus 551, 567, 571, 572, 585, and 596 (which must be taken twice) plus 5 electives (upon approval of the faculty advisor). Upon completion of the requirements, students will earn a master’s degree in Information Sciences and a Tennessee State Department of Education additional endorsement as a School Library Information Specialist.

**Additional Program Requirements Thesis Option**

Students electing the thesis option will write a master’s thesis under close supervision of a thesis committee. Six hours of Thesis (Information Sciences 500) must be taken within the 42 hours required for graduation. (Students may register for more than 6 hours of 500, but only 6 hours will count toward graduation.) Students must be registered for Information Sciences 500 in the semester they complete and defend their thesis. The oral defense of the thesis (final comprehensive examination) substitutes for the written examination that is taken by non-thesis students. The writing of the master’s thesis serves as the culminating experience.

**Non-Thesis Option**

Upon completion of the program, all students who elect the non-thesis option must take and pass a written comprehensive examination. Students may take no more than a total of 12 hours from 591, 594, 599. The number of satisfactory/no credit courses in a student’s program is limited to one-fourth of the total credits required (10 of 42).

**Financial Assistance Opportunities**

Employment with the University of Tennessee Libraries may provide a work-study opportunity for selected students who wish to obtain experience in academic librarianship while pursuing the degree. Such students usually work at least 20 hours each week and thus may extend the period required for the degree. Similar opportunities exist with other libraries and information agencies in the Knoxville area.

Work opportunities in a scientific-technical environment are available through subcontracts with Oak Ridge National Laboratory and the Department of Energy.

A limited number of graduate teaching assistantships are available through the school. Assistantships of this type carry a waiver of tuition and fees as well as a stipend and require that recipients work 10 hours per week in the school.
For application forms and information about financial aid and other information about the Master of Science with a major in information sciences, write to Admissions, College of Communication and Information, The University of Tennessee, Knoxville, 451 Communications Building, Knoxville, Tennessee 37996.

MAJORS DEGREES
Communication and Information MS, PhD

Journalism and electronic media concentration

The School of Journalism and Electronic Media offers a concentration area with professional and research tracks for the Master of Science with a major in communication and information and participates in the interdisciplinary doctoral program.
The College of Education, Health, and Human Sciences was created in 2002 through a merger of the former College of Education and the former College of Human Ecology. The merger of these two colleges, both with rich histories and exemplary records of achievement, resulted from a recognition of complementary institutional missions and a belief that the two colleges, as one, would become more effective in dealing with the complex challenges facing families, schools, and communities in the 21st century.

The union of Education and Human Ecology to form the College of Education, Health, and Human Sciences honors its past independent accomplishments but is now focused on an interdependent future. The College of Education, Health, and Human Sciences is a people-centered college that is intent on enhancing significant aspects of the human condition and, with its disciplines located at the intersection of many of societies greatest challenges, is positioned to make a significant difference through its programs of study, research, and outreach.

The Teacher Education Program at the University of Tennessee is accredited by the National Council for Accreditation of Teacher Education (NCATE). This accreditation covers the initial teacher preparation programs and advanced educator preparation programs.

The College of Education, Health, and Human Sciences holds accreditation with the American Association of Family and Consumer Sciences. Among its accredited academic programs are the following – Mental Health Counseling and School Counseling by the Council for Accreditation of Counseling and Related Educational Programs; Education of the Deaf and Hard of Hearing by the Council on Education of the Deaf; Rehabilitation Counseling by the Council on Rehabilitation Education; School Psychology by the American Psychological Association and the National Association of School Psychologists; Sport Management (Graduate Level) by the NASSM/NASPE Sport Management Program Review Council; Dietetics by the American Dietetics Association; Recreation and Tourism Management by the National Recreation and Park Association/American Association for Leisure and Recreation.

Facilities for research and service include the Academic Enrichment Program, the Affymetrix MicroArray Core Facility, the Appalachian Collaborative Center for Learning, the Assessment and Instruction in Mathematics, the Appalachian Rural Systemic Initiative, the Center on Deafness, the Center for Literacy Studies, the Center for Physical Activity and Health, the Child Development Laboratory, the Community Health Research Group, the Cornerstone, the Educational Interpreting Program, the Educational Opportunity Center, the Family Life Project, the Gerber Grant Project, Gradkids, the High School Equivalency Program, the Institute for Assessment and Evaluation, the Instructional Services Center, the Appalachian Collaborative Center for Learning, the Appalachian Rural Systemic Initiative, the Center on Deafness, the Center for Literacy Studies, the Center for Physical Activity and Health, the Child Development Laboratory, the Community Health Research Group, the Cornerstone, the Educational Interpreting Program, the Educational Opportunity Center, the Family Life Project, the Gerber Grant Project, Gradkids, the High School Equivalency Program, the Institute for Assessment and Evaluation, the Instructional Services Center, the Least Restrictive Environment for Life Project, the Math and Science Regional Center, the Nutrition Institute, the Orientation to Deafness Program, the Pre-College Upward Bound Program, Project Impact, Project Wave, the Reading Center, the Regional Rehabilitation Continuing Education Program, the Rehabilitation Counseling in Deafness Program, the Rehabilitation Counseling Program, the Small Animal Research Lab, the Southeastern Regional Interpreter Training Consortium, the Talent Search Program, the Technology Enhanced Curriculum Lab, the Tennessee Career Information Delivery System, the Tennessee's Early Intervention System, the THEC Minority Teacher Education Project, the Tourism Institute, the UT-TIE, the Urban Impact Project, and the Veterans' Pre-College Program.

Teacher Education

Postbaccalaureate students who desire to become teachers (i.e., Pre-Kindergarten-Grade 12) must make application to the College of Education, Health, and Human Sciences' Teacher Education Program and complete the equivalent of an undergraduate minor in education before enrolling in required graduate courses. Information on admission to Teacher Education and prerequisite undergraduate courses is available through the Undergraduate Catalog, the college’s Student Services Center (Claxton Complex A332) or at http://cehhs.utk.edu/main.html.
DOCTOR OF PHILOSOPHY
EDUCATION MAJOR

Application Process

Individuals seeking admission to the Doctor of Philosophy with a major in education must first be admissible to the University of Tennessee, Knoxville, (see Admission Requirements in the Graduate Studies section of this catalog) and then admitted to a concentration within the PhD with a major in Education. Prospective students are encouraged to make application at least six months before anticipated matriculation or one year in advance for school psychology (i.e., Deadline January 1.) An online application process is available at http://www.cehhs.utk.edu/departments.html.

Admission Criteria

Admission decisions for applicants to the PhD in Education are based on multiple criteria. Applicants are expected to present verbal and quantitative GRE scores equal to or higher than the 50th percentile, based on the norms in effect at the time the test was taken. An applicant with either a verbal or quantitative subtest score that is less than the 50th percentile will be expected to submit a proportionally higher, off-setting second subtest score (e.g., a verbal subtest score at the 60th percentile may off-set a quantitative subtest core at the 40th percentile). Current GRE verbal and quantitative interpretative data are available from Educational Testing Service at http://www.ets.org.

Applicants should be aware that departments and/or concentration areas may have GRE requirements which exceed those indicated above. Information regarding other admission criteria (e.g., GPA, letters of reference, writing samples, etc.), as well as GRE requirements for non-native English speaking applicants are available through the academic department in which the specific concentration is located.

Residence Requirement

The residence requirement for students in the PhD with a major in education is two consecutive semesters of full-time enrollment.

Contact Information

Additional information on the PhD with a major in education is available in the academic department sections of this catalog, through the college’s Student Services Center, Claxton Complex A332, or at http://web.utk.edu/~Ecehhsstu/.

DOCTOR OF PHILOSOPHY
HUMAN ECOLOGY MAJOR

Application Process

Individuals seeking admission to the PhD with a major in human ecology must first be admissible to the University of Tennessee, Knoxville, (see Graduate Studies Admission Requirements section at the front of this catalog) and then admitted to a concentration within the PhD with a major in human ecology. Prospective students are encouraged to make application at least six-months before anticipated matriculation. Applications are reviewed February 1, June 1, and November 1.

Overview of Program

A major challenge of the doctoral program is to draw upon basic research generated by the natural sciences, humanities, and social sciences so as to provide a holistic perspective that contributes to the improvement of both individuals and families. The PhD is a research degree granted only to individuals who demonstrate proficiency in conducting original research. Course requirements are determined by each student's faculty committee and are based on the needs and interests of that particular student, as well as department and college requirements. Further information is available in the specific department sections of this catalog and online at http://cehhs.utk.edu/.

MAJORS

Child and Family Studies
Child and family studies concentration
Early childhood education concentration

Human Ecology
Child and family studies concentration

The Department of Child and Family Studies provides both master's and doctoral degrees. Our graduate programs are based on the model of the empirically-based professional or social scientist. Graduate students learn to conduct research on child development, family studies, and educational environments in accordance with established standards of scientific inquiry and evaluation. Child
and family studies graduate programs seek to produce researchers, scholars, and educators who are capable of independent investigation of family and developmental processes. Students also receive training in how to conduct scientifically-based assessments of prevention, intervention and educational strategies. Many opportunities exist in child and family studies for graduate students to become involved in research on children, youth, and families. The central premise of graduate programs in child and family studies is the idea that scientific inquiry provides the most effective means to improve the welfare of children, youth and families.

A cornerstone idea for child and family studies graduate programs is development in context, or the perspective that human development is best understood in terms of interconnections among families, neighborhoods, schools, communities, cultures, and international environments. A more specific focus within this development in context perspective is an emphasis on children, youth, and families at risk. Together, these two themes, development in context and children, youth, and families at risk, are the foundations upon which our graduate curriculum options are structured.

Admission
A completed file for review includes a departmental application, Graduate Record Examination (GRE) scores for the general section, and completion of three Graduate Rating Forms by individuals who can attest to the applicant’s potential for graduate education. Forms may be obtained from the department or departmental link on the college Web site.

Admission to the program is contingent upon faculty evaluation of GRE scores, undergraduate/graduate GPA, rating forms, work experience, and the match between student’s goals and departmental foci. Prerequisites for admission to the master’s program are 9 semester hours of upper-division undergraduate social science.

Prerequisites to the doctoral program are a master’s degree from a regionally accredited institution or equivalent, completion of the 12-hour foundation core in the child and family studies master’s program, 3 hours of computationally-based, graduate-level statistics, and completion of a thesis as part of the master’s degree.

MASTER OF SCIENCE
CHILD AND FAMILY STUDIES MAJOR

The Master of Science degree with a major in child and family studies provides a broad foundation for understanding how children develop and how families function in today’s society. All master’s candidates enroll in foundation courses which include theoretical and empirical surveys of the human development, child development, and family science literatures plus a survey of methods of discovery used in child and family research. All MS students are expected to engage in productive research culminating in a thesis or project. Students choose to concentrate either in child and family studies, leading to doctoral study or careers in community agencies serving children and families, or early childhood education, leading to an educator career in early childhood or school settings. The early childhood education concentration is ordinarily restricted to students currently enrolled in the undergraduate fifth-year licensure program at the University of Tennessee, Knoxville.

CHILD AND FAMILY STUDIES CONCENTRATION
Requirements
The child and family studies concentration requires a minimum of 36 hours of coursework – 12 hours in foundation coursework and 24 hours in specialization. The specialization credit hours are selected with guidance of the student’s master’s committee. Students seeking the MS with a major in child and family studies must select a master’s committee chair and file a plan of study with the department head after 12 hours of graduate credit.

3 Three child and family studies graduate courses (may not include Child and Family Studies 572, 581, or 620). Only 3 hours of Child and Family Studies 580 or 610 may be included.
4 Courses may be child and family studies courses or may include courses from outside the child and family studies curriculum.

EARLY CHILDHOOD EDUCATION CONCENTRATION
Requirements
The early childhood education concentration is designed for students seeking a MS along with initial teacher licensure in early childhood education (PreK through Grade 4). At the University of Tennessee, Knoxville, students interested in the MS with a major in child and family studies (early childhood education concentration) must apply for admission to graduate study through the procedures outlined above. (Application for admission to the fifth-year teacher licensure program in child and family studies, early childhood education, is a part of the application process to the graduate program and is described in the Undergraduate Catalog. Admission to the fifth-year teacher licensure program is concurrent with admission to the child and family studies master’s program.) The early childhood education concentration requires 39 hours of coursework and a written comprehensive exam.

4 Elected from list of courses with prior committee approval.

DOCTOR OF PHILOSOPHY
HUMAN ECOLOGY MAJOR
CHILD AND FAMILY STUDIES CONCENTRATION

The department supports a doctoral program leading to a PhD with a major in human ecology. Two themes are highlighted – the integration of human development and family studies and concentration in a selected area of study. A doctoral program that is concurrently specialized and integrative in nature reflects the complexity of the disciplinary subject matter, provides a broader context to formulate theoretical questions, and broadens the empirical literature for addressing these questions. The PhD is primarily a research degree. A core component of the program focuses on the development of expertise in research methods and statistics so that graduate students are capable of advancing knowledge in their field of study.

Requirements

• Completion of the foundation courses in the master’s program – 510, 511, 550, and 570.
• Completion of the doctoral core – 640 and 634.
• Minimum of 18 hours of additional coursework in child and family studies.
• Statistics 538 or Social Work 660.
• 3 hours of advanced statistics.
• 6 hours of supervised research practica, Child and Family Studies 680 and 681.
• 3 hours of either Child and Family Studies 633 or 660 and 3 hours from Child and Family Studies 633, 660, 650, 670, or 691 for a total of 6 hours of doctoral-level child and family studies research methods.
• Minimum 3 hours in specialized research methods.
• Completion of 2 hours of Child and Family Studies 572.
• Minimum of 6 hours in a cognate area.
• Minimum of 24 hours of 600.
• Minimum of 95 hours beyond the bachelor’s degree.

EDUCATIONAL PSYCHOLOGY

Educational psychology offers individuals a choice of two concentrations at the master’s level and three PhD specializations. These options meet the needs of students with varying interests within the broad field of educational psychology. The areas of adult education, applied educational psychology, and collaborative learning are linked by a common interest in human development, teaching and learning, and methods of inquiry. Educational psychology prepares students with diverse backgrounds for leadership roles in education across the life span and in facilitation of improved professional practices. Together, a community of learners is created and students and faculty members regularly share and learn from one another through collaborative scholarship. Graduates are employed in such areas as higher education, K-12 education, business and industry, nonprofit, and community service agencies.

Adult Education

http://web.utk.edu/~adulted/

The adult education program is designed for those interested in providing learning opportunities for adults. It is intended for educators of adults in a wide range of settings such as adult literacy, continuing higher education, business and industry, government and community-based organizations, volunteer agencies, and professional and staff development programs. The program prepares individuals for such roles as program planner, instructor, trainer, and administrator.

Applied Educational Psychology

http://web.utk.edu/~edpsych/grad/app_ed_psych/

The applied educational psychology program is designed for individuals who seek to provide professional leadership in the facilitation of learning and development (at the master’s and doctoral levels). It provides an opportunity to focus on the needs of underachieving and nontraditional learners through application of cognitive education and social constructivist approaches and/or applied statistics and measurement (at the doctoral level). It is intended for individuals focused on careers in a wide range of settings such as higher education, K-12 education, community-based agencies, and research institutions.

The master’s program is often used as a stepping stone to a doctoral program in educational or school psychology or as additional preparation for functioning in professional support roles in schools, mental health centers, and business programs devoted to personal and professional development.

The doctoral program addresses the needs of professionals in educational psychology, as well as others who desire in-depth study at an advanced level on one of two areas of emphasis. Many graduates of this specialization work in higher education or research institutes and focus on human learning and development and/or applied statistics/measurement as it relates to teaching and learning.

Collaborative Learning

http://web.utk.edu/~edpsych/grad/collab_learning/default.html

The collaborative learning program addresses the advanced educational needs of professionals working in a variety of settings including business, government, higher education, and non-profit organizations. Participants study the collaborative
learning process and engage in action research in the context of their own professional practices. A cohort of doctoral students is admitted every other year.

**MASTER OF SCIENCE**

**EDUCATIONAL PSYCHOLOGY MAJOR**

**ADULT EDUCATION CONCENTRATION**

**Requirements**

The master’s program involves a minimum of 36 hours of coursework (except for the thesis option, which is 33 hours minimum). Programs typically consist of the following.

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Hours Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Adult Education Core</td>
<td>3</td>
</tr>
<tr>
<td>2. Research</td>
<td>3</td>
</tr>
<tr>
<td>3. Department Electives</td>
<td>6</td>
</tr>
<tr>
<td>1. Educational Psychology 513, 520, 521, 522, 525</td>
<td>15</td>
</tr>
<tr>
<td>2. Options could include Educational Psychology 550; Cultural Studies in Education 550, 561; Curriculum, Educational Research, and Evaluation 580; Educational Administration 516; Educational Psychology 530.</td>
<td></td>
</tr>
<tr>
<td>3. This category will include coursework outside of educational psychology that provides a more specialized focus to the program or as a complement to current professional competencies. Some examples of possible supporting areas include higher education administration, counseling, educational administration and supervision, cultural studies, sociology, psychology, human resource development, and agricultural and extension education.</td>
<td></td>
</tr>
</tbody>
</table>

**Remaining Coursework**

Remaining coursework can be taken in a combination of electives within adult education or coursework in related areas. Examples of courses in educational psychology that meet this expectation include Educational Psychology 460, 504 (recent examples have included Multicultural Perspectives in Adult Education, Learning in the Workplace, and Writing for Professional Publication), 509, 510, 514, 515, 516, 523, 524, 527, 528, 529, 573, 574.

**Comprehensive Examination/Thesis**

Most students opt to write a comprehensive examination. This involves preparing written responses to questions from the student’s graduate committee. Typically, these are done in a take-home format. However, a thesis option is also available.

The thesis is an original piece of research. Students who opt to write a thesis register for 6 hours of Educational Psychology 500. The final document is presented to the student’s graduate committee and discussed in an oral examination with the committee.

**APPLIED EDUCATIONAL PSYCHOLOGY CONCENTRATION**

This master’s program focuses on concepts, principles, techniques and models of educational psychology as they are used to facilitate teaching and learning and the creation of effective classroom environments for learners of all ages. The program includes traditional themes in educational psychology (e.g., human development, learning principles, assessment, and psychological intervention). It is unique in its focus on meeting the needs of non-traditional and underachieving learners from birth through adulthood through the use of cognitive education interventions.

The master’s program may be used as a stepping stone for entering a doctoral program in educational or school psychology or as an additional preparation for functioning in an educational role in schools, mental health centers, and business programs devoted to personal and professional development. The faculty members in the Department of Educational Psychology and Counseling are committed to the creation and study of environments that enhance learning potential and promote lifelong learning for people of all ages, abilities, and backgrounds.

**Requirements**

Students complete 36 hours beyond the baccalaureate degree. A minimum of 24 hours must be at the 500 level or higher. At least 6 hours must be taken outside the department. Students must choose between thesis and non-thesis options. Approved courses are listed below. Equivalent courses may be substituted with the consent of the program committee.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours Credit</th>

</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>36</strong></td>
</tr>
</tbody>
</table>

1. Educational Psychology 507.
2. Courses related to human development help students explore the role of development in learning for more and less successful learners. They include a choice of Educational Psychology 510, 522 and/or Psychology 511.
3. Courses related to learning principles provide an opportunity to compare behavioral and cognitive learning theories in-depth and other theories in comparison. Students may study learning as it relates to adults as well as children. Courses include Educational Psychology 671, and a choice of two of the following courses – Educational Psychology 515, 516, or 522.
5. The assessment course provides an overview of assessment concepts, approaches, and issues. Students take Counseling Education 525.
6. The courses related to intervention include exploration of approaches for meeting the needs of nontraditional and underachieving students, program development and facilitation of adult learning, self-management and reflective practice, and facilitation of group change. Students choose two courses from – Educational Psychology 572, 573, and/or 574.
7. Thesis students take 6 thesis hours toward the 36-hour program in lieu of electives. The thesis involves an original research project. A written document of the research is presented to the student’s graduate committee. Typically, the examination is conducted in an oral examination regarding the research. Non-thesis students complete a comprehensive examination. This typically involves the writing of scholarly papers in response to questions from each of the student’s graduate committee. A minimum of 6 hours of non-thesis electives may be chosen from Educational Psychology 460, 513, 522, 525, and/or 529.

**DOCTOR OF PHILOSOPHY**

**EDUCATION MAJOR**

**EDUCATIONAL PSYCHOLOGY CONCENTRATION**

**Concentration Core (10 hours)**

The concentration core in educational psychology reflects the connections between specializations and their foundation in educational psychology. The core also includes a departmental doctoral seminar that orients new students to doctoral study and scholarly activities. In addition, all students must take as one of their research courses, a departmental course that introduces modes of inquiry through appropriate selection of quantitative and/or qualitative methods. Students may select other research courses according to preference and specialization requirements as described below. Core courses include – Educational Psychology 507, 513, 525, 601.
ADULT EDUCATION SPECIALIZATION

Requirements
The PhD specialization in adult education involves a minimum of 79 hours of study beyond the master’s degree. This includes at least 55 hours of coursework and 24 hours of dissertation. The concentration core consists of courses as described above. Courses for the specialization are from adult education courses such as those listed under the master’s degree requirements and electives. A departmental course introducing quantitative and qualitative methods is required for all students as a part of the minimum 15 hours of research. To meet the research requirements, students take courses that provide them with knowledge and skills in both quantitative and qualitative research methods. At least 6 hours must be taken in a cognate area outside the College of Education, Health, and Human Sciences. Dissertation hours are taken after all or most coursework is completed. Once a student registers for course 600 (dissertation/research), he/she must continually thereafter register for a minimum of 3 hours every semester until the dissertation is defended and submitted.

APPLIED EDUCATIONAL PSYCHOLOGY SPECIALIZATION

The applied educational psychology program provides study for students with varying interests in the areas of human learning and development or statistics and measurement. Doctoral students selecting the first area of emphasis focus on acquisition and participatory theories of learning and development and the role of the teacher/mediator of learning experiences. Doctoral students selecting the second area of emphasis focus on the learning process and engage in action research in the context of their own professional practices. A cohort of doctoral students is admitted every other year.

This program involves a community of learners in which beginning students, advanced students, and faculty members come together regularly to share with and learn from one another. The cornerstone of this program is a seminar attended by all students (for their first three years) as well as the program’s faculty members. Collaboration on research projects, group trips to professional meetings, and social events also help to create the sense that “I belong; others care about me; and everyone benefits from the group’s array of skills, knowledge, background, and contacts.”

Requirements
The specialization requires a minimum of 88 hours of graduate credit beyond the baccalaureate degree distributed among the following seven categories.

<table>
<thead>
<tr>
<th>Hours Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Concentration Core</td>
</tr>
<tr>
<td>Specialization</td>
</tr>
<tr>
<td>Research</td>
</tr>
<tr>
<td>Electives</td>
</tr>
<tr>
<td>Dissertation</td>
</tr>
<tr>
<td>Total 88</td>
</tr>
</tbody>
</table>

1 The concentration core is described above and includes one designated 3-hour course from each specialization in educational psychology and a 1-hour doctoral seminar, which is taken during the student’s first semester.

2 All applied educational psychology students enroll in 2 hours of the applied educational psychology doctoral seminar during every fall and spring semester during their first three years.

3 Applied educational psychology students select an area of emphasis in either (1) applied statistics and measurement, or (2) human learning and development. For students with the learning/development emphasis, course options include (but are not limited to) mediated learning theory, educational applications of cognitive learning theories, educational applications of behavioral learning theories, collaborative learning, and facilitation of group change. For students with the applied statistics and measurement emphasis, course options include (but are not limited to) survey design and analysis, categorical data analysis, applied multivariate methods, and scale construction.

4 A departmental course introducing quantitative and qualitative methods is required for all students as a part of the minimum 15 hours of research. In addition to this course, students can elect to take a set of courses that deal with quantitative methodologies (e.g., experimental design, seminar in applied psychometrics) or they can elect to take a full set of courses that deal with qualitative methodologies (e.g., phenomenology, discourse analysis, or a survey of qualitative methods) or they can elect to take a mix of these courses.

5 The cognate requires a minimum of two courses outside the Department of Educational Psychology and Counseling. Many students choose psychology or statistics, although many other cognates are possible.

6 Toward the end of the program, each student will take 12 hours of courses that involve the refinement of professional skills including technical or scholarly writing, two independent study course experiences, and an internship in educational psychology. Students planning to teach in a college or university setting are encouraged to take an additional course in instructional design for higher education.

7 All students will enroll in a minimum of 24 hours of dissertation. Further details are described elsewhere in this catalog.

COLLABORATIVE LEARNING SPECIALIZATION

The collaborative learning specialization addresses the advanced educational needs of professionals working in a variety of settings including business, government, higher education, and non-profit organizations. Participants study the collaborative learning process and engage in action research in the context of their own professional practices. A cohort of doctoral students is admitted every other year.

Requirements
Doctoral students in the collaborative learning specialization are expected to complete a minimum of 94 hours of graduate credit beyond the baccalaureate degree. Required is a two-year residency, consisting of six consecutive semesters in which the student will enroll in a minimum of 6-9 hours of coursework in each of four semesters and a minimum of 9 hours in each of two consecutive semesters. These hours are distributed among the following categories.

<table>

</tbody>
</table>

1 The concentration consists of courses in each specialization and a departmental seminar course as described in the concentration section above.

2 The specialization core consists of four courses in the area of collaborative learning plus the doctoral seminar. Educational Psychology 630 is taken on a continuous basis beginning with the first semester of the student’s residency and culminating at the end of the second year of residency, excluding summers. Three hours are awarded per semester for a total of 12 hours of credit.

3 This set of courses includes courses in qualitative and quantitative research methods and statistics.

4 Courses taken in an area outside the major area of study.
COUNSELING

The programs within the counseling area prepare individuals as professional counselors and counselor educators in community mental health, human service, and rehabilitation agencies; educational institutions; private practice; government; business; and industrial settings. The courses of study focus on professional identity, social and cultural diversity, human growth and development, career development, helping relationships, group work, assessment, and research and program evaluation. The degrees offered are Master of Science with a major in counseling (concentrations in mental health counseling, rehabilitation counseling, and school counseling); Specialist in Education with a major in school counseling; Doctor of Philosophy with a major in education (concentration in counselor education). Each degree leads to counseling licensure. The mental health counseling and school counseling programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The graduate program in rehabilitation counseling is service-oriented and is accredited by the Council on Rehabilitation Education, Inc. (CORE). It leads to certification from the Commission on Rehabilitation Counselor Education (CRC).

MASTER OF SCIENCE
COUNSELING MAJOR
MENTAL HEALTH COUNSELING CONCENTRATION

The master’s program in mental health counseling (60-semester hours) is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The program requires a 900-hour internship in the community during the second year to prepare students for practice. Students in the mental health counseling concentration complete a program of study, which includes core courses, clinical courses, and electives. A thesis option is available. Through careful selection of electives and individualized programming, students are able to develop the skills to work in settings that emphasize alcohol and drug abuse; services to children, youth, families, and the elderly; and career development, employment, and correctional counseling. Graduates of the program will receive endorsement for licensure as a licensed professional counselor with mental health counseling concentration students is

MASTER OF SCIENCE
COUNSELING MAJOR

SCHOOL COUNSELING CONCENTRATION

The master’s program in school counseling (48 hours) is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The purpose of the program is to develop graduates who will assume the major responsibilities of a counselor within elementary and secondary schools. Applicants for degrees in this field must present satisfactory evidence of academic ability, adequacy of personal characteristics and goals as determined by recommendations of employers, instructors, and colleagues, and by scores of the aptitude portion of the Graduate Record Examination. The program requires a 600-hour internship in a school site during the second year to prepare students for practice. Students enrolled complete a program that includes core courses, clinical courses, and electives. Those applicants who have not had teaching experience may be required to complete additional classes. Graduates will fulfill the license requirements for PreK-12 School Counseling in Tennessee and in most states of the United States although some states may have additional experience and testing requirements.

SPECIALIST IN EDUCATION
SCHOOL COUNSELING MAJOR

The Specialist in Education with a major in school counseling is a post-master’s program designed to provide advanced training for school counselors and others with a master’s degree in a related area. Graduates must complete at least 60 semester hours beyond the bachelor’s degree. Applicants for a degree in this field must present satisfactory evidence of academic ability, adequacy of personal characteristics and goals as determined by recommendations of employers, instructors, and colleagues, and by scores of the aptitude portion of the Graduate Record Examination. The program can serve the educational needs of experienced counselors whose original training predated many recent advancements in counseling; students holding a master’s degree in guidance but wanting additional training; individuals who wish to shift from one setting or level of counseling to another; and students from related areas who want to enter the school counseling profession.

Those applicants who have not had teaching experience may be required to complete additional classes. Graduates who desire to fulfill the licensure requirements for K-12 School Counseling in Tennessee and in most states of the United States are required to fulfill all the requirements for a licensure endorsement. (Students without a license in school counseling are required to complete those requirements before obtaining the EdS with a major in school counseling.)

For a student with a School Counselor License, the Specialist in Education program requires 22 hours beyond the master’s. The program is individualized and planned by the student and a faculty committee. A minimum of 6 hours is required from outside the counselor education program.

DOCTOR OF PHILOSOPHY
EDUCATION MAJOR

COUNSELOR EDUCATION CONCENTRATION

The doctoral concentration in counselor education at the University of Tennessee is designed to prepare experienced counseling professionals to advance their careers in the education, supervision, and research of counselors. The doctoral program is for those students who have completed a master’s degree in counseling or counseling-related fields who aspire to careers in areas such as college, university, or community college teaching positions in counselor education or related fields; supervisory positions in schools, community agencies, state departments of education; counseling positions in student development programs and counseling centers in higher education; and/or private mental health counseling/consultation practice employee assistance programs.

The doctoral program requires advanced coursework, internship, and dissertation hours of study beyond the master’s degree. Students in the PhD concentration in counselor education will work toward endorsement for counseling licensure, if licensure has not been received prior to entering the doctoral program. During the program doctoral students will review the necessary criteria for the license they seek and will plan to meet those criteria. Preference is given to those with a 3.5 GPA on any graduate work completed prior to application. Preference is also given to students who score equal to or higher than the 70th percentile on the verbal area and the 50th percentile on the quantitative area of the GRE, based on the norms that were in effect when the test was taken, and a 4.5 on the Analytic Writing subtest. To be considered for acceptance, the applicant must have:

- Master’s degree in counseling or counselor-related field.
- Minimum of two years of work experience in counseling or counseling-related field.
- Fitness for the program, including self-awareness and emotional stability as indicated by references and interview.
- Potential for leadership and advocacy as indicated by references, publications, presentations, and other professional activities.
- Expertise in technological applications.

In addition, general graduate admission standards for international students require a transcript from the home country indicating an equivalent of the University of Tennessee grade point average of 3.0 or higher. Official results of TOEFL must be submitted. A minimum score of 213 on the computer-based test, 550 on the paper test, or 80 on the Internet-based Test typically with a score of 20 on each of the sections of the test (reading, listening, writing, and speaking), and scores on the GRE that meet the admission requirements.
Requirements

Coursework for the program in counselor education includes the following.

HIGHER EDUCATION ADMINISTRATION

Under Higher Education Administration, two programs are offered – a major in college student personnel and a concentration in higher education administration with a major in education under the PhD.

MASTER OF SCIENCE

COLLEGE STUDENT PERSONNEL MAJOR

The college student personnel program is a two-year, practitioner-oriented master's degree designed to prepare student personnel administrators and administrative needs of colleges and universities. Philosophically based in college and university administration and resting on standards articulated by the Council for Advancement of Standards for Student Services/Student Development programs, the program prepares individuals for a wide and growing variety of student and university service positions in post-secondary institutions including admissions, orientation, records, financial aid, academic advising, housing, athletics, disability services, career services, student activities and leadership development, institutional research and assessment, advancement and alumni relations, Greek life, and international education.

Admission

Students are admitted to the college student personnel program each spring for matriculation in the fall. Prospective students must submit current GRE scores (within the past five years). In addition, the following information must be submitted to the department office (program coordinator) by March 1st – College Student Personnel Program Application form, 3 rating/reference forms, application to the Office of Graduate and International Admissions. It is recommended that all materials be submitted by February 15.

Requirements

The college student personnel program requires a minimum of 36 hours, including 6 hours of practicum experience. Students are required to complete either a thesis or problems-in-lieu of thesis as a culminating activity.

DOCTOR OF PHILOSOPHY

EDUCATION MAJOR

HIGHER EDUCATION ADMINISTRATION CONCENTRATION

The concentration in higher education administration under the PhD with a major in education offers advanced graduate study to those students aspiring to enhance their leadership knowledge and skill for service in their current positions, to establish knowledge and skill bases for more responsible executive leadership appointment, to build the capacity and inclination for active participation in policy dialogue related to the purpose and performance of higher education, and to prepare selected scholars for service in faculty and policy scholar roles. Interdisciplinary in design, the program features core coursework in higher education foundations, leadership and organizational theory, research foundations, and specialization interests. The program also features forum and seminar experiences for all students in humanities and research seminar in the first year of the program and an Issues and Inquiry Seminar in the second year of the program.

Admission

Applicants must submit current (taken within the past 5 years) GRE scores that equal or exceed the minimums expected for applications to the PhD with a major in Education (see the PhD in Education section of this catalog for those details). Applicant must also submit three letters of recommendation, Graduate Application for Admission, Application for PhD study for the college and department, official transcripts of all previous undergraduate and graduate work, and a writing sample. An overall GPA of 3.3 in previous graduate study is required, and an interview may be requested of applicants to ascertain match of an applicant's goals with resources and goals of the program.

Requirements

The program requires completion of approximately 48-57 hours of coursework (exclusive of dissertation enrollment), completion of a written and oral comprehensive examination (an overall GPA of 3.5 is required to take the comprehensive examination), and successful completion and defense of dissertation. The doctoral residence requirement is met by two consecutive terms of full-time enrollment.

SCHOOL PSYCHOLOGY

http://web.utk.edu/~edpsych/grad/school_psych/default.html.

The school psychology programs are based on a data-based decision-making model and offer advanced training in psychological, educational, and professional foundations including training in assessment, research, consultation, and intervention. Two degree programs are offered – the Specialist in Education and the Doctor of Philosophy. The school psychology programs are accredited or approved by the relevant bodies including the American Psychological Association (APA), the National Association of School Psychologists (NASP), the National Council for Accreditation of Teacher Education (NCATE), and the Tennessee Department of Education. Admission occurs once a year and materials are due by January 5.

SPECIALIST IN EDUCATION

SCHOOL PSYCHOLOGY MAJOR

Every school psychology student is expected to meet the University of Tennessee, Knoxville, school psychology training programs knowledge and skill requirements. Opportunities for students to meet these requirements will occur in the classroom and during field experiences. The school psychology faculty, along with current and previous students, practica and internship supervisors, and various other groups who help ensure quality control within our training programs, have contributed to the development of our curricula. Various accrediting and curricula oversight agencies (i.e., NASP, SDE-Tennessee) have their own specific goals and objectives. The School Psychology Handbook, published by the Educational Psychology and Counseling Department, describes how the University of Tennessee, Knoxville, school psychology training programs meet the goals and objectives of these various training groups. The University of Tennessee, Knoxville, program is designed to provide graded, sequential, and hierarchical training across the following areas –

Field and Practica Experiences by Semester

First Year (Spring)
Knowledge, Roles, and Functions (40-80 clock hours); School Psychology 650 (1) (spring)

Second Year (Fall)
Introduction to consultation and intervention practices (50-100 clock hours); School Psychology 650 (1)

Second Year (Spring)
Develop consultation skills (150-200 clock hours); School Psychology 546 (3)

Third Year (Fall and Spring)
Practice professional assessment skills (e.g., administration, interpreting, report writing) (75 clock hours /semester); School Psychology 542 Total clock hours structured field experience prior to internship: 425

Fourth Year (Fall and Spring)
School Psychology 650 (1-12), Educational Psychology 600 Total clock hours structured field experience prior to internship: 425

Fifth Year (Fall, Spring, and Summer)
Practice, Development, and Mastery of Skills (2000 clock hours); School Psychology 649 (3). A minimum of 600 clock hours in school settings.

DEPARTMENT OF EXERCISE, SPORT, AND LEISURE STUDIES

http://web.utk.edu/~sals/
The biomechanics/sports medicine concentration (Master of Science) and specialization (doctoral) involves the study of biomechanical implications to exercise and rehabilitation. This program area focuses on the mechanism, prevention, and rehabilitation of musculoskeletal injuries. The emphases in courses taught in this area include biomechanical as well as medical considerations related to exercise and/or rehabilitation. The Doctor of Philosophy program requires coursework in engineering mechanics, numerical analysis, statistics, and advanced topics in biomechanics. Graduate students work with biomechanics/sports medicine faculty to pursue research in the areas of biomechanics of lower extremity function, footwear biomechanics, core stability, flexibility, and the biomechanics of injury mechanism and prevention.

The exercise physiology concentration (Master of Science) and specialization (doctoral) involves the study of the acute and chronic effects of exercise on the human body. At the master’s level, students may choose from two tracks – adult fitness/cardiopulmonary rehabilitation, or applied physiology research. Students may elect to do internships in cardiac rehabilitation at several area hospitals, and are encouraged to take the ACSM Exercise Specialist exam upon graduation. The doctoral program requires coursework in the life sciences, physiological chemistry, statistics and advanced topics in exercise physiology. Graduate students collaborate with an exercise physiology faculty member to perform research in the areas of physical activity assessment, metabolism, the health benefits of exercise, and body composition.

The physical activity and population health specialization (doctoral) involves an in-depth examination of the impact of regular physical activity on a variety of health outcomes. Students who pursue this specialization will explore various aspects of these relationships including epidemiological and statistical methodologies, mechanisms of action, and issues related to promotion exercise adherence. Students will be expected to collaborate with faculty mentors on questions exploring the health and exercise relationship. Supporting coursework in other departments (e.g., sport studies, nursing, statistics) may be required.

MASTER OF SCIENCE

EXERCISE SCIENCE MAJOR

BIOMECHANICS/SPORTS MEDICINE CONCENTRATION

Requirements

- Exercise Science 508, 513, 531, 533, 581 (3 hours), 601 (1 hour seminar, 2 enrollments) 635.
- Either Exercise Science 501 (project) or 500 (thesis – must also take a statistics course approved by advisor). Electives approved by advisor from Exercise Science, Sports Studies, or Biomedical Engineering.

EXERCISE PHYSIOLOGY CONCENTRATION

Requirements

- Exercise Science 508, 531, 533, 565, 567, 601 (1 hour seminar, 2 enrollments) 635. Either Exercise Science 501 (project) or 500 (thesis – must also take a statistics course approved by advisor). Electives approved by advisor from Exercise Science, Nursing, or Nutrition.
DOCTOR OF PHILOSOPHY
EDUCATION MAJOR
EXERCISE SCIENCE CONCENTRATION
Requirements

- 15 hours in exercise science.
- 9 hours in an exercise science specialization: biomechanics/sports medicine, exercise physiology, physical activity and population health, or other area approved by committee.
- Three registrations in Exercise Science 601.
- 6 hours in a cognate selected from outside the student’s major field. The cognate must be related to and supportive of the concentration and specialization.
- 15 hours in research methodologies or research experience.
- 24 dissertation hours.

NOTE: The above are viewed as minimum requirements and are subject to modification by the student’s committee.

Exercise Physiology Minor
The graduate minor consists of Exercise Science 533, 567, 601, and one other Exercise Science 500-level or above 3-hour course.

Graduate Assistantships

Graduate assistantships are available to qualified candidates. Students should contact directly the area in which they are pursuing an assistantship. A limited number of graduate teaching assistantships are available in the Physical Education and Activity Program for sport management students. Please contact Margy Wirtz at mwirtz@utk.edu or (865) 974-7154 for more information regarding these assistantships.

SPORT MANAGEMENT CONCENTRATION

The sport management concentration provides the opportunity for students to have a quality academic experience and to gain professional experience as they prepare for careers in the sports industry.

1 Sport Management 440, 512, 530, 540, 544, 553, 554, 555, 570, 580.
2 These courses can be taken within Exercise, Sport, and Leisure Studies or outside the department.

A total of 6 hours may be earned in Sport Management 590 and 595 combined.

DUAL MS-MBA

The College of Education, Health, and Human Sciences and the College of Business Administration offer an integrated program leading to the conferral of the Master of Science with a major in sport studies (concentration in sport management) and the Master of Business Administration.

Increasingly, sports and sports-related companies are represented by significant business enterprises. Success in these enterprises requires the application of business fundamentals, analytical techniques, and management skills within the specific context of the sports industry. The objective of the dual degree
program is to train individuals in sport management and business management to integrate both sport and management and to prepare them to undertake leadership roles in this growing, dynamic, and competitive industry.

Admission

Applications are accepted for fall semester only. Applicants for the MS-MBA program must make separate application to, and be competitively and independently accepted by, Graduate and International Admissions for the Master of Business Administration degree program and the Master of Science with a major in sport studies.

Students will initially apply for the MBA program, indicating on their application the intent to pursue the dual MS-MBA program. Students accepted for both the MS and MBA programs will be assigned to Dual Program Committee advisors, who will be responsible for course approval and supervision of the dual students’ progress through the dual program.

Applications by U.S. citizens and permanent residents received after the application deadline (March 1) will be considered as space allows. Additional information is required and different application dates are established by Graduate and International Admissions for international students.

Requirements

The MBA curriculum consists of 31 hours of common coursework in the College of Business Administration. Dual degree candidates enrolled in sport management are required to take 30 hours of graduate level Sport Management courses and internship.

The dual degree candidate must satisfy the curriculum and graduation requirements of the sport management major and the College of Business Administration. Students withdrawing from the dual degree program before completing both degrees will not receive credit toward graduation in either degree program for courses taken in the other degree program, except as such courses qualify for credit without regard to the dual degree program.

The MBA and MS will be awarded upon successful completion of the requirements of the dual program.

SPORTS EDUCATION CONCENTRATION

Requirements

Thesis and Non-Thesis Options

Most students in sport psychology choose the non-thesis option. Students who choose the non-thesis option are required to take a written comprehensive examination. The thesis option is available only upon consultation with and approval of the student’s advisor. Thesis students sign up for 6 hours of thesis. Sport sociology master’s students may elect the thesis or non-thesis option.

All students must complete a minimum of 30 semester hours. Students must select a minimum of 15 hours from the following Sport Studies courses 505, 507, 514, 533, 534, 535, 542, 543, *593 (1-3), *594 (1-3), *595 (1-3), *601 (1-3), *633. Students may select additional course relevant to their professional and career goals from other departments.

*These courses may be repeated.

DOCTOR OF PHILOSOPHY

EDUCATION MAJOR

SPORT STUDIES CONCENTRATION

The PhD with a major in education offers a concentration in sport studies with areas of specialization in sport sociology and sport psychology. The program stresses an interdisciplinary approach to coursework and research and expects its students to become proficient in qualitative and quantitative research methods. Students are expected to obtain a significant grounding in the allied, parent disciplines. The program prepares students to teach in higher education and/or to conduct work within applied educational and sport settings. Students must have completed all requirements for a master’s degree in kinesiology, physical education, psychology, sociology, sport studies or a related field prior to beginning the doctoral program. The program usually takes 3 years (2 years of coursework and 1 year for the dissertation).

Requirements

The program usually takes 3 years (2 years of coursework and 1 year for the dissertation) and includes the following:

<table>
<thead>
<tr>
<th>Hours Credit</th>
<th>Concentration</th>
<th>Research (3 hours of Sports Studies 601 included)</th>
<th>Specialization</th>

Pursley, R., PhD ........................................................... Iowa
Smith, S., EdD ........................................................ Tennessee
Wright, H., PhD .......................................................... Toronto (Canada)
Department-Specific Admissions Criteria

Each PhD applicant in the Department of Instructional Technology, Health, and Educational Studies is required to submit a current set of GRE scores as part of his/her application. However, the department does not require MS or EdS applicants to submit GRE scores.

GERONTOLOGY

Intercollegiate/Interdisciplinary Gerontology Minor

An intercollegiate/interdisciplinary minor in gerontology gives the graduate student an opportunity for combining the knowledge and experience about aging in American society with his/her own major concentration. Core courses and a practicum are offered by the College of Nursing, College of Social Work and selected departments within the College of Education, Health, and Human Sciences. A cross-listed seminar among contributing program areas is designed to integrate experiences from different sources and to demonstrate the interdisciplinary nature of working within an aging society.

Requirements

Prior to earning more than one-half the total hours required for this minor, students must complete a Declaration of a Gerontology Minor form found in the advising offices in each of the participating colleges, and in the office of the current Gerontology Coordinator identified by the interdisciplinary Gerontology Colloquy.

Core Experience

Students must complete a core experience of 12 semester hours. This requires one 3-hour course in each of the primary disciplines (health science, social science, behavioral science) as identified on the Declaration of a Gerontology Minor form.

Coursework (9 hours). A variety of coursework may be taken toward satisfaction of this requirement. Courses which are offered include Health 406, 465; Health/Public Health 650; Nutrition 518; Public Health 523; Social Work 566; Educational Psychology 504, 522, 525, 528; and other courses approved by the interdisciplinary gerontology colloquy member coordinating the minor.

Applied Practicum (2 hours). Students should register under practicum experiences in the home department of the supervising faculty.

Seminar in Gerontology (1 hour). Cross-listed with participating departments.

Graduate Committee

At least one faculty member from the interdisciplinary Gerontology Colloquy who is qualified to work with graduate students, must serve on the graduate committee of each student who declares a gerontology minor.

Admission to Candidacy

When application is made for admission to candidacy, indication of the minor must be noted on the Admission to Candidacy form.

GRADUATE CERTIFICATE IN GERONTOLOGY

The graduate certificate in gerontology is intended for pre- and in-service workers in gerontology. The program of study follows the guidelines of the Association of Gerontology in Higher Education and is offered under the purview of the University’s Gerontology Colloquy.
Prerequisite coursework assigned as a condition of admission to the MPH program must be completed promptly, with a grade of B or better, typically within the first semester or two of enrollment in graduate studies.

Admission
A statement of the applicant’s educational and career goals and three rating forms are required. Request application packet from the department. Preferential consideration for admission to degree status shall be given to those with a minimum undergraduate grade point average of 2.8 and with at least one year of professional experience in a health-related occupation. As a restricted program, non-degree admission requires department recommendation. Deadlines for completed applications are 1 February for summer term, 1 April for fall semester, and 1 October for spring semester.

MASTER OF PUBLIC HEALTH
PUBLIC HEALTH MAJOR
The MPH is a non-thesis program requiring completion of 39 hours of coursework including nine weeks of field practice. The field internship provides a full-time experience with an affiliated health agency or organization offering one or more health programs. Of importance, field practice allows the student to apply academic theories, concepts, and skills in an actual work setting.

</tbody>
</table>

1. Public Health Foundation courses – Public Health 509 (2 hours) 510, 520, 530, 540, 555.
3. Listings of electives for each concentration are available in MPH program office.
4. Public Health 587, 588 (field practice with an affiliated health agency or completion of a master’s essay). Written guidelines stipulating eligibility criteria and expectations are available.

NOTE: To meet program requirements, students must select courses in consultation with a program advisor. Program totals are minimums and some students may be required to complete additional coursework to overcome background deficiencies or to increase skill in an area of identified specialization.

DUAL MS-MPH PROGRAM
Also offered is a coordinated dual program leading to the conferral of both the Master of Science with a major in nutrition (public health nutrition concentration) and the Master of Public Health. The dual program allows students to complete both degrees in less time than would be required to earn both degrees independently.

The program is designed to meet the needs of students who are interested in the benefits of majors in both nutrition and public health. Therefore, it accommodates the interests of students who plan a career in public health nutrition and want to acquire the knowledge and skills of the nutritionist and public health professional; plan a career in nutrition and want to acquire the knowledge and skills and the perspective of the public health professional; or plan a career in public health and want to acquire the knowledge, skills, and perspective of the nutritionist.
**Graduate Certificate in Applied Epidemiology**

The University of Tennessee MPH program, in a Consortium arrangement with East Tennessee State University, the University of Tennessee Health Science Center, and The Tennessee Department of Health, offers a graduate certificate in applied epidemiology for Health Department staff seeking continuing education and career advancement opportunities in the public health practice arena. Delivered exclusively through electronically mediated courses, the program is focused on leadership principles and skills as applied in public health and community settings.

The 15-hour certificate is available by completing Public Health 520, 522, 525, 580 and an elective, which may be satisfied by taking equivalent courses offered by East Tennessee State University and the University of Tennessee Health Science Center. For those holding the MPH, other identified elective coursework may be used to satisfy certificate requirements, by petition.

**Requirements**

- A dual-degree candidate must satisfy the requirements for both the MS (public health nutrition concentration) and the MPH degrees, as well as the requirements for the dual program. All candidates for the dual degree must successfully complete Public Health 555 (2 hours); Public Health 509; and a minimum of 60 hours. The Department of Nutrition will award a maximum of 9 hours of credit toward the MS for successful completion of approved course work offered in the Department of Instructional Technology, Health, and Educational Studies. The department will award a maximum of 11 hours of credit toward the MPH for successful completion of approved courses offered in the Department of Nutrition. All courses for which such cross-credit is awarded must be approved by the Public Health Academic Program Committee and the student’s graduate committee. A single block field experience (or public health internship) is required of all students and the analytical field paper incorporates public health nutrition and the student’s public health concentration.

- Dual-degree students who withdraw from the program before completion of the requirements for both degrees will not receive credit towards the MS or MPH for courses taken in the other program, except as such courses qualify for credit without regard to the dual program.

**Approved Dual Credit**

Courses in the MS to be counted toward the MPH program must include 10 hours of Nutrition 515 and one hour of Nutrition 509. MPH courses to be counted toward the Master of Science include Public Health 520, 530, and 540.

**Graduate Certificate in Public Health Leadership**

The University of Tennessee MPH program, in a Consortium arrangement with East Tennessee State University, the University of Tennessee Health Science Center, and the Tennessee Department of Health, offers a graduate certificate in public health leadership for Health Department staff seeking continuing education and career advancement opportunities in the public health practice arena. Delivered exclusively through electronically mediated courses, the program is focused on leadership principles and skills as applied in public health and community settings.

**Requirements**

- Applicants for the MS-MPH program must make separate applications to and be competitively and independently accepted by the Department of Nutrition for the MS, Department of Instructional Technology, Health, and Educational Studies for the MPH, and the Public Health Academic Program Committee.

- Students who have been accepted by both departments may apply for approval to pursue the dual program anytime prior to, or after, matriculation in either or both departments. Such approval will be granted, provided that dual program studies are started prior to entry into the fourth semester of the MS and MPH programs.

- Dual-degree students who withdraw from the program before completion of the requirements for both degrees will not receive credit towards the MS or MPH for courses taken in the other program, except as such courses qualify for credit without regard to the dual program.

- Courses in the MS to be counted toward the MPH program must include 10 hours of Nutrition 515 and one hour of Nutrition 509. MPH courses to be counted toward the Master of Science include Public Health 520, 530, and 540.

**Approved Dual Credit**

Courses in the MS to be counted toward the MPH program must include 10 hours of Nutrition 515 and one hour of Nutrition 509. MPH courses to be counted toward the Master of Science include Public Health 520, 530, and 540.

**Curriculum Concentration (Thesis Option)**

- Select one course in each of the following areas – Educational Foundations, Instructional Technology, Curriculum, Educational Research and Evaluation 534 or 558, 560, 588.
- Select one course in each of the following areas – Educational Foundations, Instructional Technology, Curriculum, Educational Research and Evaluation 534 or 558, 560, 588.
- Select two courses from Cultural Studies in Education 526, 539, 544, 548, 608, or 609; Sociology of Education (Cultural Studies in Education 545, 549); History of Education (Cultural Studies in Education 511, 539, 546, 609, or 625).
- Select two courses from Cultural Studies in Education 526, 560, 561, 625, or 660.

**Total Thesis 30**

- Theory and Practice in Teacher Education 517.
- Select one course in each of the following areas – Educational Foundations, Instructional Technology, Curriculum, Educational Research and Evaluation 534 or 558, 560, 588.
- Curriculum, Educational Research and Evaluation 520.

**Total Thesis 30**

- Theory and Practice in Teacher Education 517.
- Curriculum, Educational Research and Evaluation 520.

**NOTE:** To meet program requirements, students must select courses in consultation with a program advisor. Program totals are minimums and some students may be required to complete additional coursework to overcome background deficiencies.

SAFETY

MASTER OF SCIENCE

SAFETY MAJOR

Graduate study with a major in safety (thesis and non-thesis options) leads to the Master of Science. Graduate students may concentrate in emergency management or in safety management.

The graduate program contributes to the University of Tennessee, Knoxville’s, mission of health protection by preparing safety professionals with the knowledge and skills necessary to create and maintain safer human environments in the workplace (industrial and commercial), home, school, and community. The offering of all core classes and required concentration courses on an evening class schedule enables those working full-time in a safety-related field to pursue the MS with a major in safety on a part-time basis.

MAJORS DEGREES

Nutrition MS
- Nutrition science concentration
- Public health nutrition concentration

Nutrition MS-MPH

Human Ecology PhD
- Nutrition science concentration

The Master of Science program is available with a major in nutrition and concentrations in nutrition science or public health nutrition.

A graduate degree combined with a Dietetic Internship (DI) beyond the baccalaureate degree qualifies the graduate to apply for the Registration Examination to become a Registered Dietitian (RD). Students may learn more from the department about the DI program from the departmental Web site. The Dietetic Internship is currently granted accreditation by the Commission on Accreditation for Dietetics Education of The American Dietetic Association, 120 South Riverside Plaza, Chicago, Illinois 60606-6995; telephone (312) 899-0040. Students may also select an interdisciplinary minor in gerontology.

Admission

A complete file for review includes the Graduate Application for Admission file, completed departmental application form, Graduate Record Examination (GRE) scores for the general section, and three Graduate Rating Forms completed by individuals who can attest to the applicant's potential for graduate education. Forms may be obtained from the departmental office at 229 Jessie Harris Building, The University of Tennessee, Knoxville, 37996-1920. Forms may also be obtained from the department's Web site.

Admission into the graduate program in the department is dependent on completion of undergraduate courses that give the necessary background for success in the graduate program. Required undergraduate courses include: general and organic chemistry, physiological chemistry/biochemistry, physiology, statistics and advanced nutrition. Admission to the PhD program with a major in human ecology and a concentration in nutrition science requires a master's degree. Applicants to all programs with related experience may be given preference.

MASTER OF SCIENCE
NUTRITION MAJOR

Requirements

Students may choose a thesis or non-thesis option in nutrition. Attendance of Nutrition 540 is required every semester.

Thesis Option

The program consists of a minimum of 33 hours with at least 16 hours of coursework in the department.
- Nutrition 511, 512, 540, 541 and 3 hours of graduate level statistics are required of nutrition science students.
- Students in public health nutrition must take 511, 512, 513, 514, 515, 541 and the minor in public health.
- 6 hours of Thesis 500, and 6 hours outside the department are required.
- A minimum of 22 hours at the 500 or 600 level is required.
- An oral comprehensive examination is required upon completion of the thesis.

Non-Thesis Option

The program consists of a minimum of 36 hours with at least 20 hours of coursework in the department.
- Nutrition 511, 512, 540, 541, 2 hours from 542, 544 and 3 hours of graduate level statistics are required of nutrition science students.
- Students in public health nutrition must take 511, 512, 513, 514, 515 and the minor in public health.
- 6 hours in one area outside the department are required.
- A minimum of 24 hours at the 500 and 600 level is required.
- A written comprehensive examination is required for completion of the program.

DUAL MS-MPH PROGRAM

The College of Education, Health, and Human Sciences offers a coordinated dual program leading to the conferment of both the Master of Science with a major in nutrition (public health nutrition concentration) and the Master of Public Health. The dual program allows students to complete both degrees in less time than would be required to earn both degrees independently.

The program is designed to meet the needs of students who are interested in the benefits of majors in both nutrition and public health. Therefore, it accommodates the interests of students who
- Plan a career in public health nutrition and want to acquire the knowledge and skills of the nutritionist and public health professional.
- Plan a career in nutrition and want to acquire the knowledge, skills and perspective of the public health professional.
- Plan a career in public health and want to acquire the knowledge, skills and perspective of the nutritionist.

Admission

Applicants for the MS-MPH program must make separate application to, and be competitively and independently accepted by, the Department of Nutrition for the Master of Science degree and the Department of Instructional Technology, Health, and Educational Studies for the Master of Public Health degree.

Students who have been accepted by both departments may apply for approval to pursue the dual program anytime prior to, or after, matriculation in either or both departments. Such approval will be granted provided that dual program studies are started prior to entry into the fourth semester of the MS and MPH programs.
Requirements

A dual degree candidate must satisfy the requirements for both the Master of Science degree (public health nutrition concentration) and the Master of Public Health degree, as well as the requirements for the dual program. All candidates for the dual degree must successfully complete Health and Society (Public Health 556); 2 hours of Seminar in Public Health (1 hour each – Public Health 509 and Nutrition 509); and a minimum of 60 hours. The Department of Nutrition will award a maximum of 9 hours of credit toward the Master of Science degree for successful completion of approved graduate-level courses offered by the Department of Instructional Technology, Health, and Educational Studies.

The Department of Instructional Technology, Health, and Educational Studies will award a maximum of 11 hours of credit toward the MPH for successful completion of approved courses offered in the Department of Nutrition.

All courses for which such cross-credit is awarded must be approved by the Public Health Academic Program Committee and the student’s graduate committee. A single block field experience (or public health internship) is required of all students and the analytical field paper incorporates public health nutrition and the student’s public health concentration.

Dual degree students who withdraw from the program before completion of the requirements for both degrees will not receive credit towards the MS or MPH for courses taken in the other program except as such courses qualify for credit without regard to the dual program.

Approved Dual Credit

MS courses to be counted toward the MPH program must include 10 hours of Field Study in Community Nutrition (Nutrition 515) and 1 hour of Graduate Seminar in Public Health (Nutrition 509). MPH courses to be counted toward the MS include public health administration (Public Health 520), biostatistics (Public Health 509), and epidemiology (Public Health 540).

DOCTOR OF PHILOSOPHY
HUMAN ECOLOGY MAJOR

NUTRITION SCIENCE CONCENTRATION

The PhD enables students to study the science of nutrition from the cellular/molecular level to the application of nutrition principles by people in a changing environment.

The doctoral program emphasizes cellular/molecular nutrition, human nutrition, nutritional epidemiology, and experimental nutrition. Cognate areas may include anthropology, biochemistry, chemistry, communications, education, food technology, human development, physiology, public health, sociology, statistics, and/or toxicology.

Requirements

- 16 hours in nutrition including 4 hours at the 600 level (exclusive of dissertation).
- Nutrition 511, 512, 541, and 2 hours from either 542-544.
- 4 hours of Nutrition 540, attendance required every semester.
- 6 hours of statistics.
- 6 hours in a cognate area.
- 9 hours at the 600 level.
- Students without college teaching experience are required to take the fall semester teaching seminar for GTAs.

Nutrition Minor

The graduate minor consists of Nutrition 511 and 512 plus at least 3 hours from any letter-graded 500-level or above nutrition courses.

MAJORS DEGREES

Consumer Services Management MS
- Hospitality and tourism management concentration
- Retail and consumer sciences concentration

Human Ecology PhD
- Hospitality and tourism management concentration
- Retail and consumer sciences concentration

Graduate Certificate Programs
- Services management
- Tourism development

The Department of Retail, Hospitality, and Tourism Management offers the master’s degree with a major in consumer services management and concentrations in hospitality and tourism management and retail and consumer sciences.

The programs in consumer services management prepare students for careers in industry and business, public and private agencies, and educational institutions. Master’s level work develops students’ technical skills in retail management, merchandising, hospitality management, tourism, and related consumer services. The advanced work undertaken for the doctoral degree focuses on building and applying research skills to advance the fields of retail and consumer sciences and hospitality and tourism.

Interested students should contact the department for more information or visit the department link on the college Web site.

Admission

A complete file for review includes the Graduate Application for Admission file, Department of Retail, Hospitality, and Tourism Management application, Graduate Record Examination (GRE) scores for the general section, and three Graduate Rating Forms completed by individuals who can attest to the potential for graduate education.

In addition to specified entrance requirements stipulated by the Graduate Council, admission to the master’s program with a major in consumer services management is dependent on completion of undergraduate courses that give the necessary background for success in the graduate program. For the concentration in hospitality and tourism management, students should have an adequate background in hotel and/or restaurant management and/or tourism management supported by coursework in food production, cost control, or lodging management. For the concen-
tration in retail and consumer sciences, students should have an adequate background in retailing and/or consumer science supported by coursework in marketing and statistics.

Superior students deficient in one or more of the above requirements may be admitted at the discretion of the department’s graduate faculty. Deficiencies may need to be addressed through undergraduate coursework.

**Academic Standards**

Evaluation of student progress will normally occur prior to enrollment for thesis hours (or the non-thesis option) and during the second semester of full time enrollment in the program. The review of the student will be undertaken by the faculty with consideration given to factors such as – GPA (minimum 3.0), portfolio evaluation, and demonstrated research capability.

If progress or performance is deemed insufficient, the faculty may recommend probation with specific goals set for a specified time or termination.

Graduate Certificate Program

Urban Education

Financial Assistance

The department offers a variety of scholarship and financial assistance opportunities and graduate assistantships for qualified students. For application forms visit the departmental website or contact our department office.

The College of Education, Health and Human Sciences offers the Master of Science, Specialist in Education, and Doctor of Philosophy degrees through the Department of Theory and Practice in Teacher Education. The department houses graduate programs in educational administration and supervision, and teacher education.

EDUCATIONAL ADMINISTRATION AND SUPERVISION

Through the educational administration and supervision programs, the department prepares entry-level and executive-level administrators for schools and colleges, and prepares policy scholars to serve in these organizations and in state, regional, and national policy agencies. The graduate degree programs are designed to enrich the knowledge, skills and values requisite to effective leadership in educational practice settings. The graduate programs focus on the preparation and development of administrative and instructional leaders who will serve in the diverse settings of schools and colleges, and educational units of government. Specialized coursework leading to the Urban Education Certificate is available in the area of urban administration.

MASTER OF SCIENCE

EDUCATIONAL ADMINISTRATION MAJOR

The Master of Science with a major in educational administration is intended for students who are seeking licensure in school administration and is directed toward providing beginning practitioners with the “best practice” knowledge and skills derived from the field and from research. Students are encouraged to transfer these practices into the world of school administration. Specifically, the MS is designed to prepare school principals and supervisors for licensure in Tennessee and for success in their initial administrative assignments. This two-year program combines evening (5:45-8:35 P.M.) and summer classes with on-the-job field activities organized around real school problems.

Initial Licensure Program

The Master of Science with a major in educational administration requires 36 hours of graduate-level coursework, a professional portfolio, and a comprehensive examination. Included in the 36 hours of coursework is a site-based internship. In order to obtain initial administrative licensure from the State of Ten-
nnesota, graduates from this program must have three years of experience in schools (i.e., teaching, counseling, etc.). Additionally, students must pass the State Leaders Licensure Assessment (SLLA) examination that is required by the State of Tennessee to obtain initial licensure as a school administrator. It is expected that students admitted to this program possess leadership potential that has been demonstrated in prior experience.

The four major themes of the Master of Science program with a major in educational administration include

- Expansion of the knowledge base that forms the framework of leadership and a broader conceptualization of educational organizations.
- Emphasis on the performance dimensions of the principalship and administration with particular attention given to the knowledge, skills, and dispositions underlying performance.
- Integration of theory and practice.
- Collaboration between universities and schools.

The University of Tennessee’s Master of Science degree with a major in educational administration is a National Council for Accreditation of Teacher Education (NCATE) approved program that follows the Interstate School Leaders Licensure Consortium (ISLLC) performance standards and the National Policy Board for Educational Administration (NPBEA) recommendations for the knowledge, skills, and dispositions required today for school leaders. The program is also actively involved in the University Council for Educational Administration (UCEA), a consortium of leading research universities offering programs in educational administration.

Admission

The applications required by both the Office of Graduate and International Admissions and the Educational Administration program must be completed. A current Graduate Record Examination (GRE) score (within the past five years) is required for admission and a grade point average (GPA) of 2.7 or higher for undergraduate work or GPA 3.2 or higher for prior graduate work is required. Applicants to the MS program must possess teacher or school-related licensure; have, or will have, by program completion three years teaching experience or experience working in schools; and must interview with an admission committee. Candidates for the educational administration major must possess leadership potential preferably demonstrated by previous leadership experience. Three rating forms must be provided with recommendations from three present or former employers that identify a candidate’s strengths, weaknesses, and leadership potential. Interviews with applicants will be held each year in April. Courses will officially start in June.

* A thesis option is available with approval of advisor.

GRADUATE CERTIFICATE IN URBAN EDUCATION

The Department of Theory and Practice in Teacher Education offers a graduate certificate in urban education for experienced urban teachers. A cohort group is competitively selected each year. Participants complete a 12-credit, four-course program of study over a two-year period. First-year courses are Theory and Practice in Teacher Education 595 and 540. Second-year courses are Theory and Practice in Teacher Education 595 and 550.

TEACHER EDUCATION

The department offers programs for students seeking Tennessee licensure in the following areas – elementary teaching (K-6); middle grades teaching (4-8); secondary content field teaching (7-12) in English education, foreign language education, mathematics education, science education, social sciences education; art education (K-12); English as a Second Language (K-12); modified special education (K-12) and early childhood special education (PreK-3); special education for the deaf and hard of hearing; reading endorsement, and comprehensive special education endorsement. The program features a professional year internship with accompanying coursework, which may lead to a master’s degree with a major in teacher education. Specialized coursework leading to a certificate in urban education is also available in the area of urban teaching.

For admission, most programs (except the Track 2 Initial Licensure/ Master of Science) require current scores from the GRE
MARTYER OF SCIENCE

TEACHER EDUCATION MAJOR

The Master of Science with a major in teacher education has

two tracks. Track 1 is for students who hold a valid Tennessee
teaching license, or for those preparing to teach on the post-

secondary level, or for those preparing for careers that do not require
teacher licensure. Track 2 is designed for students seeking initial
teacher licensure.

Both Track 1 and Track 2 offer thesis and non-thesis options
and require students to submit a written comprehensive exami-
nation. In addition, students completing theses must sit for an
oral examination of their theses.

TRACK 1

Track 1 non-licensure concentrations are Art education; Early
childhood special education; Education of the deaf and hard of
hearing; Elementary education; English education; Foreign lan-
guage/ESL education; Mathematics education; Reading educa-
tion; Science education; Science education (informal education);
Social science education; and Special education.

Admission

Students must meet all current graduate school admission re-

quirements in addition to submitting a departmental application
and three rating forms.

Requirements

• Completion of a prescribed set of courses: Core Area (9
hours minimum) Theory and Practice in Teacher Education
517, Curriculum, Educational Research, and Evaluation
520 (thesis only), Curriculum, Educational Research, and
Evaluation 580 (non-thesis), Instructional Technology 521,
573, or approved Instructional Technology course.
• Concentration Area (12 hours); Related Studies (3-12 hours).
• Completion of thesis or non-thesis option.

Thesis: Minimum 30 hours, satisfactory completion of written
thesis and oral defense of thesis; 2/3 of total hours for MS degree
must be 500-level or above.

Non-Thesis: Minimum 33 hours, satisfactory completion of
written comprehensive examination; 2/3 of total hours for MS
must be 500-level or above.

ART EDUCATION CONCENTRATION

• TRACK 1

Advising Note for Thesis and Non-Thesis Options

• The Track I MS serves those students who have a BS, BA,
or BFA and desire a master’s degree, but do not wish to
pursue certification to teach art, or who already have cer-
ification to teach art and wish to pursue a master’s

• An exhibition offered instead of a thesis toward graduation
must be of work directed by art and art education faculty,
and the artwork completed while pursuing the master’s
degree; a written paper must accompany the exhibition.
The paper includes (a) philosophical statement; (b)
process and media explanation (demonstration of knowl-
edge); (c) compositional analysis of each work; and (d)
how the work relates to ones personal artist statement.

• For both tracks, a comprehensive written examination is
required during the final semester of work. An oral exam
is given over the thesis. Students are expected to read
and meet requirements from the Graduate Studies sec-
tion, at the front of the catalog, with regard to admission
applications, candidacy forms, scheduling comprehensive
exam, as well as meeting all requirements regarding the
courses in their graduate program.

TRACK 2: INITIAL LICENSURE PROGRAMS

The Track 2 master’s is intended for individuals desiring to earn teacher licensure. Applicants to this program must first be admitted to teacher education. Elementary or secondary education applicants must complete the equivalent of an undergraduate minor in either elementary or secondary education. Applica-
tions to the middle grades teaching program complete an academic minor in one of the following licensure areas—mathematics, science, social studies and language arts, or foreign language arts. Post-baccalaureate students interested in seeking licensure in art education, special education, or in other fields that require students to earn an undergraduate major would be expected to complete an equivalent undergraduate program of study. Please refer to the catalog for complete details. Individuals are encouraged to contact the College’s Student Services Center, A332 Claxton Complex, for a diagnostic interview and to develop a tentative course of study and time line.

Requirements

Track 2 Common Course Requirements

Master's Track 2 programs are 36-hour (non-thesis); 42-hour (thesis). Students, regardless of teaching area (e.g., elementary, secondary, etc.), complete a common, teacher licensure, core of 24-hours during the professional year (see below).

Professional Year Courses (24 hours)

Education 574 (2), 575 (12), 591 (4), and specialty studies (6).

Additional Course Requirements (12 hours)

In addition to the above common core of courses, students must complete an additional 12 hours of coursework that is unique to their particular teacher preparation field.

Art Education

Art Education 510, 520, 530, 540.

Early Childhood Special Education

Special Education 554; Elementary Education 566, 567; Special Education 568.

Education of the Deaf and Hard of Hearing

Research elective (3); non-specified electives (9).

Elementary Teaching

Theory and Practice in Teacher Education 517; 9 hours of educational electives (chosen from at least three areas): historical, philosophical, or social foundations; instructional technology; reading education; language arts education; science education; social science education; elementary education; middle school curriculum.

Middle Grades Teaching

Theory and Practice in Teacher Education 542; Reading Education 543; an education course in the primary area of licensure (see faculty advisor).

Modified and Comprehensive Special Education

Special Education 553, 590; 6 hours of electives (see advisor).

Secondary Teaching

Theory and Practice in Teacher Education 517; Curriculum, Educational Research and Evaluation 534 or 541 or 558, or an elective in the history of sociology or philosophy of education; 6 hours of specialty area electives (see faculty advisor).

SPECIALIST IN EDUCATION

TEACHER EDUCATION MAJOR

The department offers a Specialist in Education degree with a major in teacher education. This degree is designed for those students who already possess a master's degree in education. Exceptions may be made only by the faculty of the program to which the student is applying. The Specialist in Education with a major in teacher education encompasses concentrations in elementary education; English education; foreign language/ESL education; mathematics education; reading education; science education; social science education; and special education.

These concentrations require completion of a minimum of 30 hours of coursework beyond the master's, including 6 hours in core courses, 18 hours in specialized courses, and 6 hours to be determined by the student's committee. Both thesis and non-thesis options are available.

Admission

Candidates must complete both university and departmental applications, including the Office of Graduate and International Admissions' application and the Teacher Education Specialist application from the department. A graduate GPA of 3.2 or higher, documentation of teaching or related experience, and three rating forms with recommendations that assess a candidate's strengths, weaknesses, leadership, and scholarly potential are required. Some concentrations have specific application deadlines while others have a rolling admissions policy. Some concentrations require a minimum of three years of teaching or related experience. In addition, some concentrations have additional requirements such as writing samples, work samples, or interviews. The departmental EdS application, rating forms, specific program deadlines, and other requirements are available from the department.

Requirements

The total EdS program involves a minimum of four semesters of study with no fewer than 60 hours of graduate credit beyond the baccalaureate, including research/thesis hours.

Education courses at the 400-level required for licensure are not eligible. At least 2/3 of semester hours accumulated in master's and all of the last 30 hours of coursework must be in 500- or 600-level courses. The EdS thesis must be approved by the student's committee prior to submission to the Office of Graduate Student Services for final approval and acceptance. The student must register for thesis hours during this time.

<table>

</tbody>
</table>

1 Must include one course from two of the following areas outside the concentration: curriculum or leadership anthropological, historical, philosophical or social foundations; human growth and development; PreK-4 teaching methodology; instructional technology.
2 Theory and Practice in Teacher Education 593, 594, 595.
3 Theory and Practice in Teacher Education 518 or 500 (thesis).
4 Must be related to focus of degree and must be outside specialty area education program, e.g., English, reading, speech, drama, communication, instructional technology, math, science, social sciences.

EDUCATION MAJOR

Faculty from the department participate in the delivery of the PhD with a major in education. Concentrations and specializations are available in leadership studies in education; literacy studies (specialization in ESL or reading); special education; and teacher education (specialization in early childhood education, elementary education, English education, mathematics education, science education, or social science education).

Information on admission appears at the beginning of the College of Education, Health, and Human Sciences section of this catalog.

1 Must include Theory and Practice in Teacher Education 640 (3) or Educational Administration 640 (3).
2 Seminar in Primary Concentration (3); Theory and Practice in Teacher Education 604, 605, 617.

Note: Please refer to the academic department for additional information on course requirements in each of these areas.

Admission

Students must submit the University of Tennessee, Knoxville, Graduate Application to the Office of Graduate and International Admissions. Students must also submit the Theory and Practice in Teacher Education Departmental Application for Graduate Study. Applicants must submit current (taken within the past 5 years) GRE scores that equal or exceed the minimums expected for applicants to the PhD with a major in education. Three letters of reference from those who know of the candidate’s record and promise are required. An overall GPA of 3.3 in previous graduate study is required for admission to doctoral study and an interview with the faculty may be required. Admissions decisions are made on a holistic basis to discern the candidate’s promise for doctoral study and to ascertain the match of the candidate’s educational goals with the resources and goals of the department.
The college had its beginnings in the university when surveying was introduced into the curriculum in 1838. The first two professional degrees, Civil Engineer and Mining Engineer, were established in 1879 at the same time that the Board of Trustees authorized the establishment of a graduate school. Known as Mechanic Arts originally, Engineering became a college in 1904.

The purpose of the College of Engineering is to educate men and women to the high levels of research, technical competence, and social understanding that will enable them to fulfill their responsibilities as professional engineers.

Graduate programs of the College of Engineering provide opportunities for advanced study leading to the Master of Science and the Doctor of Philosophy degrees. For a listing, consult majors and degrees available on the chart at the front of this catalog.

Facilities for research and service include the Center for Homeland Security and Counterproliferation, Center for Materials Processing, Center for Transportation Research, Maintenance and Reliability Center (MRC), and the Scintillation Materials Research Center (SMRC).

Dual MS-MBA

The College of Business Administration and the College of Engineering offer an integrated program leading to the conferral of the Master of Business Administration degree with a major in business administration (concentration in operations management) and the Master of Science degree in one of the following engineering majors – aerospace, biomedical, chemical, computer, electrical, engineering science, industrial, materials science, mechanical, and nuclear engineering (refer to each major for specific information and requirements).

The establishment of the dual degree program addresses the critical need for personnel trained in both engineering and management who can integrate an increasingly complex body of knowledge for rapid introduction of new products to the marketplace. The objective of the dual degree program is to prepare graduates to take a leading management role in companies that must react quickly to a dynamic market where forces of competition require rapid changes via short cycles in design, manufacturing, and product development. Since the development of a commercial product is a central part of the program, the MS-MBA is also for students who wish to become entrepreneurs.

Admission

Applications are accepted for fall semester only. Applicants for the MS-MBA program must make separate application to, and be competitively and independently accepted by, the Office of Graduate and International Admissions for the Master of Business Administration degree program and the office of Associate Dean for Student Affairs at the College of Engineering. Students will initially apply for the MBA program, indicating on their application the intent to pursue the dual MS-MBA program and the appropriate engineering major (refer to the MBA program for separate instructions). Students accepted for both the MBA and the MS with a major in one of the participating engineering majors will be assigned to Dual Degree Program Committee advisors, who will be responsible for course approval and supervision of the students’ progress through the dual program.

Applications by U.S. citizens and permanent residents received after the MBA application deadline (March 1) will be considered as space allows. Additional information is required and different application dates are established by the Office of Graduate and International Admissions for international students.

Requirements

All engineering students enrolled in the program must complete common coursework designed to provide them with an integrated, multidisciplinary teamwork experience. The MBA curriculum in product development and manufacturing consists of 30 hours of common coursework in the College of Business Administration and 12 hours of common coursework in the College of Engineering. Engineering common coursework includes a culminating 3-hour integrated project course requiring a comprehensive report, and a final examination as required by the Dual Degree Program Committee, to be taken during the first session of summer following the second year.

During the second year, dual degree candidates will take courses in their engineering major. The coursework for each option is designed to provide students with a concentration in their major and advanced skills to accomplish their teamwork assignments.

The dual degree candidate must satisfy the curriculum and graduation requirements of both the engineering major being pursued and the College of Business Administration. Students withdrawing from the dual degree program before completing both degrees will not receive credit toward graduation in either degree program for courses taken in the other degree program,
Core Graduate Classes in Chemical Engineering

A graduate degree in chemical engineering requires the mastery of the core fundamentals of the discipline. These fundamentals are represented by five core courses – 505, 531, 547, 548, and 551. Both the master’s (thesis and non-thesis) and doctoral degrees in chemical engineering require the successful completion of these core courses.

Additional Coursework

In addition to the core classes, supplementary coursework appropriate for each graduate degree will be needed. The coursework beyond the core courses is determined in consultation with the student’s advisor and dissertation or thesis committee and must be approved by the committee and the department head.

MASTER OF SCIENCE

CHEMICAL ENGINEERING MAJOR

Requirements

Thesis Option

The standard master’s program includes a thesis and leads to the Master of Science. Minimum departmental requirements are as follows.

- A total of at least 21 semester hours in graduate-level courses (excluding 500 and 501) in chemical engineering and related areas beyond the baccalaureate. These courses must include the five core courses.
- Research and a thesis to give at least 9 hours of credit in 500.
- Active participation in graduate seminars in the department. Resident students must register for 501 every semester it is offered.
- A final oral examination covering the thesis and related fields and graduate coursework.

Non-Thesis Option

Under certain conditions, a candidate may apply for a non-thesis program. To be eligible, a candidate must show evidence of significant professional experience after the baccalaureate degree. At least five years of industrial experience or research publications would be examples of such evidence. The departmental faculty will consider each application individually. Upon acceptance, the requirements for completion of the non-thesis option are as follows.

- A total of at least 33 hours in graduate courses in chemical engineering and related areas beyond the baccalaureate. These courses must include the five core courses.
- Completion of a critical review of the literature and other sources in an area related to chemical engineering (Chemical Engineering 580).
- A written comprehensive examination over the major field and an oral examination covering the review paper and related areas.

* The departmental courses include the five required departmental core courses.

DOCTOR OF PHILOSOPHY
CHEMICAL ENGINEERING MAJOR
Requirements
Students may apply directly to the PhD program either with or without having completed a master’s thesis. Students proceeding directly to the PhD program from a baccalaureate degree should submit evidence of outstanding performance in a rigorous undergraduate program and the ability to perform independent research at the doctoral level.

A total of 72 hours beyond the bachelor’s degree are required for the PhD. These consist of coursework hours and research and dissertation hours (Chemical Engineering 600). Specifically, the departmental requirements consist of the satisfactory completion of:

- A minimum of 36 semester hours in graduate-level courses (excluding 600) in chemical engineering and related fields beyond the baccalaureate. These courses must include the five core courses and at least 6 hours of courses at the 600 level from the University of Tennessee, Knoxville.
- A comprehensive examination consisting of a written part and an oral part. The written part covers the core fundamentals of the program. The defense of the dissertation proposal constitutes the oral portion of the exam.
- A minimum of 24 hours of research and dissertation credit in Chemical Engineering 600. Registration must be continuous from the time research begins. (See the Continuous Registration requirement in the Graduate Studies section of this catalog.)
- Successful oral defense of the dissertation before the student’s dissertation committee.
- Active participation in graduate seminars conducted by the department. Resident students must register for 501 every semester offered.

GRADUATE CERTIFICATE IN MAINTENANCE AND RELIABILITY ENGINEERING
The College of Engineering offers a graduate certificate in maintenance and reliability engineering. The program is designed primarily for part-time students in that several of the courses are available through distance education.

The 12-hour certificate is earned by completing 483 and 484, which are cross-listed among all participating departments in the College of Engineering, plus two elective courses selected from a list of courses provided by the participating departments. Currently, the available elective courses are Chemical Engineering 561, Industrial Engineering 516 and 591, Mechanical Engineering 534 and 599, and Nuclear Engineering 579 and 585. The selection of elective courses is determined through an advising conference with each individual student, and is based on the student’s personal interests, academic background, and work experience. Applicants must meet the minimum criteria established by the Graduate Council.

MASTER OF SCIENCE
The Master of Science programs in civil engineering and environmental engineering are offered to graduates of recognized undergraduate curricula. Both degree programs have thesis and non-thesis options. It is the policy of the department that students supported by university-related financial aid complete an integrated project, which is defined as a Thesis (Civil Engineering/Environmental Engineering 500) or Special Problems (Civil Engineering/Environmental Engineering 590). The appointment letter may specify which of the two options must be selected.

CIVIL ENGINEERING MAJOR
Departmental requirements provide that for a major in civil engineering, the bachelor's degree must be in civil engineering, or certain undergraduate prerequisite courses must be taken before Admission to Candidacy. The Department of Civil and Environmental Engineering offers both thesis and non-thesis options for the Master of Science with a major in civil engineering. Either option must be approved by the student's major professor.
Thesis Option
A minimum of 30 semester hours of approved graduate courses, including 6 hours of thesis, is required.

Non-Thesis Option
A minimum of 33 semester hours of approved graduate courses is required, which may include a 3-hour special problems course to be completed under the direction of the student’s major professor.

ENVIRONMENTAL ENGINEERING MAJOR
For the Master of Science with a major in environmental engineering, normally a bachelor’s degree in a field of engineering is required. For a student who does not have an engineering background, the following minimum prerequisite courses will be required – Engineering Fundamentals 151, 152; Statistics 251; Civil Engineering 380, 390, and 395 or 416; Mathematics 141, 142, 231, 241; Chemistry 120, 130. In general, these must be completed with a B average before courses for graduate credit can be taken. The Department of Civil and Environmental Engineering offers both thesis and non-thesis options for the Master of Science with a major in environmental engineering. Either option must be approved by the student’s major professor.

Thesis Option
A minimum of 30 semester hours of approved graduate courses, including 6 hours of thesis and a minimum of 15 semester hours of approved environmental engineering coursework, is required. A minor may be selected but is not required.

Non-Thesis Option
A minimum of 33 semester hours of approved graduate courses is required. This may include a 3-hour special problems course to be completed under the direction of the student’s major professor. The major includes a minimum of 18 semester hours of approved environmental engineering coursework, including a minimum of 9 semester hours of advanced engineering design courses selected from a list provided by the student’s committee. A minor may be selected but is not necessarily required.

DOCTOR OF PHILOSOPHY
CIVIL ENGINEERING MAJOR
A graduate program leading to the Doctor of Philosophy is offered with a major in civil engineering. Specific departmental requirements for the PhD include the following.

• A minimum of 72 semester hours beyond the bachelor’s degree, exclusive of credit for the MS thesis. Of this number, a minimum of 24 hours in 600 Doctoral Research and Dissertation will be required. It is expected that the research work will be in journal publication form prior to approval of the dissertation.

• A minimum of 18 semester hours of graduate courses in civil engineering or environmental engineering, exclusive of thesis or dissertation credit, at least 6 hours of which must be 600-level courses.

• Additional coursework in civil engineering, environmental engineering, or related scientific and engineering fields, amounting to a minimum of 18 semester hours, subject to approval by the student’s faculty committee. These related fields will normally include such disciplines as mechanics, chemistry, mathematics, microbiology, physics, and other engineering fields. A minimum of 6 semester hours of mathematics will be required beyond the civil engineering undergraduate requirements.

• At the discretion of the student’s dissertation committee and depending on the student’s background, more than 36 hours of courses may be required.

• A maximum of 24 course hours from the master’s degree may be used to satisfy the course requirements for the PhD.

• One foreign language if the student’s faculty committee feels that a reading knowledge of a foreign language is crucial to the student’s research efforts.

• Upon completion of at least one-half of all course work, each student must pass a comprehensive examination.

After completion of the dissertation, prior to graduation, each student must pass a dissertation defense examination administered by a faculty committee.

Environmental Policy Minor
The department participates in a program designed to give graduate students an opportunity to develop an interdisciplinary specialization in environmental policy. See Department of Political Science for program description.

Computer Engineering
MS, PhD

Computer Engineering
MS-MBA
The Department of Electrical and Computer Engineering offers graduate programs leading to the Master of Science and Doctor of Philosophy with a major in electrical engineering or computer engineering.

The departmental graduate committee is responsible for administering, promoting, and advancing the general well-being of the graduate program. Departmental actions regarding a graduate student may be appealed in writing, first to the departmental graduate committee and then to the department faculty.

The requirements outlined below apply to graduate degrees in both electrical engineering and computer engineering. The research project emphasis and/or the specific courses taken will determine the actual degree awarded.

**MASTER OF SCIENCE**

**COMPUTER ENGINEERING MAJOR**

**ELECTRICAL ENGINEERING MAJOR**

Graduate work leading to the Master of Science with a major in electrical engineering or computer engineering may be completed during three semesters of full-time study or two to three years of part-time study.

**Admission**

Applicants for admission to the MS program are expected to have completed a bachelor’s degree in electrical engineering or computer engineering with an average of at least 3.0 out of 4.0, both overall and in the senior year. In addition, all applicants are required to submit scores from the General Graduate Record Exam (GRE). Applicants whose native language is not English, including those who have earned degrees at U.S. institutions, must score at least 213 on the computer-based TOEFL exam, 550 on the written exam or 80 on the Internet-based Test to be considered for admission to the program.

Applicants who hold the bachelor’s degree in other fields of engineering, computer science, mathematics, or the physical sciences are also expected to have a minimum cumulative grade-point average of 3.0 and a minimum senior year average of 3.0 in that field. The department will require that selected undergraduate courses be taken as determined by the applicant’s prior education and experience. The student will be admitted under non-degree status until the required undergraduate courses are successfully completed with a 3.0 average.

**Requirements**

Students may choose between a thesis option, a non-thesis course-only option, and a non-thesis project option MS program. All students must file a Master’s Program Plan with the departmental graduate committee specifying which option they have selected. A semester-by-semester schedule of the courses they intend to take, and the members of the student’s master committee. Students may change between options one time by filing an amended Master’s Program Plan and with approval of the departmental graduate committee. A student who receives financial support under a research assistantship is enrolled in the thesis option by default. Students who have held a research assistantship will require approval from the departmental graduate committee to change to one of the non-thesis options. Candidates for the MS with a major in computer engineering are required to take at least two courses from the Electrical and Computer Engineering 500-level series as part of their curriculum.

**Thesis Option (30 hours)**

- 6 semester hours of mathematics at the 400 level* or above selected from a list approved by the graduate committee, or 6 semester hours of ECE courses at the 500 level or above, or 6 semester hours of non-ECE courses approved by the student’s master committee and the graduate committee.
- An additional 18 semester hours of 400-level* or above work in electrical and computer engineering, with at least 6 hours of 500-level or 600-level work in each of two areas of electrical and computer engineering.
- Master’s thesis, totaling 6 hours.
- A final oral examination covering the thesis and related coursework.

**Non-Thesis Courses Only Option (30 hours)**

- 6 semester hours of mathematics at the 400 level* or above selected from a list approved by the graduate committee, or 6 semester hours of ECE courses at the 500 level or above, or 6 semester hours of non-ECE courses approved by the student’s master committee and the graduate committee.
- An additional 24 semester hours of 400-level* or above work in electrical engineering or computer engineering with 18 of the hours at the 500 level or 600 level. Of the 18 hours required at the graduate level, at least 6 must be in each of two areas of electrical engineering or computer engineering and an additional 6 hours outside of the two areas.
- A final comprehensive written examination. This examination will be given in January and August.

**Non-Thesis Project Option (30 hours)**

- 6 semester hours of mathematics at the 400 level* or above selected from a list approved by the graduate committee, or 6 semester hours of ECE courses at the 500 level or above, or 6 semester hours of non-ECE courses approved by the student’s master committee and the graduate committee.
- An additional 21 semester hours of 400-level* or above work in electrical engineering or computer engineering, with 15 of the hours at the 500 level or 600 level. Of the 15 hours required at the graduate level, at least 6 must be in each of two areas of electrical engineering or computer engineering and an additional 3 hours of work outside of the two areas.
- ECE 501 (Project in Lieu of Thesis) with a minimum grade of B. This course will be administered by the student’s master’s committee. A written project proposal describing what the student will do in the course must be submitted in advance for the graduate committee’s approval. A written final report and oral presentation is required and one copy of the final draft must be submitted to the graduate committee.
- A final written and oral examination covering the project and related coursework.

*NOTE: At least two thirds of the minimum required hours must be taken in courses numbered at or above the 500 level.

DOCTOR OF PHILOSOPHY
COMPUTER ENGINEERING MAJOR
ELECTRICAL ENGINEERING MAJOR

The PhD is offered with a major in computer engineering or electrical engineering. Exceptional students holding the bachelo- lor’s degree may be admitted to the doctoral program without first obtaining a master’s degree. Candidates holding the MS must satisfy requirements 2 through 7 below while candidates holding only the BS must satisfy requirements 1 through 7.

Applicants are required to submit scores from the General Graduate Record Exam (GRE). A TOEFL score of 550 on the written exam, 213 on the computer exam, or 80 on the Internet-based Test is required for non-native speakers of English, including those who have earned degrees at U.S. institutions. Specific departmental requirements for the PhD include the following.

1. For students holding only a BS, a minimum of 48 course hours is required. The first 24 hours should satisfy
   a. 6 semester hours of mathematics at the 400 level or above selected from a list approved by the graduate committee, or 6 semester hours of ECE courses at the 500 level or above, or 6 semester hours of non-ECE courses approved by the student’s master committee and the graduate committee.
   b. An additional 18 semester hours of 400-level or above work in electrical and computer engineering, with at least 6 hours of 500-level or 600-level work in each of two areas of electrical and computer engineering.

2. For students holding an MS, a minimum of 24 semester hours of coursework excluding research and dissertation credit or seminar courses must be taken at the University of Tennessee, Knoxville. These hours must include the following:
   a. A minimum of 12 semester hours in electrical and computer engineering at the 500 and 600 levels.
   b. A minimum of 9 semester hours of 600-level coursework. At least 3 hours of this work must be in an area other than the student’s major area.
   c. A minimum of 6 hours of mathematics at the 500 level or above and approved by the departmental graduate committee.

3. Satisfactory performance on a qualifying examination. Separate qualifying examinations are offered for electrical engineering and for computer engineering. The qualifying examination is prepared by the Electrical and Computer Engineering faculty and consists of two 4-hour written examinations covering courses required in the undergraduate electrical and computer engineering curriculum through the junior level. The qualifying examination is offered twice each year (January and August), and a student is to take it the first time it is offered after the student enrolls in the program. A student who fails the qualifying examination must take and pass the examination the next time it is offered to remain in the program. A minimum of 12 hours of coursework must be completed after the student has taken the qualifying examination the first time.

4. Satisfactory performance on a comprehensive examination. The comprehensive examination is administered by the student’s committee. The exam results are reported to the graduate committee for approval and the exam is filed in the department. The comprehensive exam is given when the student is ready to apply for admission to candidacy. The comprehensive examination consists of both written and oral parts. The written part consists of a complete review of the literature in the student’s dissertation topic and a review of the major tools to be used in the dissertation work. The student’s committee may require additional written sections. The student must demonstrate a mastery of the dissertation area, ability to think analytically and creatively, skill in using academic resources, and ability to complete the dissertation satisfactorily. The oral part of the comprehensive examination consists primarily of a professional presentation of a proposal for dissertation work and its defense. The committee may cover additional topics in the oral part.

5. Participation in departmental seminars.

7. Successful public defense of the dissertation by the student.

Product development and manufacturing concentration

Graduate Certificate Programs

Engineering management
Maintenance and reliability engineering

The Departmental Graduate Committee is responsible for administering, promoting, and advancing the general well being of the graduate program. Departmental actions regarding a graduate student may be appealed in writing, first to the departmental graduate committee and then to the departmental faculty.

Admission

Applicants must first submit a formal Graduate Application for Admission. In addition to the minimum requirements of the Graduate Council, the Department of Industrial and Information Engineering requires

- Three rating forms or letters of reference.
- GRE scores.
- Essay (two double-spaced pages – contact department for current topic).

The graduate committee in the department sets any prerequisite courses or other measures that apply to the particular situation of the applicant. The department and the Office of Graduate and International Admissions must be notified of any change in the entering date after admission has been granted.

MASTER OF SCIENCE

INDUSTRIAL ENGINEERING MAJOR

Students who enroll in the Master of Science program may select a concentration in engineering management, human factors engineering, information engineering, manufacturing systems engineering, product development and manufacturing or traditional industrial engineering. Each of these concentrations, with the exception of the product development and manufacturing, allows a student to select either a thesis or non-thesis option. Students who select the manufacturing systems engineering concentration of the dual degree program must select the non-thesis option. The thesis option requires 27 hours of coursework and 6 hours thesis. The non-thesis option requires 30 hours of coursework and a 3-hour design project. The engineering management concentration requires an additional 3 hours.

INDUSTRIAL ENGINEERING CONCENTRATION

Depending upon a student’s background and career objectives, graduate work in industrial engineering enables the student to select an area of specialization from operations research, human factors engineering, information systems engineering, maintenance and reliability engineering, or general industrial engineering.

INFORMATION ENGINEERING CONCENTRATION

Information engineering is concerned with the specification, design, implementation and management of data- and knowledge-intensive information systems. The engineering of large-scale information systems requires knowledge and practical experience in areas such as database management systems, data modeling, information optimization, knowledge acquisition, data/knowledge representation, software systems engineering, and network design and management.

ENGINEERING MANAGEMENT CONCENTRATION

The engineering management concentration has an additional admission requirement of two years relevant experience as a practicing engineer or scientist. This concentration is fully supported off-campus utilizing electronic media for videotaping and interactive distance teaching methods.

HUMAN FACTORS ENGINEERING CONCENTRATION

Human factors engineering is concerned with ways of designing jobs, machines, operations, and work environments so they are compatible with human capacities and limitations. The human factors practitioner, operating within an industrial or service environment, is called upon both to apply existing human performance knowledge to the design or modification of work and workplaces and also to generate new experimental data required for system design and evaluation.

MANUFACTURING SYSTEMS ENGINEERING CONCENTRATION

Under the manufacturing systems engineering concentration, students learn strategies for improving product quality, implementing various production strategies, analysis of production planning and scheduling systems, and supplier and distribution integration. Dual degree students can select manufacturing systems engineering as an option.

PRODUCT DEVELOPMENT AND MANUFACTURING CONCENTRATION

The product development and manufacturing concentration is a non-thesis option, available only to students taking the dual MS-MBA program.

DOCTOR OF PHILOSOPHY
INDUSTRIAL ENGINEERING MAJOR

Admission

Admission to the PhD program requires an undergraduate degree and academic background that meets the admission criteria for the master’s program in industrial engineering or a Master’s degree in industrial engineering (or a closely related field), and previous academic performance that clearly demonstrates the capacity to do original research and technical investigative work and the potential for a successful scholarly career. If admitted, prerequisites (if required) will be established by the graduate committee based on the student’s academic background. All students are required to take the Graduate Record Examinations (GRE), and submit three letters of reference and a personal statement about their professional goals. International students are also required to take the Test of English as a Foreign Language (TOEFL).

Requirements

The total program of study requires a minimum of 72 graduate hours beyond the bachelor’s degree, exclusive of credit for the master’s thesis. This includes a minimum of 36 graduate hours of coursework beyond the bachelor’s degree and 24-36 hours of doctoral research and dissertation work. For a master’s program completed at another institution or in another field, the requirement may exceed the 36 hours of coursework (other than research and dissertation) dependent on the previous program of study.

GRADUATE CERTIFICATE IN
ENGINEERING MANAGEMENT

The Industrial and Information Engineering Department offers a graduate certificate in engineering management. The program is designed for professionals who work in an engineering organization and are interested in improving their technical management skills and knowledge. The program consists of four graduate courses that are available through distance education.

The 12-hour graduate certificate is earned by completing Engineering Management 533, 534, 536, and 539 with a grade of B or better. The hours may be utilized toward a graduate degree later if the student meets all other degree requirements.

Applicants must meet the minimum admission requirements and be admitted to the University of Tennessee, Knoxville, Graduate School. The only academic prerequisite for the certificate program is a bachelor’s degree from a recognized university or college.

GRADUATE CERTIFICATE IN
MAINTENANCE AND RELIABILITY
ENGINEERING

The College of Engineering offers a graduate certificate in maintenance and reliability engineering. The program is designed primarily for part-time students in that several of the courses are available through distance education. The 12-hour certificate is earned by completing 483 and 484, which are cross-listed among all participating departments in the College of Engineering, plus two elective courses selected from a list of courses provided by the participating departments. Currently, the available elective courses are Industrial Engineering 516 and 591, Mechanical Engineering 534 and 599, and Nuclear Engineering 579 and 585. The selection of elective courses is determined through an advising conference with each individual student, and is based on the student’s personal interests, academic background, and work experience. Applicants must meet the minimum criteria established by the Graduate Council.

MAJORS

Materials Science and Engineering
- Materials concentration
- Metallurgy concentration
- Polymers concentration
- Textiles concentration

Materials Science and Engineering MS-MBA
- Polymeric processing concentration
- Polymer science concentration
- Textile science concentration

Graduate programs are offered leading to the degrees of Master of Science and Doctor of Philosophy with a major in materials science and engineering or polymer engineering. Both the materials science and engineering and polymer engineering programs are flexible and interdisciplinary in nature. Students may be admitted from a wide range of disciplines. These include physics, chemistry, chemical engineering, mechanical engineering, electrical engineering, materials engineering, and engineering science programs.

The materials science and engineering concentrations offer specializations to include, but not limited to, ceramics, composites, electronic materials, physical metallurgy, materials processing, welding metallurgy and materials joining, corrosion science and engineering, biomedical materials, nonwovens science and technology, and mechanical and physical behaviors of materials.

The polymer engineering concentrations offer specialty areas in rheology; polymer morphology; mechanical, physical, and chemical behaviors of polymers; composite materials; and nonwovens science and technology.
Admission

Applicants for admission to the MS and PhD programs in materials science and engineering and polymer engineering, are expected to have completed a bachelor’s degree in an area of engineering or science with a grade-point-average of at least 3.0 out of 4.0 both overall and in the senior year. In addition, it is required all applicants submit scores from the General Graduate Record Examination (GRE). Applicants whose native language is not English must score at least 213 on the computer-based TOEFL examination, 550 on the written examination, or 80 on the Internet-based Test to be considered for admission to the programs.

MASTER OF SCIENCE
MATERIALS SCIENCE AND ENGINEERING MAJOR

POLYMER ENGINEERING MAJOR

Thesis Option

A total of 30 hours is required for the MS with a major in either materials science and engineering or polymer engineering. Additional requirements include the following.

- A major consisting of 12 hours of graduate courses in materials science and engineering or polymer engineering.
- The materials science and engineering major must include 511, 512, 515, and 516 for the metallurgy concentration; 511, 512, 540, and 541 for the polymers concentration; 511, 512, 540, 552, and 553 for the textiles concentration; and 511, 512, and two graduate specialization courses approved by the student’s faculty committee for the materials concentration.
- The polymer engineering major must include 540, 541, 543, 546, 549, and 550 for the polymer processing and polymer science concentrations; and 540, 541 or 543, 549, 550, 552, and 553 for the textile science concentration; exceptions are given if similar material has been covered in prior coursework.
- Additional courses up to 12 hours total in related areas.
- Master’s thesis 500, totaling 6 to 12 hours.
- Satisfactory performance on a comprehensive oral examination administered by the faculty committee.

All resident students are required to participate in the graduate seminar in materials science and engineering or polymer engineering, as appropriate, during each semester in which it is offered. Three hours of Materials Science and Engineering 503 or 504 may be counted toward degree requirements.

Non-Thesis Option

Any candidate may apply for a non-thesis option. Upon acceptance, a supervisory committee of three will be appointed. At least two members of the committee will be from the faculty in the major area, either materials science and engineering or polymer engineering. The requirements for completion of the non-thesis option are as follows.

- Completion of a total of 30 hours of graduate coursework. At least 18 of those hours must be in the department, and up to 12 hours may be in related areas. Three hours of Materials Science and Engineering 503 or 504 may be counted toward degree requirements. The materials science and engineering major and the polymer engineering major must include the same courses required for the thesis option. The faculty committee must approve the candidate’s degree program.
- Satisfactory completion of Materials Science and Engineering 580 (Critical Review) as a culminating experience. This course shall include a comprehensive examination administered by the faculty committee.

1 Approved related-area courses for the MSE non-thesis Master of Science requirements.
2 Departmental/Engineering Courses must fulfill MSE non-thesis Masters of Science requirements.
3 MSE 594 is an approved substitute for MSE 580 for the dual degree program.

DOCTOR OF PHILOSOPHY
MATERIALS SCIENCE AND ENGINEERING MAJOR

POLYMER ENGINEERING MAJOR

After one year in residence and with the approval of the faculty, a student may proceed directly to the doctoral program without completion of a master’s degree.

Requirements

Departmental requirements for completion of the doctoral degree are as follows.

- For students proceeding directly to the PhD from the baccalaureate degree, a minimum of 72 graduate hours is required. These hours must include 42 graduate course hours with at least 6 hours of 600-level courses and 30 hours of dissertation. Six hours of Materials Science and Engineering 503 or 504 may be counted toward degree requirements. At least 24 hours must be courses taught in the department. The materials science and engineering major and the polymer engineering major must include the courses required for the master’s program. In addition, for students in the textile science concentration of the polymer engineering major, the courses must include 541 and 543.
- For students having a thesis-based master’s degree from UT in materials science and engineering or polymer engineering or a master’s degree from another university in materials science and engineering, polymer engineering, or metallurgical engineering, a minimum of 48 graduate hours is required. These hours must include 18 hours of graduate coursework with at least 6 hours of 600-level courses and 30 hours of dissertation. Three hours of Materials Science and Engineering 503 or 504 may be counted toward degree requirements. At least 12 hours must be courses in the department.

</table>
students who seek preparation for employment in engineering areas requiring specialization in mechanics or in related interdisciplinary studies such as bio-mechanics.

In mechanical engineering or aerospace engineering, entrance into the Master of Science program is available to qualified graduates of recognized undergraduate curricula in mechanical or aerospace engineering and to qualified graduates of other curricula who satisfy the necessary prerequisites. A program application is required in addition to the Graduate Application for Admission. Admission into the doctoral program will be granted to those applicants who have demonstrated superior achievement in their engineering backgrounds. The general GRE is required of all applicants for admission.

In biomedical engineering, entrance into the graduate program is available to graduates of recognized curricula in engineering, mathematics, or one of the physical sciences who satisfy the necessary prerequisites. A program application is required in addition to the Graduate Application for Admission. The names and addresses of four references must be included with the program application. The general GRE is required of all applicants for admission.

In engineering science, entrance into the graduate program is available to graduates of recognized curricula in engineering, mathematics, or one of the physical or biological sciences. A program application is required in addition to the Graduate Application for Admission. The names and addresses of four references must be included with the program application. The general GRE is required of all applicants for admission.

Each student must satisfactorily complete a program of study that has been approved by his/her advisory committee and complies with the requirements of the Graduate Council. In engineering science, the student’s major professor may be selected from a department other than the Department of Mechanical, Aerospace, and Biomedical Engineering; however, at least one member of the student’s graduate advisory committee must be on the faculty of the Department of Mechanical, Aerospace, and Biomedical Engineering.

**Graduate Credit for Undergraduate Courses**

Students majoring in mechanical engineering or aerospace engineering may not normally use more than one 400-level engineering course to meet their advanced degree requirements. Undergraduate courses that are required for the bachelor’s degree in mechanical engineering may not be taken for graduate credit by graduate students in mechanical engineering. Undergraduate courses that are required for the bachelor’s degree in aerospace engineering may not be taken for graduate credit by graduate students in aerospace engineering. For students majoring in engineering science, 400-level graduate courses in engineering may be used to meet requirements at the discretion of the advising committee. However, at least two-thirds of the minimum required hours in a master’s degree program must be at or above the 500-level. With the approval of the student’s major department, a student whose major is outside the Department of Mechanical, Aerospace, and Biomedical Engineering may take 400-level graduate courses in the department. Such students should consult with instructors regarding prerequisites for undergraduate courses.

Dual degree candidates enrolled in engineering science are required to take 18 hours of graduate-level engineering courses during the second year of the program. This program requires a coursework plan, approved by the Dual Program Committee, including a concentration such that the student can accomplish his/her teamwork assignments.
GRADUATE CERTIFICATE IN MAINTENANCE AND RELIABILITY ENGINEERING

The College of Engineering offers a graduate certificate in maintenance and reliability engineering. The program is designed primarily for part-time students in that several of the courses are available through distance education.

The 12-hour certificate is earned by completing 483 and 484, which are cross-listed among all participating departments in the College of Engineering, plus two elective courses selected from a list of courses provided by the participating departments. Currently, the available elective courses are Industrial Engineering 516 and 591, Mechanical Engineering 534 and 591, and Nuclear Engineering 579 and 585. The selection of elective courses is determined through an advising conference with each individual student, and is based on the student’s personal interests, academic background, and work experience. Applicants must meet the minimum criteria established by the Graduate Council.

MAJOR DEGREES

Nuclear Engineering
Radiological engineering concentration

Nuclear Engineering
MS/MBA

Graduate Certificate Programs
Maintenance and Reliability Engineering
Nuclear Criticality Safety

The Department of Nuclear Engineering offers programs leading to the Master of Science and Doctor of Philosophy degrees. Students may elect a traditional nuclear engineering program focusing on fission energy or fusion energy or a radiological engi...
neering concentration, which prepares students for careers in the radiation safety field (health physics). Both programs are designed for graduates of accredited undergraduate programs in engineering, physics, chemistry, biology, or mathematics.

All entering students must have, as a minimum, competency in mathematics through ordinary differential equations, competency in atomic and nuclear physics, and competency consistent with an introductory course in nuclear engineering. If such competencies do not exist, the student must take appropriate courses for undergraduate credit. In addition, students without a BS in nuclear engineering, or the equivalent, must take 431 (Radiation Protection) and 470 (Nuclear Reactor Theory I), both of which may be taken for graduate credit. The department head is the contact for all interested students, both those with nuclear engineering degrees and those from other disciplines.

Graduate Credit for Undergraduate Courses

400-level courses in nuclear engineering may be used for graduate credit. However, at least two-thirds of the minimum required hours in the MS must be taken in courses numbered 500 or above.

MASTER OF SCIENCE
NUCLEAR ENGINEERING MAJOR

A graduate program leading to the Master of Science degree is available to graduates of recognized undergraduate curricula as described above. Each applicant will be advised as to the necessary prerequisite courses before he/she enters the program.

Requirements

The minimum requirements for the MS in nuclear engineering are

• A major consisting of 12 hours of graduate courses in nuclear engineering which must include at least one of the following sequences – 511, 512; 521, 522; 551, 552; 571, 572; 581, 582.
• A minor consisting of 6 hours of elective courses in mathematics or statistics.
• 6 hours in either nuclear engineering or a related field.
• One of the following three options for a culminating experience.
  Option 1 – a thesis project (6 hours of 500).
  Option 2 – two to four engineering practice projects (6 hours of 598).
  Option 3 – one engineering practice project (3 hours of 598) plus 6 hours of additional nuclear engineering coursework.

Options 1 and 2 result in a minimum total of 30 hours and Option 3 results in a minimum total of 33 hours. The determination of which option a student may undertake is made by the student’s graduate committee and is based on the student’s personal interests, academic background, and work experience, as well as the nature of projects currently available in the department.

A thesis project requires the student to conduct independent, in-depth research. An engineering practice project is similar to a thesis project but smaller in scope and can be research, design, product development, special operations, or a critical review of published literature in a specific technical area. The student must submit a brief written proposal for each project undertaken, either thesis or engineering practice, which must be approved by the student’s graduate committee. The final report for an engineering practice project is normally prepared in thesis format (i.e., according to the Office of Graduate Student Services, Guide to the Preparation of Theses and Dissertations); however, another formal report format may be used if approved by the student’s graduate committee. The student must also register for the appropriate number of hours of either 500 or 598, as specified by the student’s major professor, during each semester that work is performed on a thesis or engineering practice project. Finally, the student must pass an oral examination on all work presented for the degree (all coursework and all projects).

The MS with a major in nuclear engineering is also available to distance students via selected courses that are delivered synchronously over the Web to the student’s computer. More detailed information about this distance program is located at http://www.anywhere.tennessee.edu/ne/default.htm.

DUAL MS-MBA

The College of Business Administration and the College of Engineering offer an integrated program in product development and manufacturing leading to the conferral of the Master of Business Administration degree and the Master of Science degree with a major in nuclear engineering. The establishment of the dual program addresses the critical need for personnel trained in both engineering and management who can integrate an increasingly complex body of knowledge for rapid introduction of new products to the marketplace. The objective of the dual degree program is to prepare graduates to take a leading management role in companies that must react quickly to a dynamic market where forces of competition require rapid changes in design and manufacturing and a short product development cycle.

Admission

Applications are accepted for fall semester only. Applicants for the MS-MBA program must make separate application to, and be competitively and independently accepted by the Office of Graduate and International Admissions for the Master of Business Administration program and the Master of Science program with a major in nuclear engineering, and by the Dual Program Committee.

Students will initially apply for the MBA program, indicating on their application the intent to pursue the dual MS-MBA program and the appropriate engineering major (refer to the MBA program for separate instructions). Students accepted for both the MBA and the MS with a major in nuclear engineering will be assigned to a Dual Program Committee advisor (a faculty member in nuclear engineering) who will be responsible for course approval and overall supervision of the students’ progress through the dual program.

Applications by United States citizens and permanent residents received after the MBA application deadline (March 1) will be considered as space allows. Additional information is required and different application dates are established by the Office of Graduate and International Admissions for international students.

Requirements

All engineering students enrolled in the product development and manufacturing program must complete common coursework designed to provide them with an integrated, multidisciplinary teamwork experience. The MBA curriculum in product development and manufacturing consists of 33 hours of common coursework in the College of Business Administration and 15 hours of common coursework in the College of Engineering. Engineering common coursework includes a culminating 3-hour integrated project course requiring a comprehensive report, and a final examination as required by the Dual Program Committee, to be taken during the first session of summer following the second year.

During the second year, dual degree candidates will also take courses in their engineering major. The coursework is designed to provide students with a concentration in their major and advanced skills to accomplish their teamwork assignments. Dual degree candidates enrolled in nuclear engineering are required to take 18 hours of graduate-level nuclear engineering courses during the second year of the program, which must be approved
by the student’s Dual Program Committee Advisor. In addition, a
dual degree candidate who majors in nuclear engineering must
successfully defend, in an oral examination administered by at
least three nuclear engineering faculty members including the
student’s Dual Program Committee Advisor, all work presented
for the MS degree (all coursework and the culminating integrat-
project).

The dual degree candidate must satisfy the curriculum and
graduation requirements of the engineering major being pursued
and the College of Business Administration. Students withdraw-
ing from the dual degree program before completing both de-
grees will not receive credit toward graduation in either degree
program for courses taken in the other degree program, except
as such courses qualify for credit without regard to the dual de-
gree program. The MS and the MBA will be awarded upon suc-
cessful completion of the requirements of the dual program.

**DOCTOR OF PHILOSOPHY**

**NUCLEAR ENGINEERING MAJOR**

Students in the field of nuclear engineering desiring to study for
the Doctor of Philosophy degree must have a Bachelor of Science
or Master of Science from a recognized university with a major in
engineering, physics, chemistry, biology, or mathematics. All can-
didates will be required to demonstrate general competence in a
comprehensive examination in the areas of engineering science,
mathematics, chemistry, physics, and nuclear engineering.

**Requirements**

Specific requirements for the PhD with a major in nuclear en-
gineering include the following.

- A minimum of 48 hours beyond the bachelor’s degree, exclusive
  of credit for the MS thesis or nuclear engineering practice.
- A minimum of 24 hours in doctoral research, Nuclear En-
gineering 600.
- A minimum of 30 hours in nuclear engineering courses numbered 500 and above (or the equivalent), with at least
  9 hours of 600-level courses. These are exclusive of thesis
  or dissertation credit. Three of the 9 hours of 600-level courses can be from a department other than nuclear en-
gineering provided the selection supports the student’s re-
search area.
- A minimum of 12 hours in mathematics or statistics cours-
es beyond nuclear engineering undergraduate require-
ments numbered 400 or above.
- A minimum of 6 hours in courses numbered 500 or above
from a department other than nuclear engineering. The choice depends on the student’s overall program and
should expand his/her knowledge in a given field.

The first part of the comprehensive examination is prepared by
the nuclear engineering faculty and consists of 12 hours of
written examination that is administered over a three-day period.
All past written examinations are filed in the library and students
are encouraged to review them. Students are invited to take the
written examination after completing approximately 30 hours of
graduate coursework. A student who fails the written examination
must take and pass the examination the next time it is offered to
remain in the PhD program. Registration for 600 is not permitted
until the written examination is passed. The second part of the
comprehensive examination is completed with the successful
oral defense of a written dissertation proposal. A candidate must successfully defend, in an oral examination,
all work presented for the degree (all coursework and the disser-
|tation).

**GRADUATE CERTIFICATE IN MAINTENANCE AND RELIABILITY ENGINEERING**

The College of Engineering offers a graduate certificate in
maintenance and reliability engineering. The program is de-
signed primarily for part-time students in that all of the courses
are available through distance education (see http://www.any-
where.tennessee.edu/ne/default.htm).

The 12-hour certificate is earned by completing 483 and 484,
which are cross-listed among all participating departments in the
College of Engineering, plus two elective courses selected from a
list of courses provided by the participating departments. Current-
ly, the available elective courses are Industrial Engineering 516
and 591, Mechanical Engineering 534 and 599, and Nuclear Engi-
neering 579 and 585. The selection of elective courses is deter-
mained through an advising conference with each individual stu-
dent, and is based on the student’s personal interests, academic
background, and work experience. Applicants must meet the min-
imum criteria established by the Graduate Council.

**GRADUATE CERTIFICATE IN NUCLEAR CRITICALITY SAFETY**

The Department of Nuclear Engineering offers a graduate certificate in nuclear criticality safety. The program is designed
primarily for part-time students in that all of the courses are avail-
able through distance education (see http://www.anywhere.ten-
nessee.edu/ne/default.htm).

The 12-hour certificate is earned by completing 421, 543, and
582 plus one of the following three courses: 470, 571, or 581.
The selection of one of the latter three courses is determined
through an advising conference with each individual student and
is based on the student’s personal interests, academic back-
ground, and work experience. Applicants must meet the mini-
mum criteria established by the Graduate Council. Students with-
out a nuclear engineering background must take Nuclear Engi-
eering 301 prior to beginning the graduate coursework de-
scribed above.

Law JD-MBA, JD-MPA

The University of Tennessee College of Law commenced operation in 1890 and has continuously sought to provide high-quality legal education in a university community.

The principal objective of the college is to prepare students for the practice of law. The college teaches the analytical skills needed to interpret cases and statutes, the ability to communicate effectively, an awareness of the historical growth of the law, a knowledgeable appreciation of the interrelationship of law and society, and the ability to use law as an implement of social change and development. Students are thus equipped to serve their communities not only as advocates and counselors, but as policy makers and active, responsible citizens.

The program of the college has three dimensions – teaching and learning, research into and appraisal of our legal systems and institutions, and service to the community. Each plays a significant role in the college as a modern law center.

The teaching and learning element of legal education at the college involves a co-operative classroom interaction between faculty and students in the analytical study of a host of questions and problems found in today’s legal profession. These involve decisional law, statutory interpretation, administrative regulation, techniques of trial and appellate advocacy, and the roles and responsibilities of the lawyer in advising and representing clients.

The college is also directly involved in providing service to the community. A major element of public service is centered in the Legal Clinic where students, under the guidance of skilled and experienced licensed practitioners, provide legal services to clients. Additionally, through research, consultation, and other services to legal institutions and groups within the state, the college seeks to participate in the development and improvement of the society in which its students may eventually practice law.

In combination, the direction and objectives of the college lead to the development not of a narrow technician, but of a student of the law with the perspective, breadth, and understanding necessary to accomplish the many tasks assigned by society to the legal profession.
Graduate Programs

The College of Law offers the Doctor of Jurisprudence degree program; a dual degree program with the College of Business Administration leading to the JD and the Master of Business Administration degree; and a dual degree program with the Department of Political Science, College of Arts and Sciences, leading to the JD and Master of Public Administration. In addition graduate students may be eligible to take a limited number of law courses to count toward a graduate degree.

Current information regarding admission, financial aid, course requirements, academic policies, extracurricular activities, and student services is available from the Admissions Office, The University of Tennessee College of Law, 1505 West Cumberland Avenue, Knoxville, Tennessee 37996-1810 and at the college’s Web page www.law.utk.edu. Completed application should be received before February 1 of the year of requested admission.

DOCTOR OF JURISPRUDENCE

The Doctor of Jurisprudence degree will be conferred upon candidates who complete, with the required average, six semesters of resident law study and who have 89 semester hours of credit, including all required courses. The required average is 2.0 and that average must be maintained on the work of all six semesters and also for the combined work of the grading periods in which the last 28 hours taken in residence were earned. Averages are computed on weighted grades. Grades are awarded on a numerical scale (in increments of 0.1) from 0.0 to 4.3. No credit toward the JD degree is awarded for grades of 0.0 to 0.7.

Eligible law students may receive up to 6 hours of credit toward the JD for acceptable performance (a grade of B or higher) in upper-level courses that materially contribute to the study of law and which are taken in other departments at the University of Tennessee, Knoxville. Course selection and registration are subject to guidelines approved by the law faculty which include the requirement that any such course be acceptable for credit toward a graduate degree in the department offering the course.

Refer to the Law Catalog and Student Handbook for current degree requirements.

CONCENTRATION IN ADVOCACY AND DISPUTE RESOLUTION

Students interested in a concentration in advocacy and dispute resolution must complete the following courses

Second Year Fall Semester – 813, 920.

Third Year (one of the following) – 905, 908 and 914 or 947.

During the second and third year, any combination totaling 12 hours from the following courses – 821, 855, 877, 915, 916, 918, 921, 922, 923, 927, 990*, 991*. (*Only if approved by the Dean or Dean’s designee as satisfying the requirements of the concentration.)

Students electing a concentration in advocacy and dispute resolution may not take any of the above courses on an S/NC basis.

CONCENTRATION IN BUSINESS TRANSACTIONS

Students interested in a concentration in business transactions must complete all of the following law courses.

818 Fundamental Concepts of Income Taxation
826 Introduction to Business Transactions*
827 Business Associations
972 Income Taxation of Business Organizations
940 Land Finance Law
840 Commercial Law
842 Contract Drafting Seminar
833 Representing Enterprises OR
978 Transactional Tax Planning

Students electing a concentration in business transactions may not take any of the above courses on an S/NC basis except 826.

*This course is not required for students who have an undergraduate major in accounting, finance, or business administration, who hold the MBA, or who are enrolled in the dual JD-MBA program. Waivers may also be granted to students who have acquired the requisite business knowledge through other coursework or through practical experience.

DUAL JD-MBA PROGRAM

The College of Business Administration and the College of Law offer a coordinated dual program leading to the conferment of both the Doctor of Jurisprudence and the Master of Business Administration.

The establishment of the dual program recognizes the increasingly complex body of knowledge necessary to the creative conduct of business and business-related law practice, the complementary nature of many aspects of the graduate programs of the College of Law and the College of Business Administration, and the intellectual benefits inherent in the concurrent study of both business and business-related law. The program is designed to accommodate the interests of students who (a) contemplate a career in public service and want to acquire the skills and perspective of the lawyer and the business-oriented manager; (b) contemplate a career in business management and want to acquire the skills and perspective of a lawyer; or (c) contemplate a career as a lawyer specializing in business-related law and want to acquire the skills and perspective of the business-oriented manager.

Admission

Applicants for the JD-MBA program must make separate application to, and be competitively and independently accepted by, the College of Law for the JD, the Office of Graduate and International Admissions and College of Business Administration for the MBA degree, and by the Dual Program Committee.

Students who have been accepted by both colleges may apply for approval to pursue the dual program anytime prior to, or after, matriculation in either or both colleges. Such approval will be granted, provided that dual program studies are started prior to entry into the last 28 hours of JD coursework and prior to the third semester of the MBA program. Students interested in entering the dual degree program should submit a letter of application to the Dual Program Committee. Upon receipt of the application, the Dual Program Committee will determine eligibility and assign students to advisors who will be responsible for course approval and supervision of the student’s progress through the dual program.

Requirements

A dual program candidate must satisfy the graduation requirements of each college. Students withdrawing from the dual program before completion of both degrees will not receive credit toward graduation from either college for courses in the other college, except as such courses qualify for credit without regard to the dual program.

The College of Law will award up to 9 hours of credit toward the JD for acceptable performance in approved graduate-level courses offered by the College of Business Administration. The College of Business Administration will award up to 6 hours of credit toward the MBA for acceptable performance in approved courses offered in the College of Law. The approval of courses is the responsibility of the Dual Program Committee and the student’s assigned advisor.

Students may begin their studies in either the JD or the MBA program, but may not enroll in MBA coursework while completing the first year of the law curriculum and may not enroll in JD coursework while completing the first year of the business cur-
riculum. During the first year in the JD program, students register through the College of Law. During the first year in the MBA program, students register as graduate students. After the first two years, any term in which students take law courses or a mixture of law and graduate courses, they are classified and registered as law students. If taking only graduate courses, they are classified and registered as graduate students.

Approved Dual Credit
MBA courses in which the student has earned a B grade or higher and are to be counted toward the JD program must include 9 hours approved by the College of Law. The 6 hours of law courses in which the student has earned a 2.3 or C+ grade or higher and are to be counted toward the MBA must be selected from those approved by the Assistant Dean of the MBA Program.

DUAL JD-MPA PROGRAM
The College of Law and the Department of Political Science in the College of Arts and Sciences offer a coordinated dual degree program leading to the conferral of both the Doctor of Jurisprudence and Master of Public Administration degrees. In this program, a student may earn the MPA and JD in about four years rather than the five years that otherwise would be required. Students pursuing the dual degree program should plan to be enrolled in coursework or an internship for one summer term in addition to taking normal course loads for four academic years.

Admission
Applicants for the JD-MPA program must make separate application to, and be independently accepted by, the College of Law for the JD and the Department of Political Science and the Office of Graduate and International Admissions for the MPA. Applicants must also be accepted by the Dual Degree Committee. All applicants must submit a Law School Admission Test (LSAT) score. An applicant’s LSAT score may be substituted for the Graduate Record Examination (GRE) score, which is normally required for admission to the MPA program. Application may be made prior to or after matriculation in either the JD or the MPA program, but application to the dual program must be made prior to entry into the last 29 hours required for the JD and prior to entry into the last 15 hours required for the MPA.

Requirements
A dual degree candidate must satisfy the requirements for both the JD and the MPA, as well as the requirements for the dual program. The College of Law will award a maximum of 9 hours of credit toward the JD for successful completion of approved graduate level courses (500 or 600 level) offered in the Department of Political Science. The MPA program will award a maximum of 9 hours of credit toward the MPA for successful completion of approved courses offered in the College of Law. All courses for which such cross-credit is awarded must be approved by the JD-MPA coordinators in the College of Law and the Department of Political Science. All candidates for the dual degree must successfully complete Administrative Law (Law 821). An internship is strongly recommended for students in the dual degree program, as it is for all MPA candidates, but an internship is not required.

During the first two years in the dual program, students will spend one academic year completing the required first year of the College of Law curriculum and one academic year taking courses solely in the MPA program. During those first two years, students may not take courses in the opposite area without the approval of the JD-MPA coordinators in both academic units. In the third and fourth years, students are strongly encouraged to take both law and political science courses each semester.

Dual degree students who withdraw from the program before completion of the requirements for both degrees will not receive credit toward either the JD or the MPA for courses taken in the other program except as such courses qualify for credit without regard to the dual program.

Awarding of Grades
For grade recording purposes in the College of Law and the Department of Political Science, grades awarded in courses in the other unit will be converted to either Satisfactory/No Credit and will not be computed in determining a student’s GPA or class standing. The College of Law will award a grade of Satisfactory for an approved MPA course in which the student earns a grade of B or higher and a grade of No Credit for any lower grade. The Political Science Department will award a grade of Satisfactory for an approved law course in which the student earns a grade of C+ or higher and a grade of No Credit for any lower grade. The official academic record of the student maintained by the Office of the University Registrar shall show the actual grade assigned by the instructor without conversion.

Policy for Graduate Students Taking Law Courses
Students pursuing a graduate degree in another college may, upon approval of the College of Law and the major chairperson, take up to 6 hours of law courses and receive credit toward the graduate degree. The graduate student must register for the law course during regular registration at the College of Law requesting an S/NC grade only. If a C or above is earned in a law course, an S will be recorded on the transcript. If a student earns below a C, an NC will be recorded, and the course cannot be used toward meeting degree requirements. Grades for law courses will not be reflected in the cumulative average. Law courses may be taken for credit only by students enrolled in a graduate degree program.

Different rules apply to the student enrolled in the Dual JD-MBA or JD-MPA Programs. Grades must be earned according to the grading system of the respective college, e.g. numerical grades for law courses, letter grades for graduate courses. Refer to section on Grades for the grading scale acceptable toward meeting degree requirements. Cumulative GPA for law courses only will be calculated until graduation, at which time both the graduate and the law cumulatives will be shown on the permanent record.

Nursing of Women and Children

The College of Nursing was established in July 1971. The master’s program was initiated in 1976 and approval for the doctoral program was granted in 1988. For more information, contact the Director of MSN or PhD Program, The University of Tennessee, College of Nursing, 1200 Volunteer Boulevard, Knoxville, Tennessee 37996-4180; (865) 974-4151.

Facilities for research and service include the Center for Nursing Practice and the Center for Nursing Research.

MASTER OF SCIENCE IN NURSING

NURSING MAJOR

The College of Nursing program is accredited by the Collegiate Commission on Nursing Education that may be contacted at One Dupont Circle NW, Ste 530, Washington, DC 20036-1120, 1-202-887-6791, and is unconditionally approved by the Tennessee Board of Nursing.

The purpose of the master’s program in nursing is to prepare leaders, managers, and practitioners who facilitate achievement of optimal health in the dynamic health care system. The program prepares advanced practice nurses for a career in adult health nursing, nursing of women and children, mental health nursing, and nurse anesthesia as well as role preparation as nurse practitioners, clinical nurse specialists or nursing administrators. Advanced practice nursing involves the delivery of care, management of resources, interdisciplinary collaboration, and application of technology, information systems, knowledge, and critical thinking.
Graduates of the program are expected to
• Provide advanced nursing care in a variety of health care settings.
• Utilize theoretical knowledge to guide advanced practice nursing.
• Collaborate in research activities and utilize knowledge gained from research in advanced practice nursing.
• Evaluate health policies and economics related to delivery of health care.
• Assume roles as leaders and collaborators with other professionals and communities in planning, providing, and evaluating health care.

Admission
• Meet requirements for admission to graduate study.
• Achieve a competitive score on the combined verbal and quantitative portions of the Graduate Record Exam.
• Achieve a TOEFL score of at least 550 on the paper test, 213 on the computer-based test, or 80 on the Internet-based Test if native language is not English.
• Applicants for nurse anesthesia require an interview.
• Hold a bachelor’s degree in nursing (Bachelor of Science in Nursing) from an accredited program.
  a. Hold or be eligible for licensure to practice nursing in Tennessee.
  b. Have an undergraduate GPA of 3.0 or higher on a 4-point scale, or a GPA of 3.3 for courses in the undergraduate major.
  c. Have completed a health assessment course.
  d. Have completed 3 hours of graduate-level statistics. OR
• Hold a bachelor’s degree in a discipline other than nursing (master’s entry student or RN) from an accredited college or university.
  a. Have a cumulative undergraduate GPA of at least 3.0 on a 4-point scale.
  b. Have satisfactorily completed the following prerequisite courses: chemistry (8 hours); microbiology (including lab); anatomy and physiology (6 to 8 hours); nutrition (covering lifespan in health and illness); social sciences (9 hours) and a general psychology course (3 hours); undergraduate research course or course; 3 hours of graduate-level statistics prior to enrollment in graduate research course.
  c. Nurse anesthesia option not available to master’s entry students.
• New students normally are admitted to the program only at the beginning of fall semester. However, under special circumstances and on a space available basis, a BSN graduate may be admitted at the beginning of spring or summer terms in a temporary non-degree status. Applications from full-time BSN and master’s entry students for fall admission must be received by February 1. Part-time and post-master’s applications must be received by October 1. Nurse anesthesia applications must be received by March 1 for spring admission in the following academic year.

Non-Degree Status
Only 501, 505, 510, 511, and 515 are open to students in Non-Degree Status. Students not yet accepted into the master’s program must see the Chair of the Master of Science in Nursing program for advising prior to enrolling in any course.

Special Requirements
• Each student must hold personal professional liability insurance and health insurance.
• Registered nurses must be eligible to practice nursing in Tennessee, i.e., licensed in Tennessee or one of the interstate compact states.
• Each student must present proof of hepatitis B vaccination and rubella and rubeola immunization or sufficient titer for immunity; TB status.
• Each student must present evidence of current two-person CPR certification.
• Non-registered nurse students must have completed courses in chemistry, nutrition, microbiology, anatomy, and physiology plus 12 hours of behavioral science courses.
• For more detailed information about the application process, contact Student Services/Master of Science in Nursing Program, The University of Tennessee College of Nursing, 1200 Volunteer Boulevard, Knoxville, Tennessee 37996-4180; (865) 974-7606.

Thesis and Non-Thesis Options
The thesis option is available for interested students and is especially encouraged for those who are considering pursuit of doctoral degrees sometime in the future. Students who choose the non-thesis option must register for Nursing 582.

Program Requirements
All students must complete a minimum of 36 semester hours distributed as follows.

*Not required for nursing administration concentration.*
Special Policies

- If the clinical performance of any student for any course is found to be unsatisfactory, the student will receive a grade of F for the course.
- If a student achieves a final grade of D or F for any required undergraduate or graduate nursing course, he or she will not be permitted to repeat the course and will be required to withdraw from the program.
- If the clinical performance of any student is characterized by unethical, unprofessional or unsafe behavior, or behavior that places the client in jeopardy, the student will be required to withdraw from the program.
- Students are expected to maintain a 3.0 cumulative GPA; however, students must maintain a grade of B or better in clinical concentration courses and/or directed clinical practice. Graduate students are not permitted to repeat a course, repeat an exam or do additional work for the purpose of raising a grade already received. A student who receives a final grade below a B in a clinical concentration course will be dismissed from the program. A student whose cumulative GPA drops below a 3.0 as a result of earning grades of C in other courses will be placed on academic probation. A student will be allowed to continue in graduate study while on academic probation as long as each semester’s grade point average is 3.0 or better and the grade for clinical concentration work is at least 3.0.

RN-MSN Track

The RN-MSN track provides an opportunity for qualified associate degree and diploma-prepared nurses to obtain the MSN.

Admission

- Associate degree or diploma in nursing.
- Minimum grade point average 3.0 (on 4 point scale) for all pre-professional course requirements.
- Eligible to practice as a registered nurse in Tennessee (licensed as an RN in Tennessee or one of the interstate compact states).
- Have satisfactorily completed the following prerequisite courses – chemistry (8 hours); microbiology (including lab); anatomy and physiology (6 to 8 hours) nutrition (covering lifespan in health and illness); social sciences (9 hours) and a general psychology course (3 hours).
- Three professional letters of reference.
- Personal statement of goals and objectives.

Prior to Admission to Graduate Program

- Complete the BSN with at least a 3.0 GPA.
- Achieve a competitive score on the combined verbal and the quantitative portions of the Graduate Record Examination.

Bachelor of Science in Nursing Courses

- RN’s are exempt from sophomore level Nursing 201 (Introduction to Nursing) and will be given proficiency credit based on RN status.
- RN students will take the NLN Acceleration Challenge Exams prior to starting upper division coursework. If a decision score of 100 is achieved (per section), the student will receive proficiency credit for Nursing 361, 403, 404, 421, and 461.
- Proficiency credit can be obtained in courses marked with an asterisk (*).

Bachelor of Science in Nursing Degree

- A baccalaureate degree in nursing will be awarded upon completion of all required level 500 and 600 courses.
- A total of 123 undergraduate hours are required for the baccalaureate degree with the last 30 hours completed in residence at the University of Tennessee, Knoxville.

RN-MSN students will complete (or challenge*) the following courses, prior to beginning MSN courses.

DOCTOR OF PHILOSOPHY
NURSING MAJOR

The College of Nursing offers a doctoral program leading to the Doctor of Philosophy degree with a major in nursing. This is a unified program offered jointly with the University of Tennessee, Memphis, College of Nursing. Students may complete all or part of the program at either site. The dissertation must be completed in its entirety at one site.

The doctoral program prepares nursing scholars capable of integrating research, theory, and practice into their roles as researchers, educators, and/or administrators. Specifically, the graduate of this program should be able to

- Analyze, test, refine, and expand the theoretical basis of nursing.
- Conduct research that generates knowledge and advances nursing as a discipline.
- Provide leadership as nurse scientists who can function in a variety of roles and settings.
- Collaborate with members of other disciplines in health-related research.
- Develop, implement, evaluate, and recommend healthcare policy.
- Demonstrate professionalism, advocacy, ethical principles and scientific integrity.

Admission

- Meet requirements for admission to graduate study.
- Hold a master’s degree in nursing from a program accredited by the National League for Nursing Accrediting Commission or the Commission on Collegiate Nursing Education. Some outstanding applicants who are prepared at the bachelor’s level in nursing may be considered. In such cases, graduate level courses in nursing theory, concentration specialty, and/or research will be integrated into the formal program of doctoral degree requirements.
- Have a minimum cumulative graduate grade point average of 3.3 on a 4.0 scale for previous college work.
- Achieve a competitive score on the combined verbal and quantitative portions of the Graduate Record Exam.
- Have successfully completed a basic statistics course and graduate nursing theory and research courses prior to enrollment in nursing doctoral level courses.
- Have TOEFL score of at least 550 on the paper test, 213 on the computer-based test, or 80 on the Internet-based Test if native language is not English.
- Complete Graduate Program Data Form, College of Nursing.
- Submit Graduate Rating Forms from three college level instructors and/or nurses and administrators who have supervised applicant’s professional work.
- Submit a sample of scholarly writing (e.g., thesis, published paper).
- Submit an essay describing personal and professional aspirations.
- Submit Graduate Application for Admission, academic transcript(s), Graduate Record Examination scores, and, if required, TOEFL scores to the Office of Graduate and International Admissions. Submit three Graduate Rating Forms, sample of scholarly writing, and Graduate Program Data Form with essay to the Director of the PhD program prior to November 1 of the year prior to fall admission.
- Schedule a personal interview with the College of Nursing PhD Student Admissions Committee prior to March 15 of the year preceding fall admission. International applicants may be interviewed by telephone or teleconferencing at the discretion of the admissions committee.

Total 67

*Note: One hour per semester, must be taken for two semesters.
**Possible cognate areas include, but are not limited to, anthropology, child and family studies, psychology, education, management, public health, social work, philosophy, and statistics.

Doctoral Committee

Early in the student’s program, a nursing faculty advisor will be selected by the student in consultation with the program director. The student’s comprehensive examination committee consists of the faculty teaching core courses and one representative from the cognate area. The student then selects the dissertation committee. Four faculty, holding the rank of assistant professor or above, comprise the committee, three of whom (including the chair) must be approved by the Graduate Council to direct doctoral dissertations. At least one member of the committee must be from an academic unit other than nursing.

Special Policies

- A maximum of 6 graduate hours taken before acceptance into the doctoral program may be applied toward the degree.
- A minimum grade of B in all nursing doctoral courses and a 3.0 cumulative GPA are required for continuation in the program.

Intercollegiate/Interdisciplinary Gerontology Minor

Graduate students in the College of Nursing may pursue an intercollegiate/interdisciplinary minor in gerontology. The gerontology minor gives the student an opportunity for combining knowledge about aging in American society with his/her major concentration.

Core courses and a practicum are offered by the College of Social Work and selected departments within the Colleges of Education, Health, and Human Sciences and Arts and Sciences. A cross-listed seminar between contributing programs is designed to integrate experiences from different sources and to demonstrate the multi-faceted nature of working within an aging society. Please refer to the College of Education, Health, and Human Sciences for specific requirements.

Nursing Education Minor

Graduate students in the College of Nursing may pursue a nursing education minor. The minor consists of 12 hours – 6 hours in nursing and 6 in education. Required courses in the College of Nursing are 566 and 565. In consultation with the Nursing Education Minor Coordinator, students select 6 hours of coursework from the College of Education, Health, and Human Sciences.
GRADUATE CERTIFICATES

The College of Nursing offers certificates for nurses who need additional training. A master’s degree in nursing is required for admission.

The total hours will vary depending on the student’s academic record, clinical experience, and objectives. Students must complete a minimum of 12 hours. Most students complete 16-20 hours of course credit with the exception of those pursuing the homeland security nursing certificate or the nurse anesthesia certificate. The nurse anesthesia certificate program requires students who have completed the master’s degree in nursing within the preceding five years to complete 60-70 hours of course credit. Contact the MSN chair for more information.

• ADULT HEALTH NURSING
  Course requirements are 530 and 531 plus additional hours as determined by the college.

• FAMILY NURSE PRACTITIONER
  Course requirements are 570, 571, 572, and 573 plus additional hours as determined by the college.

• HOMELAND SECURITY NURSING
  Course requirements are 532, 533, 534, 535, 536, plus additional hours as determined by the college.

• MENTAL HEALTH NURSING
  Course requirements are 560 and 561, plus additional hours as determined by the college.

• NURSE ANESTHESIA
  In addition to the general requirements for admission to graduate study and the College of Nursing, the following are required of all nurse anesthesia certificate applicants.
  • One year of critical care experience with adult clients.
  • Certification in Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS).
  • A personal interview.
  Course requirements are 506, 516, 517, 518, 522, 523, 524, 525, 526 of nurse anesthesia didactic content, plus additional hours as determined by the college and 54 hours of nurse anesthesia clinical practice courses, 544, 545, 546, 547, 548, 549, 583.

• NURSING ADMINISTRATION
  Course requirements are 590 and 591, plus additional hours as determined by the college.

• NURSING EDUCATION
  The post-master’s certificate in Nursing Education consists of 12 hours – 6 hours in nursing and 6 in education. Required courses in the College of Nursing are 566 and 565. In consultation with the Nursing Education Minor Coordinator, students select 6 hours of coursework from the College of Education, Health, and Human Sciences.

• NURSING OF WOMEN AND CHILDREN
  Course requirements are 550 and 551, plus additional hours as determined by the college.

MAJOR
Social Work
- Clinical Social Work Practice concentration
- Social Welfare Management and Community Practice concentration
Social Work PhD
Graduate Certificate Program
Management and Community Practice

The College of Social Work began as the Nashville School of Social Work, founded in 1942 under the auspices of Vanderbilt University, Scarritt College, and George Peabody College. It joined the University of Tennessee in 1951. By 1974 the three branches, located in Nashville, Memphis and Knoxville, offered the two-year master’s program. The doctoral program was inaugurated in 1983. In 1985 the Bachelor of Science in Social Work program was added, and the School achieved college status.

The University of Tennessee College of Social Work is the only graduate professional social work education program in Tennessee and offers the full continuum of social work education degrees at the baccalaureate, master’s and doctoral levels.

Social work is a helping profession that focuses on providing skilled intervention in the prevention and amelioration of individual and societal problems. It is the purpose of the college to provide an education that fosters growth in both individual and career development.

Graduate Programs
The two-year program (thesis or non-thesis option) leading to the Master of Science in Social Work is fully accredited by the Council on Social Work Education and is offered on all three campuses. The foundation curriculum of the PhD program is available only in Knoxville. The college also offers a post-master's certificate program in management and community practice. The Tennessee state school social work licensure program is available to currently enrolled MSSW students. Application materials are available from the College of Social Work, Henson Hall, Knoxville, Tennessee 37996-3333, or at http:\csw.utk.edu. Please specify MSSW, PhD, or certificate program on the request.
Financial Aid
Students may apply directly to the university’s Office of Financial Aid and Scholarships for assistance such as the National Direct Student Loan or the Work-Study Program. Information regarding scholarships administered by the college is made available after admission. Financial aid is available to qualified students in the form of fellowships, scholarships, and teaching and research assistantships. Graduate assistantships and other forms of assistance are awarded on the basis of merit and interest to applicants who are accepted into the PhD program.

MASTER OF SCIENCE IN SOCIAL WORK

SOCIAL WORK MAJOR

The Master of Science in Social Work program prepares social workers to provide professional leadership in clinical social work practice and social work management and community practice. These objectives are met through a curriculum requiring of all students a professional foundation and a concentration in either clinical social work practice or social welfare management and community practice. The MSSW program is accredited by the Council on Social Work Education.

Admission
Admission to the master’s program is based on the following.

- A bachelor’s degree from an accredited college or university with appropriate preparation in the social sciences. At least three-fourths of the applicant’s undergraduate work should be in the social sciences, humanities, physical sciences, and other arts and sciences subjects. Applicants must have a course in human biology and demonstrate a liberal arts perspective through coursework in at least four of the following five areas – economics or mathematics; government, political science or history; sociology or anthropology; psychology; philosophy, literature, or the arts. Applicants with other academic backgrounds may request consultation to discuss ways that they can meet the requirements.
- A grade point of 2.7 or higher on a 4.0 scale. Applicants falling below this average may be considered for probationary admission on the basis of supplemental evidence of the ability to perform at a satisfactory level. The university requires a minimum GPA of 2.7 for admission to graduate study.
- Personal qualifications acceptable for entrance into the professional practice of social work.
- All applicants must submit up-to-date scores from the Graduate Record Examination (general). Preference is given to applicants with a GPA of 3.0 or above in their undergraduate work with substantial preparation in the social sciences. Applicants who have a prior conviction, other than a minor traffic violation, may not necessarily be denied admission to the MSSW program. However, such convictions may prevent placement in certain field practice agencies and/or licensure in certain states.

Advanced Standing
The University of Tennessee College of Social Work has an advanced standing program. Admission to advanced standing requires a BSW from an accredited program; an overall undergraduate GPA of 3.0 or higher; and personal qualifications acceptable for entrance into the professional practice of social work. Students admitted into advanced standing are required to complete a minimum of 36 hours of study in either of the college’s concentrations – clinical social work practice or social work management and community practice. These students will follow the curriculum plan and meet all requirements of the concentration duration and community practice. These students will follow the curricular – clinical social work practice or social work management and community practice. Beginning students must complete a minimum of 30 hours in the concentration consisting of 24 hours in foundation classroom courses and 6 hours in field practice. The foundation is the initial phase of the master’s program. It contributes to the process of professional identification and presents a comprehensive, broad base of theory, knowledge and skills from which to practice. The foundation classroom courses include Foundations of Social Work Practice I, II and III; Human Behavior in the Social Environment I and II; Social Welfare Policy and Services; Social Work Research; and Social Work and Oppression. Students also complete a two-semester field placement, Field Practice (6 hours). Upon successful completion of the foundation curriculum, all students must complete a minimum of 30 hours in the concentration curriculum including field practice (12 hours). Students select a concentration in clinical social work practice or social welfare management and community practice.

Extended Study
Planned part-time programs are available in all three locations of the college. Admission requirements are the same as for full-time study. Coursework can be completed over a three- or four-year period.

Transfer Credits
Coursework equivalent to the first year of the master’s program, completed in another accredited graduate social work program, is usually accepted toward degree requirements. Applicants must meet the admission requirements of the Graduate Council and the College of Social Work. Transfer courses must be approved as equivalent to required and/or elective courses taken for graduate credit and passed with a grade of B or better. An S (Satisfactory/No Credit system) for the field practicum is also accepted. In addition, transfer courses must be part of an otherwise satisfactory graduate program (B average) and be approved by the dean. This coursework must be completed within the six-year period prior to the receipt of the degree. A maximum of 6 hours from work earned in disciplines other than social work may be transferred as elective credits. The student’s academic committee must approve the request and the transfer credit must meet Graduate Council requirements.

Proficiency Examination
Students in the master’s program may earn a maximum of 9 hours by proficiency examination, with the exception of field practice courses. Students interested in proficiency examinations are referred to the Graduate Catalog statement describing the procedure for applying for examination.

Requirements
- The program requires successful completion of a minimum total of 60 semester hours including completion of the foundation curriculum (30 hours) and 30 hours in one of the two concentrations (clinical social work practice or social welfare management and community practice).
- Students may select a thesis or non-thesis option. Students pursuing the thesis option receive 6 hours for successful completion.
- Students must successfully complete a comprehensive exam or thesis defense.
- Students must have an overall GPA of 3.0 or better on all graded courses and satisfactory performance in field.

Professional Foundation Curriculum
All students must complete 30 hours in the foundation curriculum consisting of 24 hours in foundation classroom courses and 6 hours in field practice. The foundation is the initial phase of the master’s program. It contributes to the process of professional identification and presents a comprehensive, broad base of theory, knowledge and skills from which to practice. The foundation classroom courses include Foundations of Social Work Practice I, II and III; Human Behavior in the Social Environment I and II; Social Welfare Policy and Services; Social Work Research; and Social Work and Oppression. Students also complete a two-semester field placement, Field Practice (6 hours). Upon successful completion of the foundation curriculum, all students must complete a minimum of 30 hours in the concentration curriculum including field practice (12 hours). Students select a concentration in clinical social work practice or social welfare management and community practice.
Field Practice

Field instruction is a critical component of the student’s first- and second-year programs. Through cooperation with a wide range of social agencies and human service programs throughout Tennessee, the college is able to provide field placements in a variety of social work practice areas. The faculty works closely with the placement agencies and the field instructors to ensure that students have quality field practice experiences that meet the objectives of the core curriculum and the concentration.

The college uses a concurrent class and field plan. Students are in field two days per week during the first year and three days per week during the second year.

First-year agency placements are selected to provide practice experiences related to the foundation curriculum content. Within the placement, each student’s experiences are planned and designed according to educational objectives.

Second-year placements are selected according to the student’s area of concentration, individual career interests, and educational needs. The student actively participates with the field practice coordinator and the educational committee in selection of the second-year placement. The second-year field placement experience focuses on the integration of social work knowledge and values and emphasizes the acquisition and development of practice skills.

Students are responsible for meeting the requirements of their placement agencies in terms of office hours and workload coverage. This responsibility takes precedence over scheduled university breaks and may result in variations in holidays and office hours for the student.

Students receiving a grade of NC in field practice may not repeat the field practice.

CLINICAL SOCIAL WORK PRACTICE CONCENTRATION

The clinical social work practice concentration focuses on students developing expertise in clinical social work practice with client systems including individuals and small groups, particularly with clients from high-risk and vulnerable groups. The concentration emphasizes theoretical and empirical knowledge and practice skills in differential assessment, clinical interventions and practice evaluation. The concentration also emphasizes knowledge and skills directed toward (1) amelioration of complex psychosocial, interpersonal problems; (2) ethically sound and culturally sensitive practice; and (3) influence the development of services and programs that are responsive to the needs of vulnerable, high-risk clients and groups.

Required Courses

- 521 (3 hours).
- 525 (3 hours).
- 526 (3 hours).
- 582-583 Field Practice (12 hours).
- Minimum of 3 advanced course electives (total of 9 hours): one or more from a pool of advanced clinical practice courses; one or more from a pool of advanced general courses.

SOCIAL WELFARE MANAGEMENT AND COMMUNITY PRACTICE CONCENTRATION

The social welfare management and community practice concentration focuses on students’ developing skills directed toward the management and analysis of complex service delivery needs within organizations and communities, knowledge and skills in the development of service intervention strategies to address such and related needs, and the organizational and management skills that enable practitioners to work in a variety of challenging and turbulent environments. The concentration empha-
tration and planning, areas of practice, and research methodology and statistics. Upon this foundation, students and their academic committees develop a plan of study consisting of coursework in Social Work and other departments of the university.

 Typically, the 24 hours of foundation curriculum are completed and elective coursework begun during the first year of study, Social Work 670 and the elective requirement are completed and dissertation research begun in the second year of study, and dissertation research is continued in the third year of study. While it is generally expected that the coursework will be completed on a full-time basis, dissertation research can be completed on a planned part-time basis.

 Specific courses required are 601, 602, 612, 613, 640, 650, 670, and Statistics 531 and 532 or any two graduate level statistics courses approved by the doctoral program chair.

Examinations

 All doctoral students are required to pass a qualifying examination and a comprehensive examination. The qualifying examination covers the foundation curriculum. The comprehensive examination is administered by members of the comprehensive exam committee and is designed for the student to demonstrate comprehensive knowledge of the major and cognate areas and the dissertation topic. In case of failure of either examination, the student may request a retake. The result of the second examination is final.

Intercollegiate/Interdisciplinary Gerontology Minor

 Graduate students in the College of Social Work, at the Knoxville location, may pursue an intercollegiate/interdisciplinary minor in gerontology. The gerontology minor gives the student an opportunity for combining the knowledge about aging in American society with his/her major concentration.

 Core courses and a practicum are offered by the College of Social Work and selected departments within the Colleges of Education, Health, and Human Sciences and Arts and Sciences. A cross-listed seminar between contributing programs is designed to integrate experiences from different sources and to demonstrate the multi-faceted nature of working within an aging society. Please refer to the College of Education, Health, and Human Sciences for specific requirements.

GRADUATE CERTIFICATE IN MANAGEMENT AND COMMUNITY PRACTICE

 The College of Social Work offers a 15-hour graduate certificate designed for social workers desiring supervisory, management, administration and community practice training and education to enhance career advancement or career redirection. A master's degree in social work or a closely related field is required for admission.

 Course requirements are 541, 543, 547, and two courses selected from 550, 551, 552.
College of Veterinary Medicine

MAJOR
Veterinary Medicine

DEGREE
DVM

The College of Veterinary Medicine, established in 1974, offers a professional curriculum leading to the Doctor of Veterinary Medicine (DVM) degree. Residency training programs in the various clinical specialties are also offered.

The primary objective of the college is to enable students to attain essential information, skills, attitudes and behaviors to meet the varied needs of society and the veterinary profession. The professional curriculum provides an excellent basic science education in addition to training in diagnosis, disease prevention, medical treatment, and surgery. Graduates are qualified to pursue careers in the many facets of veterinary medicine and related health professions.

About two-thirds of the veterinarians in the United States are engaged exclusively in pet or companion animal practice. A growing number are concerned with the health problems of zoo animals, laboratory animals, wildlife, and aquatic species. A number of veterinarians are involved in the health care of food and fiber animals ensuring the supply of safe and healthy food.

Veterinarians also find rewarding careers in the U.S. Public Health Service, the Armed Forces, and in state, county, or local health agencies. A number of veterinarians are employed by the U.S. Department of Agriculture and by state departments of agriculture for important work in livestock disease control, meat and poultry inspection, serum and vaccine production, and the protection of our country against the importation of foreign animal diseases. With the events of September 11, 2001, veterinarians are making significant contributions to biosecurity and homeland defense.

Excellent research opportunities exist for veterinarians – research directly benefiting animals and research conducted with animals that benefits humans. Such opportunities are available at colleges and universities and with governmental agencies, private research institutions and biological and pharmaceutical companies.

The college jointly administers a graduate program leading to the Master of Science and the Doctor of Philosophy degrees with a major in comparative and experimental medicine. This program provides a wide spectrum of interdisciplinary training that prepares graduates for teaching and/or research careers in the health sciences. The majority of the graduate students and graduate faculty of the College of Veterinary Medicine are involved in the comparative and experimental medicine program. (See Comparative and Experimental Medicine in the Intercollegiate section of this catalog.)

Because of the interdisciplinary departmental administration of the college, the faculty also have opportunities in the graduate programs of other instructional units, including Animal Science (nutrition, physiology, genetics and animal management), Microbiology (bacteriology, virology and immunology), Ecology and Evolutionary Biology (environmental toxicology), Public Health. (Refer to other sections of this catalog for a full description of these programs.)

DOCTOR OF VETERINARY MEDICINE

Admission
To qualify for admission to the professional program of the College of Veterinary Medicine, a candidate must have completed at least the minimum pre-veterinary course requirements listed below. These may be completed at any accredited college or university that offers courses equivalent to those at the University of Tennessee, Knoxville. Pre-veterinary course requirements must be completed by the end of spring term of the year in which the applicant intends to enroll. Biochemistry requirements must be completed by the end of spring term of the year in which the applicant intends to enroll. Biochemistry requirements must be completed by the end of spring term of the year in which the applicant intends to enroll. Biochemistry requirements must be completed by the end of spring term of the year in which the applicant intends to enroll.

Admission Procedures

Admission of new students is for the fall semester, with first priority given to residents of Tennessee.

The College of Veterinary Medicine utilizes the Veterinary Medical College Application Service (VMCAS) for all applicants. Forms and instructions for making application for admission may be obtained from the Office of the Associate Dean, The University of Tennessee, College of Veterinary Medicine, 2407 River Drive, Room A102, Knoxville, Tennessee 37996-4550.

The deadline for receipt of the completed application materials is October 1. Non-Tennessee applicants must have a minimum cumulative grade point average of 3.2 on a 4.0 scale for application to be considered.

Applications are accepted only from U.S. citizens or permanent residents of the U.S.

Requirements

The curriculum of the College of Veterinary Medicine is a nine-semester, four-year program. Each class begins in August and graduates four years later in May. The first three years generally follow the traditional fall and spring semesters with the summer break following years one and two. The final year of the professional curriculum begins immediately following semester six and is a continuous clinical rotation experience extending over 54 weeks.

Development of a strong basic science foundation is emphasized in the first year. Courses consist mostly of pre-clinical subjects of anatomy (gross and microscopic), physiology, immunology, bacteriology, virology and parasitology. Also included in the first year are clinical subjects of physical diagnosis and epidemiology. Considerable integration of subject matter is incorporated during this year.

The second and third years include the study of diseases, their causes, diagnosis, treatment and prevention, and courses are team-taught on an organ system basis.

The final year (three semesters) is devoted to intensive education in solving animal disease problems involving extensive clinical experience in the Veterinary Teaching Hospital. Each student will participate exclusively in clinical rotations in the Veterinary Teaching Hospital and in required externships (preferably off-campus).

Innovative features of this curriculum include six weeks of student centered, small group, applied learning exercises in semesters one through five; three weeks of dedicated clinical experiences in the Veterinary Teaching Hospital in semesters three through five; and elective course opportunities in semesters four through nine which allow students to focus on individual educational/career goals. Students enrolled in the DVM program may register for up to 10 hours of graduate courses and these hours will be credited toward the DVM. Elective study offers a unique educational alternative for students in the College of Veterinary Medicine and is intended to enhance professional growth, concentration in an area of interest and career opportunities.

In addition to education in the science and art of veterinary medicine, students receive instruction in paramedical subjects such as animal behavior, medical communication, professional ethics, jurisprudence, economics, and practice management.

The curriculum requires successful completion of 164 credit hours.

MAJOR DEGREE
Aviation Systems MS

The University of Tennessee Space Institute offers a program leading to the Master of Science degree with a major in aviation systems. The aviation systems program is designed for those who possess a bachelor's degree in engineering or science and wish to study under a system philosophy toward careers in research and development or administration in areas pertinent to aviation. Current emphases include flight testing, aircraft design, aviation meteorology, air traffic control, and airport management.

Admission
To qualify for admission to this program, the applicant must possess a bachelor's degree in engineering or science from an accredited institution, show evidence of ability to pursue and benefit from the program, and fulfill the University of Tennessee, Knoxville, graduate admission procedures and grade point standards. It is expected that the student will have a basic knowledge of computer utilization and statistics; an understanding of aero-dynamic fundamentals, aircraft propulsion, and performance; and some understanding of economics.

MASTER OF SCIENCE
AVIATION SYSTEMS MAJOR

Both thesis and non-thesis programs are available. The thesis program involves a minimum of 30 hours credit while the non-thesis program involves a minimum of 33 hours. Both options are fully supported off-campus utilizing electronic media for videotaping and interactive distance teaching methods.

Requirements

Thesis Option
The thesis program involves satisfactory completion of the following requirements.

Research and Development Specialization
• 12 hours of 500-level courses in the major field of aviation systems.
• 6 hours in industrial engineering (engineering management).
• 6 hours of electives from the major field, mathematics or engineering.
• 6 hours of Aviation Systems 500 demonstrating the ability to conduct and report on an independent investigation.
• Defense of thesis and completion of final exam.

Administration Specialization
• 12 hours of 500-level courses in the major field of aviation systems.
• 3 hours in industrial engineering (engineering management).
• 3 hours in economics or finance.
• 6 hours of electives selected from the major field, mathematics or engineering.
• 6 hours of Aviation Systems 500 demonstrating the ability to conduct and report on an independent investigation.
• Defense of thesis and completion of final exam.
Non-Thesis Option
The non-thesis program will be permitted in special circumstances and involves satisfactory completion of the following requirements.

Research and Development Specialization
- 12 hours of 500-level courses in the major field of aviation systems.
- 6 hours in industrial engineering (engineering management).
- 12 hours of electives in the major field, mathematics or engineering.
- 3 hours of an assigned project under Aviation Systems 550.
- A comprehensive final written examination on all coursework submitted for the degree and defense of the project course paper.

Administration Specialization
- 12 hours of 500-level courses in the major field of aviation systems.
- 3 hours in industrial engineering (engineering management).
- 3 hours in economics or finance.
- 12 hours of electives in the major field, mathematics or engineering.
- 3 hours of an assigned project under Aviation Systems 550.
- A comprehensive final written examination on all coursework submitted for the degree and defense of the project course paper.

MASTER OF SCIENCE
COMPARATIVE AND EXPERIMENTAL MEDICINE MAJOR

Admission
Admission requirements of the Graduate Council of the University of Tennessee, Knoxville, apply. In addition, all applicants must furnish three letters of recommendation from individuals who are familiar with their scholastic or professional records.

Applicants must have a baccalaureate degree with coursework in chemistry through organic, mathematics through calculus, physics, and basic biology. More advanced study in biology such as biochemistry, mammalian anatomy, histology, cell biology, or other appropriate biomedical courses from an accredited university is recommended.

Applicants for admission to the Master of Science degree program whose background include no formal training in the biomedical field beyond the baccalaureate degree will be required to score at least 1,000 on the quantitative and verbal portions of the Graduate Record Examination.

Requirements
Students must complete a minimum of 24 hours of coursework and 6 hours of Thesis 500. Comparative and Experimental Medicine 541 and 608 are required, as are 4 hours of 600-level graduate journal clubs. In addition, students must take at least 3 hours of 500- or 600-level statistics and a minimum of 8 hours of coursework in a specified discipline. Areas of emphasis may include hematology, oncology, pathology, pharmacology, toxicology, immunology, genetics, infectious disease, epidemiology, metabolism, or other areas of medicine. Exceptions to accommodate students with specific interests must be approved by the Joint Graduate Coordinating Committee after application, in writing, to the director.

The graduate committee (at least three members) is chosen before the end of the second term and must include at least one member from the College of Veterinary Medicine and at least one member from the Graduate School of Medicine. If a minor is declared, one member must be from the minor discipline. A final oral examination must be passed at the completion of the program.

DOCTOR OF PHILOSOPHY
COMPARATIVE AND EXPERIMENTAL MEDICINE MAJOR

Admission
Admission requirements of the Graduate Council of the University of Tennessee, Knoxville, apply. In addition, all applicants must furnish three letters of recommendation from individuals who are familiar with their scholastic or professional records.

Applicants generally will be expected to have a professional degree in one of the medical sciences (e.g., MD, DDS, DVM) or a master’s degree in one of the biomedical sciences and a Graduate Record Examination score of at least 1000 for the quantitative and verbal portions.

An individual having a baccalaureate degree with a strong background in the physical and biological sciences may be admitted upon presenting evidence of exemplary performance on the Graduate Record Examination.

Exceptional veterinary students at the University of Tennessee, Knoxville, may be admitted to the comparative and experimental medicine graduate program but will be enrolled officially as veterinary students. During summers such students may take advantage of registering for graduate courses to be counted as elective courses in the veterinary program.
Requirements

Students with professional degrees (e.g., MD, DDS, DVM) or master’s degrees in a program-related biomedical science must complete at least 24 hours of coursework and 24 hours of Dissertation 600. Others must complete a minimum of 48 hours of coursework and 24 hours of Dissertation 600.

Comparative and Experimental Medicine 541 and 608 are required, as are 6 hours of 600-level graduate journal clubs. In addition, students must take at least 3 hours of 500- or 600-level statistics and a minimum of 8 hours of coursework in a specified discipline. Areas of emphasis may include hematology, oncology, pathology, pharmacology, toxicology, immunology, genetics, infectious disease, epidemiology, metabolism, or other areas of medicine. Exceptions to accommodate students with specific interests must be approved by the Joint Graduate Coordinating Committee after application, in writing, to the director. The doctoral committee is chosen during the first year. At least one member must be from the College of Veterinary Medicine and at least one member from the Graduate School of Medicine.

A comprehensive examination must be passed before the end of the third year of the program. In addition, students must prepare and defend a prospectus outlining their proposed research projects before the end of their third year in the program. Exceptions to these requirements are provided for medical residents pursuing doctoral degrees who must successfully complete the comprehensive examination and research prospectus before the end of their fourth year in the program.
Facilities for Research and Service

Center for Business and Economic Research
(College of Business Administration)
William Fox, Director

The Center for Business and Economic Research (CBER) is well known within Tennessee for its extensive record of high quality public policy research related to a broad range of issues of importance to the life of Tennesseans, their economy, and their government. The research spans such diverse issues as welfare, taxation, Internet, health care, economic development, education and environmental policy. CBER is also the source of data that is used by both the public and private sectors for a wide range of purposes.

The quality and breadth of CBER’s work is also recognized across the U.S. and around the world. The public policy and academic communities from many states and countries call upon CBER researchers to analyze key policy issues.

CBER was established in 1937 as an auxiliary of the College of Business Administration at the University of Tennessee, Knoxville. It is located on the first floor of Temple Court. CBER currently has four research faculty, seven graduate students, and an extensive support staff in the areas of research, data analysis, project management, administration, and publications. CBER is designated as a State Data Center, allowing direct and timely access to Census and other data. Additionally, CBER staffs the college’s Technology Information Services, which provides technological support to the entire College of Business Administration.

Center for Executive Education
(College of Business Administration)
http://TheCenter.utk.edu
Alex Miller, Associate Dean

The College of Business Administration’s executive/management education efforts are facilitated through the Center for Executive Education, 702 Stokely Management Center. The center is a major outreach activity of the University of Tennessee, Knoxville, and a key link between the business community and the College of Business Administration.

The center offers four executive track Master of Business Administration degrees for working managers. Non-degree programs for the business community include programs in lean enterprise, supply chain management, process improvement and general management.

Much of the center’s work is customized to the needs of individual companies and provided at their sites in the U.S. or abroad.

A prominent feature of all programs is their applied nature. Through projects, assignments and workshops, participants use the courses to analyze their organizations and implement immediate changes.

Additional information about the Center for Executive Education can be found at http://TheCenter.utk.edu.

Center for Information Studies
(College of Communication and Information)
www.sis.utk.edu/cis/

The Center for Information Studies (CIS) was established in June 1989 to be a focal point for research related to information systems and services. The center, located at 420 Communications Building, has performed research for the federal government, state and local governments, and business and industry. Projects have ranged from strategic planning efforts to information system and service evaluations, to modeling of scientific and technical communication. Staff of the center have been actively involved in proposal development and project performance with faculty and staff in other centers and departments at the university.

Areas of interest to the center include information systems design, information organization and retrieval in very large databases, directories and locator tools in a networked environment, design of regional library and information system networks, new technology applications, information system support for educational reform, modeling of information processes, development of measures and methods for evaluating information system performance and effectiveness.

Center for Literacy Studies
(College of Education, Health, and Human Sciences)

The Center for Literacy Studies, founded in 1988, links theory and practice in the field of adult learning and literacy. The center collaborates with practitioners, policy makers, and other research organizations in Tennessee and across the nation in
Center for Physical Activity and Health (College of Education, Health, and Human Sciences)

The mission of the Center for Physical Activity and Health is to integrate scientific research, education, and practical applications of exercise and health science in a manner that enhances health, fitness, performance, and quality of life. The center is a research and service oriented organization designed to educate the University of Tennessee, Knoxville, and Knoxville communities about the benefits of regular physical activity as well as warn about the serious potential health outcomes of leading a sedentary existence.

A number of research projects are currently being conducted through the center. Many of these projects involve the role that physical activity plays in the prevention and treatment of obesity. In addition to supporting research, the center trains future leaders in exercise promotion, provides exercise opportunities for members of the university community, promotes exercise within the University of Tennessee and Knoxville communities, and provides exercise testing and assessment.

The center focuses its efforts in four main areas: training future leaders in exercise promotion, provides exercise opportunities for members of the university community; promotes exercise within the University of Tennessee and Knoxville communities, and provides exercise testing and assessment.

For additional information about services, contact Dr. Dixie L. Thompson at (865) 974-6040 or via e-mail at dixielee@utk.edu.

Center for Transportation Research (Office of Research)

Stephen H. Richards, Executive Director

The Center for Transportation Research, formerly the Transportation Center, was created in 1970 to foster and facilitate interdisciplinary research, public service, and outreach in the field of transportation at the University of Tennessee, Knoxville. It began operating full-time in 1972 and since then has contributed greatly to the overall research program of the university.

The center, 600 Henley Street, Suite 309, is a university-level organization administratively positioned within the College of Engineering at the University of Tennessee, Knoxville. The center’s multidisciplinary staff includes over 120 full-time researchers and technicians augmented with numerous faculty and students. The center is presently organized into five major divisions – Logistics and Systems Analysis, Infrastructure and Environment, Safety and Traffic Operations, Mobility Services and Policy, and Information Technology.

The center has three goals. The first is to conduct a program of research in transportation that is recognized for its excellence, comprehensiveness, innovation, productivity, and national leadership. The second is to develop and sustain the technical expertise for high quality transportation research by the faculty and students within the various departments and colleges of the University of Tennessee, Knoxville. The third goal is to serve the transportation research, service, and training needs of state and local government, business, and industry in Tennessee, the southeast region, and the nation.

Centers and Chairs of Excellence

The Centers of Excellence grew out of Tennessee’s Better Schools Program, an initiative to upgrade state-aided education at all levels. State officials and legislators wanted to give a few outstanding academic programs in state-aided universities a special push toward prominence, well beyond regular annual increases for all programs.

In 1984, the General Assembly appropriated and the governor approved $10 million for the first Centers of Excellence throughout the state. The public colleges and universities submitted their proposals for Centers of Excellence to the Tennessee Higher Education Commission, which made the final determinations. Now four of the university’s ten Centers of Excellence are sponsored by the UT Knoxville or located in Knoxville.

Concurrently, the university has received state funding, which it must match dollar-for-dollar, for Chairs of Excellence. These Chairs are $1 million endowed professorships in areas of significance to the university and to the individual, foundation, or corporation providing the matching gift money. Chairholders are noted within their respective academic units. The Chairs of Excellence are as follows.

KNOXVILLE

Benard Blasingame Chair of Excellence in Agricultural Policy
Chair of Excellence in Science, Technology and Medical Writing
Clayton Homes Chair of Excellence in Finance
College of Business Administration Chair of Excellence of Policy Studies
Condra Chair of Excellence in Computer Integrated Engineering and Manufacturing
Condra Chair of Excellence in Power Electronics Applications
Goodrich Chair of Excellence in Transportation
Hodges Chair of Excellence of English
J. Fred Holly Chair of Excellence in Political Economy
Nancy Gore Hunger Chair of Excellence in Environmental Studies
The University of Tennessee Willis Lincoln Chair of Excellence in Physics
Pilot Chair of Excellence in Leadership
Ivan Racheff Chair of Excellence in Materials Science and Engineering
Ivan Racheff Chair of Excellence of Plant Molecular Genetics
Forrest and Patsy Shumway Chair of Excellence in Romance Languages
Bernadotte E. Schmitt Chair of Excellence of History

MEMPHIS

Maury W. Bronstein Chair of Excellence in Cardiovascular Physiology
Crippled Children’s Hospital Foundation
William and Dorothy Dunavant Chair of Excellence in Pediatrics
Federal Express Chair of Excellence in Pediatrics
First Tennessee Chair of Excellence in Clinical Pharmacy
Thomas A. Gerwin Chair of Excellence in Physiology
Goodman Chair of Excellence in Medicine
J. R. Hyde Chair of Excellence in Rehabilitation Engineering
Le Bonheur Chair of Excellence in Pediatrics
E. Erick Muirhead Chair in Pathology
Plough Foundation Chair of Excellence in Pediatrics
Second Le Bonheur Chair of Excellence in Pediatrics
Semmes-Murphey Chair of Excellence in Neurology
Mark S. Soloway Chair of Excellence in Urology
Harriet S. Van Vleet Chair of Excellence in Biochemistry
Harriet S. Van Vleet Chair of Excellence in Microbiology and Immunology
Harriet S. Van Vleet Chair of Excellence in Pharmacology
Harriet S. Van Vleet Chair of Excellence in Virology
The University of Tennessee Medical Group Chair in Obstetrics and Gynecology

Early Learning Center for Research and Practice
(College of Education, Health & Human Sciences)
http://elc.utk.edu
Rena Hallam, Executive Director
The Early Learning Center for Research and Practice, operated by the Department of Child and Family studies since 1927, currently offers an early education program for young children ages six weeks to five years, including children with disabilities. Through its high-quality model program for children and for university students, the Early Learning Center serves three purposes – to promote the research and scholarship activities of the department and other university faculty and students through observation and study of young children, their families and teachers; to prepare undergraduate and graduate child development and early education professionals to work effectively with young children and families; and to provide a model early education program for children, families, and early childhood professionals. Housed in three locations, the ELC sites are all equipped with videotaping capabilities, small group research rooms, and observation booths that facilitate observation and research. A variety of research projects (such as the development of creativity in young children, early childhood assessment, teachers as collaborative researchers, and nutritional preferences of toddlers) are ongoing. The Early Learning Center is accredited by the National Academy of Early Childhood Programs, a division of the National Association for the Education of Young Children and is a Tennessee Three-Star rated child care facility. For more information, check the website at http://elc.utk.edu.

Energy, Environment, and Resources Center
(Office of Research)
Jack N. Barkenbus, Executive Director
The Energy, Environment, and Resources Center, 600 Henley Street, Suite 311, was created in 1973 to encourage interdisciplinary research directed at solutions to problems related to energy and the environment. The center involves faculty and students in research and public service projects, manages research and development projects that involve several disciplines, and assists government and industry in specific problems related to energy, environmental, resource, and technology policy issues. The center has a close working relationship with the Joint Institute for Energy and Environment, and Oak Ridge organizations. Sponsors include federal and state agencies, industry, and foundations.
Current research includes sustainable development, solid and hazardous waste management, information systems, environmental education, global environmental problems, water, and cleaner production. The center operates the Waste Management Research and Education Institute, the Center for Clean Products and Clean Technologies, the Water Resource Research Center, the Center for Geography and Environmental Education, and the Technology Research and Development Program. Grants and contracts bring approximately $4 million in research to the university each year.

Institute of Agriculture
Buddy Mitchell, Interim Vice President for Agriculture

The Institute of Agriculture dates to 1869 when the university was designated as Tennessee’s Federal Land-Grant Institution. Since the enabling federal legislation, agriculture education programs expanded to include mission-oriented basic and applied research in agricultural sciences and natural resources, and extending this knowledge to the citizens of the state. The Institute of Agriculture is composed of four units – the Tennessee Agricultural Experiment Station, UT Extension, the College of Agricultural Sciences and Natural Resources, and the College of Veterinary Medicine.

Agricultural Experiment Station
Thomas H. Klindt, Interim Dean

The university’s Board of Trustees established the Agricultural Experiment Station on June 8, 1882, five years before the passage of the Hatch Experiment Station Act by the U.S. Congress. The university was one of the first five institutions in the U.S. to establish an Agricultural Experiment Station. Since its creation, the Station’s priority has been to research to improve agricultural production, products, and marketing in Tennessee. Over time, programs have expanded to include natural resources and environmental stewardship.

The mission-oriented research initiatives of the Tennessee Agricultural Experiment Station, which are also reflected in thematic areas of the academic programs, are

- Molecular agriculture – applying the tools of biotechnology to agricultural and natural resources problems.
- Agro-environmental systems – systems approach to production and natural resources problems.
- Innovative technologies – engineering and processing technologies in agriculture and food systems.
- Agribusiness policies and practices – developing policies and practices that have economic, environmental and societal benefits.

The seven academic departments located in Knoxville are part of the Tennessee Agricultural Experiment Station. The faculty members, with joint appointments in the Experiment Station and the College of Agricultural Sciences and Natural Resources, are the graduate faculty participating in the eleven Master of Science and five doctoral programs. Research is conducted on campus and at ten Research and Education Centers located across Tennessee and operated by the Experiment Station. The Experiment Station also supports graduate student assistantships.

University of Tennessee Extension
Charles Goan, Interim Dean

The University of Tennessee Extension was established in 1914. Its purpose is to extend through various educational means agricultural, natural resources, and family and consumer sciences information to the citizens in the state. The program is carried on through offices in each of the 95 counties of the state. Educational emphasis includes work in four major program areas: agriculture and natural resources, resource development, family and consumer sciences, and youth education through 4-H Clubs. County Extension staff members working directly with local people are supported in various disciplines by faculty who are stationed either in Knoxville, Nashville, or Jackson. The University of Tennessee Extension works cooperatively with faculty and staff at Tennessee State University in administering programs.

Faculty members, who are State Specialists, and area agents collaborate with other faculty members of the Institute of Agriculture to conduct ongoing and timely, issue-based applied research to meet the needs of agricultural producers, foresters, and others involved with the food and fiber system. Many of the Extension faculty members are involved with the departmental graduate programs.

UT Extension operates as one of the four units in the Institute of Agriculture. The state is divided into three regions with directors located in their respective regions. Regional headquarters are maintained in Knoxville, Nashville and Jackson. Extension operates in a three-way partnership among county, state and federal governments. The University of Tennessee represents the state and federal government, and a County Agricultural Extension Committee represents county government in this partnership.

The University of Tennessee Libraries own approximately 2.4 million volumes and subscribe to more than 32,000 periodicals and serial titles.* The UT Libraries are committed to providing access to information in all formats. A strong collection of electronic resources are available through the Libraries’ Web page at www.lib.utk.edu. UT’s Digital Library Center hosts a growing number of digital collections. The Libraries’ membership in the Association of Research Libraries reflects the university’s support of large collections of library materials to meet the needs of a comprehensive university curriculum.

Experts at the reference desk in each library offer help and assistance in using the library for research. AskUs.Now (www.lib.utk.edu/refs/askusnow/) provides chat, e-mail, and telephone connections to librarians. Students will find a wide variety of materials and services in the main library (John C. Hodges Library), four branches on the Knoxville campus (Agriculture and Veterinary Medicine Library, Map Library, Music Library, and Special Collections), and the Social Work Library in Nashville.

Students can search the library catalog and hundreds of databases at any library location – and through the UT Libraries’ Web site. Interlibrary Services is available to help students find and retrieve materials that are not available in the UT Libraries. Workshops and classes are offered throughout the semester to help students learn how to get the most out of the Libraries’ services. The services and facilities of the UT Libraries are accessible to persons with disabilities.

The John C. Hodges Main Library (1015 Volunteer Blvd.) is a 350,000 square-foot building housing collections in all subject areas. Reference assistance and research consultation are available in Reference Services (Room 135) and The Commons (Room 235). The Commons, which is jointly staffed by the University Libraries and the Office of Information Technology, offers a computer help desk, a wide range of software applications and computer equipment, spaces for individual and group study, and loaner laptops configured to access the wireless network. The Commons is open continuously from noon on Sunday to midnight on Friday, during Fall and Spring Semesters. The second floor CyberCafe, with reading tables and a coffee shop, also is open for late night study. The Studio (Room 245) offers students a state-of-the-art lab for graphics, video and web production. Still and video cameras are available for checkout from The Studio. The Center for Children’s and Young Adult Literature on the third floor provides a study collection of children’s books.

The Agriculture and Veterinary Medicine Library (Room A-113, Veterinary Teaching Hospital) has a strong collection in agriculture; veterinary, comparative and human medicine; environmental studies and biodiversity; and related biological sciences.

The Map Library (Room 15, basement of the Hoskins Library, 1401 Cumberland Ave.) houses a large collection of sheet maps, atlases, journals, and digital resources related to cartography and GIS. Materials in print, film, and digital formats are gathered from commercial sources as well as the Government Depository program.

The Music Library (301 Music Bldg.) has a comprehensive collection of music and music literature, including books, scores, audio and video recordings, current periodicals, and microfilm. Most materials in the Library of Congress “M” classification are located here.

Special Collections (2nd floor, west wing, of the Hoskins Library) is dedicated to building collections of manuscripts, rare books, and other unique research materials. Collection strengths include Tennessee authors, Tennessee history and politics, Oak Ridge, and TVA. The Great Smoky Mountains Regional Collection is an ongoing effort to collect and preserve materials on the region. Students are welcome to use Special Collections. Materials from Special Collections cannot be checked out, but they can be used in the Special Collections Reading Room. The University Archives are also housed in the Hoskins Library. The Archives contain official records of the university; items published by its units, departments, and agencies; and materials that document University of Tennessee life.

The Social Work Library (Room 292, 193-E Polk Ave., Nashville) serves College of Social Work students in field practice across the state. The library has a working collection of materials in social work and related disciplines.

The Law Library on the Knoxville campus and the libraries located on the campuses in Chattanooga, Martin, Memphis, and Tullahoma are separately administered. The students and faculty of the university can use all of the libraries affiliated with The University of Tennessee.

**Maintenance and Reliability Center**  
*(College of Engineering)*

*Thomas V. Byerley, Director*

The Maintenance and Reliability Center (MRC), located at East Stadium Hall, was created in 1996 to provide an international center for research, development and application of advanced maintenance and reliability engineering. Over 30 industrial firms and a network of universities and national laboratories have joined with the University of Tennessee, Knoxville, in this endeavor. The four-fold mission of the MRC consists of education, research and technology assessment, information sharing, and business support and alliances. The mission has established maintenance and reliability engineering as an interdisciplinary activity with application across a broad spectrum of industrial activities. In addition to the technology, the MRC stresses the development of management techniques that will provide industry with the means to assess the availability, costs and benefits of advanced maintenance and reliability engineering practices.

The Maintenance and Reliability Center involves all departments in the College of Engineering. Interested and qualified students may affiliate as interns with the MRC program while pursuing a degree in any of the engineering departments. Maintenance and reliability engineering courses are available.

**Nutrition Institute**  
*(College of Education, Health, and Human Sciences)*

*M. Michael Zemel, Director*

The Nutrition Institute is a system wide, multidisciplinary consortium of faculty who are engaged in clinical and experimental nutrition research, teaching and service. Its expertise and resources are multifaceted including tools and techniques used in cell biology, epidemiology, metabolism and clinical training.

The multidisciplinary nature of nutrition has created a situation where nutrition research and teaching is dispersed among a number of academic units, including the Department of Nutrition in the College of Education, Health, and Human Sciences as well as in several departments in the colleges of Agricultural Sciences and Natural Resources, Arts and Sciences, Medicine, and Veterinary Medicine. The institute fosters collaboration among all efforts in nutrition sciences, coordinates collaborative research programs in nutrition and provides a unified forum for exchange and interactions with the national and international nutrition community. In addition, by creating formal ties among the units within the university that are involved in undergraduate, graduate and professional education in nutrition, teaching resources are pooled to strengthen nutrition-related instruction in these units.

**Office of Information Technology**  
[http://oit.utk.edu](http://oit.utk.edu)

The Office of Information Technology (OIT) provides computing and telecommunications resources and services for students, faculty, and staff. Information about OIT is available on the OIT Web site http://oit.utk.edu. OIT provides the core information technology equipment and services for The University of Tennessee, Knoxville. OIT provides public-access computer labs, central computing, administrative information systems, and network services, as well as information security for UT Knoxville.

---

* Data describe the Knoxville campus, excluding the Law Library.
Individual computer accounts are provided at no charge for all UT Knoxville students. The student’s UT email account is the official way the University communicates with students. These accounts may be used for e-mail, course work, research, and personal Web pages. Information and on-line registration for computer accounts are available at http://oit.utk.edu/accounts/. Students are also encouraged to download http://antivirus.utk.edu and use AntiVirus software supplied by OIT at no cost to the student.

Students on the Knoxville campus may access the Internet through wireless, direct Ethernet, or dial-up connections. UT Knoxville’s wireless infrastructure is available in most of the academic and administrative buildings on the Knoxville campus.

To provide access to computing facilities on campus, OIT staffs seven computing labs, maintains several unstaffed labs, and supports computing installations in residence halls. The computing labs are equipped with more than 300 microcomputers including current models of Apple, Dell, and Gateway machines. In addition, there are laser printers, wireless printers, scanners, CD-Writers, and zip drives available. A variety of industry standard software applications are available for use on the machines in the computing laboratories. Please refer to http://oit.utk.edu/labs.html for more information.

OIT Help Desk

OIT provides the telephone Help Desk as a centralized source of information and service for the computer and network resources managed by OIT. Help Desk Services are available to all University of Tennessee Students. To contact the Help Desk, please dial 974-9900. The Help Desk may also be contacted online by filling out the Help Desk request form which can be found at http://oit.utk.edu/contact.html. For more information, please visit the Help Desk Web site at http://oit.utk.edu/helpdesk.

OIT Customer Service Center

OIT maintains a Customer Service Center that centrally locates all contact points for walk-in support on related OIT services. Students can receive assistance and/or training on a wide variety of topics at our Customer Service Center. These services include installing academic software free of charge on personally owned computers and helping students diagnose problems with their computers. The Customer Service Center also cleans up virus and spyware infected machines and reloads/upgrades operating systems. The Customer Service Center is located on the corner of Cumberland and Volunteer in rooms 103/104 Aconda Court and is open Monday through Friday, 9 a.m. until 4 p.m.

Technology Training

Several courses are offered aimed at improving skills with the technology available at UT. Life Preserver: An Introduction to UT Computing is offered several times each semester on supported application software and operating systems. Other courses include those about MS Office products, Dreamweaver, JavaScript, using the Internet and search engines, and Web Page Essentials (four levels of HTML training). There is also a series of courses on Adobe Photoshop. Please refer to http://web.utk.edu/~training for more information.

Computer-Based Training

Computer-Based Training (CBT) is a self-paced series of interactive, Web delivered, learn-as-you-go courses offered on many computing topics. CBT offers courses for Microsoft products (Word, Excel, etc.), Internet topics (Internet basics, How to create a Web page, etc.), and more advanced topics, such as JavaScript, Visual Basic, object-oriented techniques, and open systems. There are over 800 courses available. This training is free to students. For registration and access to the CBT courses on the Web go to http://oit.utk.edu/cbl/.

Statistical Consulting Center

Our mission is to help UT students, faculty, and staff enhance the quality of their research by working together to effectively apply analytical methods, especially statistics. The software we support includes SPSS, SAS, Maple, MATLAB, LabVIEW, QDA Miner, WordStat, Enterprise Miner and Text Miner. The SCC can help you with determining sample sizes, designing surveys and deploying them on web pages, scanning and scoring Scan Forms, acquiring and managing data, analyzing or mining data or text, visualizing data through interactive or presentation graphics, and interpreting the results. Assistance is available by appointment via the Help Desk at 974-9900, by walk-in at 200 SMC, and by e-mail at StatHelp@utk.edu. For details, see http://oit.utk.edu/scc/.

The Innovative Technology Center

The Innovative Technology Center (http://itc.utk.edu) provides the leadership, support, resources, and training necessary to help University of Tennessee faculty, graduate teaching assistants, and academic teaching staff make effective use of technology in their teaching, both online and in the classroom. The ITC supports the University’s academic community by providing free production services for the design and development of web-based course materials, implementing faculty grants for instructional technology projects, and administering Online@UT, the University’s Blackboard-powered integrated online academic community. Students can get help with Online@UT/Blackboard by calling the OIT Help Desk at 974-9900.

Psychological Clinic

(College of Arts and Sciences)

Lance Laurence, Director

The Psychological Clinic supports graduate research and training in clinical psychology. Psychological assessment and psychotherapy are offered on an outpatient basis to the general public as well as to university students and staff.

Research Centers of Excellence

http://www.tennessee.edu/research/roce.shtml

In 2000, the University of Tennessee, Knoxville, created nine Research Centers of Excellence in a competitive process that sought to emphasize some of the strongest, most promising research taking place at the university. With financial support from the state of Tennessee, the nine centers have created vital research programs that promise to enhance the university’s teaching and research and to contribute positively to the state economy. The five centers in Knoxville are in environmental biology, food safety, materials science, information technology, and structural biology. Memphis has four centers – genomics, neurology of brain diseases, diseases of connective tissue, and vascular biology. Several of the programs involve activities on the various university campuses and collaboration with Oak Ridge National Laboratory.

Center for Genomics and Bioinformatics

Daniel Goldowitz, Director

The Center for Genomics and Bioinformatics, located at the University of Tennessee Health Science Center in Memphis, is committed to fostering an atmosphere conducive to scientific research and collaboration in the area of functional genomics, involving both basic science and clinical departments across the campuses of the University of Tennessee.

Center for Information Technology Research (CITR)

Jack Dongarra, Director

The Center for Information Technology Research (CITR) was established in the spring of 2001 to drive the growth and development of leading-edge Information Technology Research (ITR) at the University of Tennessee, Knoxville. The mission of CITR is to build a thriving, well-funded community in basic and applied ITR at the University of Tennessee, Knoxville, in order to help the university capitalize on the rich supply of research opportunities that exist in this area.
Center of Excellence for the Neurobiology of Brain Disease
William Pulsinelli, Director

The Center for the Neurobiology of Brain Disease works to improve the diagnosis, treatment, and prevention of neurological and psychiatric disorders. The center combines state-of-the-art technologies for brain disease research and molecular biology to improve understanding of brain function and the underlying reasons for neurological disorders ranging from Parkinson’s and Huntington’s diseases to schizophrenia and drug addiction.

Center for Environmental Biotechnology
Gary Sayer, Director

The Center for Environmental Biotechnology (CEB) was established in 1986 to foster a multidisciplinary approach toward training the next generation of environmental scientists and solving environmental problems through biotechnology. The CEB was given Research-Center-of-Excellence status by the University of Tennessee, Knoxville, in order to catalyze and advance a new research agenda that pushes the envelope of creative and pioneering research. This fundamental new research will revolutionize the ability to dissect, monitor and control processes at the molecular level to achieve real-time information and computational analysis in complex bioenvironmental systems.

Food Safety Center of Excellence
Ann Draughon and Stephen Oliver, Directors

The Food Safety Center of Excellence was established in December 2000. The center develops and evaluates strategies to destroy or control food-borne pathogens and reduce the occurrence of food-borne illnesses. Contributing to this work is a multidisciplinary team of researchers, consisting of members of UT’s Institute of Agriculture’s Department of Food Science and Technology as well as researchers from departments outside the institute. Specialists include scientists with expertise in biochemistry, reproductive biology, food service management, parasitology, infectious diseases and risk assessment.

Vascular Biology Center of Excellence
Lisa K. Jennings, Director

The Vascular Biology Center of Excellence at the University of Tennessee Health Science Center (UTHSC) in Memphis was initiated in January 1999. The study of cellular and integrated vascular function under normal and pathologic conditions is the major research and clinical focus of the UT Vascular Biology Center of Excellence. The major collaborations formed by the participating faculty and trainees, along with the TAM (Tennessee, Arkansas, Mississippi) Cardiovascular Network of more than 70 cardiologists, creates an innovative and powerful research consortium.

Center of Excellence for Diseases of Connective Tissue
Andrew Kang, Director

The Center for Diseases of Connective Tissue is located at the University of Tennessee Health Science Center in Memphis. Scientists at the center conduct basic research in five areas – autoimmune diseases, such as rheumatoid arthritis and lupus; degenerative diseases, such as osteoarthritis; inflammation and the basic science of how the body reacts to injury; fibrotic diseases, such as heart failure and emphysema; and clinical research. The center also educates and trains pre-and postdoctoral fellows and conducts outreach programs.

Tennessee Advanced Materials Laboratory (TAML)
Ward Plummer, Director

The Tennessee Advanced Materials Laboratory (TAML) calls on experts in materials science and engineering, chemistry, chemical engineering, and physics at the University of Tennessee, Knoxville, and the Oak Ridge National Laboratory to explore the creation of new materials through computer-intensive modeling and experimental research.

Center of Excellence for Structural Biology
Engin Serpersu, Director

The mission of the University of Tennessee Center of Excellence for Structural Biology (CESB) is to expand the frontiers of knowledge in biomolecular structural and functional research. The center brings together a large group of structural molecular biologists working on a wide range of biological molecules, biomolecular assemblies and complexes. Its participants represent specialties in all of the current major techniques for high-resolution structure determination of large molecules, including X-ray crystallography, NMR spectroscopy and a battery of sophisticated biophysical tools including mass spectrometry and other spectroscopic techniques.

Research Consortiums

The University of Tennessee, Knoxville, is a member of three not-for-profit research consortia – Oak Ridge Associated Universities (ORAU); Southeastern Universities Research Association (SURA); and Universities Research Association, Inc. (URA).

Oak Ridge Associated Universities (ORAU). Since 1946, students and faculty of the University of Tennessee, Knoxville, have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 91 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU manages, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines, including business, earth sciences, epidemiology, engineering, geological sciences, physics, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of under-represented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research, and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact Lillian T. Mashburn; Director, Office of Federal Relations; ORAU Councilor for the University of Tennessee or Monnie E.
Southeastern Universities Research Association (SURA)
SURA is a nonprofit consortium of forty-one universities in thirteen Southeastern states and the District of Columbia. SURA's goals are to foster excellence in scientific research, to strengthen the scientific and technical capabilities of the nation and the Southeast, and to provide outstanding training opportunities for the next generation of scientists and engineers. The SURA-Oak Ridge National Laboratory (ORNL) Summer Cooperative Research Program in Materials Science and Engineering was established in 1989 to promote collaborations between individual university investigators and ORNL researchers. The SURA Continuous Electron Beam Accelerator Facility (CEBAF) Graduate Fellowship Program offers awards to promising graduate students enrolled or enrolling in master's or doctoral programs at SURA member institutions and whose research interests correspond to research activities to be conducted at CEBAF (i.e. nuclear and related particle physics, accelerator physics, and associated scientific and engineering fields).

Universities Research Association, Inc. (URA). URA, Inc. is a nonprofit corporation consisting of eighty-six major research-oriented universities in the United States, Canada, and Japan and is a management operating contractor for the U.S. Department of Energy (DOE) for the design, construction, and operation of the Fermi National Accelerator Laboratory (Fermilab) located near Batavia, Illinois. URA provides funds to support courses for graduate students at Fermilab. Member institutions have graduate study programs in science and are active in particle physics and astrophysics.

Tennessee Water Resources Research Center
(Office of Research)
http://eerc.ra.utk.edu/divisions/WRCC.html

The Tennessee Water Resources Research Center, 600 Henley Street, Suite B060, is a federally designated institute for sponsoring and coordinating water research for the state. The mission of the center is: (1) to assist and support all the academic institutions of the state, public and private, in pursuing water resources research which addresses a wide range of problems of interest to the state, region, and nation; (2) to provide for information dissemination and technology transfer services to state and local government bodies, academic institutions, professional groups, environmental organizations, and others, including the general public, who have an interest in water resources matters; and (3) to promote education and training in fields relating to water resources and to encourage the entry of promising students into careers in these fields. The center maintains a technical library that includes numerous water resources-related databases on CD-ROM and other references in support of its broad-based program involving watershed management, water quality education, urban stormwater management, erosion prevention, and sediment control. The center sponsors and conducts training workshops on stormwater management and erosion prevention and sediment control for the state.

Textiles and Nonwovens Development Center
(Office of Research)

The Textiles and Nonwovens Development Center (TANDEC) is a research and application development facility for melt processed nonwoven fabrics. These are materials used in a variety of products such as disposable diapers, wipes, hospital gowns and drapes, and protective clothing and masks. Officially dedicated in 1990, TANDEC was established through a grant from Exxon Mobil Chemical Company. The Center brings together academics and industry to provide leadership in research, education, and industry services, by developing innovative materials, studying basic engineering and scientific aspects of products and processes, building cross-disciplinary research groups, and providing a range of laboratory and pilot scale equipment. Opportunities exist for faculty and students to work with pilot scale processing lines and interact with industrial engineers and scientists.

Tourism Institute
(Office of Research)
The University of Tennessee Space Institute

Tourism Institute
Through education, research, and public service the Tourism Institute at the University of Tennessee seeks to add value to Tennessee's largest sector of the economy – hospitality and tourism. Centered in the department of Retail, Hospitality, and Tourism Management in the College of Education, Health and Human Sciences, many research projects involve maintaining databases of tourism trends, economic impacts and educational issues in management, marketing, and the development of market valued tourism products. The institute will assist public and private tourism professionals in efficient and profitable operational analysis as well as marketing and economic assistance.

Since tourism is a demand driven industry, understanding consumer demand and tourist behavior is essential to expanding markets and increasing demand for the Tennessee tourism product. Recognizing the tourism product includes consumer spending on lodging, retail shopping, food and beverage, transportation, and attractions provides special opportunities to track the impact and growth of these hospitality related industries as a result of tourist spending. It also works with Tennessee and Southeast regional public and private tourism organizations in developing educational, research and service projects to grow the state and regional tourism economy. The institute works with the Tennessee Department of Tourism Development, College of Agriculture and Natural Sciences and other agencies in developing research studies to expand the tourism industry.

The University of Tennessee Space Institute
John E. Caruthers, Associate Vice President and Chief Operating Officer

The Space Institute is a graduate education and research institution located on a 365-acre lakeshore campus in Middle Tennessee. UTSI was established in 1964 and has evolved into an internationally recognized institution for graduate study and research in engineering, physics, and mathematics. The accredited academic programs and educational policies of the Space Institute have their origins in appropriate departments of the University of Tennessee. The more than 30 faculty members of the Institute carry out these accredited academic programs through classroom teaching, informal seminars, active research, and directing the research of their students in an environment of creative work and advanced study. Programs are available to students devoting full-time or part-time effort toward MS and PhD degrees, those interested in continuing education for updating
and broadening knowledge, and those who wish to pursue postdoctoral research.

Graduate degree programs are available with majors in aerospace engineering, aviation systems, chemical engineering, electrical engineering, engineering science, Industrial engineering (engineering management concentration), mathematics, mechanical engineering, and physics. In addition to the fundamental studies characteristic of each discipline, research opportunities are available in many areas including aerodynamics, fluid mechanics, advanced space propulsion, energy conversion processes, thermal sciences, coal combustion, magnetohydrodynamics, plasma physics, space systems, propulsion, computational fluid dynamics, and other aspects of atmospheric and space flight.

The Institute has an established Center of Excellence in Laser Applications and offers graduate studies and research opportunities in laser diagnostics, laser materials interactions, pico-second processes, and coherent and non-linear optics, and biophysical applications.

The Institute was established in part to increase the research and engineering resources of the University of Tennessee through education and practice in relevant scientific and technical areas and in part to interface university faculty and student research with the Air Force Arnold Engineering Development Center. The faculty, research activities, and facilities of the Institute, and those available at Arnold Center through appropriate contractual arrangements, provide students an unusual opportunity for significant research in these areas. Students who enroll at UTSI are admitted to graduate study at the University of Tennessee. Graduate Research Assistantships are available for qualified students. Further information may be obtained from the Dean for Academic Affairs, the University of Tennessee Space Institute, Tullahoma, Tennessee 37388.

### University Outreach and Continuing Education

**Norvel Burkett, Assistant Vice Chancellor**

The University of Tennessee, Knoxville, is committed to its land-grant mission of public service. The institution meets that mission by extending its continuing education services and programming resources through outreach initiatives. University Outreach and Continuing Education works with academic departments to offer courses, educational services and programs. The division offers programs using a variety of modes, helping people of all ages achieve degrees and certificates, accomplish professional development goals, and pursue intellectual and self-improvement interests.

Programs and courses are based upon student needs and desires, whether for self-motivated learning; for leisure and recreational programs; or for professional promotion, certification, licensure, re-licensure, or mid-career changes. The division provides these opportunities through program coordination and development of the four departments – Department of Conferences, Department of Distance Education and Independent Study, English Language Institute, and Professional and Personal Development.

For more information, contact

**University Outreach and Continuing Education**

The University of Tennessee

313 Conference Center Building

Knoxville, Tennessee 37996-4137

Phone (865) 974-3181, fax (865) 974-6629

E-mail outreach@tennessee.edu

### Department of Conferences

**Robert Gibbs, Director**

The Department of Conferences, housed in the Conference Center Building in downtown Knoxville, provides management services to university departments and faculty or outside groups that desire to hold an educational meeting anywhere in Tennessee or across the United States.

The department assists organizations in designing and managing programs to meet the needs of attendees. The staff provides professional guidance and management for small group meetings as well as for major conventions of several thousand delegates. Consulting and support services can include planning and budgeting, registration, lodging, food services, promotional materials, meeting-site management and all details to ensure a successful event. Some programs qualify for Continuing Education Units (CEUs), which become a permanent record maintained by the University Outreach and Continuing Education.

### University Conference Center

**Robert Gibbs, Director**

The University Conference Center, managed by the Department of Conferences, offers quality meeting facilities and service to university units, business and industry groups, professional organizations, and government agencies. Professional groups and interested individuals can request interactive videocasting to locations worldwide. Arrangements can also be made to receive (downlink) programming or transmit (uplink) programming via satellite. The University Conference Center is located at 600 Henley Street in downtown Knoxville.

### English Language Institute

**Jim Hamrick, Director**

The English Language Institute (ELI) offers a non-credit language-study program. It is designed to assist students in their pursuit of career goals or educational objectives in the United States. The courses emphasize development of communicative ability in listening, speaking, reading, and writing. Faculty members are trained in teaching English to speakers of other languages and different national backgrounds.

The curriculum consists of eight proficiency levels: 101-108, Introductory through Pre-Academic. Classes meet each day with emphasis on English Structure (Grammar): Listening Comprehension, Writing/Composition (Rhetoric), Conversation Practice for Communicative Purposes, Reading and Vocabulary.

Classes also assist students in pronunciation, test-taking strategies, U.S. culture orientation, and university study skills.

ELI offers on and off-campus classes for professional and academic audiences. ELI also offers seminars for international
graduate students who need to improve their spoken English or pedagogical skills for the purpose of serving as graduate teaching assistants.

Department of Professional and Personal Development
Mary F. Jerger, Director

The Department of Professional and Personal Development provides a comprehensive array of non-credit courses, certificates, and seminars designed to serve the needs of individuals and businesses in Knoxville and surrounding communities. Courses are offered on the university campus, at off-campus locations (including two Oak Ridge classrooms), and online. Classes are taught by university faculty, staff, and community experts. Courses also are delivered on-site for business clients, with instructional services tailored to the needs of each group.

Business topics include professional development, career planning, computer training, and several specialized certificate programs. Personal interest topics range from creative writing to art, dance, gardening, music, and sports. There are also courses that meet requirements of the state or other agencies for certification in real estate and financial planning.

Special programming also includes Kids U which provides summer hands-on workshops for elementary and secondary education students; Seniors for Creative Learning, a membership-based program focusing on issues and courses for senior adults; and the Smoky Mountain Field School, a program co-sponsored with Great Smoky Mountains National Park.

Department of Distance Education and Independent Study
George H. Hoemann, Assistant Dean

The Department of Distance Education and Independent Study, in concert with academic departments, offers Internet-based, Web-delivered classes, and programs leading to certificates and degrees. The College of Communication and Information and the College of Engineering offer Master’s degree programs through Web-based courses, while the Departments of Nuclear Engineering and Statistics offer courses leading to degree and certificate programs. Other undergraduate and graduate classes and programs are available, as well as a variety of individual courses in many disciplines. Current course availability can be found on the Web at anywhere.tennessee.edu.

The department provides services and support for faculty, students, and industry interested in flexibly-delivered education.

The Internet eLearning Institute provides certificate programs, professional development courses and training.

For information and registration forms, contact the Distance Education Program at
Courses of Instruction

REGISTRATION NOTES
(RE) Prerequisite(s) and Corequisite(s) will be enforced by the Registration System in the future. They are currently enforced by the department.
(DE) Prerequisite(s) and Corequisite(s) are enforced by the department.
Registration Restrictions are enforced by the Registration System.

Accounting (009)
451 Operational Auditing and Consulting (3) Approaches auditors might use to evaluate an entity’s efficiency and effectiveness in variety of settings and techniques auditors might use in consulting to provide entity competitive advantage.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

507 Financial Reporting Research and Contemporary Issues (3) Theory and practice of contemporary financial reporting issues are covered with an emphasis on researching the authoritative accounting literature. Specific contemporary issues covered vary each semester.
Comment(s): Master of Accountancy admission or consent of instructor required.

518 Professional Standards (3) Basic standards and contemporary issues relevant to assurance providers. Actual practice cases are used to illustrate application.
Comment(s): Master of Accountancy admission (or consent of instructor) required.

519 Seminar in Business Risk and Assurance Methodology (3) Business risk and emerging methodology used by assurance providers.
Comment(s): Admission to a graduate program or consent of instructor required.

521 Advanced Management Accounting (3) Analysis of management accounting and cost management practices and models. Topics include cost behavior, strategies and models for decision making, and performance measurement issues.
(DE) Prerequisite(s): Management accounting course.
Comment(s): Admission to a graduate program or consent of instructor required.

531 Tax Strategy, Tax Research, and Entity Taxation (3) Current issues in tax strategy including investment models, implicit taxes, tax arbitrage, organizational form, and other selected topics. Methods of researching tax issues within the U.S. federal tax system with emphasis on Web-based research tools. Income taxation of business entity operations.
Comment(s): Master of Accountancy admission or consent of instructor required.

532 Corporate Taxation and Reorganizations (3) Current issues in corporate taxation including organization and capital structure, distributions, liquidations, acquisitions, and reorganizations. Course emphasizes group projects and presentations. Web-based research tools used extensively.
(DE) Prerequisite or (DE) Corequisite: 531.
Comment(s): Master of Accountancy admission or consent of instructor required.

533 Taxation of Partnerships and S Corporations (3) Current issues in partnership and S corporation taxation including partnership formation, operations, allocations, and distributions; LLCs; S corporation election and operations; and comparisons of different flow-through entities. Course emphasizes group projects and presentations. Web-based research tools used extensively.
(DE) Prerequisite or (DE) Corequisite: 531.
Comment(s): Master of Accountancy admission or consent of instructor required.

534 Family Tax Planning (3) Methods used to value closely-held business, the law and planning strategies related to inter vivos and post-mortem property transfers and the taxation of estates, and financial planning techniques used to meet family tax planning objectives.
(DE) Prerequisite or (DE) Corequisite: 531.
Comment(s): Master of Accountancy admission or consent of instructor required.

539 Multi-Jurisdictional Tax Planning and Policy (3) International and state tax law as it pertains to business transactions. Particular emphasis is placed on identifying tax planning opportunities and designing tax strategies to meet planning objectives.
(DE) Prerequisite: 531.
Comment(s): Master of Accountancy admission or consent of instructor required.

592 Graduate Internship in Accounting (3) Full-time resident professional employment for one academic semester involving qualified job experience, written report of responsibilities, and evaluation of student performance.
Comment(s): Master of Accountancy admission or consent of Master of Accountancy advisor required.

593 Individual Research in Accounting (3) Directed research in topic of mutual interest.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Master of Accountancy admission or consent of Master of Accountancy advisor required.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

611 Doctoral Seminar in Accounting (3) Analysis of issues reflected in accounting literature.
Registration Permission: Consent of PhD program advisor.

612 Doctoral Seminar in Accounting (3) Analysis of issues reflected in accounting literature.
Registration Permission: Consent of PhD program advisor.

619 Doctoral Research in Accounting (3) Study of research methodology and application of various research methods in accounting literature.
Registration Permission: Consent of PhD program advisor.

621 Accounting Colloquium (1) Research and discussion of contemporary issues in practice of accountancy.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Registration Permission: Consent of PhD program advisor.
622 Accounting Colloquium (1) Research and discussion of contemporary issues in practice of accounting.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Registration Permission: Consent of PhD program advisor.

693 Independent Study (3) Directed research in topic of mutual interest.
   Repeatability: Maximum 6 hours.
   Comment(s): Admission to the PhD/business administration major/accounting concentration required.

Advertising (012)
490 Special Topics (3) Detailed study of a specialized area of advertising. Topics vary by semester and include advanced media strategy, advanced creative strategy, direct marketing, and multicultural advertising.

500 Thesis (1-15)
   Grading Restriction: P/NoP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when the student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

510 Advertising and Society (3) Analysis of advertising as institution in a free-enterprise democratic society and its relation to social, legal, cultural, and economic institutions.

520 Advertising and Communications Theory (3) Application of contemporary communications theories of attitude change, information-processing, and persuasion as applied to creative strategy decisions.
   Comment(s): Admission to the program (or consent of the instructor) required.

530 Advertising and Public Relations Research (3) Nature, scope, and application of research function to advertising and public relations decisions.
   (DE) Prerequisite(s): Statistics 531 or equivalent.

540 Advertising Decision Making (3) Analysis of decision making in budgeting, creative strategy, media strategy, research, evaluation, and agency-client relationships. Advertising response functions. Advertisements' scope and function.
   Comment(s): Admission to the program or consent of instructor required.

590 Project (3) Capstone project under guidance of faculty. Application of principles from previous coursework.
   Grading Restriction: Satisfactory/No Credit grading only.

597 Independent Study (3)
   Repeatability: May be repeated. Maximum 6 hours.
   Registration Permission: Consent of instructor.

Aerospace Engineering (018)

Not all the courses listed below are available at both the University of Tennessee, Knoxville, and UTSA campuses.

422 Aerodynamics (3) Theory and design of aerodynamic bodies for desired characteristics. Potential flow theory, viscous effects, and compressibility effects. Subsonic, transonic, and supersonic airfoils.
   (DE) Prerequisite(s): 351 and 370.

424 Astronautics (4) Solar system, orbital mechanics, propulsion, atmospheric entry including thermal protection materials, human factors in space flight, the space environment, and current topics.
   (DE) Prerequisite(s): 351.
   (DE) Corequisite(s): Mechanical Engineering 331.

   (DE) Prerequisite(s): 351.

426 Introduction to Aerospace Design (2) Design process, synthesis, design studies. Individual design reports required.
   (DE) Prerequisite(s): 351, 370, and 363.
   (DE) Corequisite(s): Mechanical Engineering 344.

429 Aerospace System Design (3) Synthesis and design of a complete aerospace system. Participation in team design effort including formal presentations and design report.
   (DE) Prerequisite(s): 422, 425, and 426.

449 Aerospace Engineering Laboratory (3) Designing, conducting, and reporting results of experimental exercises. Test standards and specifications. Analysis of data and formation of conclusions.
   (DE) Prerequisite(s): 345, 351, and 425.

494 Selected Topics in Aerospace Engineering (1-4)
   Problems and topics related to developments and practice in aerospace engineering.
   Registration Permission: Consent of instructor.

495 Selected Topics in Aerospace Engineering (1-4)
   Problems and topics related to developments and practice in aerospace engineering.
   Registration Permission: Consent of instructor.

500 Thesis (1-15)
   Grading Restriction: P/NoP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when the student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

509 Multidisciplinary Project (1)
   See Industrial Engineering 509.

511 Inviscid Flow (3) Kinematics and dynamics of inviscid fluids; potential flow about body, conformal mapping.
   (DE) Prerequisite(s): 422 or 541, and Mathematics 425.

512 Viscous Flow (3) Derivation of fundamental equations of compressible viscous flow; boundary conditions for viscous heat-conducting flow; exact solutions for Newtonian viscous flow (Navier-Stokes) equations for special cases; similarity solutions. Thermal boundary layers, stability of laminar flows, transition to turbulence, 2-D turbulent boundary layer equations, Incompressible-turbulent mean flow, and compressible boundary layer flow.
   Registration Permission: Consent of instructor.

515 Air Vehicle Aerodynamics and Performance (3) Application of aerodynamics principles to air vehicles to provide estimates of performance, stability, and control characteristics for subsonic to hypersonic speeds. Relations among thrust, drag, lift and attitude, propulsion systems, vehicle performance characteristics, and trajectory optimization.
   (DE) Prerequisite(s): 422.

516 Air Vehicle Aerodynamics and Performance (3) Application of aerodynamics principles to air vehicles to provide estimates of performance, stability, and control characteristics for subsonic to hypersonic speeds. Relations among thrust, drag, lift and attitude, propulsion systems, vehicle performance characteristics, and trajectory optimization.
   (DE) Prerequisite(s): 515.

521 Aerodynamics of Compressible Fluids (3)
   One-dimensional internal and external flow; waves; small perturbation theory; slender body theory; similarity rules; method of characteristics.
   (DE) Prerequisite(s): 422.

522 Aerodynamics of Compressible Fluids (3)
   One-dimensional internal and external flow; waves; small perturbation theory; slender body theory; similarity rules; method of characteristics.
   (DE) Prerequisite(s): 521.

525 Hypersonic Flow (3) Slender body flow; similitude: Newtonian theory; blunt body flow; viscous interactions; free molecule and rarefied gas flow.
   (DE) Prerequisite(s): 512.

527 Aerospace Ground Test Facilities (3)
   Atmospheric models and similarity considerations; aerodynamic test facilities; continuous and intermittent wind tunnels and ballistic ranges; propulsion test facilities or air breathing and rocket engines; space environment and space vehicle test facilities.
   (DE) Prerequisite(s): 521, 541, and Mechanical Engineering 522.

528 Aerospace Ground Test Facilities (3)
   Atmospheric models and similarity considerations; aerodynamic test facilities; continuous and intermittent wind tunnels and ballistic ranges; propulsion test facilities or air breathing and rocket engines; space environment and space vehicle test facilities.
   (DE) Prerequisite(s): 521, 541, and Mechanical Engineering 522.

529 Rarefied Gasdynamics (3)
   Binary elastic collisions; kinetic theory; flow regimes; Boltzmann and model equations, transfer equation, gas-surface interactions; slip boundary conditions, free molecule, slip and transition flow; Monte Carlo simulation; experimental techniques; introduction to hypersonic real gas flows.
   (DE) Prerequisite(s): 522 and Mechanical Engineering 522.

531 Magnetohydrodynamics (3) Electromagnetic field theory; chemical kinetics; thermodynamic and thermophysical properties of gas plasmas; governing equations and applications.
   (DE) Prerequisite(s): 422 and Mathematics 471.
532 Introduction to Turbulence (3) Macroscopic effects, analogies, statistical treatment, correlation functions, energy spectra, diffusion; application of turbulent jets and pipe flow.

533 Dynamics (3) (See Mechanical Engineering 533.)

534 Atmospheric Entry (3) Reentry trajectories; lift and drag during reentry; vehicle motion and stability during reentry; aerodynamic heating and heat protection systems.

535 Mechanical Vibrations (3) (See Mechanical Engineering 534.)

539 Continuum Mechanics (3) (See Engineering Science 539.)

541 Fluid Mechanics I (3) (See Mechanical Engineering 541.)

542 Fluid Mechanics II (3) (See Mechanical Engineering 542.)

544 Transonic Flow (3) Nature of flow at transonic speeds; small disturbance theory; shock wave properties; shock-free flows; strong viscous interaction phenomena; solution techniques.

551 Aerospace Mechanics (3) Principles of mechanics applicable to aerospace vehicles, equations of motion, multibody problems and trajectory analysis.

554 Aerospace Vehicle Stability and Control (3) Static and dynamic longitudinal directional and lateral stability and control. Coupled modes. Motion with free and fixed flight control surfaces. Automatic control systems.

555 Human Vibrations Analysis and Protection (3) (See Biomedical Engineering 555.)

556 Vertical or Short Take Off and Landing Aircraft (3) Performance, stability, control of rotary wing, tilt wing, vectored lift and jet vertical riser type aircraft. Vertical and transition flight modes. High lift airfoils. Automatic controls. Simulation facility types and flight testing.

559 Advanced Mechanics of Materials I (3) (See Mechanical Engineering 559.)

561 Fundamentals of Aeroacoustics (3) Generation, propagation and absorption of sound in static and moving media.

564 Spacecraft Attitude Dynamics and Control (3) Rotational attitude dynamics of space vehicles. Gyroscopic instruments; passive and active attitude control devices. Linear control theory and attitude stabilization.

571 Finite Elements for Engineering Applications (3) (See Engineering Science 551.)

572 Computational Fluid-Thermal Systems (3) (See Engineering Science 552.)

573 Computational Solid Mechanics (3) (See Engineering Science 553.)

574 Space Engineering: Satellite Technology (3) Satellites and rockets (orbit, launch vehicles and launching), spacecraft structure, power systems, attitude control system, telemetry/tracking/command, and communication systems, spacecraft testing, reliability, and application of satellites (communication, weather, Earth observation, and future applications).

590 Selected Engineering Problems (2-6)

595 Seminar (1) All phases of aerospace engineering, reports on current research at the University of Tennessee, Knoxville, and UT界定。Graduation Restriction: Satisfactory/No Credit grade only. Repeatability: May be repeated.

599 Special Topics in Aerospace Engineering (1-3)

600 Doctoral Research and Dissertation (3-15)

642 Physical Gas Dynamics (3) High speed, high temperature gas flow from molecular point of view. Kinetic theory, statistical mechanics, equilibrium flow, vibrational and chemical rate processes, non-equilibrium vibrational and chemical flow, non-equilibrium kinetic theory, flow with translational non-equilibrium.

645 Theory of Turbulence (3) (See Engineering Science 645.)

659 Advanced Mechanics of Materials II (3) (See Mechanical Engineering 659.)

661 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 651.)

662 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 652.)

663 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 653.)

664 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 654.)

690 Advanced Topics in Aerospace Engineering (3)

African Studies (023)

421 Comparative Studies in African and African-American Societies (3) Comparative studies of African and African-American societies in such areas as education, religion, and social stratification. Includes the respective views African-Americans and Africans have of each other and concept of Pan-Africanism.

443 Topics in Black Literature (3) (See English 443.)

450 Issues and Topics in African-American Studies (3) Topics vary but include a variety of problems, issues, and individuals from the field of African-American studies.

452 Black African Politics (3) (See Political Science 452.)

461 Art of Southern and Eastern Africa (3) (See Art History 461.)

462 Art and Archaeology of Ancient Africa (3) (See Art History 462.)

463 Arts of the African Diaspora (3) (See Art History 463.)

473 Black Male in American Society (3) Examines historical images, myths and stereotypes which have developed concerning African-American males in American society. Includes the impact of such critical factors as black feminism, violence, concepts of masculinity, family, white males, white females, homosexuality, nationalism, and athletics on African-American males in America.

484 African-American Women in American Society (3) Focuses on historical and contemporary social, economic, and political factors in American society as they relate to the black woman. (Same as Women's Studies 484.)

510 Special Topics (3)

540 Communication Techniques in Agriculture (3) Aeronautical and chemical flow, non-equilibrium kinetic theory, flow with translational non-equilibrium.

552 Advanced Topics in Turbulence and Vibration (3) Kinetic theory, statistical mechanics, equilibrium flow, vibrational and chemical rate processes, non-equilibrium vibrational and chemical flow, non-equilibrium kinetic theory, flow with translational non-equilibrium.

561 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 651.)

562 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 652.)

563 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 653.)

564 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 654.)

600 Doctoral Research and Dissertation (3-15)

595 Seminar (1) All phases of aerospace engineering, reports on current research at the University of Tennessee, Knoxville, and UT界定。Graduation Restriction: Satisfactory/No Credit grade only. Repeatability: May be repeated.

599 Special Topics in Aerospace Engineering (1-3)

600 Doctoral Research and Dissertation (3-15)

595 Seminar (1) All phases of aerospace engineering, reports on current research at the University of Tennessee, Knoxville, and UT界定。Graduation Restriction: Satisfactory/No Credit grade only. Repeatability: May be repeated.

600 Doctoral Research and Dissertation (3-15)

Agricultural and Extension Education (042)

440 Communication Techniques in Agriculture (3) Elements of effective use of mass media in agricultural and extension education. Effective technical writing and presentation strategies for agricultural audiences.

450 Agricultural Leadership Development (3) Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations and youth groups; methods of resolving conflict, of communicating, of guiding and evaluating; and ethical considerations for leaders.

500 Thesis (1-15)

501 Creative Component in Lieu of Thesis (3) Capstone experience completed under supervision of major professor and committee. Individual project: literature survey; development of teaching software; development of curriculum materials; development of white paper; or other suitable project. Graduation Restriction: Satisfactory/No Credit grade only. Comment(s): Students in the non-thesis option only. Registration Permission: Consent of major professor.
502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Credit Restriction: May not be used toward degree requirements.

511 Extension History, Philosophy and Objectives (3) Historical and philosophical foundation of adult education in American agriculture, key figures, issues, legislative movement, farmer organizations and programs. Cooperative Extension Service, origin, legislation and growth, and nature of present-day objectives and programs.
(DE) Prerequisite(s): 211 or consent of instructor.

521 Extension Program Planning and Evaluation (3) Theories and models of program development and evaluation and their use in extension education: planning and conducting needs assessments; planning, organizing, implementing and evaluating extension educational program content and learning activities; development and interaction of county, state and federal extension plans of work, and principles, techniques and instruments used to identify, gather and analyze information to evaluate extension programs.
(DE) Prerequisite(s): 211 and 511 or consent of instructor.

522 Educational Technology in Agricultural and Extension Education (3) Advanced concepts and methods relevant to both formal and non-formal instructional methodologies. Processes by which professional, administrative, and educational agencies influence the introduction, adoption, and diffusion of technological change.
(DE) Prerequisite(s): 435 and 436 or consent of instructor.

524 Research Methodology (3) Social science research methods related to research in agricultural and extension education. Issues: research design, reliability and validity in measurement, sampling procedures, logic of analysis, scaling and measurement, and selection and interpretation of appropriate inferential tests of significance.
(DE) Prerequisite(s): 435 and 436 or consent of instructor.

525 Curriculum Development in Agricultural and Extension Education (3) Models, principles, and procedures for developing curricula in agriculture and extension education programs and scheduling learning activities used to implement these planned programs.
(DE) Prerequisite(s): 435 and 436 or consent of instructor.

526 Agricultural Education for First-Year Teachers (2) Developing competencies needed by first-year teachers for planning, organizing, and conducting program of vocational agriculture in local community. Group meetings in selected centers and visits by instructor.
(DE) Prerequisite(s): 211 or consent of instructor.

527 Adult Education Strategies in Agricultural and Extension Education (3) Methods of developing and implementing educational programs for adults in agricultural and extension education and related contexts: different learning of adults and children (andrology vs. pedagogy); understanding and determining adult needs, priorities and motivation for participating in educational programs; adoption of new ideas by adult learners; methods and materials effective in teaching adults; developing favorable attitudes toward post-secondary education and life-long learning.
(DE) Prerequisite(s): 211 and 511 or 346 or consent of instructor.

530 Special Topics in Agricultural and Extension Education (1-3) Current issues.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

532 Managing Organizations, Programs and Personnel (3) Theory and principles of management for individual and organizational effectiveness of educational organizations.
(DE) Prerequisite(s): 511 and 521 or consent of instructor.

592 Internship in Agricultural and Extension Education (1-3) Practical field experience in selected setting under supervision of local practitioner and departmental representative.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

593 Special Problems in Agricultural and Extension Education (1-4) Special research and/or special reports based on supervised independent study.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

Agricultural Economics (047)

412 Agricultural Finance (3) Macro-finance, financial objectives, acquisition of debt and equity funds, capital investments, capital allocation, debt repayment, credit analysis, borrower and lender loan application analysis, insurance strategies, computer applications, kinds and sources of agricultural credit, and financial intermediation.

420 International Agricultural Trade and Marketing (3) Introduction to real and monetary aspects of international trade effect on agricultural commodity flows; partial equilibrium analysis of international trade in agricultural products; institutional aspects of international marketing of agricultural products.

430 Agricultural Policy (3) Values, goals and policy process. Economic rationale and effects of policy. Historical development and current characteristics of commodity, credit, food, and trade policy.

442 Agribusiness Management (3) Advanced concepts in developing business and marketing plans and in applied management principles such as inventory control and pricing techniques. Discussion of management issues including going international, employee supervision, management succession and guerrilla marketing. Teamwork emphasized in managing an agribusiness firm through game simulation. Written and oral presentation required.

450 Agricultural Industry Analysis and Forecasting (3) Analytical tools for decision making in agricultural sector; analysis of commodity supply and demand conditions; economic modeling; market forecasting; analysis of temporal and spatial patterns.

470 Natural Resource Economics (3) Nature of natural resources; economic efficiency as basis for natural resource use; externalities in natural resource use; factors influencing environmental quality; alternative public policy tools for influencing natural resource use or improving environmental quality.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction: Master of Science – agricultural economics major.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Managerial Economics for Agribusiness (3) Practical application of economic concepts to agribusiness management and marketing decisions. Topics include supply and demand analysis, demand estimation, production economics, cost analysis, pricing decisions, break-even analysis, capital budgeting, time value of money, and risk and uncertainty. Students will use Microsoft Excel to analyze managerial economic questions.

505 Microeconomic Analysis (3) Theory of utility maximization and demand, production, cost, firm behavior, and supply; price in product and factor markets; efficiency and welfare.
Recommended Background: Calculus and intermediate microeconomics courses.

512 Advanced Agribusiness Finance (3) Financial and investment analysis tools and concepts and their application to decisions faced by agribusiness. Emphasis on financial analysis and planning principles, capital budgeting, debt structure and financing, options, present value concepts, and risk analysis.
Recommended Background: Senior-level finance course.

520 Research Methods in Agricultural Economics (1) An overview of the logic and process of economic inquiry. Topics covered include the relationship between theory and applied research, problem formulation, definition of research problems, development of research problem statements with goals and objectives, and presentation and interpretation of results.

524 Econometric Methods in Agricultural Economics (3) Application of statistical methods to agricultural economic models; estimation of supply, demand and production functions; microeconomic forecasting models; interpretation of results.
Recommended Background: Calculus and statistics courses.

525 Agribusiness Operations Research Methods (3) Applications of operations research methods and concepts for agribusiness. Theoretical background and applied considerations of each technique with emphasis on applications. Computer and other applications of each technique for relevant agribusiness problems.
Recommended Background: Calculus and intermediate microeconomics courses.

530 Agricultural Policy Analysis (3) Evaluation of public policy as related to agricultural industry and rural areas.
542 Advanced Agribusiness Production Decisions (3) Decision theory concepts and tools for analyzing agribusiness decision problems; modeling choices using decision trees and sensitivity analysis; incorporating uncertainty into decision models using probability theory and simulation; modeling preferences using utility theory and risk attitudes.

(EN) Prerequisite(s): 505 or 503.

550 Advanced Agribusiness Marketing (3) Use of economic concepts in agribusiness marketing decisions. Analysis of agricultural markets; buyer behavior in food and fiber markets; competitive environment. Profitability analysis of marketing and distribution decisions; market planning and strategy; product evaluation and new product introduction; pricing decisions.

(EN) Prerequisite(s): 505 or 503.

552 Advanced Agribusiness Seminar (3) A capstone course for students in the Master of Science non-thesis agribusiness concentration. The course centers on discussion and analysis of real-world management case studies. Students are responsible for the development of a comprehensive written case study analyzing a real-world agribusiness management problem. Major writing and oral presentation emphasis.

Recommended Background: 2 completed semesters of the agricultural economics MS program.

570 Advanced Natural Resource Economics (3) Analysis of natural resource allocation issues; applied welfare economics, external effects and evaluation of public policy.

593 Special Topics in Agricultural Economics (1-3) Topics to be assigned.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 9 hours.

595 Professional Internship (3) Supervised internship experience with appropriate agribusiness firm.

670 Advanced Topics in Natural Resource Economics (3) Applications of microeconomic theory to the use, allocation and control of scarce, exhaustible, and renewable natural resources, including soil, water, minerals, forests, and fish, in both static and dynamic contexts. Optimal control theory, dynamic programming, supply of, and demand for, natural resources, social versus private decisions, market and nonmarket considerations, regulation, uncertainty, property rights, equity considerations, and landscape pattern and change.

Recommended Background: Advanced microeconomics course.

Agriculture and Natural Resources (088)

491 International Experience in Agriculture and Natural Resources (1-12) Credit for formalized international experiences related to agricultural sciences and natural resources. Determination of credit based on nature of the proposed experience. Student should discuss the opportunity with their faculty advisor prior to the trip to determine if it is appropriate for credit. Credit hours will be determined by the department and college depending on the extent of activity and types of projects and/or presentations to be completed by the student upon return.

Grading: Satisfactory/No Credit or letter grade.

Repeatability: May be repeated. Maximum 12 hours.

507 Professional Development Seminar (1) Planning and executing graduate research programs; ethics and professionalism; graduate program procedures and resources. (Same as Animal Science 507, Entomology and Plant Pathology 507; Food Science and Technology 507; Plant Sciences 507.)

Grading Restriction: Satisfactory/No Credit grading only.

512 Teaching Internship in Agriculture and Natural Resources (1) Supervised experience in teaching – test preparation and evaluation of agriculture students.

Repeatability: May be repeated. Maximum 2 hours for MS students and maximum 4 hours for PhD students.

American Studies (099)

423 Geography of American Popular Culture (3) (See Geography 423.)

442 American Humor (3) (See English 442.)

510 Special Topics (3) Repeatability: May be repeated. Maximum 6 hours.

Animal Science (113)

420 Advanced Reproduction (3) Collection, evaluation, and preservation of ova, spermatozoa and embryos; application of methods of natural breeding and techniques of artificial insemination and embryo transfer; herd sire and dam evaluation; pregnancy determination; gestation and parturition; infertility; recent advances in theriogenology.

Contact Hour Distribution: 1 hour and 2 labs.

(EN) Prerequisite(s): 320 or equivalent.

430 Nutrient Evaluation and Ration Formulation (3) Ration nutrient analysis and formulation for beef and dairy cattle, sheep, horses, swine, poultry, laboratory, zoo, and companion animals. Mathematical and computer solutions and applications to formulating complex rations with constraints.

Contact Hour Distribution: 2 hours and 1 lab.

(EN) Prerequisite(s): 330 or equivalent and an introductory computer science course.

481 Beef Cattle Production and Management (3) Integration of principles of nutrition, breeding, physiology, and marketing into complete production and management programs. Structure of industry, enterprise establishment, systems of production, production practices, and improvement programs. Management evaluated in terms of production responses and economic returns. Comparisons made to small ruminant, forage-based production systems.

Contact Hour Distribution: 2 hours and 1 lab.

(EN) Prerequisite(s): Completion of animal science sophomore and junior core courses or consent of instructor.

482 Dairy Cattle Production and Management (3) Integration of principles of nutrition, breeding, physiology, and marketing into complete production and management programs. Structure of industry, enterprise establishment, systems of production, production practices, and herd improvement programs. Alternatives evaluated in terms of production responses and economic returns.

Contact Hour Distribution: 2 hours and 1 lab.

(EN) Prerequisite(s): Completion of 300-level courses or consent of instructor.

483 Pork Production and Management (3) Integration of principles of nutrition, breeding, physiology, and marketing into complete production and management programs. Structure of industry, enterprise establishment, systems of production, production practices, and improvement programs. Management evaluated in terms of production responses and economic returns.

Contact Hour Distribution: 2 hours and 1 lab.

(EN) Prerequisite(s): Completion of 300-level core courses or consent of instructor.

484 Poultry Production and Management (3) Integration of principles of nutrition, breeding, physiology, and marketing into complete production and management programs. Structure of industry, enterprise establishment, systems of production, production practices, and improvement programs. Management evaluated in terms of production responses and economic returns.

Contact Hour Distribution: 2 hours and 1 lab.

(EN) Prerequisite(s): Completion of 300-level core courses or consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

507 Professional Development Seminar (1) (See Agriculture and Natural Resources 507.)

511 Special Problems in Animal Science (1-4) Repeatability: May be repeated. Maximum 9 hours.

Registration Permission: Consent of instructor.

(EN) Prerequisite(s): General undergraduate coursework in anatomy/physiology and biochemistry or consent of instructor.

523 Advanced Mammalian Reproduction (3) Current topics and new frontiers in reproductive biology.

(EN) Prerequisite(s): 320.
530 Animal Nutrition and Metabolism (4) Comparative digestive physi-
ology, digestion, absorption and metabolism of nutrients in ruminant and 
nonruminant species. Concepts and methodologies of animal growth and 
nutrient requirements; interrelationships, availability and deficiencies of 
nutrients. 
(DE Prerequisite(s): Animal nutrition, feeds, and ration formulation course or 
consent of instructor. 
535 Ruminology (2) Anatomy, physiology, and microbiology of rumen 
ecosystem: microbial fermentation and metabolism of polysaccharides, 
lipids and nitrogen. 
(DE Prerequisite(s): 530 or consent of instructor. 
571 Design and Analysis of Biological Research (3) Experimental de-
signs and procedures; selection of experimental units; analysis and inter-
pretation of data; statistical models and contrasts, analyses of variance; 
covariates, treatment arrangements, mean separation and regression. 
(Same as Plant Sciences 571.) 
Recommended Background: 3 hours of statistics. 
572 Least Squares Analysis (3) Least squares estimation and hypo-
thesis testing procedures for linear models; mixed model methodology; full 
rank and non-full rank situations; covariance structures; estimation of 
variance components. 
Contact Hour Distribution: 2 hours and 1 lab. 
Recommended Background: 6 hours of statistics. 
596 Seminar on Advanced Topics in Animal Science (1) Required of 
all first- and second-year MS students. 
Repeatability: May be repeated. Maximum 2 hours. 
600 Doctoral Research and Dissertation (3-15) P/NP only. 
Grading Restriction: P/NP only. 
Repeatability: May be repeated. 
621 Advanced Topics in Animal Physiology (1-4) Recent advances 
and concepts, research techniques, current problems. 
Repeatability: May be repeated. Maximum 6 hours. 
631 Advanced Topics in Animal Nutrition (1-4) Recent advances 
and concepts, research techniques, current problems. 
Repeatability: May be repeated. Maximum 6 hours. 
651 Advanced Topics in Animal Anatomy (1-4) Current and future re-
search methodology, laboratory situation, recent advances in quantitative 
techniques for gross and microscopic anatomy. 
(Same as Comparative and Experimental Medicine – Veterinary Medicine 651.) 
Repeatability: May be repeated. Maximum 6 hours. 
652 Disorders of the Endocrine System (2) Pathological and physiologi-
cal aspects of diseases; endocrine glands of various animal species. 
(Same as Comparative and Experimental Medicine – Veterinary Medicine 652.) 
Recommended Background: 3 hours of physiology. 
681 Advanced Topics in Animal Health and Well-Being (1-4) Recent 
advances and concepts, research techniques, and current problems as-
associated with animal health and behavior. 
Repeatability: May be repeated. Maximum 6 hours. 
696 Seminar (1) Advanced topics in animal science. Required of all first-
and second-year PhD students. 
Repeatability: May be repeated. Maximum 2 hours. 

Anthropology (122) 
410 Principles of Cultural Anthropology (3) Exploration and illustration of 
major concepts, theories, and methods in cultural anthropology, with 
application to analysis of specific ethnographic studies. 
(DE Prerequisite(s): 130. 
411 Linguistic Anthropology (3) Basic linguistic concepts applied to re-
search in cultural anthropology, particularly investigation of relationships 
between language and culture. 
(Same as Linguistics 411.) 
(DE Prerequisite(s): 130 or Linguistics 200. 
412 Folklore in Anthropology (3) Introduction to anthropological study of 
folklore, using folklore and folklore materials from various tribal, peasant, 
and complex societies. 
(DE Prerequisite(s): 130 or consent of instructor. 
413 Dynamics of Culture (3) Definition and in-depth study of major 
forms of culture change, ranging from evolution and diffusion to religious 
revitalization and political revolt. Continuity and change in diverse cultural 
settings examined through use of archaeological, ethnographic, and 
contemporary case studies. 
(DE Prerequisite(s): 130 or consent of instructor. 
414 Political Anthropology (3) Examination of the organization and dy-
namics of power and politics in both stateless and state-level societies. 
Role of symbols, rituals, and ideologies in producing and reproducing 
power relations. The relationship between actors (individuals) and structures. 
The encapsulation of traditional political forms and systems within modern 
states. 
(DE Prerequisite(s): 130 or consent of instructor. 
415 Environmental Anthropology (3) Overview of theoretical and 
methodological approaches to the study of human / environmental inter-
actions. Impacts of environmental change on society and culture; human 
impacts on environmental change. 
(DE Prerequisite(s): 130. 
Registration Permission: Consent of instructor. 
416 Applied Anthropology (3) Introduction to principles, practice and 
ethics of anthropology applied to practical problems in non-academic set-
tings. Overview of career opportunities in various domains of applied an-
thropology. 
(DE Prerequisite(s): 130 or consent of instructor. 
431 Ethnographic Research (3) Conceptual and practical exploration of 
methods and techniques cultural anthropologists use in fieldwork. 
(DE Prerequisite(s): 130 or consent of instructor. 
432 Anthropology of Warfare and Violence (3) Origins and tactics of 
wars; overview of cultural foundations of warfare and structural vio-
ence; and effects on communities, social institutions, environments, and 
social organization. 
(DE Prerequisite(s): 130. 
Registration Permission: Consent of instructor. 
435 Historical Archaeology Laboratory (3) Laboratory procedures for 
processing, identification, and interpretation of artifacts from historical 
sites. Artifactual material from historic East Tennessee sites used for 
class projects. 
Recommended Background: 361. 
436 Cities and Sanctuaries of the Greek and Roman World (3) 
(See Classics 436.) 
442 Intensive Survey of the Archaeology of the Prehistoric Aegean 
(3) (See Classics 442.) 
443 Intensive Survey of the Archaeology of Greece (3) 
(See Classics 443.) 
444 Intensive Survey of the Archaeology of Etruria and Rome (3) 
(See Classics 444.) 
462 Early European Prehistory (3) Origins and evolution of human cul-
ture in Europe through beginnings of settled life. Primary focus on Pale-
olithic/Mesolithic chronology and lifeways. 
(DE Prerequisite(s): 120 or consent of instructor. 
463 Rise of Complex Civilizations (3) Development of complex soci-
eties in Old World from origins of agricultural economics to rise of States. 
Focus on Mesolithic, Neolithic, and Metal Age lifeways in Africa, Europe, 
and Asia. 
(DE Prerequisite(s): 120 or consent of instructor. 
464 Principles of Zooarchaeology (3) Basic osteological studies of 
major vertebrate groups; with emphasis on the aboriginal’s use of ani-
imals in subsistence and culture. Identification and interpretation of ar-
chaeologically derived molluscan and vertebrate remains; with introduc-
tion to laboratory use of comparative collections. 
(DE Prerequisite(s): 120 or consent of instructor. 
465 Urban Archaeology (3) Field archaeology and interpretation of ar-
chaeological remains on historic urban sites in the United States. Course 
content will include lectures and field and laboratory research on urban 
sites in East Tennessee. 
Recommended Background: 361. 
480 Human Osteology (4) Intensive examination of the human skeleton. 
Contact Hour Distribution: 3 hours and 1 lab. 
(DE Prerequisite(s): 110 or consent of instructor. 
481 Museum Studies I: Museums, Purpose and Function (3) 
(See Art 481.) 
482 Museum Studies II: Exhibition Planning and Installation (3) 
(See Art 482.) 
484 Museum Studies III: Field Projects (1-12) 
(See Art 484.) 
485 Oral Biology (4) Intense examination of human dentition and oral 
skeletal structures: including dento-facial embryology/growth, histology, 
gross tooth morphology and pathology. 
490 Primate Evolution (3) Living and fossil primate taxonomy, ecology, 
and comparative anatomy. Survey of primate fossil record with emphasis 
on the origin or major primate lineages. 
(DE Prerequisite(s): 110.) 

188 COURSES OF INSTRUCTION
494 Primate Behavior (3) Social organization and behavior of selected primates: group composition, size, and structure; patterns of mating; other social interactions; communication; and cultural behavior. Application of primate studies to human ethology. (DE) Prerequisite(s): 110 or consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP grading only. Repeatability: May be repeated. Maximum 18 hours.

501 Graduate Research (1-9) Independent investigation of special problems in anthropology. Repeatability: May be repeated. Maximum 18 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

510 Method and Theory in Cultural Anthropology (3) Development of primary theoretical orientations by cultural anthropologists; formulation of research problems and methods of collecting, organizing, and utilizing data. Registration Permission: Consent of instructor.

511 Special Topics in Cultural Anthropology (3) Seminars for advanced students on topics of special interest: ethnomedicine, psychological anthropology, comparative social organization, religion, and art. Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

512 Urban Studies in Anthropology (3) Process of urbanization examined cross-culturally; theory and method in researching urban communities; urban problems and applied anthropology.

515 Medical Anthropology (3) Cultural impact on disease patterning, theories of disease causation, and models of therapy. Theoretical and applied aspects of the anthropological study of health and disease. Registration Permission: Consent of instructor.

517 Forms of Social Inequality (3) Anthropological perspectives on societies stratified along lines of rank, caste, race, ethnicity, and class; inequalities engendered by sex role structure. Construction of social distinctions before and after rise and consolidation of modern world system. Intersections of race and ethnicity with class and gender.

520 Seminar in Zooarchaeology (3) Approaches to analysis and interpretation of archaeological fauna. Intensive reading; evaluation and discussion of major faunal studies, guides to identification, methods of presenting faunal data. Repeatability: May be repeated. Maximum 6 hours.

521 Laboratory Studies in Zooarchaeology (4) Examination and comparison of skeletons of major vertebrate groups, shells of terrestrial and aquatic mollusks, in relation to animal remains from archaeological contexts. Basic osteology and shell characters of species encountered in original sites; use of comparative collections. Repeatability: May be repeated. Maximum 8 hours.

522 Seminar in Archaeology (3) Theoretical and practical issues in contemporary archaeology: ethnarchaeology, paleoethnobotany, taphonomy, ceramic analysis, agricultural origins, and regional archaeological cultures. Repeatability: May be repeated. Maximum 9 hours.

530 Fieldwork in Archaeology (3-9) Practicum in surveying, excavating, processing, and analysis of archaeological data. Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

560 Theory in Archaeology (3) Detailed consideration of theory in contemporary archaeology: models of scientific explanation, research design, archaeological formation processes, and methods of analysis and interpretation.

561 Archaeological Resource Management (3) Federal legislation and regulations affecting identification, protection, and management of archaeological resources. Professional ethics and responsibilities and relationship of federal and state agencies, public interest groups, and professional archaeologists in conduct of federally sponsored archaeology. Registration Permission: Consent of instructors.

562 Special Topics in Mediterranean Archaeology (3) (See Classics 562.)

563 Lithic Artifact Analysis (3) Methods for analyzing prehistoric stone tools in practical laboratory/lecture format. Stone tool production, use, stylistic variability, and discard processes.

564 Archaeology of Southeastern United States (3) Archaeological research on prehistoric American Indian cultures in Southeastern United States; Tennessee prehistory.

565 Graduate Seminar in Ancient Mediterranean Civilization (3) (See Classics 565.)

580 Advanced Human Variation (3) Genetic and morphological variation among extant human groups; relationships of variation to geography, ecology and subsistence.

582 Paleoanthropology (4) Fossil record from origin of hominids to appearance of anatomically modern humans. Functional morphology and phylogenetic relationships of fossil humans. (DE) Prerequisite(s): 480.

583 Skeletal Biology (3) Practical and theoretical approaches to analysis of prehistoric human skeletal remains. Demography, vital statistics, pathology, nutrition, and measures of biological relationships as related to population as adaptive unit. (DE) Prerequisite(s): 480.

585 Laboratory Studies in Biological Anthropology (3) Topical coverage of laboratory methods in biological anthropology. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Consent of instructor.

590 Method and Theory in Biological Anthropology (3) Current methods of analysis in biological anthropology and of past and current history of theoretical perspectives. Paleoanthropology, human osteology, and human variation and population structure. Registration Permission: Consent of instructor.

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

601 Advanced Graduate Research (1-6) Independent investigation of special problems in anthropology by advanced graduate students. Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied toward the 600-level requirement.

611 Advanced Seminar in Cultural Anthropology (3) Critical evaluation of current issues in theory and data interpretation. Repeatability: May be repeated. Maximum 6 hours.

660 Advanced Seminar in Archaeology (3) Selected topics in prehistoric and historic archaeology. Repeatability: May be repeated. Maximum 6 hours.

690 Selected Topics in Physical Anthropology (3) Repeatability: May be repeated. Maximum 6 hours. Comment(s): For doctoral students in biological anthropology concentration.

691 Selected Topics in Paleoanthropology (3) Repeatability: May be repeated. Maximum 6 hours.

695 Gross Human Anatomy (9) Skeleton, muscles, and cardiovascular system. Dissection of cadavers. Contact Hour Distribution: 5 hours and 5 labs. (DE) Prerequisite(s): 480 or human biology course.

Architecture (133)

403 Introduction to Preservation (3) History, theory, and legal aspects of architectural preservation and restoration.

404 Preservation Technology (3) Techniques of preservation – methods of analysis, history of materials and technology used in old buildings. (DE) Prerequisite(s): 403.

406 Ideas in Architecture (3) Historical and critical review of major ideas of architecture through the ages. Comment(s): Open to all students.

410 History and Theory of Urban Form (3) Patterns of community development. Selected historical and contemporary examples. Basic urban design issues and exemplary design approaches examined through lectures, readings, essays, and sketch studies including historical change in urban form and design.
412 Non-Western and Indigenous Architecture (3) Building responsive to climate, material availability, and economic level, as designed by anonymous builders. Examples from prehistoric times to present including the fertile crescent; the Indus Valley; Hindu, Buddhist, and Mughal architecture of India, China, and Japan.

415 Medieval Architecture (3) History of architecture from decline of Rome to beginning of Renaissance. (Same as Medieval Studies 415.)

417 The International Style (3) Survey of architecture of the early modern movement, primarily in Europe and America, covering the years 1900 to 1940.

420 History of American Architecture (3) Consideration of architecture and city planning in the United States from the pre-Columbian period until the mid-20th century.

425 Special Topics in Architecture (1-6) Faculty-initiated courses. Topics vary.
   Repeatability: May be repeated. Maximum 12 hours.
   Registration Permission: Consent of instructor.

432 Computer Applications in Design II (3) Advanced computer-aided design using three-dimensional modeling software. Design analysis using computer animation, rendering techniques, visualization, and video.
   (DE) Prerequisite(s): 231 or consent of instructor.

433 Computer Applications in Design III (3) Advanced course that integrates three-dimensional modeling and technical analysis with computers to augment building design. Independent studies under faculty direction.
   Registration Permission: Consent of instructor.

445 Advanced Lighting (3) In-depth analysis and innovative concepts in design of lighting.
   (DE) Prerequisite(s): 342.

463 Architectural Development (3) Principles and practice of the architect as a developer. Impact of economics, finance and urban policy on the design and development of real estate.
   Comment(s): Open to all students.

473 Architectural Photography (3) Photography as a design, research, and presentation medium. Application of photographic techniques, printing and processing. Color and black and white.

500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

503 Modern Architecture: Histories and Theories (3) History and theory of modern architecture: late 19th and 20th centuries through broad-based examinations of question of modernity and specific case studies of buildings, projects, landscapes and theories.

507 Architecture, Culture and Modernity (3) Scope of ideas generated in architecture's recent history to reveal and explain production and reception of architecture: historical background necessary to understand those concepts. Complements history sequence but in specialized field of theory.

509 Seminar in Architectural Technology (3) Technological aspects influencing building form. Role of technical aspects of structural, environmental and building infrastructure as integrated systems supporting access use and expression of building.

514 Seminar in Ethical Imperatives (3) Social, cultural, philosophical and moral issues which impact professional responsibilities. Attitudes, values, and ideas that address formation of profession's ethos.

515 Seminar in Issues in Urban Design (3) Investigations of urban forms, patterns, and attitudes that have shaped towns and cities.
   Registration Permission: Consent of instructor.

516 Materials and Methods of Construction (3) Properties of interior and exterior building materials and their relation to construction methods and detailing. Theory of materials selection and application and role materials and methods play in design process.

521 Principles of Architectural Form (3) Historical and contemporary architectural theory through investigation of literature and related examples. Theories of understanding and theories of application related to generation of architectural form and space in response to both cultural and environmental focus.

525 Special Topics in Architecture (1-3) Student- or instructor-initiated course.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 9 hours.

526 Directed Readings in Architecture (3) Readings on topics of interest: primary texts, history, theory, urban issues, technology and professional practice.
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

528 Topics in Architectural History and Theory (3) Historic topics, ideas, and theories in architecture.
   Registration Permission: Consent of instructor.

545 Principles of Environmental Control I (3) Introduction to heating, ventilating, air conditioning, solar energy, plumbing, and fire-protection systems.
   (DE) Prerequisite(s): 180.
   Comment(s): Enrollment is limited to Master of Architecture students.

551 Research Methods (3) Quantitative and qualitative methods of research in architectural inquiry. Systematic study and application of applied and speculative investigations in field of architectural research. Review and identification of techniques and methodologies and applications for architectural research and scholarship.

553 Advanced Topics in Architectural Technology (3) In-depth investigations and analysis: architectural technology lighting, structure, enclosure, mechanical and other architectural technologies.
   Registration Permission: Consent of instructor.

562 Professional Practice (3) Management and organizational theories and practices for delivering professional design services: assessment of building industry and its influence on practice; analysis of basic management functions within professional firms; legal and ethical concerns facing practitioners today; and introduction to special obligations and privileges of design professional.

571 Architectural Design Studio: Building Groups/Complexes (6) Investigations analyzing cultural and contextual influences and precedents informing architectural form, space and structure in communal complex of buildings. Design of residential, recreational, educational, religious and communal facilities comprising distinctive/individual and modular/repetitive units.
   (DE) Prerequisite(s): 282.

   (DE) Prerequisite(s): 571.

   (DE) Prerequisite(s): 572.

   (DE) Prerequisite(s): 551.

589 Urban Site Planning Workshop (4) Explores ideas, vocabulary, conventions, and technical skills essential to a critical understanding of how design and planning operate within the various scales of urban and ecological context. Examines both underlying terrain elements (landform, vegetation, water, climate) and human site interventions (urban infrastructure, buildings, and landscape). Strategies and analysis techniques for reading, mapping, and analyzing urban sites are introduced, as are issues, language, and principles of site design in urbanized landscapes.
   Comment(s): Open to all majors.
   Registration Permission: Consent of instructor.

591 Foreign Study (1-9)

592 Off-Campus Study (1-9)

593 Independent Study (1-9)
Art (140)

481 Museum Studies I: Museums, Purpose and Function (3) Purposes, functions, and development of museums of art, history, natural and applied science. (Same as Anthropology 481.)

482 Museum Studies II: Exhibition, Planning and Installation (3) Exhibition concept development and implementation. Exhibition design and installation techniques. Publicity, production, matting and framing, shipping and storage. (Same as Anthropology 482.)

(DE) Prerequisite(s): 481 or consent of instructor.

484 Museum Studies III: Field Projects (1-12) Special field projects including restoration, preservation, registration, and other related research on or off campus. (Same as Anthropology 484.)

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 481 and 482.

Registration Permission: Consent of instructor.

499 Special Topics (3) Student- or instructor-initiated course offered at convenience of department.

Repeatability: May be repeated. Maximum 12 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

507 Professional Practices: Teaching Internship (1) Individual study in development of skills and methodology in teaching studio courses.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 4 hours.

Credit Restriction: May not be applied toward degree requirements.

Comment(s): Enrollment is limited to students who are not GTAs.

Registration Permission: Consent of instructor.

591 Foreign Study (1-6)

Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-6)

Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-4)

Repeatability: May be repeated. Maximum 15 hours.

Registration Permission: Consent of instructor.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.

Repeatability: May be repeated. Maximum 8 hours.

Credit Restriction: May not be applied toward the art history requirement.

COURSES OF INSTRUCTION         191

Art Ceramics (135)

421 Ceramics: Advanced Handbuilding (6) Continued investigation of ceramic form: emphasis on the development of individual direction.

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 321 and 322.

422 Ceramics: Advanced Throwing (6) Continued, in-depth investigation of ceramic form: emphasis on the development of individual direction.

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 321 and 322.

424 Ceramics: Clays and Glazes (3) Clay chemistry, clay bodies, glaze theory, and calculation. Formulating, mixing and testing of clay bodies and glaze formulas.

(DE) Prerequisite(s): 320.

429 Ceramics: Special Topics (3) Student- or instructor-initiated course: offered at convenience of department.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

521 Graduate Ceramics I (2-5)

Repeatability: May be repeated. Maximum 10 hours.

525 Graduate Ceramics II (2-5)

Repeatability: May be repeated. Maximum 10 hours.

593 Independent Study (1-4)

Repeatability: May be repeated. Maximum 15 hours.

Registration Permission: Consent of instructor.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.

Repeatability: May be repeated. Maximum 8 hours.

Credit Restriction: May not be applied toward the art history requirement.

599 Projects in Lieu of Thesis (10)

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 20 hours.

Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.

Art Design/Graphic (136)

400 Typography (3) Principles of typography as well as classical and contemporary type forms as vehicles for communication. An intensive introduction to the fundamentals of type, from individual letterforms to large bodies of textual information. Attention to formal, technological, rhetorical and historical issues.

(DE) Prerequisite(s): Art 295 and Art Design/Graphic 251.

405 Computer Enhanced Graphic Design (3) Exploration of new technologies and their significance to graphic design.

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 351 and 356 with a grade of C or better.

Registration Permission: Consent of instructor.

410 Advanced Typographic Investigation (3) Expands on principles introduced in Typography 400. Projects will include work in reflective as well as electronic environments with an emphasis on personal exploration.

(DE) Prerequisite(s): Art Design/Graphic 400.

425 Illustration (3) Develops skills and critical analysis for effective visual communication. Projects will explore the relationship between image and meaning. Students will explore a variety of media as they develop a personal visual vocabulary.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Prerequisite(s): Art 295 and Art Design/Graphic 251.

451 Advanced Graphic Design (3) Theory and techniques of visual problem-solving as applied to advanced applications of graphic design.

(DE) Prerequisite(s): 352 with a grade of C or better.

452 Graphic Design Seminar (3) Discussion of design and professional issues including politics, economics, and ethics for the graphic designer. Culminates in a student-initiated project.

(DE) Prerequisite(s): 451 with a grade of C or better.

456 Graphic Design Practicum (1-12) Practical work experience in the graphic design field. Must be prearranged with department.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

459 Special Topics in Graphic Design (3) Student- or instructor-initiated course offered at convenience of department.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

550 Studies in Graphic Design/Illustration History (3) Design and illustration c. 1850 to present.

Repeatability: May be repeated. Maximum 6 hours.

Comment(s): Enrollment is limited to MFA candidates.

551 Graphic Design I (2-6)

Repeatability: May be repeated. Maximum 10 hours.

552 Graphic Design II (2-6)

Repeatability: May be repeated. Maximum 10 hours.

553 Computer Enhanced Design (2-6)

Repeatability: May be repeated. Maximum 10 hours.

Registration Permission: Consent of instructor.

593 Independent Study (1-4)

Repeatability: May be repeated. Maximum 15 hours.

Registration Permission: Consent of instructor.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.

Repeatability: May be repeated. Maximum 8 hours.

Credit Restriction: May not be applied toward the art history requirement.

599 Projects in Lieu of Thesis (10)

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 20 hours.

Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.

Art Drawing (137)

419 Special Topics in Drawing and Painting (3) Student- or instructor-initiated course offered at convenience of department to enhance/expand the painting, drawing, and watercolor curriculum.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

511 Graduate Drawing I (2-6)

Repeatability: May be repeated. Maximum 10 hours.

512 Graduate Drawing II (2-6)

Repeatability: May be repeated. Maximum 10 hours.

593 Independent Study (1-4)

Repeatability: May be repeated. Maximum 15 hours.

(DE) Prerequisite(s): Consent of instructor.
595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.
Repeatability: May be repeated. Maximum 8 hours.
Credit Restriction: May not be applied toward the art history requirement.

599 Projects in Lieu of Thesis (10)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 20 hours.
Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.

Art Education (141)
510 History and Philosophy of Art Education (3) United States from 1860s to present.
Registration Permission: Consent of instructor.

520 Studies in Art Education (3) Issues and topics current to the field of art education.
Registration Permission: Consent of instructor.

530 Production and Critical Pedagogy in Art (3) Relationship of production to aesthetics and critical analysis of works of art.

540 Use and Construction of Instructional Materials for Teaching Art (3) Examination and construction of curriculum and instructional aids related to teaching strategies in art education.

Art History (139)
403 History of Photography (3) Survey of history of photography from introduction of daguerreotype and calotype to more recent trends. Emphasis will be placed on aesthetics and the use of photography as a medium for artistic expression.

411 Art of South and Southeast Asia (3) Survey of art and architecture of the Indian subcontinent and Southeast Asia from 2000 BC to the 20th century. The major achievements of each period are examined in relation to their religious, political, and social contexts.

415 Art of China (3) Survey of art and architecture of China from Neolithic period to the 20th century. The major achievements of each period are examined in relation to their religious, political, and social contexts.

416 Chinese Art of the 20th and 21st Centuries (3) Survey of Chinese art from the late 19th century through the present. Hong Kong, Taiwanese, and expatriate artists are also considered.

419 Art of Japan (3) Survey of the art and architecture of Japan from the Neolithic period to the 20th century. The major achievements of each period are examined in relation to their religious, political, and social contexts.

425 Early Christian and Byzantine Art to 1350 (3) Art in Italy and the Eastern Empire from the beginnings of Christian art to c. 1350. Mosaic and painting, sculpture and architecture. (Same as Judaic Studies 425.)

431 Medieval Art of the West, 800-1400 (3) Western European art of the Dark Ages, Romanesque, and Gothic periods. (Same as Judaic Studies 431; Medieval Studies 431.)

441 Northern European Painting, 1350-1600 (3) From courtly art of late Middle Ages to Northern Renaissance. Jan van Eyck, Roger van der Weyden, and Dürer; early printmakers. (Same as Medieval Studies 441.)

442 Art of Northern Europe, 1600-1675 (3) Concentrated study of Bruegel, Rubens, Rembrandt, Georges de La Tour, Vermeer, Poussin, and Hals.

451 Art of Italy, 1250-1450 (3) Development of exploration of naturalism. Revival of antiquity and development of theories of perspective in Early Renaissance. Including Duccio, Giotto, Masaccio, Donatello, Botticelli. (Same as Medieval Studies 451.)

453 Art of Southern Europe, 1575-1700 (3) Concentrated study of Caravaggio, Bemini, and Italian Baroque developments in all media. Spanish Baroque painting and sculpture with special attention to Velázquez.

454 Renaissance and Baroque Theory (3) Addresses the theory of Western art in the early modern period with emphasis on the development and evolution in European Art during the Renaissance and Baroque periods.
(DEC) Prerequisite(s): 172 and 173 or consent of instructor.

461 Art of Southern and Eastern Africa (3) Art traditions of the eastern and southern regions of Africa. Sculpture, painting, pottery, textiles, architecture and human adornment will be examined. Some ancient Stone and Iron Age traditions will be examined, but the main emphasis will be on the diverse ethnic and regional art traditions practiced in the area from 19th century to present. (Same as Africana Studies 461.)

462 Art and Archeology of Ancient Africa (3) Historical art traditions of sub-Saharan Africa. Topics to be covered include prehistoric rock paintings; art from archaeological sites and ancient kingdoms. The time period covered ranges from the first and second millennia BC for some of the early terracotta sculpture and rock paintings, the 11th through 19th centuries AD for the later ancient kingdoms. (Same as Africana Studies 462.)

463 Arts of the African Diaspora (3) Examines the aesthetic, philosophical and religious patterns of the African descendants of Brazil, Suriname, Caribbean and United States. Emphasis will be placed on the full range of art forms, including the sculptural and performance traditions, as well as architecture, textile, basketry and pottery art forms. (Same as Africana Studies 463.)

464 Oceanic Art (3) Concentrated study of selected sculpture, textiles, architecture and other traditional art forms of Polynesia, Micronesia, and Melanesia. Objects are discussed on the basis of style, style relationship, iconography and the uses to which they were put in their traditional religious, political and social contexts.

471 History of North American Art (3) Survey of landmarks in painting, architecture, sculpture, and design from prehistory to 1900.

472 History of 20th-Century American Art (3) Developments in architecture, painting, and design from 1900.

473 19th-Century American Painting (3) From West and Copley to emergence of “The Eight.”

474 Theory of 20th-Century Art in Europe and America (3) Addresses the theoretical basis for the modern movement. Emphasis on analyzing and discussing individual works of art in light of contemporary writings by artists and theorists.
(DE) Prerequisite(s): 172 and 173 or consent of instructor.

476 History of 20th-Century Painting and Sculpture in Europe (3) Development of the Modern and Post-Modern movements in Europe. Investigation of progression of abstraction through more recent conceptual trends. Analysis of the work of individual artists such as Picasso, Matisse, and others.

479 Special Topics in Art History (3) Student- or instructor-initiated course offered at convenience of department.
Repeatability: May be repeated. Maximum 12 hours.

483 History of American Sculpture (3) American sculpture from prehistory to the 1960s.

489 Studies in Art History (3) Concentration in individually selected area.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

514 Studies in Medieval Art (3) Art and architecture of the Middle Ages – major monuments from Byzantium or western Europe.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

571 Studies in Medieval Art (3) Art and architecture of the Middle Ages – major monuments from Byzantium or western Europe.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

572 Studies in Italian Renaissance Art (3) Art and architecture of the 14th, 15th, and/or 16th centuries in Italy. Early or High Renaissance or Mannerist periods.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

573 Studies in Baroque Art (3) Seventeenth century art and architecture – major artists and works from southern or northern Europe.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

574 Studies in Modern Western Art (3) Selected topics in 19th- and 20th-century western art.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

575 Studies in Modern American Art (3) Selected topics in 19th- and 20th-century American art.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

576 Studies in Asian Art (3) Selected topics in Japanese or Chinese Art.
Repeatability: May be repeated with consent of department. Maximum 6 hours.
Comment(s): For MFA candidates.

579 Special Topics in Art History (3) Student- or instructor-initiated course offered at convenience of department.
Repeatability: May be repeated with consent of department. Maximum 9 hours.
Comment(s): For MFA candidates.
Art Media Arts (134)

431 Photography III (3-6) Individual development of photographic problems and techniques.
Repeatable: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 231, 330, and 331.

433 History of Film and Modern Art (3) Study of the development and interaction between cinematic arts and visual arts within the context of modern art history. (Same as Cinema Studies 433.)
Comment(s): Available for art history credit.

435 Cinematography as Art (4) Continued development of concepts and techniques for the creation of film as an art form with an emphasis on individual projects. (Same as Cinema Studies 435)
Repeatable: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 235 and 330 or consent of instructor.

436 Video Art (4) Continued development of concepts and techniques for the creation of video works as an art form with emphasis on individual projects. (Same as Cinema Studies 436)
Repeatable: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 236 and 330 or consent of instructor.

439 Special Topics in Media Arts (3) Student- or instructor-initiated course offered at convenience of department.
Repeatable: May be repeated. Maximum 12 hours.

441 Digital Photography II (4) Continuation of exploration and implications of use of computer in photography.
Repeatable: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

442 Large Format Photography II (4) Studio course that continues exploration of the use of the large format camera in photography.
Repeatable: May be repeated. Maximum 10 hours.
(DE) Prerequisite(s): 330 and 341.
Registration Permission: Consent of instructor.

513 Photography I (2-6)
Repeatable: May be repeated. Maximum 10 hours.

516 Graduate Watercolor II (2-6)
Repeatable: May be repeated. Maximum 10 hours.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.
Repeatable: May be repeated. Maximum 8 hours.

599 Projects in Lieu of Thesis (10)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 20 hours.
Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.

Art Printmaking (132)

461 Advanced Print Workshop (1-6) Individual and collaborative studio work encompassing theory and practice in intaglio, lithography, relief printing, screenprinting, monoprint, papermaking, book arts, and/or photo-print processes.
Repeatable: May be repeated. Maximum 12 hours.

561 Printmaking I (2-6) Directed exploration of any or all matrix-based imaging: intaglio, relief, lithography, screen printing, photo-print methods, and monoprint.
Repeatable: Not repeatable. May be taken once for 2-6 hours.

562 Printmaking II (2-6) Directed exploration of any or all matrix-based imaging: intaglio, relief, lithography, screen printing, photo-print methods, and monoprint.
Repeatable: May be repeated. Maximum 12 hours.

563 Printmaking III (2-6) Directed exploration of any or all matrix-based imaging: intaglio, relief, lithography, screen printing, photo-print methods, and monoprint.
Repeatable: May be repeated. Maximum 12 hours.

564 Printmaking IV (2-6) Directed exploration of any or all matrix-based imaging: intaglio, relief, lithography, screen printing, photo-print methods, and monoprint.
Repeatable: May be repeated. Maximum 12 hours.

593 Independent Study (1-4)
Repeatable: May be repeated. Maximum 15 hours.
Registration Permission: Consent of instructor.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.
Repeatable: May be repeated. Maximum 8 hours.

599 Projects in Lieu of Thesis (10)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 20 hours.
Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.

Art Sculpture (143)

441 Advanced Sculpture (3) Individual development of sculptural problems and techniques. Students work independently while participating in group projects, critique, and discussion.
Repeatable: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 6 hours of 300-level sculpture.

449 Special Topics in Sculpture (3) Student- or instructor-initiated course offered at convenience of department.
Repeatable: May be repeated. Maximum 12 hours.
Prerequisite(s): Successful completion of any portfolio review.

541 Graduate Sculpture I (2-6)
Repeatable: May be repeated. Maximum 10 hours.

542 Graduate Sculpture II (2-6)
Repeatable: May be repeated. Maximum 10 hours.

593 Independent Study (1-4)
Repeatable: May be repeated. Maximum 15 hours.
Registration Permission: Consent of instructor.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.
Repeatable: May be repeated. Maximum 8 hours.

Art Imaging (133)

331 Photography (3-6) Introduction to principles and concepts of photography.
Repeatable: May be repeated. Maximum 12 hours.
Prerequisite(s): Consent of instructor.

332 Photography I (2-6) Continuation of exploration and implications of use of computer in photography.
Repeatable: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

335 Media Arts I (2-6)
Repeatable: May be repeated. Maximum 10 hours.

431 Photography III (3-6) Individual development of photographic problems and techniques.
Repeatable: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 231, 330, and 331.

433 History of Film and Modern Art (3) Study of the development and interaction between cinematic arts and visual arts within the context of modern art history. (Same as Cinema Studies 433.)
Comment(s): Available for art history credit.

435 Cinematography as Art (4) Continued development of concepts and techniques for the creation of film as an art form with an emphasis on individual projects. (Same as Cinema Studies 435)
Repeatable: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 235 and 330 or consent of instructor.

436 Video Art (4) Continued development of concepts and techniques for the creation of video works as an art form with emphasis on individual projects. (Same as Cinema Studies 436)
Repeatable: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 236 and 330 or consent of instructor.

439 Special Topics in Media Arts (3) Student- or instructor-initiated course offered at convenience of department.
Repeatable: May be repeated. Maximum 12 hours.

441 Digital Photography II (4) Continuation of exploration and implications of use of computer in photography.
Repeatable: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

442 Large Format Photography II (4) Studio course that continues exploration of the use of the large format camera in photography.
Repeatable: May be repeated. Maximum 10 hours.
(DE) Prerequisite(s): 330 and 341.
Registration Permission: Consent of instructor.

513 Photography I (2-6)
Repeatable: May be repeated. Maximum 10 hours.

516 Graduate Watercolor II (2-6)
Repeatable: May be repeated. Maximum 10 hours.

595 Visiting Artist Seminar (2) Contemporary art issues by different visiting artists.
Repeatable: May be repeated. Maximum 8 hours.

599 Projects in Lieu of Thesis (10)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 20 hours.
Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.
### 194 COURSES OF INSTRUCTION

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>599</td>
<td>Projects in Lieu of Thesis (10)</td>
<td>Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 20 hours. Comment(s): Completion of all graduate coursework and successful second-year evaluation by graduate faculty required.</td>
<td></td>
</tr>
<tr>
<td>431</td>
<td>Readings in Chinese Literature (3)</td>
<td>(Same as Chinese 431.) Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): Mastery of intermediate-level Chinese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>451</td>
<td>Readings in Pre-Modern Japanese Literature (3)</td>
<td>(Same as Japanese 451.) (DE) Prerequisite(s): Mastery of intermediate-level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>452</td>
<td>Readings in Modern Japanese Literature (3)</td>
<td>(Same as Japanese 452.) (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>471</td>
<td>Selected Topics in Asian Studies (3)</td>
<td>Content varies. Repeatability: May be repeated. Maximum 6 hours.</td>
<td></td>
</tr>
<tr>
<td>434</td>
<td>Clinical Practice in Speech-Language Pathology II (1-4)</td>
<td>(DE) Prerequisite(s): Mastery of intermediate-level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>510</td>
<td>Special Topics in Astronomy (1-3)</td>
<td>Topics of current interest in astronomy and astrophysics. Acceptable for graduate credit in physics with consent of department. Repeatability: May be repeated with consent of department. Maximum 9 hours.</td>
<td></td>
</tr>
<tr>
<td>511</td>
<td>Introduction to Research in Speech and Hearing (3)</td>
<td>Research techniques, fundamentals of statistics, application of statistics, and completion of a proposal and hypothetical pilot research project. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>512</td>
<td>Seminar in Voice Disorders (3)</td>
<td>Current research in diagnosis and treatment of adult swallowing disorders and critical interpretation of research literature on dysphagia. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>513</td>
<td>Seminar in Speech Sound Disorders (3)</td>
<td>Current research in diagnosis and treatment of speech and language disorders. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>514</td>
<td>Seminar in Pharyngeal Dysphagia (3)</td>
<td>Current research in diagnosis and treatment of adult swallowing disorders and critical interpretation of research literature on dysphagia. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>515</td>
<td>Practicum in Aural Rehabilitation (1-4)</td>
<td>Repeatable. Maximum 15 hours. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>516</td>
<td>Language Sample Analysis (3)</td>
<td>Methods of characterizing and describing language behaviors. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>517</td>
<td>Adult Neurogenic Communication Disorders I (3)</td>
<td>This course will assist students in developing basic biologic, social, clinical, and theoretical understandings of commonly observed neurogenic impairments. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>518</td>
<td>Adult Neurogenic Communication Disorders II (3)</td>
<td>This course will assist students in developing an advanced understanding of the neural, behavioral, social, clinical, and theoretical understandings of acquired neurogenic cognitive-linguistic impairments. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>522</td>
<td>Seminar in Speech Sound Disorders (3)</td>
<td>Current research in diagnosis and management of voice disorders. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>523</td>
<td>Seminar in Voice Disorders (3)</td>
<td>Current research in diagnosis and management of voice disorders. Multicultural, gender, and age-related issues. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>525</td>
<td>Counseling and Communication Disorders (3)</td>
<td>Issues related to the role of counseling in clinical practice in speech pathology and audiology. Includes discussion of counseling needs and approaches, including multicultural issues.</td>
<td></td>
</tr>
<tr>
<td>526</td>
<td>Dysphagia (3)</td>
<td>Clinical diagnosis, evaluation, and treatment of adult swallowing disorders and critical interpretation of research literature on dysphagia. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>527</td>
<td>Language, Culture, and Communication Disorders (3)</td>
<td>Multicultural issues across the lifespan; theoretical rationales for speech and language development and use, assessment and treatment practices. Comment(s): Graduate standing required.</td>
<td></td>
</tr>
<tr>
<td>531</td>
<td>Seminar on Stuttering (3)</td>
<td>Current significant research in stuttering. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>532</td>
<td>Advanced Clinical Practice in Speech-Language Pathology (1-4)</td>
<td>Repeatable. Maximum 15 hours. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>533</td>
<td>Advanced Clinical Practice in Speech-Language Pathology (1-4)</td>
<td>Repeatable. Maximum 15 hours. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>534</td>
<td>Advanced Clinical Practice in Speech-Language Pathology (1-4)</td>
<td>Repeatable. Maximum 15 hours. (DE) Prerequisite(s): Mastery of intermediate level Japanese or consent of instructor.</td>
<td></td>
</tr>
</tbody>
</table>
535 Advanced Clinical Practice in Speech-Language Pathology: Off-Campus Sites (1-4)
Repeatability: May be repeated. Maximum 15 hours.
(DE) Prerequisite(s): 100 hours clinical experience.
Comment(s): Enrollment for fewer than 2 hours must have prior departmental approval.
Registration Permission: Consent of instructor.

538 Advanced Clinical Practice in Speech-Language Pathology: Public Schools (1-4)
Repeatability: May be repeated. Maximum 15 hours.
Comment(s): Enrollment for fewer than 2 hours must have prior departmental approval.

539 Motor Speech Disorders (3) Neurornotor organization for speech production; types of motor speech disorders and associated neuromuscular symptomatology; diagnosis and management of motor speech disorders.
(DE) Prerequisite(s): 506.

540 Structural Speech Disorders (3) Etiology, diagnosis and clinical management of craniofacial and resonance disorders.
(DE) Prerequisite(s): 306 and 435.

541 Pediatric Oromotor Disorders (3) Evaluation, diagnosis, and treatment of pediatric oromotor disabilities that affect normal acquisition of feeding and pre-speech skills.
(DE) Prerequisite(s): 506 or consent of instructor.

542 Hearing Disorders (3) Effects of heredity, development/aging, diseases, and physical agents on hearing.
(DE) Prerequisite(s): 473 or consent of instructor.

543 Amplification Technology (3) Description of hearing aid circuits, components and performance characteristics. Electroacoustical and real ear analysis of hearing aids. Coupler material and geometry effects. Practical experience in troubleshooting, repair, and construction of hearing aids.
(DE) Prerequisite(s): 473 and 507 or consent of instructor.

(DE) Prerequisite(s): 473, 507, and 543 or consent of instructor.

545 Sound Measurement Techniques and Hearing Conservation (3) Techniques of measurement and analysis of sound: hearing conservation in schools and industry.
Registration Permission: Consent of instructor.

546 Audiologic Assessment (3) Theoretical bases for behavioral audiometry and acoustic immittance measurement.

547 Special Problems in Audiology (1-3)
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 473 or equivalent.
Registration Permission: Consent of instructor.

552 Seminar in Speech Pathology (2-3) Current significant research in speech pathology. Topics vary.
Repeatability: May be repeated with consent of department. Maximum 9 hours.
(DE) Prerequisite(s): 9 hours in speech pathology.

555 Special Problems in Speech-Language Pathology (1-3)
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

556 Independent Study in Speech-Language Pathology (1-3)
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

558 Phonological Disorders (3) Current theories and approaches to assessment and intervention for individuals with difficulty acquiring or using speech sound system of English.
(DE) Prerequisite(s): 435 or consent of instructor.

561 Child Language Disorders (3) Current literature on assessment and intervention techniques for young language learners.
(DE) Prerequisite(s): 461 or consent of instructor.

563 Language Disorders: Birth to Three (3) Overview of family-focused, transdisciplinary intervention process. Assessment/treatment of infants, toddlers, and preschoolers. Description of disabilities and resulting communication disorder.
(DE) Prerequisite(s): 461 or consent of instructor.

574 Pediatric Audiology (3) Theoretical and practical considerations in evaluation and treatment of hearing loss in infants and children. Audiological intervention in case management of hearing impaired child: amplification, educational alternatives, and state and federal guidelines.

576 Physiologic Assessment of the Auditory System I (3) Otocoustic emissions, electrocochleography, and auditory brainstem responses. Anatomical origins, principles, and applications. Use of these responses in evaluation of auditory function and determination of site-of-lesion.
(DE) Prerequisite(s): 507 and 546 or consent of instructor.

577 Vestibular Disorders (3) Anatomy, physiology, and pathophysiology of vestibular system and other systems that contribute to balance. Practicum in electronystagmography.
(DE) Prerequisite(s): 507, 542, 546, and 576 or consent of instructor.

581 Assessment of Central Auditory Processing (3) Overview of current central auditory processing disorder (CAPD) literature and assessment procedures, with emphasis on a holistic view by combining perceptual, electrophysiological, linguistic, and cognitive measurements.
(DE) Prerequisite(s): 546, 574, and 594 or consent of instructor.

582 Speech and Language Services in School (3) Organization and implementation of speech and language programs in schools.

583 Physiologic Assessment of the Auditory System II (3) Middle-latency, long-latency, and event-related potentials. Neurophysiological mechanisms, principles, and applications. Use of these potentials in evaluation of neurological and cognitive function.
(DE) Prerequisite(s): 576 or consent of instructor.

584 Amplification for Children with Hearing-Impairment (3) Study of strategies for selecting and fitting amplification systems for children; outcomes and measures and service coordination.
(DE) Prerequisite(s): 543, 544, and 574 or consent of instructor.

585 Cochlear Implants (3) Overview of cochlear implants, focusing on theory of auditory stimulation and cochlear implant systems; candidacy, surgical preparation, and follow-up/outcome measures; the rehabilitation process; and cochlear implant case presentations.
(DE) Prerequisite(s): 507, 576, and 583 or consent of instructor.

586 Standards and Practice Issues in Audiology (3) Overview of professional practice standards, ethics, medical/legal issues, business practices, and reimbursement procedures in audiology.
(DE) Prerequisite(s): 512 or consent of instructor.

591 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 30 hours.

592 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 30 hours.

593 Independent Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

594 Aural Habilitation/Rehabilitation of the Hearing-Impaired (3) Study of grieving process, counseling, group and individual amplification systems, classroom/speech acoustics, central auditory problems, therapy methods for habilitation and rehabilitation, speech reading, school-based programs, programs for adults and the elderly; student research reports/case studies.
(DE) Prerequisite(s): 473 and 494 or consent of instructor.

595 The Verbotonal System: Auditory/Speech Perception (3) Innovative theory, therapy procedures, and SUVAG amplification/filters for diagnosis/evaluation/remediation of spoken language/listening skills of hearing-impaired children/adults: use of rhythms, movements, and suprasegmentals; special audiometric tests, acoustic filters, correcting malarticulations through optimal listening; central auditory treatment; second (foreign) language through listening/spoken language; relationship of concepts to conventional concepts/practice; student research reports.
(DE) Prerequisite(s): 305, 473, and 494 or consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Experimental Phonetics (3) Acoustical and perceptual analyses of speech production and overall oral communication.
Registration Permission: Consent of instructor.

602 Psychoacoustics (3) Auditory perception and reception of acoustic stimuli.
(DE) Prerequisite(s): 507 or consent of instructor.

604 Molecular Genetics and Pharmacology of Hearing (3) Study of genetics, pharmacology, and general cellular processes as they relate to hearing.
(DE) Prerequisite(s): 507 or consent of instructor.

605 Speech Perception and Hearing Impairment (3) Study of perception of speech stimuli, with particular emphasis on the effects of hearing impairment on perception.

611 Experimental Design in Speech and Hearing (3) Analysis of experimental design in theses and related journals. Generation of experimental designs.
Registration Permission: Consent of instructor.
613 Externship in Audiology (1-9) Off-campus clinical training experience.
   Repeatability: May be repeated. Maximum 36 hours.
   Registration Permission: Consent of academic advisor.

626 Advanced Seminar in Neurologically-based Communication Disorders (3) Topics vary.
   Repeatability: May be repeated. Maximum 6 hours.
   (DE) Prerequisite(s): 520, 539, and 524 or consent of instructor.

650 Advanced Seminar in Audiology (3-6) Topics vary.
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

652 Advanced Seminar in Speech and Language (2) Topics vary:
   - aberrations of voice, articulation, speaking time and rhythm, language
classification analysis, and language symbolization.
   Repeatability: May be repeated. Maximum 8 hours.
   Registration Permission: Consent of instructor.

655 Practicum in College Teaching (1-3) Supervised experience in college teaching.
   Grading Restriction: Satisfactory/No Credit grading only.
   Registration Permission: Consent of instructor.

656 Directed Research (1-4) Participation in ongoing or non-dissertation.
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

657 Directed Study in Speech Pathology (1-3)
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

658 Directed Study in Audiology (1-3)
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

659 Directed Study in Speech Science (1-3)
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

660 Directed Study in Hearing Science (1-3)
   Repeatability: May be repeated. Maximum 9 hours.
   Registration Permission: Consent of instructor.

661 Advanced Seminar: Language Disorders in Children (3) Topics vary.
   Repeatability: May be repeated. Maximum 6 hours.
   (DE) Prerequisite(s): 561 or consent of instructor.

662 Advanced Seminar in Audiologic Assessment (3) Synthesis of information on audiologic and vestibular assessment and application of clinical cases.
   (DE) Prerequisite(s): 542, 546, 574, 576, and 577 or consent of instructor.

663 Advanced Seminar in Aural Habilitation/Rehabilitation (3) Synthesis of information on audiologic habilitation and rehabilitation cases.
   (DE) Prerequisite(s): 543, 544, 584, and 594 or consent of instructor.

664 Advanced Seminar in Amplification (3) Synthesis of information on amplification technology, amplification for adults with hearing impairment, and case studies.
   (DE) Prerequisite(s): 543, 544, 584, and 594 or consent of instructor.

Aviation Systems (169)

500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

501 Aviation Systems: An Overview (3) Aviation systems, present and future. Socioeconomic base, aerospace and propulsion technology, meteorology, air traffic control, airport community interface, and technological trends and developments pertinent to present status, and future development of air transportation.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

503 Air Vehicles (3) Current capabilities and future requirements for civilian and military air vehicles. Parameters significant for air vehicle type selection. Integration of air vehicle into aviation systems.
   (DE) Prerequisite(s): 501.

504 Airports and the Community (3) Structure of airports and their communities. Technology and economics of cargo, baggage, ticket, and passenger handling. Airport management, economics and logistics. Interfaces with community. Plans, programs and developments for collecting and distributing passengers and freight from various types of airports. Types of airport developments and their projections.
   (DE) Prerequisite(s): 501.

505 Governmental Policies for Aviation (3) Theoretical and legal basis for economic and governmental regulation of aviation. Historical and legislative development of aviation regulatory agencies, organizational structure, administrative and enforcement procedures.
   (DE) Prerequisite(s): 501.

506 Aircraft Design (3) Design process, compromise of conflicting requirements, economical, industrial, and legal aspects. Definition of mission requirements, synthesis and optimization techniques, safety and reliability, systems integration, standards and regulations, teamwork, and decision-making process.

507 Introduction to Airborne Radar (3) Theory and application of airborne radar. Radar detection and measurement techniques through aviation systems applications. Ground effects on radar signals of multipath and clutter. Pulsed operation, coding, filters, processing techniques, Doppler effects. Problems of range and range rate and tracking. Methods and techniques for reducing radar cross section.

508 Flight Test Instrumentation (3) Principles of measurement, measuring devices with views toward both ground and flight aerospace testing: measurement fundamentals, sensors for specific parameters (e.g. temperature, heat flux, flow rate, pressure, acceleration, vibration, strain, and humidity), data bus integration, signal condition, telemetry, and fabrication.

509 Introduction to Aircraft Structures (3) Design and analysis of structures: light-weight and modern materials used for aircraft structures. Topics: load determination and aviation regulations, airworthiness, ultimate loads, limit loads, load factors; simplifying assumptions to safe side; basics of stress and strain, elasticity, shear, bending, torsion; statically indeterminate systems, frames; structural instabilities, buckling of columns, thin plates; tension field beams; principles of stressed skin construction; open, closed, thin-walled beams; tapered beams, fuselage and frames, wings and ribs; laminated composite structures; elementary aeroelasticity.

510 Special Topics in Aviation Systems (3) Current problems.
   Repeatability: May be repeated with consent.
   Registration Permission: Consent of instructor.

511 Theory and Aviation Applications of GPS (3) Global Positioning System (GPS) for improved navigation and situational awareness for civil and military applications. GPS theory: geometric dilution of precision, satellite positioning, ionospheric delay, differential GPS, and GPS errors. Applications for navigation and aircraft flight-testing. Integration of GPS for aviation infrastructure and for air vehicle navigation, concepts of WAAS and LAAS.

512 Helicopter Performance Flight Test Techniques (3) Experimental test techniques for helicopter performance flight testing. Theoretical derivation of flight test techniques. Participation in series of flight test experiments demonstrating acquisition of flight test data. Instrumentation and data reduction techniques.

513 Helicopter Stability and Control Flight Test Techniques (3) Experimental test techniques for helicopter stability and control flight testing. Theoretical derivation of flight test techniques. Participation in series of flight test experiments demonstrating acquisition of flight test data. Instrumentation and data reduction techniques.

514 Systems Flight Testing (3) Experimental test techniques for helicopter flight systems. Approach and design for testing airborne systems. Theory and operation of typical flight systems: aircraft systems, navigation systems, communications systems, and specific mission systems.

515 Aviation Human Factors (3) Human factors pertinent to aviation: concept of human factors, human error, fatigue, body rhythms, performances, motivation, vision and visual illusions, communication, attitudes, training and devices, displays and controls, space and layout, anthropometry, flight deck design and evaluation, aircraft cabin design and evaluation, flying qualities evaluation, and performance measurement techniques. Applied aviation systems.

516 Aircraft Flight Controls (3) Feedback control concepts, root locus techniques, bode analysis, PID control design, and controller and observer design concepts applied to aircraft. Complex analysis and matrix algebra.

(DE) Prerequisite(s): 422.

(DE) Prerequisite(s): 422.

(DE) Prerequisite(s): 422.

550 Project in Aviation Systems (3) Repeatable: May be repeated. Credit Restriction: Maximum of 3 hours may be applied toward degree requirements. Comment(s): Non-thesis aviation systems majors only.

Biochemistry and Cellular and Molecular Biology (188)

401 Biochemistry-Molecular Biology I (4) First semester of a two-course sequence providing in-depth coverage of biochemistry and molecular biology. Covers amino acid structure and chemistry, protein structure and chemistry, protein folding, enzyme behavior and function, reaction mechanisms, catabolism and energy transfer, synthetic metabolism including photosynthesis, and protein transport.

(DE) Prerequisite(s): Biology 240 and Chemistry 350, 360, and 369.

402 Biochemistry-Molecular Biology II (4) Second semester of a two-course sequence providing in-depth coverage of biochemistry and molecular biology. Covers structure of DNA and RNA, experimental methods of analyzing nucleic acids, mechanisms of RNA and protein synthesis, mechanisms of DNA replication, repair and recombination, chromosome structure and function, regulation of gene expression, genome structure and genomics, and mechanisms of biological regulation.

(DE) Prerequisite(s): Biology 240 and Chemistry 350, 360, and 369.

403 Advanced Genetics Laboratory (3) Experiments illustrating methods in modern genetics: techniques in classical, cyto-molecular, and developmental genetics. Using model organisms, especially Drosophila and mouse.

(DE) Prerequisite(s): Biology 240 and Chemistry 350, 360, and 369.

404 Plant Molecular Biology (4) Introduction to current research approaches and methodologies in plant developmental biology and molecular genetics.

Contact Hour Distribution: Laboratory and lecture.

(DE) Prerequisite(s): Biology 140 and 240.

419 Cellular and Comparative Biochemistry Lab (2) Experiments with enzymes, nucleic acids, and membranes and organelles. Chromatography, kinetics, hybridization, sequencing, and immunochernical methods.

(DE) Prerequisite or (DE) Corequisite: 401 or 410.

421 Cell and Tissue Structure and Function (4) Study of animal cells and tissues at light and electron microscope levels.

Contact Hour Distribution: 2 hours and 2 labs.

(DE) Prerequisite(s): Biology 140.

429 Cell Biology Laboratory (3) Series of open-ended, discovery-based exercises developed to design and test new drugs using modern cell biology and computer technologies. Experimental modules: techniques used in cell isolation, purification, culturing, fluorescent microscopy, receptor binding and signal transduction, apoptosis, cell cycle analysis, protein and steroid secretion, computer modeling, and state-of-the-art electron microscopy. Experiment design, execution, data analysis, and peer evaluation.

(DE) Prerequisite or (DE) Corequisite: 401 or 410.

440 General Physiology (3) Principles of cellular and organ-system animal physiology.

(DE) Prerequisite(s): Biology 140.

(DE) Corequisite(s): Chemistry 350 and 360. Recommended Background: Physics 221 and 222.

465 Human Genetics (3) Genetic and molecular principles and problems of human inheritance.

(DE) Prerequisite(s): Biology 240.

471 Biophysical Chemistry (3) Physicochemical principles with applications to biological systems. Thermodynamics; chemical equilibria; solution chemistry; transport; electrochemistry; kinetics; enzyme catalyzed reactions. (Same as Chemistry 471.)

(DE) Prerequisite(s): Chemistry 350 and 360, Mathematics 125, and general biology or consent of instructor.

480 Physiology of Exercise (3) See Exercise Science 480.

481 Biophysical Chemistry (3) Physicochemical principles with applications to biological systems. Elementary quantum chemistry; interactions of light with biological molecules; optical and magnetic spectroscopy; light scattering; case studies of selected macromolecules. (Same as Chemistry 481.)

(DE) Prerequisite(s): Chemistry 350 and 360, Mathematics 125, and general biology or consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatable: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatable: May be repeated. Credit Restriction: May not be used toward degree requirements.

511 Advanced Protein Chemistry and Cellular Biology (3) Cellular structure and function at molecular and supramolecular level in progress; protein structure and function; membrane structure and function; bioenergetics and membrane proteins.

(DE) Prerequisite(s): Prior knowledge of cell biology and biochemistry. Registration Permission: Consent of instructor.

512 Advanced Molecular Biology (3) Regulation of nucleic acid expression and protein activity. Nucleic acid structure and function; replication and repair of nucleic acids; gene expression; protein synthesis; post-translational protein modification; mitosis and meiosis; cell cycle and cell growth.

(DE) Prerequisite(s): 511 or consent of instructor.

513 Advanced Protein Biochemistry and Cell Biology II (3) Advanced topics of cellular function and regulation of cell division and growth, and structure and function of supramolecular structures: cytoskeleton and cell junctions and adhesions.

(DE) Prerequisite(s): 511.

515 Experimental Techniques I (2-4) Introduction to modern experimental methodology and instrumentation in biochemistry, molecular biology and cell biology, including cell culture; spectrophotometry; microscopy; nucleic acid purification and analysis; protein assays; enzyme purification; electrophysiology; computer analysis of nucleic acid and protein sequences. Team-taught lecture/demonstration format. Repeatable: May be repeated. Maximum 6 hours.

Comment(s): Primarily for departmental graduate students.

516 Experimental Techniques II (2-4) Laboratory rotations. Students work in laboratory of faculty member on clearly defined project. Written proposal and oral report required. Repeatable: May be repeated. Maximum 8 hours.

(DE) Prerequisite(s): 515.

Comment(s): Primarily for departmental graduate students.

517 Physical Biochemistry (3) Physics and chemistry of biological systems and molecules. Thermodynamics; diffusion and transport; physical chemistry of macromolecules; enzyme kinetics; binding reactions; spectroscopy; electrophysiology.

(DE) Prerequisite(s): 511 or consent of instructor.

520 Special Topics (1-3) Selected directed readings or special course in topics of current interest. Consult departmental listings for offerings. Grading Restriction: Satisfactory/No Credit grading only. Repeatable: May be repeated with consent of instructor. Maximum 6 hours.

(DE) Prerequisite(s): 401 and one semester of introductory plant physiology or cell biology.

523 Advanced Plant Physiology II (3) Growth and differentiation of plants at molecular, cellular and organismal levels. Regulation of development; macromolecular interpretation of differentiation, dormancy, germination, flowering, and senescence.

(DE) Prerequisite(s): 401 and one semester of introductory plant physiology or cell biology.

525 Graduate Research Participation (3-12) Tutorial laboratory experiencen.

Repeatable: May be repeated. Maximum 12 hours.
530 Experimental Design and Analysis (2) Development of skills in strategies of experimental design and interpretation of experimental results. Critical discussion of research articles illustrating issues in experimental design. Preparation of grant proposal in standard format to be read and discussed by class and by panel of faculty expert in area of proposal.

Registration Permission: Consent of instructor.

550 Advanced Concepts in Neurobiology/Physiology (3) Concepts related to neurobiology/physiology with information taken from current literature. Predominantly lecture format with student participation. Specific subject area to be announced.

Registration Permission: Consent of instructor.

552 Physiology of Hormones (3) Cellular and organismal action of hormones in invertebrate and vertebrate animals.

Contact Hour Distribution: 2 hours and 1 lab.

Recommended Background: 410.

Registration Permission: Consent of instructor.

559 Biophysical Crystallography (3) Theories and practices of X-ray diffraction, neutron diffraction and neutron scattering to elucidate the structure of nucleic acids, proteins, nucleosomes, ribosomes and viruses. Application of 3-D structures in designing drugs against AIDS, cancer, cardiac disease and neurodegenerative disorders.

Recommended Background: 401 or two 300-level chemistry courses or Physics 240.

Registration Permission: Consent of instructor.

560 Advanced Concepts in Structural Biology/Biochemistry (3) Concepts related to structural biology/biochemistry with information taken from current literature. Predominantly lecture format with student participation. Specific subject area to be announced.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

561 Environmental Toxicology (3) (See Ecology and Evolutionary Biology 561.)

Contact Hour Distribution: Two 3-hour labs.

Comment(s): Approved graduate students in department only.

564 Introduction to Electron Microscopy-Scanning Electron Microscope (3) Practical introduction to techniques of electron microscopy and to scanning electron microscope. Use of microscope, introduction to darkroom techniques and digital image processing, preparation of samples for observation, and special project.

Contact Hour Distribution: 2 hours and 1 lab.

Registration Permission: Consent of instructor.

570 Advanced Concepts in Cellular/Molecular Biology (3) Concepts related to cellular/molecular biology with information taken from current literature. Predominantly lecture format with student participation. Specific subject area to be announced.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

580 Advanced Concepts in Genetics/Developmental Biology (3) Concepts related to genetics/developmental biology with information taken from current literature. Predominantly lecture format with student participation. Specific subject area to be announced.

Repeatability: May be repeated. Maximum 12 hours.

Registration Permission: Consent of instructor.

591 Foreign Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

601 Departmental Seminar (1) Invited speakers. Topics posted in advance. Required every semester in residence.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 15 hours.

603 Graduate Research Colloquium (1) Seminars and lectures dealing with current advances in fields of biochemical and biophysical methods. Mechanisms of enzyme catalysis, gene expression, membrane structure and function, metabolic regulation, physical biochemistry, molecular genetics, cell biology, neurobiology, and related topics. Topics posted in advance. Required every semester in residence.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 15 hours.

605 Journal Club in Neurophysiology/Physiology (1) Readings and discussion based on current literature.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 12 hours.

606 Journal Club in Structural Biology/Biochemistry (1) Readings and discussion based on current literature.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 12 hours.

607 Journal Club in Cellular/Molecular Biology (1) Readings and discussion based on current literature.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 12 hours.

608 Journal Club in Genetics/Developmental Biology (1) Readings and discussion based on current literature.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 12 hours.

610 Current Topics in Biochemistry, Cellular, and Molecular Biology (1-3) Critical reviews of research problems and methods in biochemistry, cell biology and/or molecular biology. Oral presentations, written reports, computer simulations by faculty and students.

Repeatability: May be repeated. Maximum 4 hours.

Registration Permission: Consent of instructor.

612 Advanced Topics in Environmental Toxicology (1-3) (See Ecology and Evolutionary Biology 612.)

615 Special Topics in Biochemistry, Cellular, and Molecular Biology (3) Biochemical and biophysical methods, mechanisms of enzyme catalysis, gene expression, membrane structure and function, metabolic regulation, physical biochemistry, molecular genetics, cell ultrastructure and physiology, neurobiology, and related topics.

Repeatability: May be repeated. Maximum 9 hours.

(DE) Prerequisite(s): 511 and 512 or consent of instructor.

Biomedical Engineering (192)

408 Cell and Tissue Engineering (3) Mammalian cell culture. Effects of mechanical forces on cells. Tissue engineering of cardiovascular and orthopedic tissues.

(DE) Prerequisite(s): 310 and Biology 140.

430 Biomedical Engineering Laboratory (4) Experience with unique problems associated with making measurements and interpreting data in living systems. Experiments may include mechanical testing of biological materials, imaging and physiological measurements (EKG, EMG, ECG, etc.).

(DE) Prerequisite(s): 310 and 346 or consent of instructor.

473 Applied Biomechanics (3) Applications of biomechanics to the industrial and orthopedic area. Design of orthopedic implant devices; biomechanics of injury and protection.

(DE) Prerequisite(s): Mechanical Engineering 321.

(DE) Corequisite(s): 310 and Materials Science and Engineering 474.

475 Design of Artificial Internal Organs (3) Design, development and evaluation of artificial internal organs; analysis of transport processes in therapeutic devices for design optimization; current research and development needs. Ethical considerations.

(DE) Prerequisite(s): Aerospace Engineering 341 and Mathematics 231.

494 Special Project in Biomedical Engineering (1-3) Problems related to recent developments and practice.

Repeatability: May be repeated. Maximum 6 hours.

495 Special Project in Biomedical Engineering (1-3) Problems related to recent developments and practice.

Repeatability: May be repeated. Maximum 6 hours.

500 Thesis (1-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.
507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)

509 Multidisciplinary Project (1) (See Industrial Engineering 509.)

511 Biotransport Processes (3) Cellular transport and electrical properties from a combined biological, physical, and engineering point of view. Matter transport across cellular membranes involving diffusion, osmosis, coupled solute and solvent transport, carrier-mediated transport, and ion transport. Homeostatic mechanisms involved in maintaining cellular solute concentrations, volume, and potential. Electrically excitable and excitable cells, lumped parameter and distributed-parameter cell models, linear electric properties of cells, and voltage gated ion channels.

(DF) Prerequisite(s): Electrical and Computer Engineering 301 or consent of instructor.

531 Advanced Biomechanics I (3) Derivation of mathematical models of the human body using Kane’s Method of Dynamics to create system equations of motions. Mathematical models will pertain to human non-implanted and implanted joints. Models will be created by hand and using the symbolic manipulation algorithm AutoTov. (Same as Mechanical Engineering 531.)

(DF) Prerequisite(s): Mechanical Engineering 231.

534 Mechanical Vibrations (3) (See Mechanical Engineering 534.)

539 Continuum Mechanics (3) (See Engineering Science 539.)

541 Fluid Mechanics I (3) (See Mechanical Engineering 541.)

552 Computational Biomechanics (3) Practical use of general-purpose commercial finite element packages for simulations related to orthopedic and sport biomechanics. Prediction of failure and performance of bone, joints and prosthetic devices.

(DF) Prerequisite(s): Mechanical Engineering 231 and 321.

555 Human Vibrations Analysis and Protection (3) Concepts of whole body vibrations, background information on the development of ANSI and ISO Standards for the protections of workers from whole body vibrations; how to apply the standards to meet the EU requirements; measurement methods and signal processing requirements for whole body vibration; background information on the development of ANSI and ISO Standards for the protections of workers for vibration white finger syndrome; development criteria for current ANSI, ISO, and EU standards; measurements methods and requirements, effectiveness of anti-vibration gloves. (Same as Aerospace Engineering 555; Mechanical Engineering 552.)

(DF) Prerequisite(s): Mechanical Engineering 363 and 534.

Registration Permission: Consent of instructor.

559 Advanced Mechanics of Materials I (3) (See Mechanical Engineering 559.)

561 Finite Elements for Engineering Applications (3) (See Engineering Science 551.)

562 Computational Fluid-Thermal Systems (3) (See Engineering Science 552.)

571 Biomechanics of Hard and Soft Tissue (3) (See Engineering Science 571.)

572 Biomedical Fluid Mechanics (3) (See Engineering Science 572.)

577 Neural Networks in Engineering (3) (See Nuclear Engineering 577.)

587 Dynamic Modeling and Simulation (3) (See Mechanical Engineering 587.)

590 Selected Biomedical Engineering Problems (2-6)

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. Comment(s): Enrollment limited to students in the non-thesis option. Registration Permission: Consent of instructor.

595 Seminar (1) All phases of biomedical engineering, reports on current research at UTK and UTSS. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

599 Special Topics in Biomedical Engineering (1-3)

Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)

Grading Restriction: P/No Credit only. Repeatability: May be repeated.

610 Advanced Topics in BME (3) Current research topics of interest in biomedical engineering.

Registration Permission: Consent of instructor.

(DF) Prerequisite(s): 511 or consent of instructor.

631 Advanced Biomechanics II (3) Using the symbolic manipulation algorithm, difficult systems pertaining to the human body will be modeled. A more in depth analysis of Kane’s method of multibody dynamics will also be implemented in these models. Each student will focus on one complex model that pertains to an orthopedic complication that the orthopedic industry needs solved. (Same as Mechanical Engineering 631.)

(DF) Prerequisite(s): 531.

659 Advanced Mechanics of Materials II (3) (See Mechanical Engineering 659.)

Biosystems Engineering (196)

411 Mechanical Systems Engineering (3) Fundamentals of power delivery systems and simple mechanisms; selection and design of mechanical, hydraulic, and tractive power transmission systems. Emphasis on off-road vehicles and bioprocessing systems.

Contact Hour Distribution: 2 hours and 1 lab. Recommended Background: Rigid-body dynamics, mechanics of materials.

416 Hydrologic and Water Quality Engineering (3) An introduction to hydrology including: hydrologic variability, precipitation, evapotranspiration, infiltration, runoff, erosion, water quality and non-point pollution, energy dissipation, streamflow measurement, hydrographs, routing, open channel flow, and urban hydrology. (Same as Civil Engineering 416.)

Recommmended Background: Hydraulics or fluid mechanics.

431 Bioprocess Engineering (3) Development of interdisciplinary bioprocess engineering: basics of biology in an engineering perspective; enzymatic reaction kinetics; metabolism and bioenergetics; cell growth kinetics and product formation; engineering principles applied to bioprocess engineering including mass balance, energy balance, and reaction kinetics; reactor design and systems; introduction to bioseparations; practical aspects of bioprocess engineers and process development.

Contact Hour Distribution: 2 hours and 1 lab.

451 Electronic Systems (4) Basic electronics with biological applications. Analog and digital electronics; sensing and controlling physical and environmental parameters; sensor selection and interfacing; signal conditioning; process control. Includes laboratory experiments and design projects.

Contact Hour Distribution: 3 hours and 1 lab. Recommended background: Electrical circuits.

500 Thesis (1-15)

Grading Restriction: P/Not Credit only. Repeatability: May be repeated. Registration Restriction(s): Master of Science – biosystems engineering major.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Seminar (1) (See Environmental and Soil Sciences 503.)

519 Modeling Techniques and Applications (3) Engineering approach to mathematical modeling of physical phenomena. Systems definitions and boundaries; types and formulation of models and solution techniques; verification and calibration techniques; model applications and case studies.

Contact Hour Distribution: 2 hours and 1 lab. Comment(s): Graduate standing in engineering required.

525 Soil Erosion and Sediment Yield (3) (See Environmental Engineering 525.)

530 Research Problems in Biosystems Engineering (1-3) Theoretical and experimental studies relating to current problems in agricultural engineering.

Repeatability: May be repeated. Maximum 6 hours.
532 On-Site Domestic Wastewater Treatment, Dispersal and Reuse (3) Design and management of domestic on-site wastewater treatment and dispersal systems, use of the soil as a medium for final treatment and for wastewater dispersal, concepts of the decentralization of domestic wastewater management, and reuse of treated water for irrigation. (Same as Biosystems Engineering Technology 532.)
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): Civil Engineering 395 or consent of instructor.

541 Principles of Compost Engineering (3) Comprehensive study of composting: survey of installed systems; thermodynamics of composting; biology of composting; kinetics of heat inactivation; feed conditioning; aeriation; substrate characteristics; process kinetics; and odor control. Design component.
(DE) Prerequisite(s): Coursework in thermodynamics and heat and mass transfer.

543 Instrumentation and Measurement (3) Modern instrumentation techniques. Static and dynamic response of instrumentation; signal conditioning; temperature, moisture, optical radiation, displacement, strain, pressure, velocity, acceleration, and flow measurements; digital data acquisition and control. (Same as Environmental Engineering 543.)
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): 451 or coursework in electronics and computer circuits.

545 Monitoring Hydrologic Phenomena (3) Application of instrumentation theory to monitoring hydrologic phenomena; strengths and weaknesses of current equipment and strategies; equipment operation and solution of environmental monitoring problems. (Same as Environmental Engineering 545.)
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): 451 or coursework in electronics and computer circuits.

550 Selected Topics (1-3) Lecture/group discussion on specialized topics. Repeatability: May be repeated. Maximum 6 hours.

552 Biological Treatment Theory (3) (See Environmental Engineering 552.)

555 GIS and GPS Applications to Biosystems (3) Theory and applications of Geographical Information Systems (GIS) and Global Positioning Systems (GPS); acquiring, managing, and analyzing spatially-varying data. Specific applications in agriculture, environmental site assessment, natural resource management, and hydrology. (Same as Biosystems Engineering Technology 555.)
Contact Hour Distribution: 2 hours and 1 lab.
Comment(s): Students with graduate standing in engineering, biological or physical sciences only.

575 Applied Microbiology and Bioengineering (3) (See Chemical Engineering 575.)

591 Environmentally-Sensitive Spray Applications (3) Develops the concepts of spray drift causes and corrective actions to lessen the effects of pesticides in the environment. Concepts are based on factors related to dosage transfer and the competing physics of droplet delivery under a variety of atmospheric conditions. Mass balance procedures are emphasized to validate measures of spray drift. Spray equipment components and operation factors affecting spray drift are introduced as operator controlled measures to minimize spray drift. The role of pesticide label language is incorporated into course concepts. Best management practices are developed to ensure practical applications of course concepts are emphasized. The student will learn how to implement spray drift reduction practices as well as make objective conclusions about spray drift test data.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: Grading size and composition.
Repeatability: May be repeated.
Registration Restriction(s): Doctor of Philosophy – biosystems engineering major.

603 Seminar (1) (See Environmental and Soil Sciences 603.)

619 Mathematical Modeling for Engineers (3) Describing physical and biological settings with mathematical expressions. Applying dimensional analysis, linear and nonlinear ordinary differential equations, partial differential equations, systems of linear equations, linearization, moving boundary problems, and series solutions to solve mathematical expressions. (RE) Prerequisite(s): 519.

636 Geospatial Methods for Environmental Research (3) Sampling and displaying the multidimensionality of environmental variables. Spatial and temporal sensing of the environment. Geostatistical mapping and interpretation; sampling stratification; precision geomatic techniques for the environmental scientist and engineer.
Contact Hour Distribution: 2 hours and 1 lab.
(RE) Prerequisite(s): 555.

650 Selected Topics (1-3) Lecture, group discussion, and individual study on specialized developments. Repeatability: May be repeated. Maximum 6 hours.

Biosystems Engineering Technology (194)

422 Food and Process Engineering Technology (3) Application of basic engineering principles to agricultural and food processes. Fluid handling, drying, evaporating, thermal processing, heating and cooling, refrigeration systems, and materials handling.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: General physics.

432 Agricultural Machinery and Tractors (3) Functions, selection, matching, and management of agricultural machinery systems. Tractor power ratings, engine air transmission systems, hydraulic systems, hitching, and ballasting. Field and material capacity, field efficiency, cost analysis, and machinery replacement strategies. Functional analyses of tillage operations, planters and drills, no-till systems, hay harvest systems, forage and small grain harvesting, and cotton harvesting. Crop drying processes, off-road machinery safety considerations, and operator ergonomics.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: 2 semesters of calculus.

442 Agricultural Waste Management and Pollution Control (3) Waste renovation fundamentals; characteristics of animal manure; techniques for collection, transporting, storing, and utilizing livestock waste.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: 2 semesters of calculus.

452 Small Internal Combustion Engines (3) Theory, concepts, and mechanics of small internal combustion engines; theoretical cycles; selection, operation, adjustment, troubleshooting and repair of single-cylinder engines.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: 2 semesters of calculus.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction(s): Master of Science – biosystems engineering major.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Seminar (1) (See Environmental and Soil Sciences 503.)

506 Engineering Principles (3) Properties of materials, fundamentals of hydraulics, principles of electricity, thermal phenomena, applications in biological systems.
Contact Hour Distribution: 2 hours and 1 lab.

508 Special Problems in Biosystems Engineering Technology (1-3) Individual studies of current problems.
Repeatability: May be repeated. Maximum 6 hours.

514 CAD Applications to Biosystems Engineering Technology (3) Computer Aided Drafting (CAD) applications in agriculture and environmental science. Essentials of CAD software to create drawings of components, systems, flow charts, and process diagrams. Applications in mechanical, structural, and biosystems. 2-D applications with limited exposure to 3-D applications. Computer intensive course. Hands-on experience.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): 506.

532 On-Site Domestic Wastewater Treatment, Dispersal, and Reuse (3) (See Biosystems Engineering 532.)
534 Production Monitoring and Automation (3) Precision technologies for monitoring and control of agricultural systems. Applications include: yield monitoring, variable rate control and sensing systems for planters, sprayers, soil applied nutrients, water management, crop health, and pest pressure; electronic information transfer; and GPS-based vehicle guidance.

- Contact Hour Distribution: 2 hours and 1 lab.
- Credit Restriction: Students cannot receive credit for both 434 and 534.
- Registration Restriction(s): Minimum student level – graduate.

542 Simulation of Agricultural Systems (3) Synthesis and analysis of agricultural systems using computer simulation, philosophy of system simulation, critical path, discrete and continuous systems.

- Contact Hour Distribution: 2 hours and 1 lab.
- (RE) Prerequisite(s): 506.

546 Automation Devices and Applications (3) Basic electronics as applied to simple automation systems, programmable controllers, data acquisition, digital logic and transducers.

- Contact Hour Distribution: 2 hours and 1 lab.
- (RE) Prerequisite(s): 506.

555 GIS and GPS Applications to Biosystems (3) (See Biosystems Engineering 555.)

562 Selected Topics in Biosystems Engineering Technology (1-3) Lecture/group discussion on specialized topics.

- Repeatability: May be repeated. Maximum 6 hours.

574 Environmental Instrumentation and Monitoring (3) Equipment and techniques commonly used to measure all aspects of hydrologic cycle: precipitation, runoff, streamflow, subsurface water movement. Sampling of all flows for contaminants. Design of monitoring systems. Analysis of data.

- Contact Hour Distribution: 2 hours and 1 lab.
- Credit Restriction: Students cannot receive credit for both 474 and 574.
- (RE) Prerequisite(s): 506.
- Recommended Background: Hydrology.
- Registration Restriction(s): Minimum student level – graduate.

Business Administration (205)

501 MBA Career Development (1) Career opportunities available in each concentration.

- Grading Restriction: Satisfactory/No Credit grading only.
- Comment(s): Enrollment is limited to students admitted to the MBA program or by consent of the Assistant Dean of the MBA Program.

511 MBA Core I (3) Essential skills of manager: basic information technology skills, team building, and written and oral communication skills. Finance and accounting fundamentals. Introduction to integrated value chain.

- Grading Restriction: Satisfactory/No Credit grading only.
- Comment(s): Requires admission to the MBA program or consent MBA Program Director.

- (DE) Prerequisite(s): 511 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to the MBA program or consent of MBA Program Director.

513 MBA Core III (9) Continuation of the functional fundamentals from 512. Integration of value chain: supply management and resource management. Capstone integrated experience using information technology.

- (DE) Prerequisite(s): 511 and 512 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to MBA program or consent of MBA Program Director.

- (DE) Prerequisite(s): 511, 512, 513 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to MBA program or consent of MBA Program Director.

520 Innovation and Entrepreneurship (3) Introduces students to innovation and entrepreneurship business logics and strategies. Topics include innovative problem solving, business consulting practices, business planning, continuous improvement, transformational change leadership, and project management.

- (DE) Prerequisite(s): 511, 512, and 513.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Executive MBA admission required.

- (DE) Prerequisite(s): 551.

- (DE) Prerequisite(s): 552.

561 Management Project I (3) Company project. Preliminary investigation of significant strategic issue (new initiative, program or significant organizational change to enhance organizational effectiveness) in sponsoring organization. Work within firm under guidance of faculty to develop proposal which defines issue and scope of project. Proposal to be approved by company and faculty.

- (DE) Corequisite: 551.
- Comment(s): Executive MBA admission and cooperation of sponsoring organization required.
562 Management Project II (3) Company project. Continuation of 561. Diagnosis and analysis of strategic issues. Work within firm under guidance of faculty member.

(DE) Prerequisite(s): 561.

563 Management Project III (3) Company project. Continuation of 562. Completion of analysis and presentation of report to senior management in sponsoring organization. Work within firm under guidance of faculty member.

(DE) Prerequisite(s): 562.

591 International Travel (1) This one-hour course provides one-hour credit framework for purposes of international travel and cultural exchange programs that are sponsored by the MBA program.

Comment(s): Requires admission to MBA program or consent of MBA Program Director.

593 Directed Independent Study (3) Cross-disciplinary topic of mutual interest to student and faculty.

Grading: Satisfactory/No Credit or letter grade.

Repeatability: May be repeated. Maximum 6 hours.

Comment(s): Available only by prearrangement with supervising faculty member. May require approval of Dean of the MBA program.

595 Entrepreneurial Strategy Implementation (3) Student teams of 2-4 individuals work with an entrepreneur to implement business strategies. Guided by statement of Work, students will conduct research, analyze company data, and interact weekly with the entrepreneur to understand goals of the strategy being implemented. One student per team will serve as the project manager, and a faculty member will serve as the Client Partner lead.

(DE) Prerequisite(s): 511, 512, 513, and 520.

599 Executive-In-Residence (3) Interaction with corporate executives from wide spectrum of business disciplines and discussion of domestic and international strategic planning as applied in major corporations.

(DE) Prerequisite(s): MBA core.

Registration Permission: Consent of instructor.

611 Seminar in Theoretical Foundations (3) Theoretical foundations and frameworks common to business research. Historical and philosophical science perspectives.

612 Seminar in Research Methods (3) Research processes: philosophical foundations, problem formulation, grounded theory, qualitative methods and analysis, measurement, sources of error, experimental design and analysis, survey design and analysis.

693 Independent Study (3)

Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

699 Special Topics (3) Seminars that integrate content from various business functions: international business, management information systems.

Chemical Engineering (226)

467 Honors: Engineering Internship in Process Control (4) Selected students work in small groups on industrial problems in process dynamics and control. Directed by faculty and engineers from host company.

(DE) Prerequisite(s): 360 and consent of instructor.

477 Honors: Applied Process Automation Laboratory (3) Interfacing flexible batch continuous processes to automation systems. Top down analysis with bottom up implementation, hierarchical structures and object oriented concepts are used to design automation solutions: human-machine-interfaces. Workstations with modern industrial equipment, provide an interactive graphics, and visualization environment.

(DE) Prerequisite(s): 360 and consent of instructor.

483 Introduction to Reliability Engineering (3) (See Nuclear Engineering 483.)

484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.)

500 Thesis (1-15)

Grading Restriction: P/INP only.

Repeatability: May be repeated.

Comment(s): Enrollment is limited to students admitted to the graduate program.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

505 Engineering Analysis (3) Formulation and solution of problems in chemical engineering and materials areas, ordinary and partial differential equations; types of ODE, PDE and solution techniques; transform methods; conformal mapping; variational methods; introduction to numerical methods. (Same as Materials Science and Engineering 505.)

507 Application of Linear Algebra in Engineering Systems (3) Fundamental concepts of linear algebra to problems in engineering systems: steady state and dynamic systems. Geometric and algebraic interpretations of relevant concepts: least square problems, LU, QR, and SVD decompositions of system matrix, eigenvalue problems, and similarity transformations in solving difference and differential equations; numerical stability aspects of various algorithms; application of linear algebra concepts in control and optimization studies; introduction to linear programming, Computer projects. (Same as Biomedical Engineering 507; Electrical and Computer Engineering 507; Industrial Engineering 507; Materials Science and Engineering 507; Mechanical Engineering 507.)

Comment(s): Graduate standing or consent of instructor required.

509 Multidisciplinary Project (1) (See Industrial Engineering 509.)

531 Advanced Chemical Engineering Thermodynamics (3) Phase equilibrium in ideal and non-ideal solution: composition relationship between phases, solution behavior, and application to macromolecules; introduction to microscopic approach to thermodynamics.

(DE) Prerequisite(s): 531.

541 Polymer Rheology (3) (See Materials Science and Engineering 541.)

542 Diffusive and Stagewise Mass Transfer Operations (3) Analysis of mass transfer phenomena, coupled mass transfer and reaction, mass transfer operations in packed towers and agitated vessels, membrane separations. Equilibrium stage concepts applied to mass transfer operation, emphasizing nonequivalence and subsystem. Operations and mass transport processes, and prediction of transport parameters.

547 Transport Phenomena I (3) Unified treatment of momentum transport (fluid flow), energy transport (heat conduction, convection, and radiation), and mass transport (diffusion). Fundamental basis of transport phenomena and momentum transport: viscous, viscoelastic, and potential flows.

548 Transport Phenomena II (3) Unified treatment of momentum transport (fluid flow), energy transport (heat conduction, convection, and radiation), and mass transport (diffusion). Energy transport and mass transport in closed and flow systems, interrelationships between transport processes, and prediction of transport parameters.

551 Chemical Reactor Analysis (3) Rate models for heterogeneous reactions, properties of porous catalysts, reactor deactivation, fluid-fluid and fluid-solid reactors.

556 Data Mining in Engineering and Manufacturing (3) (See Industrial Engineering 556.)

Comment(s): Graduate standing or consent of the instructor required.

575 Applied Microbiology and Bioengineering (3) Cross-disciplinary course combining basic concepts in microbiology, biochemistry, reaction kinetics, and biochemical and environmental engineering. Commercial processes, biodegradation/wastewater treatment, analysis of basic bioreactor systems, biosensors, and immobilization methods. (Same as Biosystems Engineering 575; Environmental Engineering 575: Microbiology 575.)

580 Technical Review and Assessment (3) Preparation of critical review of literature in area related to chemical engineering.

Comment(s): Enrollment is limited to students in the non-thesis option.

Registration Permission: Consent of advisor.
581 Green Engineering (3) Principles and practical aspects of the design, commercialization, and use of processes and products that are feasible and economical while minimizing the generation of pollution at the source and risk to human health and environment. (Same as Engineering Science 585; Environmental Engineering 581.)

Comment(s): Graduate standing in engineering or consent of the instructor required.

585 Process System Reliability and Safety (3) (See Nuclear Engineering 585.)

590 Special Topics in Chemical Engineering (3) Repeatability: May be repeated. Maximum 6 hours.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

600 Doctoral Research and Dissertation (3-15) Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May not be used toward degree requirements.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

505 Special Problems (3) Specially assigned theoretical or experimental work on problems not covered in other courses. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. RegistrationPermission: Consent of department.

510 Analytical Spectrometry (3) Principles and practice of optical and mass spectrometric techniques in quantitative chemical analysis. (DE) Prerequisite(s): 2 semesters of physical chemistry.

511 Analytical Separations (3) Principles and practice of chemical separations based on extraction, chromatographic, and electrophoretic phenomena. (DE) Prerequisite(s): 2 semesters of physical chemistry.

512 Electroanalytical Chemistry (3) Fundamentals of electrode processes; principles and practice of electroanalytical techniques in quantitative chemical analysis and applied to study of chemical systems. (DE) Prerequisite(s): 2 semesters of physical chemistry.

530 Chemical Bonding (3) Wave mechanical atom, group theory, quantum approach to molecular orbital theory, covalent, ionic, and metallic bonding, ligand field theories, solid state. (DE) Prerequisite(s): 1 semester of inorganic chemistry.

531 Characteristics of Inorganic Compounds (3) Descriptive chemistry of elements, structure, reactions, mechanisms, equilibria, and spectra of coordination, organometallic, bioinorganic compounds. (DE) Prerequisite(s): 1 semester of inorganic chemistry.

532 Experimental Methods of Inorganic Chemistry (3) Electronic, infrared, Raman, microwave, NMR, ESR, nuclear quadrupole, Mossbauer, mass, and photoelectron spectroscopies for characterization of inorganic compounds. (DE) Prerequisite(s): 1 semester of inorganic chemistry.

533 Chemistry of the Transition Metals (3) Theoretical and experimental foundations of modern coordination, organometallic, and bioinorganic chemistry of transition metals; transition metal mediated catalysis, materials chemistry, isolobal theory, kinetics and mechanism of reactions of transition metals, and applications in organic synthesis. (DE) Prerequisite(s): 1 semester of inorganic chemistry.

552 Organic Reaction Mechanisms (3) Techniques and principles in study of organic reaction mechanisms; applications and interpretations in polar, radical, and pericyclic reactions; reactive intermediates. (DE) Prerequisite(s): 550.

553 Spectroscopic Characterization of Organic Compounds (2) Organic structure elucidation using spectroscopic methods; nuclear magnetic resonance, infrared, ultraviolet and mass spectrometry. (DE) Prerequisite(s): 2 semesters of organic chemistry.

554 Organic Spectroscopy Laboratory (1) Use of IR, UV, MS and multinuclear FTNMR spectrometers. Development of problem-solving ability in area of spectroscopic characterization of organic molecules. (DE) Prerequisite(s): 360 or equivalent. (DE) Corequisite(s): 553.

570 Quantum Chemistry and Spectroscopy (3) Basic principles of quantum mechanics and their applications to molecular orbital theory, molecular structure, and spectroscopy; introduction to group theory. (DE) Prerequisite(s): 2 semesters of physical chemistry.

571 Advanced Quantum Chemistry and Spectroscopy (3) (DE) Prerequisite(s): 570 or consent of instructor.

572 Thermodynamics and Statistical Mechanics (3) Macroscopic and microscopic description of equilibrium systems. Basic principles of thermodynamics and statistical mechanics, and application to selected chemical systems. (DE) Prerequisite(s): 2 semesters of physical chemistry.

573 Chemical Kinetics and Transport (3) Time-dependent phenomena in chemistry: chemical kinetics, chemical dynamics, transport theory. (DE) Prerequisite(s): 2 semesters of physical chemistry.
590 Polymer Chemistry (3) Fundamentals of polymer synthesis and characterization through application of organic and physical chemical principles.

595 Physical Chemistry of Polymers (3) Conformation of macromolecules, solution and bulk properties, rubber elasticity, kinetics of polymerization, polymer thermodynamics.

600 Doctoral Research and Dissertation (3-15)

601 Chemistry Research Proposal (2) Preparation and oral defense of original written research proposal based on thorough survey of chemical literature.

610 Selected Topics in Analytical Chemistry (3) Topics of current significance.

630 Selected Topics in Inorganic Chemistry (3) Topics of current significance.

650 Selected Topics in Organic Chemistry (3) Topics of current significance.

670 Selected Topics in Physical Chemistry (3) Topics of current significance.

690 Selected Topics in Polymer Chemistry (3) Topics of current significance.

691 Selected Topics in Thermal Analysis of Polymeric Materials (3) Topics of current significance.

500 Thesis (1-15)

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

505 Development of Interpersonal and Supervision Skills (3) Refinement of interpersonal skills needed to work with families and other professionals. Supervisory training in others’ skill development, active listening, self-disclosure, relationship building, and negotiation. Skills adapted for use among family members.

510 Theory in Human Development (3) Theoretical models of human development: cognitive, social learning, and ecological theory; analysis, synthesis, and discussion of historical and contemporary relevance of models; application of theory to research, prevention, intervention, and education; critical reading and evaluation of theory-based research on human developmental processes.

511 Survey of Research in Child Development (3) Survey of human development research from conception through adolescence. Classic and contemporary empirical literature in domains of physical, cognitive, language, social, emotional, and moral development; biological basis of development; cross-cultural perspectives.

515 Children in Contemporary Society (3) Theory and research on environmental and developmental issues in contemporary family situations and educational environments for children from infancy through middle childhood. Implications for programs and policy.

522 Naturalistic Interventions for Parents and Teachers of Young Children (3) Common problems faced by parents and teachers; methods available to modify problem behavior.

525 Seminar on Play (3) Comparison and contrast of theoretical frameworks and research methodologies on play. Developmental perspective on play.

530 Families of Children with Disabilities (3) Developmental nature of families’ experiences in caring for handicapped children, especially during infancy and early childhood.

545 Family Resource Management and Instruction (3) Design and implementation of family resource management curriculum for family life education audiences based on theory and application of managerial functioning in family settings; analysis of goals, resource use. Information systems, constraints within families. Observation and analysis of diverse family practices.

550 Theory and Research in Family Studies (3) Research in various major topics in family studies and application of theoretical models to understanding research.

552 Diversity in Children and Families (3) Diversity in family configurations in contemporary U.S. society. Variations of family patterns by race, ethnicity, religion, and social class; social dynamics of family formation, composition, and patterning.

560 Human Sexuality (3) Theory, research, and family life education practice related to study of human sexuality: individual, relational, cognitive, emotional, biological, and developmental issues of human sexuality.

562 Families and Children Coping with Stress (3) Processes used by children and families during times of stress. Theoretical contributions to study of impact of developmental stressors and catastrophes on children and families.

563 Family Life Education Programs (3) Planning, implementing and evaluating programs in marital, parent-child, and family relationships, and parenthood education.

564 Practicum in Human Development or Family Studies I (3) School and community programs concerned with education for human development and family living.

565 Practicum in Human Development or Family Studies II (3) School and community programs concerned with education for human development and family living. Committee approved and supervised written project.

566 Approaches to Family Intervention and Counseling (3) Various theoretical approaches for family intervention and counseling. Structural, systemic, experiential and social learning schools of practice. Effects of intervention from perspective of their impact on family functioning and communication. (Same as Counselor Education 566.)

567 Family Violence (3) Theory and research on initiation, maintenance and cessation of violent behaviors in intimate family contexts, and assessment of responses to violent family behaviors, perpetrators, victims, and family systems.

569 Action Research in Early Childhood Education (3) Principles and methodologies of action research for practitioners in early childhood and school settings.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Urban Systems: Engineering and Management (3) Various urban systems usually under responsibility of city manager and/or city engineer: streets, lighting, water, sewerage, refuse collection. Personnel management, finance, planning and public relations.
Comment(s): Graduate standing or consent of instructor required.

521 Pavement Design (3) Empirical and theoretical based methods of pavement design and analysis, strengthening existing pavements, pavement distress and economical design alternatives.
(DE) Prerequisite(s): 321 and 330.

522 Mix Design for Asphaltic and Portland-Cement Concrete (3) Aggregate properties and tests, asphalt binder properties and tests, mix design methods for asphaltic mixtures, hot-mix asphalt (HMA) mixture production and construction, Portland-cement concrete (PCC) mix design, additives and admixtures for PCC, special types of PCC, PCC production and construction.
(DE) Prerequisite(s): 321.

525 Pavement Materials Characterization (3) Material modeling, laboratory study and characterization of unbound granular, stabilized base, hot-mix asphalt mixtures, Portland cement concrete, and other paving materials; performance prediction for flexible and rigid pavements.
(DE) Prerequisite(s): 321 and 330.

(DE) Prerequisite(s): 330.

531 Soil Stabilization (3) Mechanical stabilization of soils by compaction, drainage, and blending; chemical stabilization of soils with admixtures, waterproofing and modifying soils and admixtures. Reinforced earth and stabilization with geosynthetics.
(DE) Prerequisite(s): 330.

532 Rock Mechanics and Rock Engineering (3) Engineering properties and characterization of rock and rock masses. Discontinuity analysis, stress and strain, key block theory. Applications to rock slopes, underground excavations, foundations and groundwater flow.
(DE) Prerequisite(s): 330 or consent of instructor.

533 Advanced Laboratory and In situ Testing of Soil (3) Instruments for measurement of electrical signals, static and dynamic transducers, data acquisition and control, in situ measurement of stress, pore pressure, deformation, load deformation behavior (seismic methods, static methods), advanced laboratory shear strength and compressibility testing.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): 330.

(DE) Prerequisite(s): 435.

538 Finite Element Applications in Geotechnical Engineering (3) Application of finite element method to typical problems in geotechnical engineering. Confined and unconfined flow through porous media; two-dimensional stresses in cohesive soil; two-dimensional elements; representation of nonlinear soil behavior with elastic and elastic-plastic models. Taught concurrently with 561.
Credit Restriction: Students may not receive credit for both 538 and 561.
(DE) Prerequisite(s): Coursework in soil behavior and matrix computation.

539 Geotechnology Seminar (1) Seminar topics in geotechnical and geological engineering. Research contributions and case histories by graduate students and engineers and scientists from surrounding community.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Comment(s): Enrollment limited to students with graduate standing.
Registration Permission: Consent of advisor.

540 Construction Management I (3) Management and organization of heavy and building construction projects.
(DE) Prerequisite(s): 442.

541 Construction Management II (3) Management organization of heavy and building construction projects.
(DE) Prerequisite(s): 442.

543 Construction Estimating (3) Project costs, estimating and takeoff techniques, market cost conditions, and feasibility of design to cost.
(DE) Prerequisite(s): 442.

550 Transportation Seminar (1) Seminar topics in transportation engineering. Research contributions and case histories by graduate students and engineers and scientists from the professional community.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 10 hours.
Comment(s): Minimum student level – senior.
Registration Permission: Consent of instructor.

551 Traffic Engineering: Characteristics (3) Characteristics of human, vehicle, and roadway in transportation system; microscopic and macroscopic traffic models; elements of transportation/highway safety.
(DE) Prerequisite(s): 352.

552 Traffic Engineering: Operations (3) Operation and management of the surface transportation system including freeways and arterials; traffic control systems including traffic signal design and operation; traffic control devices including signing and markings.
(DE) Prerequisite(s): 551.

553 Geometric Design and Layout of Roadways and Community Facilities (3) Functional and geometric design and rural and urban roads of all classes; subdivision layout; configuration of urban roads of all classes; techniques for access control; freeway interchanges and street intersections; and parking.
(DE) Prerequisite(s): 451 or consent of instructor.

556 Traffic Accident Reconstruction (3) Data collection and analysis as basis for accident prevention on control programs; roadside hardware design and crash testing.
(DE) Prerequisite(s): 452 or graduate standing.

557 Transportation Planning and Operations with Micro-Computer Applications (3) Hands-on laboratory and field experiences in computer and information technology for modeling and analysis of transportation problems.
Contact Hour Distribution: Lecture and lab.
(DE) Prerequisite(s): 551.

558 Planning and Transportation (3) Preparation of transportation as elements of comprehensive development plans. Analysis of relationship between various transportation modes and between transportation and community features. Use of planning process to establish existing travel patterns, modeling of demand, proposing alternatives and evaluation. (Same as Political Science 555.)
Comment(s): Enrollment limited to students with graduate standing.

559 Intermodal Transportation (3) Technical and institutional aspects of intermodal transportation system for passengers and freight providing intercity and urban service; characteristics of individual modes and strategies for their coordination; functional design and operation of transportation terminals including seaports and air cargo terminals; safety and security issues.
Comment(s): Minimum student level – senior.

561 Finite Element Applications in Structural Engineering (3) Application of finite element method to typical problems in structural engineering. Truss, beam and plate elements; two-dimensional stress and strain; two-dimensional elements; representation of nonlinear material behavior with elastic and plastic models. Taught concurrently with 538.
Credit Restriction: Students may not receive credit for both 561 and 538.
(DE) Prerequisite(s): Structural analysis and matrix computation course.

562 Structural Systems (3) Structural system analysis and design; dead, live, wind, and earthquake loads on buildings; vertical and lateral load resisting systems; use of computers in analysis and design.
(DE) Prerequisite(s): 471.
565 Structural Dynamics (3) Analysis of free and forced vibrations, and transient response of structures having many degrees of freedom; elastoplastic behavior considered for structural systems; earthquake design and response of structures. (DE) Prerequisite(s): 471.

571 Behavior of Steel Structures (3) Behavior of structural steel members due to static and fatigue loading; relation between research results and current specifications for design. (DE) Prerequisite(s): 471.

572 Fracture Analysis (3) (See Geology 572.)

573 Prestressed Concrete (3) Properties of prestressing materials; methods of pretensioning and posttensioning; analysis and design of simple and continuous beams and slabs. (DE) Prerequisite(s): 471.

574 Behavior of Reinforced Concrete Members (3) Moment-curvature and load-deflection relationships for reinforced concrete beams; combined bending and axial load; shear and torsion; relation between research results and specifications for design. (DE) Prerequisite(s): 471.

576 Masonry Design (3) Clay and concrete masonry materials; unreinforced masonry design; reinforced masonry design; seismic behavior of masonry structures. (DE) Prerequisite(s): 471.

580 Risk Analysis in Civil and Environmental Engineering (3) Applications of probability theory and statistics in civil engineering disciplines: structures, geotechnology, water resources, transportation, and environmental engineering. (DE) Prerequisite(s): Calculus II or consent of instructor.

590 Special Problems in Civil Engineering (3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to students in non-thesis option only.

595 Special Topics (1-4) Problems and topics related to current developments in field.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

631 Soil Dynamics (3) Introductory and advanced topics: vibrations of elementary systems, foundations subjected to repeated and impulse loading, wave propagation theory and applications, and site response to dynamic loading. (DE) Prerequisite(s): 435.

651 Analysis Techniques for Transportation Systems I (3) Topics on mathematical, statistical, operations research, or computer science techniques that may be applied to modeling and analysis of transportation systems. Registration Permission: Consent of instructor.

652 Analysis Techniques for Transportation Systems II (3) Advanced topics of application of mathematical, statistical and computer science techniques in modeling and analysis of transportation systems. (DE) Prerequisite(s): 651.

671 Behavior of Steel Bridges and Buildings (3) Behavior, analysis and design of plate girders, columns, and composite members subjected to static and dynamic loading. (DE) Prerequisite(s): 571.

674 Behavior of Reinforced Concrete Beams and Slabs (3) Strength and behavior of statically indeterminate reinforced concrete beams and frames; limit analysis; behavior, analysis, and design of reinforced concrete slabs: yield-line theory, finite element solutions, and ACI Code Method. (DE) Prerequisite(s): 574.

680 Reliability of Constructed Systems (3) Development of safety factors and probability based design codes; Monte Carlo methods; constructed system reliability; evaluation of existing infrastructures. (DE) Prerequisite(s): 580 or consent of instructor.

691 Special Topics in Civil Engineering (3) Selected advanced problems of current interest.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

Classics (257)

401 Greek Poetry (3) Epic, lyric, drama. Authors vary. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 261.

402 Greek Prose (3) History, philosophy, and oratory. Authors vary. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 261.

405 Selected Readings from Greek Literature (3) For advanced students in Greek, the study of plays, historical writings, the poetry of ancient Greece in the original Greek. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 401 and 402 or consent of instructor.

406 Selected Readings from Greek Literature (3) For advanced students in Greek, the study of plays, historical writings, the poetry of ancient Greece in the original Greek. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 401 and 402 or consent of instructor.

414 Cicero and Techniques of Latin Prose Composition (3) For advanced students in Latin. Practice in prose composition, the writings of Cicero the model. (DE) Prerequisite(s): 351 and 352 or consent of instructor.

431 Selected Readings from Latin Literature (3) For advanced students in Latin. Oratory, historical writings, poetry of ancient Rome in the original Latin. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 351 and 352 or consent of instructor.

432 Selected Readings from Latin Literature (3) For advanced students in Latin. Oratory, historical writings, poetry of ancient Rome in the original Latin. Repeatability: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): 351 and 352 or consent of instructor.

435 Medieval Latin (3) Selected readings from the Latin prose and poetry of medieval Europe. Registration Permission: Consent of instructor.

436 Cities and Sanctuaries of the Greek and Roman World (3) Major cities and sanctuaries in Greece, the Greek colonies, and the Roman Empire. Approach is archaeological, focusing on physical evidence – landscape, architecture and artifacts – as well as description of ancient authors. Cities include various types: planned and unplanned, seaports, caravan centers, government and commercial centers. The sanctuaries also vary in function including prophetic centers, athletic centers, theater centers, and healing centers. (Same as Anthropology 436.)

441 Special Topics in Classical Civilization (3) Topics in art, literature, religion, and society of Greece and Rome. Repeatability: May be repeated with consent of department. Maximum 9 hours.

442 Intensive Survey of the Archaeology of the Prehistoric Aegean (3) Survey of archaeology and art of the Aegean from the earliest human to the rise of the Greek polis in the 8th century BC. Highlights include Early Cycladic art, Minoan and Mycenaean complex societies, Thera, cultural interconnections with Egypt and the Near East, and the Trojan War. Emphasis on archaeological and modern art historical approaches. (Same as Anthropology 442.)

443 Intensive Survey of the Archaeology of Greece (3) Survey of the archaeology and art of Greece and the Greek-speaking areas from the Orientalizing through Hellenistic periods (c. 700–30 BC). Developments in architecture, sculpture, and vase painting seen in the context of changes in society. Archaeological evidence for daily life, economy, and political institutions. (Same as Anthropology 443.)

444 Intensive Survey of the Archaeology of Etruria and Rome (3) Survey of the archaeology of Italy and the Roman world from prehistoric times to the fall of the Roman Empire (1000 BC–AD 476). Highlights are the rise and decline of Etruscan culture, the development of Roman architecture, art, and urban planning, art and architecture used for political propaganda, and Roman cosmopolitan culture during the Empire. (Same as Anthropology 444.)

562 Special Topics in Mediterranean Archaeology (3) Selected topics in archaeology or art of the prehistoric Aegean, historic Greece or Rome. Lectures, discussions, student presentations, and papers. (Same as Anthropology 562.)
Repeatability: May be repeated. Maximum 9 hours.

565 Graduate Seminar in Ancient Mediterranean Civilization (3) Theoretical and practical issues in the civilizations of the prehistoric Aegean or historic Greece. Study and discussions conducted in seminar format. Emphasis on developing students' skills in research and oral as well as written presentation. (Same as Anthropology 565.)
Repeatability: May be repeated. Maximum 15 hours.
591 Foreign Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

Communication and Information (248)  
501 Orientation to Graduate Study (1) Overview of the communication and information discipline. Orientation to resources needed for successful graduate study.
Grading Restriction: Satisfactory/No Credit grading only.
Comment(s): Enrollment limited to students admitted to the program.

540 Communication Theory (3) Overview of theory-building process and theories in communication.
Comment(s): Enrollment is limited to students admitted to the program or by consent of the instructor.

560 Special Topics in Communication Studies (3) Contemporary Topics.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

580 Survey of Public Communication (3) Identifies and addresses theories and research in public discourse.

590 Project (3) Capstone project under guidance of faculty. Application of principles from previous coursework.
Grading Restriction: Satisfactory/No Credit grading only.

591 Foreign Study (1-15) Independent study outside U.S. Prior to departure student must have plan of study approved by department head and supervising faculty member. Credit given only upon fulfilling all requirements set by department.
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study/Internship (1-6) Independent study outside traditional classroom setting; community involvement and/or work experiences. Credit given only upon fulfilling all requirements set by department.
Repeatability: May be repeated. Maximum 6 hours.

593 Independent Study (1-6) Independent study by individual under direction of faculty member.
Comment(s): Approval of faculty member and department must be obtained prior to registration.

Comparative and Experimental Medicine – Graduate School of Medicine (262)  
Participating departments include Anesthesia, Medicine, Medical Genetics, Obstetrics and Gynecology, Pathology, Pediatrics, Radiology, and Surgery.

500 Thesis (1-15)  
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 15 hours.

508 Graduate Research Participation (3) Advanced research techniques while conducting individual biomedical research projects under supervision of faculty.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
Comment(s): Open to all graduate students.
Registration Permission: Consent of instructor.

541 Cellular and Molecular Basis of Disease (4) Disease at molecular level. Changes in molecular events in cells that lead to disease and occur as result of disease. Correlation with clinical and pathological states.
(DE) Prerequisite(s): Biochemistry and Cellular and Molecular Biology 410 and 419.

600 Doctoral Research and Dissertation (3-15)  
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Journal Club in Comparative and Experimental Medicine (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

610 Medical Biology Seminar (1) Invited speakers. Topics posted in advance.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.

611 Advanced Topics in Medical Science (1-3) New developments in biological research applicable to clinical medicine.
Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Primarily for doctoral candidates in comparative and experimental medicine.
Registration Permission: Consent of instructor.
Comparative and Experimental Medicine – Veterinary Medicine (261)
Participating departments include Animal Science, Comparative Medicine, Microbiology, Pathology, Large Animal Clinical Sciences, and Small Animal Clinical Sciences. Several faculty in the Department of Microbiology hold joint appointments in the College of Veterinary Medicine. See Microbiology for additional courses.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Special Topics in Comparative and Experimental Medicine (1-6)
Specialized experience in comparative and experimental medicine.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Predictive Toxicology (3)
Principles and techniques of predictive toxicity: structure-activity relationships, expert systems, neural nets, and molecular similarity.

505 Laboratory Animal Care and Use (2)
Review of basic laboratory animal care and use as prerequisite to conducting research using animal subjects. Compliance issues and techniques.

506 Experimental Animal Surgery (3)
Competence in performing humane surgical modifications of experimental animals. Techniques of anesthesia. Drug administration and postoperative care.
Contact Hour Distribution: 1 hour and 2 labs.
(DE) Prerequisite(s): Coursework in embryology, parasitology, and physiology and/or consent of instructor.

530 Wildlife Diseases (2) (See Wildlife and Fisheries Science 530.)

561 Pharmacology (4)
Principles of pharmacokinetics and pharmacodynamics properties of drugs: mode of action, pharmacologic effects, chemical and physical properties, metabolism, toxicities, important idiosyncrasies, and clinical applications.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

602 Surgical Pathology (1-2)
Examination of biopsy specimens and interpretation of observations. Preparation of specimens for sectioning.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

603 Correlative Post-Mortem Pathology (1-3)
Gross and microscopic post-mortem examination of animals. Correlative interpretation of clinical diseases and lesions.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

604 Veterinary Pathology Seminar (1)
Microscopic slides and transparency of lesions from cases examined by pathologists, residents, and graduate students. Interpretation of observations.
Repeatability: May be repeated. Maximum 4 hours.
Registration Permission: Consent of instructor.

605 Pathobiology Seminar (1)
Subjects of current interest in biomedical science. Students present one seminar per term enrolled.
Contact Hour Distribution: Class meets once monthly.
Repeatability: May be repeated. Maximum 4 hours.

606 Clinical Epidemiology (3)
Theory and principles of design implementation and analysis of clinical research. Lab: appraisal of biomedical literature and design of proposal for clinical research project.
Registration Permission: Consent of instructor.

607 Diagnosis and Pathogenesis of Virus Diseases of Domestic Animals (3)
Advanced study of virus diseases important to domestic animals: virus biology, pathogenesis, pathology and diagnosis. Technical training in virus diseases diagnosis.
Contact Hour Distribution: 2 hours and 1 lab.
Registration Permission: Consent of instructor.

608 Descriptive and Applied Epidemiology (3)
Principles of epidemiology as well as historic and modern applications to human and animal diseases. Host-agent relationships, measurement of disease frequency, disease monitoring and control in human and animal populations, field investigations, animal health economics and production.
Registration Permission: Consent of instructor.

609 Mechanisms of Disease (4)
Advanced topics in pathobiology and mechanisms of disease: pathophysiology, cellular degeneration, inflammation, immunopathology, hemo-transfer. Principal biochemical and morphologic responses of various cells, tissues, and organs to injury and other metabolic derangements. Selected contemporary topics from current literature and textbooks.
Registration Permission: Consent of instructor.

610 Advanced Topics in Comparative and Experimental Medicine (1-3)
Specialized in-depth experience in various disciplines. Current and future research methodology, recent advanced in instrumentation in analytical techniques for comparative medicine.
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

611 Journal Club in Emerging Infectious Diseases (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

612 Journal Club in Pathobiology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

613 Journal Club in Large Animal Clinical Sciences (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

614 Journal Club in Small Animal Clinical Sciences (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

651 Advanced Topics in Animal Anatomy (1-4) (See Animal Science 651.)

652 Disorders of the Endocrine System (2) (See Animal Science 652.)

Comparative Literature (260)

401 Special Topics in Comparative Literature (3)
Repeatability: May be repeated. Maximum 9 hours.

402 Special Topics in Comparative Literature (3) Content varies.
Repeatability: May be repeated. Maximum 9 hours.

452 Modern Drama, 1880-1945 (3) (See English 452.)

454 Twentieth-Century International Novel (3) (See English 454.)

510 Special Topics (3)
Repeatability: May be repeated. Maximum 6 hours.

Computer Science (266)

420 Advanced Topics in Machine Intelligence (3)
Topics such as search, learning, expert systems, neural networks, pattern recognition, and natural language processing. Emphasis on faculty research.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Coursework in current literature.

430 Advanced Topics in Hardware Systems (3)
Topics such as architecture, parallel processors, microprogramming, networks, and communications. Emphasis on faculty research.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Coursework in current literature.

460 Advanced Topics in Software Systems (3) Topics such as operating systems, compilers, parallel computation, software engineering, database systems, and programming languages. Emphasis on faculty research.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Coursework in current literature.

470 Advanced Topics in Scientific Computation (3)
Topics such as numerical methods, supercomputers and computer modeling and simulation of physical systems. Emphasis on faculty research.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Coursework in current literature.

471 Numerical Analysis (3) (See Mathematics 471.)

472 Numerical Algebra (3) (See Mathematics 472.)

480 Advanced Topics in Theoretical Computer Science (3) Topics such as theory of computation, complexity theory, formal languages and graph theory and its applications. Emphasis on faculty research.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Coursework in current literature.

555 Practicum in Counseling (3) Supervised practice and application of counseling skills with individual clients. (Same as Psychology 569.)
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 431, 525, and 551.
Comment(s): Admission to program is required.
Registration Permission: Consent of instructor.

556 Orientation to Mental Health Counseling (3) Mental health counseling as profession: professional organizations, work settings, code of ethics, certification requirements, and role identity.

558 Internship in School Counseling (1-6) Supervised post-practicum employment at academic unit approved site.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 555.
Registration Permission: Consent of instructor.

559 Internship in Mental Health Counseling (1-6) Supervised post-practicum employment at academic unit approved human services agency.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 555.
Comment(s): Admission to mental health counseling program required.
Registration Permission: Consent of instructor.

560 Introduction to Qualitative Research in Education (3) Fundamentals of qualitative research methods and development of skills needed for qualitative research proposals. Overview of qualitative research methods: ethnography, case study, historiography, biography, oral and life history. Critical reading and evaluation of qualitative research studies.
(DE) Prerequisite(s): 560 or equivalent.
Comment(s): Requires admission to PhD program or consent of instructor.

561 Development and Operation of School Counseling Programs (3) Management of comprehensive school counseling programs to include needs assessment, program goals, resource identification, evaluations, and use of computer-based program management software.
(DE) Prerequisite(s): 550.

562 Directed Research (1-15) Independent study under the direction of an instructor.
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

563 Ethical, Legal, and Professional Issues in Psychology (3) (Same as Psychology 567.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 555 or consent of instructor.

564 Seminar in Gerontology (1) (See Health 585.)

565 Seminar in Gerontology (1) (See Health 585.)

566 Seminar in Gerontology (1) (See Health 585.)

567 Seminar in Gerontology (1) (See Health 585.)

568 Seminar in Gerontology (1) (See Health 585.)

569 Seminar in Gerontology (1) (See Health 585.)

570 Cross-Cultural Counseling: Theory and Research (3) Theory and research on issues and problems in counseling of clients from different cultural backgrounds in U.S. and abroad. (Same as Psychology 574.)

572 History of Women's Education (3) Historical study of the institutions and philosophies of education that have shaped the education of girls and women in the United States. (Same as Women's Studies 512.)

573 Ethical, Legal, and Professional Issues in Psychology (3) (Same as Psychology 567.)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

574 Survey of Contemporary Philosophies in Education (3) Current debates within various philosophical fields of study related to education.

575 Educational Sociology (3) Sociological analysis of American education system. Controversial social issues that affect educational system and potential solutions offered by various programs.
Comment(s): Open to juniors, seniors, and graduate students.

576 Theory and Practice of Counseling Supervision and Consultation (3) Theory of counseling supervision and consultation, supervision of entry-level counselors, and agency consultation.
Comment(s): Requires admission to PhD program or consent of instructor.

577 Practicum in Counselor Education (3) Supervised practice and application of counseling skills with clients.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Admission to counselor education program required.
Registration Permission: Consent of instructor.

578 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

579 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

580 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

581 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

582 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

583 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

584 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordinations.

585 Seminar in Gerontology (1) (See Health 585.)

586 Seminar in Gerontology (1) (See Health 585.)

587 Seminar in Gerontology (1) (See Health 585.)

588 Seminar in Gerontology (1) (See Health 585.)

589 Seminar in Gerontology (1) (See Health 585.)

590 Cultural Studies Seminar (2) Two-semester sequence (fall and spring) focusing discussion about cultural studies: popular culture, inter-disciplinary work, social justice issues. Presentations, videos, readings.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 4 hours.
Curriculum, Educational Research, and Evaluation (256)

520 Techniques of Research in Education (3) Study and application.

532 Instructional Research: Analysis and Application (3) Analysis of research on instruction. Translation and application of research findings into instructional performance.

534 Program Evaluation in Education (3) Issues and practices in planning and conducting program and curriculum evaluation in variety of settings. Fundamentals of design, measurement, philosophy, ethics, and underlying values; proper role and use of evaluation in educational organizations. (Same as Educational Administration 534; Higher Education Administration 534.)

Registration Permission: Consent of instructor.

541 The High School Curriculum (3) Identification of problems associated with curriculum study, Tennessee curriculum framework, assessment of trends in programs of local, regional, and national significance.

552 School Law for Educators (3) Case and statutory material for public school educators; problems concerning law and public education.

557 The Junior High and Middle School Curriculum (3) Curriculum and instructional design for junior high and middle school. Characteristics of students, curriculum designs, instructional patterns, and organization and structure of junior high and middle school.

558 Curriculum Planning and Development (3) Foundations and principles of curriculum planning and development. Historical analysis of curriculum theory, principles of planning and development, and classroom applications for improved learning.

560 Student Assessment (3) Processes for assessing and reporting student progress; interpretation and use of available assessment data. Methods of assessment other than tests and measurements: portfolios, performance tasks, exhibitions.

580 Techniques for Research in Curriculum and Instruction (3) Fundamentals of research methodology applicable to curriculum, instruction, and other areas of educational inquiry. Critical reading of research and development of skills needed for proposal development.

588 Instructional Theory and Design (3) Relationship of curriculum to instruction; examination of instructional and related learning theories; instructional models and teaching styles.

604 Seminar in Curriculum and Instruction (1) Required two consecutive semesters.

623 Using Research for Curriculum Improvement (3) Research methodology; application to descriptive/survey curricular materials. Critical reading of research, methodological development in descriptive and survey areas.

630 Seminar in Assessment and Evaluation (3) Trends and issues in student/individual assessment, personnel evaluation, and program evaluation; and examination of current state, regional, and national assessment and evaluation projects.

Registration Permission: Consent of instructor.

631 Application of Assessment/Evaluation (3) Systems designs, instruments, procedures, reporting formats used in personnel and program evaluation and student assessment; analysis, synthesis, and interpretation of data sets. (DE) Prerequisite(s): 630.

672 Interpretation and Application of Curriculum and Instruction Research (3) Analysis of research in curriculum and instruction, newer methodologies and strategies. Utilization of research to improve curriculum and instruction practice, application of research principles in context of specific professional assignments.

Registration Permission: Consent of instructor.

674 Designing and Implementing Personnel Assessments (3) Models and methods for assessing performance of educators and other professionals. Critique of systems currently in use and design of evaluation system.

675 Curriculum Evaluation: Theory and Application (3) Evaluation trends and issues. Theoretical frameworks to design evaluation studies for various educational programs.

676 Curriculum Theory (3) Influential curriculum theories and approaches, implications for structure and design of educational programs. Nature and function of theory; theory building activities. (DE) Prerequisite(s): 580.

Dance (274)

415 Teaching Creative Dance for Children (2) Theory, methods, materials, and practical experience in presentation and integration of creative dance in grades K-6. A mini-teaching experience is involved in this class.

480 Dance History through the 19th Century (3) Survey of the dance of various societies and cultures from pre-history through the 19th century.

490 Dance in the 20th Century (3) Survey of the history and philosophy of dance in the 20th century.

495 Dance Pedagogy (3) Principles and methods of teaching dance with practical application in a mini-teaching experience. Different level of performance is expected of those registered for graduate credit.

Comment(s): Prerequisites as announced.

510 Ballet: Level IV (2) Instruction and practice in advanced classical ballet techniques.

Registration Permission: Consent of instructor.

520 Jazz: Level IV (2) Instruction and practice in advanced jazz styles and techniques.

Registration Permission: Consent of instructor.

530 Modern: Level IV (2) Instruction and practice in advanced modern dance techniques.

Registration Permission: Consent of instructor.

550 Dance Composition IV (3) Independent study applying choreographic and production skills, culminating in presentation of two works. (DE) Prerequisite(s): 440 and 445 or consent of instructor.

593 Independent Study (1-3) Grading Restriction(s): Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 12 hours.

Ecology and Evolutionary Biology (278)

410 Plant Evolutionary Morphology (4) Morphology, development, natural history, and evolution of fungi, cyanobacteria, non-vascular plants (algae and bryophytes), and vascular plants (ferns, fern allies, gymnosperms, and flowering plants). (DE) Prerequisite(s): Biology 102 or 110 or 130.

411 Minicourse in Ecology and Evolutionary Biology (2) Selected advanced topics in ecology, behavior, and evolutionary biology, concentrated in time and subject matter. Consult departmental listing for topics offered.

Repeatability: May be repeated. Maximum 4 hours. Credit Restriction(s): Maximum 4 hours may be applied toward departmental major.

Comment(s): Prerequisites as announced.
412 Minicourse in Ecology and Evolutionary Biology (2) Selected advanced topics in ecology, behavior, and evolutionary biology, concentrated in time and subject matter. Consult departmental listing for topics offered. 
Registration Restriction: May be repeated. Maximum 4 hours.
Credit Restriction(s): Maximum 4 hours may be applied toward departmental major.
Comment(s): Prerequisites as announced.

414 Plant Anatomy (3) Cells, tissues and organs, their development in vegetative and reproductive structures of vascular plants – emphasis on seed plants.
(DE) Prerequisite(s): Biology 111 and 112 or Biology 130 and 140.

419 Science as Method (3) The dynamic process of scientific discovery, as opposed to a static body of knowledge. Basic principles will be compared. Introduction to the scientific method, implications for education, and critical analysis of scientific inference. 
Registration Restriction: Satisfactory/No Credit grading only. 
Credit Restriction: May not be used toward degree requirements.

421 Community Ecology (3) Interactions between individuals, species, communities, and environments – including competition, coexistence, predation, herbivory; causes and consequences of biological diversity; biological invasions; application of advanced sampling and analysis techniques; local to global environmental change. Includes periodic field trips or laboratories.
(DE) Prerequisite(s): Biology 250 or equivalent.

423 Plant Ecology (3) Interactions between individuals, species, communities and their environments. Circulation of energy and matter in ecosystems. Includes weekly field trips or laboratory periods and at least two weekend field trips.
(DE) Prerequisite(s): 330 or equivalent.

446 Introduction to Oceanography (4) Basic oceanography: including physical, chemical, geological and biological processes and patterns. Emphasis on oceanic subsystems such as upwellings, polar oceans, hydrothermal vents, gyres, coral reefs, estuaries, and coastal regions. Field trip to coast required.
(DE) Prerequisite(s): General biology and Chemistry 120 and 130. 
Recommended Background: Biology 250.

450 Comparative Animal Behavior (3) Principles and methods of ethology: emphasis on ecological, developmental, physiological, and evolutionary aspects. 
(Same as Psychology 450.)

459 Comparative Animal Behavior Laboratory (3) Introduction to observational and experimental research in ethology. 
(Same as Psychology 459.)
(DE) Corequisite(s): 450.

Contact Hour Distribution: 3 hours and 2 hours lab/discussion.
(DE) Prerequisite(s): Biology 240 or consent of instructor.

461 Special Topics in Organismal Biology (3) Evolution, ecology, biogeography, classification, and anatomy of selected animal and plant taxa. 
Repeatability: May be repeated if topic differs. Maximum 12 hours.
(DE) Prerequisite(s): Biology 250 or consent of instructor.

465 Evolutionary and Functional Vertebrate Morphology (4) A detailed study of the structure and function of the vertebrates. Analysis of evolutionary patterns of vertebrates using the comparative method and data from anatomy, developmental biology and functional morphology within a phylogenetic context. Laboratory requires intensive dissection to learn vertebrate anatomy, evolutionary trends and specializations.
Contact Hour Distribution: 2 hours and 2 labs. 
(DE) Prerequisite(s): Biology 250 or consent of instructor. 
Recommended Background: Physics 221.

470 Aquatic Ecology (3) Introduction to the physicochemical nature of inland waters with description of biotic communities and their interrelationships.
Contact Hour Distribution: 2 hours and 1 lab. 
(DE) Prerequisite(s): Chemistry 120 and 130 and Biology 250.

474 Ichthyology (4) Evolution, classification, collection and identification, distribution and biology of fishes with emphasis on freshwater fauna of Eastern North America. 
Contact Hour Distribution: 2 hours and 2 lab. 
(DE) Prerequisite(s): Biology 250 or consent of instructor.

484 Conservation Biology (3) Application of principles and techniques of ecological research to conservation of biological diversity at genetic, population, community, and ecosystem levels. 
(DE) Prerequisite(s): Biology 240 and 250.

500 Thesis (1-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. 
Grading Restriction: Satisfactory/No Credit grading only. 
Credit Restriction: May not be used toward degree requirements.

503 Ecology and Evolutionary Biology Seminar (1) Advanced topics in ecology, behavior, and evolutionary biology. Required of all first-year and second-year graduate students. Senior departmental majors are encouraged to enroll.
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 4 hours.

504 Special Topics (1-3) Selected directed readings or special course in topics of current interest. Consult departmental listing for offerings.
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated with consent of instructor. Maximum 9 hours.

508 Introduction to Faculty Research (1) Orientation of new graduate students to current research of departmental graduate faculty. Required of all first-year students.
Grading Restriction: Satisfactory/No Credit grading only. 
Comment(s): Admission to program in ecology and evolutionary biology required.

509 Foundations: Readings in Ecology (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

511 Foundations: Readings in Evolution (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

512 Foundations: Readings in Conservation Biology (2) Readings and discussion of classic papers in field.

514 Foundations: Readings in Mathematical and Computational Ecology (2) Readings and discussion of classic papers in field.

515 Foundations: Readings in Environmental Toxicology (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

530 Advanced Taxonomy of Flowering Plants (3) Evolution and classification of families of angiosperms, local flora.
Contact Hour Distribution: 2 hours lecture and 1 lab. 
(DE) Prerequisite(s): 330 or equivalent.

535 Ecology and Development in the Amazon (3) Natural history, ecosystem diversity and function, and opportunities for sustainable economic development in the Amazon Basin. Includes a field trip of 1-10 days to Manaus, Brazil.

540 Insect Taxonomy I: Major Orders (3) Survey of classification of major orders of insects, with practical experience in identification of insects at family level.
Contact Hour Distribution: 4 hours combined lecture/lab. 
Registration Permission: Consent of instructor.

541 Insect Taxonomy II: Minor Orders (3) Survey of classification of minor orders of insects, with practical experience in identification of insects at family level.
Contact Hour Distribution: 4 hours combined lecture/lab.
(DE) Prerequisite(s): 540 or consent of instructor.

543 Aquatic Insects (3) Taxonomy and biology of aquatic insects; immature forms.
Contact Hour Distribution: 2 hours and 1 lab. 
(DE) Prerequisite(s): Consent of instructor.

545 Advanced Animal Behavior (3) Second-level course in ethology, stressing evolution, genetics, physiology, ecology, and human behavior. 
(Same as Psychology 545.)
(DE) Prerequisite(s): 450 or equivalent.

546 Ethological Psychology (3) (See Psychology 546.)

547 Conceptual Foundations of Evolution and Behavior (3) (See Psychology 547.)

556 Ice-Age Environments and Global Climate Change (3) Glacial-interglacial climatic cycles and dynamic responses of landscapes within glacial, periglacial, and non-glacial environments across North America over past 2.5 million years. 
(Same as Geology 556.)

557 Quaternary Ecology (3) Perturbation, process, and pattern within Quaternary ecosystems; climatic change and vegetational response during last 2.5 million years. 
(Same as Geology 557.) 
Registration Permission: Consent of instructor.
60 Biometry (3) Statistical applications in biological research.  
(DE) Prerequisite(s): Statistics course or consent of instructor.

561 Environmental Toxicology (3) Basic concepts in toxicology; molecular toxicology and detoxification; reproductive toxicology; mutagenesis, teratogenesis, carcinogenesis, pathologic changes and environmental impact.  
(Same as Biochemistry and Cellular and Molecular Biology 561.)  
(DE) Prerequisite(s): General biology course and knowledge of basic biology and biochemical principles.  

575 Ecological Genetics (3) Genetics of natural populations, using both single-locus and quantitative genetic approaches.  
(DE) Prerequisite(s): Genetics course.

577 Landscape Ecology (3) Ecological structure, function, and change through time of landscape mosaics: quantitative measures of landscape heterogeneity; responses of organisms to changes in landscape heterogeneity.  
(DE) Prerequisite(s): Biology 250 or consent of instructor.

581 Mathematical Ecology (3)  
(Same as Mathematics 581.)

582 Mathematical Ecology (3)  
(Same as Mathematics 582.)

583 Zoogeography (3) Processes determining geographic distribution of animals and distribution and composition of animal communities.  
(DE) Prerequisite(s): Ecology course or consent of instructor.

585 Mathematical Evolutionary Theory (3)  
(Same as Mathematics 583.)

591 Foreign Study (1-15)  
Repeatable: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)  
Repeatable: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)  
Repeatable: May be repeated. Maximum 15 hours.

595 Advanced Evolutionary Ecology (3) Advanced concepts in evolutionary and ecological genetics. Biogeography, climate, population genetics, evolution and natural selection, population growth and regulation, competition, niche, experimental ecology, predation, phylogenetics in ecology, biodiversity, and conservation.  
Credit Restriction: Students cannot receive credit for both 595 and 495.  
(DE) Prerequisite(s): General biology course, general ecology course, coursework in organism biology (ecology, evolution) at the upper-undergraduate level or consent of instructor.

600 Doctoral Research and Dissertation (3-15)  
Grading Restriction: P/NP only.  
Repeatable: May be repeated.

602 Advanced Topics in Ecological Process and Structure (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in ecological process and structure. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

603 Advanced Topics in Evolutionary Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in evolutionary biology. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

606 Advanced Topics in Conservation Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in conservation biology. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

607 Seminar in Ecology and Evolutionary Biology (1) Readings and discussion based on current literature.  
Repeatable: May be repeated. Maximum 12 hours.

609 Advanced Topics in Comparative Animal Behavior (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in animal behavior. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

610 Advanced Topics in Mathematical, Theoretical and Computational Ecology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in mathematical, theoretical, and computational ecology. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

611 Advanced Topics in Organismal Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in organismal biology. Consult departmental listing for offerings.  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

612 Advanced Topics in Environmental Toxicology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in environmental toxicology. Consult departmental listing for offerings.  
(Same as Biochemistry and Cellular and Molecular Biology 612.)  
Repeatable: May be repeated with consent of department. Maximum 9 hours.

662 Seminar in the History of Botany (2) History of botanical exploration and advances from early civilization to modern periods.  
Repeatable: May be repeated. Maximum 4 hours.

681 Advanced Mathematical Ecology (3)  
(Same as Mathematics 681.)

682 Advanced Mathematical Ecology (3)  
(Same as Mathematics 682.)

Economics (283)  

400 Special Topics II (3) Variable topics for advanced students.  
(DE) Prerequisite(s): 311 or 312 and 313.  
Registration Permission: Consent of instructor.

413 Macroeconomics: Business Cycles and Growth (3) Analysis of macroeconomic short-run fluctuations and long-term growth. Coverage will also include the role of monetary and fiscal policy on aggregate output, employment, and interest rates.  
(DE) Prerequisite(s): 313.

421 International Economics (3) Balance of payments, exchange rate determination, monetary and fiscal policies, monetary arrangements, comparative advantage, tariff and non-tariff trade distortions, protection arguments, and regional integration, with analyses based upon intermediate-level economic theory.  
(DE) Prerequisite(s): 311 or 312.

435 Industrial Organization (3) Monopoly and competition in United States economy; interrelationship of market structure, business behavior, and economic performance.  
(DE) Prerequisite(s): 311 or 312.

436 Economics of Health and Health Care (3) Medical care and health status; demand for medical care and insurance; physician and hospital supplies; government provision of services and insurance; regulation of health care markets.  
(DE) Prerequisite(s): 311 or 312.

441 Labor Economics (3) Extension of economic principles to labor markets, public policy questions, demand and supply, theory of wage differentials, unemployment, unions in the private sector, investment in individuals, education and training, mobility.  
(DE) Prerequisite(s): 311 or 312.

463 Environmental Economics (3) Economic foundations for public decision making about environmental resources, utilizing tools from intermediate microeconomic theory. Emphasis on the welfare economic approach for the provision of public goods, with specific emphasis on market failure, externalities, benefit-cost analysis, and methods for valuing environmental resources and human health.  
(DE) Prerequisite(s): 311 or 312.

472 Public Finance: Taxation and Fiscal Federalism (3) Analysis of federal, state, and local government revenue systems, to include individual and corporate income, sales, and property taxes and other tax and non-tax revenue sources. Consideration of current policy issues and relations among various levels of government.  
(DE) Prerequisite(s): 311 or 312.

482 Introduction to Mathematical Economics (3) Application of basic mathematical tools (e.g., calculus, matrix algebra, etc.) to major topics of economic theory.  
(DE) Prerequisite(s): 311 or 312.

500 Thesis (1-15)  
Grading Restriction: P/NP only.  
Repeatable: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatable: May be repeated.  
Credit Restriction: May not be used toward degree requirements.

511 Microeconomic Theory (3) Theory of consumer choice and demand, theory of revealed preference, attributes of goods and implicit prices, market demand, labor supply, individual behavior under uncertainty, theory of firm, theory of production and cost, market structures, demand and factor pricing, introduction to welfare economics, market failure and theory of second best, pure exchange.
512 Microeconomic Theory (3) Theory of consumer choice and demand, theory of revealed preference, attributes of goods and implicit prices, market demand, labor supply, individual behavior under uncertainty, theory of firm, theory of production and cost, market structures, derived demand and factor pricing, introduction to welfare economics, market failure and theory of second best, pure exchange.

513 Macroeconomic Theory (3) Dynamic general equilibrium models, endogenous growth theory, credibility of monetary policy, budget deficits and fiscal policy, consumption, investment, asset pricing, overlapping generations models, real business cycle, search theory, and open-economy macro models.

514 Macroeconomic Theory (3) Dynamic general equilibrium models, endogenous growth theory, credibility of monetary policy, budget deficits and fiscal policy, consumption, investment, asset pricing, overlapping generations models, real business cycle, search theory, and open-economy macro models.

515 History of Economics (3) Purpose and methods of history of economics. Background for and origins, concerns, methods, development and conclusions of classical political economy; From Adam Smith through J.S. Mill and K. Marx. Anticipators of neoclassicism – J. Dupuit and H.H. Gossen.

577 Environmental Economics and Policy Management (3) Interdisciplinary perspective on goals of sustainable economic development and environmental quality. Development of decision-making tools and conflict resolution.

579 Environmental Policy Research Workshop (1) Multidisciplinary analysis of advanced topics in environmental policy. Student participation. Major writing requirement.

582 Elements of Econometrics I (3) Elementary econometric concepts and techniques. Least squares and maximum likelihood estimation, specification and econometric problems, statistical inference, generalized least squares, simultaneous equation models, applications of concepts to economic problems.

583 Elements of Econometrics II (3) Elementary econometric concepts and techniques. Least squares and maximum likelihood estimation, specification and econometric problems, statistical inference, generalized least squares, simultaneous equation models, applications of concepts to economic problems.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

621 International Economics (3) Comparative advantage, trade migration, commodity composition of trade, protectionist arguments, trade liberalization, U.S. trade policy, exchange rate determination, balance of payments adjustment, multinational corporations, and international capital flows.

622 International Finance (3) Analysis of macroeconomic adjustment in open economies, with attention to foreign exchange markets, balance of payments, international policy coordination, integration of world capital markets, liberalization of non-market economies and the international monetary system.

623 Economic Development: Theories and Policies (3) Principal theories explaining economic behavior in developing countries and policies and strategies used to promote development.

631 Industrial Organization I (3) Standard models of imperfect competition, oligopoly, and asymmetric information. Topics include pricing with market power and strategic decision making.

632 Industrial Organization II (3) Economics of regulation and antitrust. Topics include public utility regulation, consumer product regulation, occupational safety regulation, environmental regulation and antitrust legislation.

651 Monetary Theory (3) Study of money, credit, and liquidity as related to real output determination, interest rates, employment, and prices.

652 Topics in Monetary Theory (3) Advanced monetary models, issues in monetary policy, open economy monetary theory and policy. Student participation.

653 Monetary Economics (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

654 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

655 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

656 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

657 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

658 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

659 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

660 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

661 Monetary and Financial Markets (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.

662 Methods of Regional and Urban Analysis (3) Theory of regional/urban economic structure and growth. Regional income and product accounts, shift and share analysis, economic base study, and analysis of input-output models. Theory and problem solution.

672 Public Finance: Taxation and Intergovernmental Relations (3) Theory of taxation; tax incidence and tax efficiency; policy analysis of U.S. tax structure at federal, state, and local levels. Theory of fiscal federalism and intergovernmental relations.

677 Environmental and Natural Resource Economics (3) Alternative paradigms for allocating and valuing environmental resources. Exploration of issues related to market failure and differences between renewable and nonrenewable resources.

678 Economics of Environmental Policy (3) Topics in environmental policy analysis. Consideration of alternative policy instruments, defining policy objectives and role of risk in decision-making process.

682 Advanced Topics in Cross-Section Econometrics (3) Models with limited dependent variables, panel data analysis, nonparametric estimation, selection models and duration models.

683 Time Series Econometrics (3) Univariate and multivariate time series modeling of economic data-AR, MA, ARMA, VAR; models of non-stationary time series-unit roots, cointegration and error correction models; time series models of heteroskedasticity-ARCH, ARCH-M, GARCH; exogeneity and causality.

690 Workshop (3) Advanced topics in economics. Student participation. Repeatability: May be repeated. Maximum 9 hours.

693 Independent Study (1-3) Directed research on topic of mutual interest to faculty and student. Variable title for transcript purposes. Repeatability: May be repeated. Maximum 6 hours.

Education (289)

540 Topics in Improvement of Instruction (1-3) Special conferences, workshops, and in-service programs.

574 Analysis of Teaching for Professional Development (2) Strategies to document and analyze effectiveness of teaching and of professional development. Study and application of various approaches.

575 Professional Internship in Teaching (1-8) Intensive teaching and teaching-related experiences in professional settings in public schools.

576 Practicum in Classroom Teaching (1-8) Teaching and teaching-related experiences in elementary and secondary school settings. Specific hours and school level assignment determined by licensure or certification requirements.

589 Field Experience (1-3) Application of curricular and instructional principles, methods, and materials in schools.

651 Monetary Theory (3) Study of money, credit, and liquidity as related to real output determination, interest rates, employment, and prices.

652 Topics in Monetary Theory (3) Advanced monetary models, issues in monetary policy, open economy monetary theory and policy. Student participation.

653 Monetary Economics (3) Advanced topics in monetary theory and policy: real and nominal exchange rates, international capital flows.
591 Clinical Studies (4) Group and individual seminar activities during full-time internship. Application and evaluation of professional core competencies. Completion and presentation of portfolio and analysis of teaching project. (DE) Corequisite(s): 575.

Education of the Deaf and Hard of Hearing (285)

415 Language Development of Deaf/Hard of Hearing I (3) Language problems of hearing impaired contrasted with scope and sequence of normal language development. Formal linguistic systems used to describe language development problems.

416 Language Development of Deaf/Hard of Hearing II (3) Developmental and remedial systems of teaching language to hearing impaired children. Comprehension and production differences, idiomatic and figurative structures. (DE) Prerequisite(s): 415 or consent of instructor.

419 Speech Development of Deaf/Hard of Hearing (4) Theories of speech development, approaches in training perception and production of speech, and aural habilitation. Practicum experiences.

424 Nature of Hearing Impairments (3) Anatomy and physiology of hearing; nature and causes of hearing loss; methods and instrumentation for assessment of hearing level; interpretation of audiologic services to medical and other rehabilitative disciplines.

425 Introduction to the Psychology and Education of the Deaf/Hard of Hearing (3) Primarily for those planning to teach the hearing impaired. Research related to psychology, social adjustment, communication methodologies, language development and education of hearing impaired. Survey of literature. Visit to programs.

504 Clinical Experience in Teaching and Supervision of Exceptional Children (3-9) Placement in educational settings. (Same as Special Education 504.)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 9 hours.

509 Vocational Guidance and Career Planning With Hearing Impaired (3) Utilization of psychological, educational, social and vocational diagnostic materials and resources appropriate for hearing impaired persons to provide guidance in career decisions and individualized rehabilitation plan.

523 Practicum with Deaf/Hard of Hearing (3) Receptive and expressive language capabilities of hearing impaired student. Designing, teaching, and post-testing unit of instruction for remediation of specific language errors.

529 Teaching Reading to Deaf/Hard of Hearing (3) Specific methods necessary for the pralingually hearing impaired student. Practice in preparation of developmentally appropriate reading materials. Methods which assist in integrating hearing impaired students in regular reading curricula and materials.

579 Special Topics (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 9 hours.
Comment(s): Admission to the graduate program is required.

Education Administration (293)

513 Administrative and Organizational Theory (3) Introduction to theoretical administrative and organizational foundations of management and leadership of educational programs and institutions. (Same as Higher Education Administration 513.)

515 Human Relations and Communication in Administration (3) Development and use of effective interpersonal communication skills and channels, inter-group relations, supportive work climates, personnel motivation, conflict management skills, and role of values, attitudes, and expectations in administration.

516 Research Methods (3) Descriptive, experimental, and quasi-experimental designs to help students without quantitative backgrounds to read and understand technical professional literature. Introduction to inferential statistics, needs assessments, and evaluation procedures. (Same as Higher Education Administration 516.)

518 Educational Specialist Research and Thesis (3)
Grading Restriction: P/INP only.
Repeatability: May be repeated.

523 Administration of Special Services (3) Legal, programmatic, and ethical responsibilities of educational administrators in design and implementation of special service programs within school settings. Special learner characteristics, program categories, service delivery models, and legal/ethical frameworks. Inclusion and full service delivery.

529 Politics and Public Relations in Education (3) School/community relations in political context of modern, complex society. Administrator and supervisory competencies: political, social, ethnic, cultural, and racial environments in which schools operate.

534 Program Evaluation in Education (3) (See Curriculum, Educational Research, and Evaluation 534.)

535 Administrative Applications of Micro Computers (3) DOS, word processing, data based management, spreadsheets, and computer communications. Review and development of specific administrative applications: scheduling, attendance, student record systems, and accounting.

544 School Finance and Business Management (3) For prospective building level administrators. Financial and logical management tasks and procedures in individual school setting.

548 Supervision and Personnel Administration (3) Basic supervisory and personnel concepts and related competencies at the micro-organizational level: interviewing, personnel planning, collecting and maintaining employee information, supervision of personnel, performance appraisal and staff development.

553 Strategic Planning (3) Processes for improving decision-making function through use of both quantitative and qualitative planning techniques.

554 Policy Issues in Educational Law, K-12 (3) Logical arrangement of case and statutory materials for public school administrators and teachers; problems concerning law and public education.

560 Grant Writing and Project Management (3) Processes of finding funding for research efforts, writing grant proposals, negotiating with funding sources, implementing and maintaining funded programs, and closing out projects at end of funding support.

577 Educational Statistics (3) (See Educational Psychology 577.)

580 Internship in Educational Administration (3) Field experience in appropriate educational setting working directly with administrator. At end of planned program of study. Placement by department assignment. Repeatability: May be repeated. Maximum 6 hours.

583 Educational Leadership-Principals (3) Knowledge, skills and relationships for principals to be effective educational leaders.

592 Field Problems in Educational Administration and Supervision (3) Repeatability: May be repeated. Maximum 6 hours.

596 Seminar in School Leadership, K-12 (3) On-site study of quality school processes throughout region. Repeatability: May be repeated. Maximum 6 hours.

605 Advanced Seminar in Administrative Theory (3) (See Higher Education Administration 605.)

606 Leadership Forum (1-3) Development of research, evaluation, policy analysis skills and critical analysis and evaluation of philosophical principles underlying American education. Continuous on-campus enrollment for 2 years. (Same as Higher Education Administration 606.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

610 Internship in Educational Administration (3) Opportunity for doctoral students and advanced graduate students to gain experience in performance of critical tasks of educational administration under supervision of practitioner and university representative.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated at discretion of student's committee. Maximum 12 hours.

614 Statistics for Educational Administrators (3) An introductory statistics course that focuses on the application of statistical procedures to problems in educational administration. Included are: scales of measurement, hypothesis testing, and descriptive and inferential statistical techniques. Computer applications are explored. (Same as Higher Education Administration 614.)

615 Research Design (3) The foundations of designing, conducting, and evaluating quantitative, qualitative, and mixed-methods research and the philosophical assumptions underlying these approaches. Topics covered include: identifying a research problem, reviewing the literature, specifying a purpose, writing research questions and hypotheses, and collecting and analyzing data. (Same as Higher Education Administration 615.)
616 Research Methods (3) The techniques of multiple regression, analysis of covariance, and multivariate analysis as applied to problems in educational administration. Computer applications are explored. (Same as Higher Education Administration 616.) (DE) Prerequisite(s): 614.

617 Case Study Methods in Educational Research (3) Methods, techniques and strategies consistent with case study approaches to inquiry in educational and related settings. (Same as Higher Education Administration 617.) (DE) Prerequisite(s): 614.

629 Seminar in Policy Issues in Education (3) Local, state, and federal education policy: theory, analysis, development and implementation. Why education policy is changing rapidly, ways to follow and influence education policy, and conceptual frameworks to use for future understanding. (Same as Higher Education Administration 629.)

646 Personnel Administration (3) Personnel administration functions for professional and supporting staff in educational organizations. Recruitment, selection, placement, personnel policies, employee wage and salary administration, fringe benefits, collective negotiations, human relations, staff development, and staff evaluation.

656 Legal Issues in Education (3) School law; constitutional foundations as they relate to public education at state and local levels.

658 Conflict Management (3) (See Higher Education Administration 658.)

670 Values and Ethics in Educational Leadership (3) (See Higher Education Administration 670.)

680 Administration of Complex Organizations (3) Concepts and theoretical formulations to understand, analyze, evaluate, and change complex educational programs and organizations. (Same as Higher Education Administration 680.)

Educational Interpreting (287)
431 American Sign Language III (3) Sequence (431-432) stresses fluency of expressive and reception sign communication skills. Using language in context is emphasized. Grammatical structures of ASL and cultural implications of the deaf community. (DE) Prerequisite(s): 431 and 432 must be taken in sequence.

432 American Sign Language IV (3) Sequence (431-432) stresses fluency of expressive and reception sign communication skills. Using language in context is emphasized. Grammatical structures of ASL and cultural implications of the deaf community. (DE) Prerequisite(s): 432 or consent of instructor. Comment(s): 431 and 432 must be taken in sequence.

435 Linguistics of American Sign Language (3) Introduction to grammatical and linguistic structures of ASL. Language variations, discourse, bilingualism and language contact also covered in this course. Conducted in ASL.
Grading: Satisfactory/No Credit or letter grade. (DE) Prerequisite(s): 431 or consent of instructor.

Educational Psychology (310)
431 Personality and Mental Health (3) (See Counselor Education 431.)

460 Self-Management in the Helping Professions (3) Applications of self-management strategies to career, social, emotional, and health domains for both helping professionals and their clientele.
Grading: Satisfactory/No Credit or letter grade. (DE) Prerequisite(s): Introductory course in psychology or consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 9 hours.

504 Special Topics (1-3) Instructor-initiated course offered at convenience of unit on topics of current interest.
Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

505 Quasi-Experimental and Single-Subject Design Research (3) History, theory and research design techniques used to examine cause and effect relationships during applied psychoeducational research. Focus on controlling threats to internal validity through research design.

507 Survey of Educational Psychology (3) Historical developments and current issues; analysis of concepts, principles, techniques and models as they are used to facilitate teaching and learning and the creation of effective educational environments.

509 Internship in Adult Education (3) Practical field experiences in selected settings under supervision of practitioner and departmental representative.

Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

510 Psychological Theories of Human Development Applied to Education (3) Theory and research on emotional, social, and intellectual development over life span with applications to educational and therapeutic settings.

513 Reflective Practice in Education and Psychology (3) Concepts, theories and processes of reflective practice applied to educational settings.

514 Individual Study in Adult Education (3) Approval form must be completed in office of unit head.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of supervising instructor.

515 Educational Applications of Behavioral Theories of Learning (3) Behavioral theories and research, conditioning, observational learning, and ethological learning as systems apply to student motivation, discipline and learning.

516 Educational Applications of Cognitive Learning Theories (3) Cognitive theory and research, social learning, attribution and information processing as applied to education.

517 Direct Assessment and Interventions for Academic Skills Deficits (3) Theory, techniques and procedures shown to prevent and remedy academic skills deficits: curriculum-based assessment and direct intervention procedures.

518 Educational Specialist Research and Thesis (3) Grading Restriction: P/NP only. Repeatability: May be repeated.

520 Survey of Adult Education (3) Historical development, philosophies of adult education agencies, associations, programs, issues, and literature illustrating process of adult education and diversity of continuing education.
Registration Permission: Consent of instructor.

521 Program Development and Operation in Adult Education (3) Theories and methods from research to practice in planning and operating adult education programs.
Registration Permission: Consent of instructor.

522 Adult Development (3) Theory and research in adult development and change over lifespan and its implications for adult learning in formal and informal contexts.

523 Post-Secondary Education for Adults (3) History, evolution, philosophy, structure and functions of post-secondary, sub-university institutions, their programs and clientele.
Registration Permission: Consent of instructor.

524 Continuing Professional Education (3) Theories and concepts supporting design and management of educational programs for adults in professions.

525 Adult Learning (3) Key characteristics of adult learners, current theory and research on adult learning, and implications for teaching and learning concepts.

526 Informal Methods of Assessment (3) Development and use of rating scales, check-lists, observation, test scores and case reports in assessment and counseling of children and adults.
(DE) Prerequisite(s): Counselor Education 525.

527 Controversies in Adult Education (3) Controversies confronting the field of adult education; development of critical analysis skills by looking at controversies from different perspectives.

528 Psychology of Aging (3) Theory and research of aging and gerontology related issues: psychological and related physiological changes that occur in later life stages of human development. Implications for treatment programs and policy.

529 Facilitating Adult Learning (3) Theory, research, and practice related to working with adults in teaching-learning situations.
530 Methods of Action Research (3) Models of action research and applications in professional practice.

550 Statistics and Research Design: Conceptual (3) Consumer-oriented, conceptual treatment of statistics, research design, and quantitative basis of testing.

560 Discipline and Conflict Resolution (3) Applications of major models of discipline and conflict resolution strategies in development of constructive atmosphere for classroom learning.

569 Internship in Educational Psychology (3) Supervised employment in unit approved educational psychology internship sites. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.

572 Cognitive Education: Models and Approaches (3) Models and approaches in field of cognitive education: research and theoretical support for various program components, critical variables of organizational learning that affect success of implementation.

573 Meeting Needs of Nontraditional and Underachieving Learners (3) Exploration of students’ needs at any age and level of functioning who are not progressing up to their fullest potential. Causes of academic and motivational problems, and approaches to overcome them. Learning to learn, cultural alienation, and personal world view and interaction with effective teaching and learning.

574 Facilitating Group Change (3) Practical issues of group change. Analyses of group and individual experiences in all types of educational settings in relation to systems theory and collaborative learning theory. Needs of individuals and groups involved in change and roles of inside and outside change agents.

577 Educational Statistics (3) Applications of descriptive and inferential statistics to educational and instructional problems. Use of Internet sites and computer programs to analyze data. (Same as Educational Administration 577.) (DE) Prerequisite(s): 1 year of college mathematics and an elementary course in statistics or consent of instructor.

585 Seminar in Gerontology (1) (See Health 585.)

593 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

601 Professional Seminar (1) An introduction to doctoral study in educational psychology and counseling that explores research requirements, the meaning of scholarship in academia, resources, survival strategies for students, and related topics. (Same as Counselor Education 601.) Grading Restriction: Satisfactory/No Credit grading only. Credit Restriction: May not be used to meet the Educational Psychology 600 or Counselor Education 600 requirement. Comment(s): Admission to a doctoral program in the Department of Educational Psychology and Counseling is required.

602 Directed Research (1-3) Instructor- or student-initiated group investigation of empirical and theoretical problems in educational and counseling psychology. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.

604 Special Topics (1-3) Instructor-initiated courses offered at convenience of unit on topics of interest. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

609 Advanced Seminar in Curriculum and Learning (3) Team-taught interdisciplinary seminar: trends, themes, and issues in curriculum and learning. Reading and discussions based on significant research and scholarly publications.

620 Seminar in Adult Education (3) Issues in adult education, theories and concepts, philosophical positions, research trends and methodologies. (DE) Prerequisite(s): 520 or equivalent. Registration Permission: Consent of instructor.

621 Advanced Seminar in Program Planning (3) Concepts, principles, and theories related to program planning in adult education. (DE) Prerequisite(s): 521 or equivalent. Registration Permission: Consent of instructor.

622 Advanced Seminar in Adult Development and Learning (3) Adult development and adult learning theory and research. (DE) Prerequisite(s): 522 and 526. Registration Permission: Consent of instructor.

630 Doctoral Seminar in Collaborative Learning (3) Issues, theories, concepts and research in collaborative learning. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 12 hours.

635 Ethical, Legal, and Professional Issues in Psychology (3) (See Psychology 635.)

640 Seminar in Applied Educational Psychology (2) Issues, theories, concepts and research in applied educational psychology. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.

655 Research in Psychoeducational Studies (1) Data analyses, collection, and interpretation. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 9 hours.

662 Applied Research Design (3) Planning of empirical investigations, collection of data, and drawing of inferences from evidence gathered. (DE) Prerequisite(s): 2-course sequence in statistics.

663 Scale Construction (3) Development, pilot testing, and revision of attitude inventories, rating scales, and other paper-and-pencil techniques for assessing beliefs, personality characteristics, and opinion. (DE) Prerequisite(s): Counselor Education 525 and a 2-course sequence in statistical analysis.

665 Analysis of Research in Instructional Technology (3) Research on human learning, design of learning environments. Analysis of teacher behavior, text development, computer software design and video presentations.

668 Practicum in Instructional Planning (3) Development and management of course or program of instruction in educational psychology. (DE) Prerequisite(s): 665 or consent of instructor.

669 Internship in Educational Psychology (1-6) Supervised employment in unit approved educational psychology internship sites. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.

671 Mediated Learning Theory (3) Feuerstein’s theory of mediated learning experience and its connections to work of Piaget, Vygotsky and others. Implications for transformational learning and building of learning communities for learners of all ages. Comment(s): Requires admission to doctoral program or consent of instructor.

673 Collaborative Learning (3) Theories of collaborative learning and research related to facilitating collaborative learning in professional practice settings. (DE) Prerequisite(s): 513 and 617 or consent of instructor.

677 Advanced Educational Statistics (3) Applications of parametric and nonparametric statistical inference to educational and instructional problems. Use of computer programs and Internet sites in analyzing data. (DE) Prerequisite(s): 577. Registration Permission: Consent of instructor.

693 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

Electrical and Computer Engineering (319)

Courses required in the electrical engineering undergraduate curriculum cannot be used in either the MS or PhD programs. No 400-level course may be used toward a graduate degree in electrical engineering except when required by the program.

400 Senior Design (5) A major design project that focuses the student’s attention on professional practice, accumulated background of curricular components, and recent developments in the field. This major design emphasis is directed to topics within the field of electrical engineering. Includes Level 3 design projects which require laboratory work. (DE) Prerequisite(s): 316, 335, 342, and 355.

415 Automatic Control Systems (3) Automatic control systems for physical systems with linear models. The methods presented include steady-state error analysis, stability, root locus, Nyquist theory, and Bode plots. (DE) Prerequisite(s): 316.

416 Computer Control Systems (3) Computer controlled systems using state variables and z-transform model representations with sampling theory and its effect of digital control design. Design of digital controllers in both the state space and frequency domains. Includes Level 1 design projects. (DE) Prerequisite(s): 316.
421 Electric Energy Systems (3) Structure and operation of electrical energy grid; load flow; economic loading; planning; control; reliability. Balanced and unbalanced faults; system protection; system stability. Includes Level 1 design projects.
(DE) Prerequisite(s): 316.

422 Power System Operations and Planning (3) Dynamic phenomena in power systems; transient stability assessment and enhancement; direct and indirect methods for stability determination in nonlinear systems. Operations planning, unit commitment, economic dispatch, frequency regulation and automatic generation control. Volt-var control, load management, cogeneration and other topics of contemporary concern. Includes Level 1 design projects.
(DE) Prerequisite(s): 421.

423 Electric Machines (3) Principles of electromechanical energy conversion. Design procedures for AC and DC machine windings; construction and performance constraints. Effects of machine parameters on steady state and dynamic performances; the d-q model; reference frame. Includes Level 1 design projects.
(DE) Prerequisite(s): 316 and 325.

431 Operational Amplifier Circuits (3) Linear and non-linear active circuits using commercial operational amplifiers. Includes operational, instrumentation, isolation, bridge, rms and logarithmic converters, multipliers and function generators, rectifiers, references, active filters, modulation and demodulation, sinusoidal generators. Noise fundamentals and calculations in op-amp circuits. Design for specified pole-zero functions. Emphasis on applications including transducer interfacing. Includes Level 1 design projects which require laboratory work.
(DE) Prerequisite(s): 316, 332, and 342.

432 Electronic Amplifiers (3) Feedback amplifier principles; wideband linear amplifier design; low-noise preamplifier design; audio power amplifier design. Introduction to radio-frequency amplifier design; oscillator principles. Includes laboratory experiments and design projects.
Includes Level 2 design projects which require laboratory work.
(DE) Prerequisite(s): 431.

441 Digital Communication (3) Quantization and pulse code modulation, binary and Mary signaling, spectra of line codes, link budget analysis, binary communication in the presence of noise, matched filtering and equalization, bandwidth digital transmission, introduction to multiple access techniques. Includes Level 1 design projects.
(DE) Prerequisite(s): 342.

442 Communication System Design (3) Application of communication theory to system design. Hardware and software design and simulation. Modern communication topics. Includes Level 1 design projects.

443 Antennas and Propagation (3) Introduction to antenna theory including fundamental antenna concepts and parameters (directivity, gain, patterns, etc.) and signal propagation. Theory and design of linear and loop antennas, arrays, and other simple antennas. Includes Level 1 design projects.
(DE) Prerequisite(s): 316, 341, and 342.

446 Electromagnetic Compatibility (3) Principles and practices to avoid interference among and within electrical devices. Parameters and coupling for dipole, biconical, and log-periodic antennas. High frequency effects in circuit elements. Radiated and conducted emissions and susceptibility. Crosstalk, shielding, electrostatic discharge, and EMC regulations. Includes Level 1 design projects which require laboratory work.
(DE) Prerequisite(s): 316, 341, and 342.

451 Computer Systems Architecture (3) Architecture and design of microcomputer systems with microprocessors or microcontrollers. Instruction set architectures, software interfaces, processor structures, memory hierarchy, interfacing. Includes Level 1 design projects which require laboratory work.
(DE) Prerequisite(s): 355.

453 Introduction to Computer Networks (3) Principles of computer networking and software design of network protocol with emphasis on the Internet and TCP/IP protocol suite. Includes Level 1 design projects.
(DE) Prerequisite(s): 206.

471 Introduction to Pattern Recognition (3) Introduction to statistical decision theory, adaptive classifiers, and supervised and unsupervised learning. Students will explore the application of these techniques in areas of current interest such as face recognition, speech processing, remote sensing, data mining and bioinformatics. Includes Level 1 design projects.
(DE) Prerequisite(s): 316.
Comment(s): Non-majors must obtain consent of instructor.

472 Introduction to Digital Image Processing (3) Basic methods for digitizing, storing, processing, and displaying images. Computational procedures for image enhancement, restoration, coding, and segmentation. Includes Level 1 design projects.
(DE) Prerequisite(s): 316.
Comment(s): Non-majors must obtain consent of instructor.

481 Power Electronics (3) Principles and characteristics of power semiconductor devices, single-phase and polyphase phase-controlled converters, converter control, AC voltage controller. Includes Level 1 design projects and laboratory work.
(DE) Prerequisite(s): 316, 325, and 336.

482 Power Electronic Circuits (3) Voltage-fed inverters, PWM principles, control of inverters, dc-dc converters, dc machine drives, resonance converters, step motor drives, brushless dc machine principles. Includes Level 1 design projects.
(DE) Prerequisite(s): 481.

491 Special Topics (3) Relating to basic design and current practice. Includes Level 1 or Level 2 design projects which may require laboratory work.
(DE) Prerequisite(s): Completion of all junior electrical and computer engineering courses or consent of instructor.

495 Senior Seminar (1) Current topics in electrical engineering.
Grading: Satisfactory/No Credit or letter grade.
(DE) Prerequisite(s): Completion of all junior electrical and computer engineering courses or consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

501 Project in Lieu of Thesis (3) Capstone course taken under supervision of student's major professor and master's committee. Individual project involving literature survey, development of some software or hardware, testing, writing a white paper or journal paper, or other suitable project.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of graduate committee.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

504 Random Process Theory for Engineers (3) Probability and random variables as approached by set theory. Statistical averages and transformations of random variables. Random processes, stationarity, correlation functions and temporal analysis, power spectrum and spectral analysis as applied to response of systems to random signals.

505 Digital Signal Processing I (3) Discrete-time signals and systems, sampling, fast Fourier transform (FFT) and fast convolution, design of FIR filters and IIR filters.

506 Digital Signal Processing II (3) Filter properties in the Z and Fourier transform domains, structures for digital filters, sampling and reconstruction, hardware implementation of digital filters.

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)

509 Multidisciplinary Project (1) (See Industrial Engineering 509.)

511 Linear Systems Theory (3) State space models of linear dynamical systems, linear algebra, state transition map, matrix exponential, controllability, observability, realization theory, and stability theory.
(DE) Corequisite(s): 507.

512 Multivariable Linear Control System Design (3) Design of controllers, for multivariable systems, which satisfy constraints on robustness to plant uncertainties, disturbance rejection, command following.
(DE) Prerequisite(s): 511.

521 Power Systems Analysis I (3) Matrix-vector representations of power networks, sequence modeling of power system components, unbalanced shunt and series faults. Formulating and solving problems in matrix-vector form with application to large scale power systems.
(DE) Prerequisite(s): 421 or equivalent.
522 Power Systems Analysis II (3) Operation and control of interconnected power systems, transient and dynamic stability. Formulating and solving problems in matrix-vector form with application to large-scale power systems. 
(DE) Prerequisite(s): 521.

523 Power Electronics and Drives (3) Forced commutated inverters, advanced PWM techniques, current-fed inverters, drive system modeling, vector and scalar control of induction machines, parameter variations, control principles of synchronous machine.

525 Alternative Energy Sources (3) Energy outlook, interconnection issues of distributed energy resources, efficiency of power production, electric energy conversion and storage. Photovoltaics, fuel cells, wind turbines, microturbines.

531 Advanced Analog Electronics I (3) Physical operation of modern electronic devices: semiconductor devices; diodes, bipolar transistors, J-FETs, and MOS-FETs. Small-signal equivalent circuits and noise models of active devices. Project laboratory. 
(DE) Prerequisite(s): 431 and 432 or consent of instructor.

(DE) Prerequisite(s): 531.

541 Electromagnetic Fields (3) Maxwell's equations, special relativity, wave reflection and transmission, generalized media, guided waves, radiation from current elements.
(DE) Prerequisite(s): Mathematics 404.

542 Communication Systems Simulation (3) Simulation is used as a design and performance evaluation tool for communication systems. Simulation models for stochastic signals and system components including decoders, modulators, non-linear power amplifiers, bit and carrier synchronizers, equalizers and receivers are discussed along with the error effects resulting from the use of these models. Techniques for modeling time-varying and nonlinear systems are included. Monte Carlo techniques, semi-analytic techniques and variance reduction methods are covered.

(DE) Prerequisite(s): 504.

(DE) Prerequisite(s): 543.

545 Introductory Microwave Networks and Components (3) Scattering and transfer representation for multipoles; unilateral and bilateral microwave and millimeter wave devices. Component and system parameter measurement by modern network analyzers. Electrical oscillators and amplifiers, frequency swept oscillators, transit time devices, parametric devices, mixers, switches.

552 Digital System Design II (3) State identification and structure realizations of sequential machines. Digital system architecture design: microprogramming and interrupt control. 
(DE) Prerequisite(s): 551.

553 Computer Networks (3) Principles of computer networks with a focus on the Internet and TCP/IP protocol suite. In-depth study of several core issues and design options involved. Employs a top-down approach from the discussion from the application layer down to the physical layer. An emphasis is given on protocol design and performance analysis. Other topics include ad-hoc networking, network security and network simulation. Assignments that require hands-on networking and programming skills will be issued in order to solve concrete problems.

557 Computer Architecture and Design (3) An exploration of the central issues in computer architecture: instruction set design, addressing and register set design, control unit design, microprogramming, memory hierarchies (cache and main memories, mass storage, virtual memory), pipelining, bus organization, RISC (Reduced Instruction Set Computers), and CISC (Complex Instruction Set Computers), implementation issues, technology trends, architecture modeling and simulation.

561 Plasma Diagnostics I (3) Principles of active, passive, perturbing and nonperturbing diagnostic methods used in low temperature plasmas, and high temperature plasmas of interest in fusion research. Laboratory safety, data reduction and presentation, microprocessor based data handling and analysis, and reduction of time series data. 
(DE) Prerequisite(s): 461 or 463 or consent of instructor.

562 Plasma Diagnostics II (3) Laboratory instruction in operation of plasma diagnostic instruments in plasma science laboratory, experience with high voltage, vacuum, RF, and digital data handling techniques. 
(DE) Prerequisite(s): 561.

565 Industrial Plasma Engineering I (3) Low temperature plasma physics relevant to industrial applications: kinetic theory, particle dynamics in electric and magnetic fields, gasdynamic discharges, and electron, ion, and plasma sources. 
(DE) Prerequisite(s): Requires graduate standing or consent of instructor.

566 Industrial Plasma Engineering II (3) Continuation of 565 to industrial applications: ion implantation in solids, plasma deposition and etching, space propulsion systems, plasma chemistry, plasma lighting devices, insulating dielectrics and breakdown, materials processing with plasma arcs, and related topics.

571 Pattern Recognition (3) Decision-theoretic and structural approaches to pattern recognition. Deterministic and statistical decision rules, feature extraction and representation, syntactic and semantic methods.
(DE) Prerequisite(s): 471 or consent of instructor.

(DE) Prerequisite(s): 472 or consent of instructor.

573 3D Methods in Robot Sensing, Vision and Visualization (3) Tools used in image synthesis and analysis; 3D recovery by nonlinear estimation. Projective geometry, analytic photogrammetry, range sensing, lighting models, differential geometry, and 3D rendering.

574 Advanced Computer Vision (3) Principles and methods for analysis of time and/or space varying imagery. Imaging physics and color theory, shape-form-X, feature correspondence and tracking, stereo Vision, structure from motion, optical flow, motion-based segmentation, and selected topics form current literature. 
(DE) Prerequisite(s): 573 or consent of instructor.

574 Advanced Computer Vision (3) Principles and methods for analysis of time and/or space varying imagery. Imaging physics and color theory, shape-form-X, feature correspondence and tracking, stereo Vision, structure from motion, optical flow, motion-based segmentation, and selected topics from current literature. 
(DE) Prerequisite(s): 573 or consent of instructor.

574 Advanced Computer Vision (3) Principles and methods for analysis of time and/or space varying imagery. Imaging physics and color theory, shape-form-X, feature correspondence and tracking, stereo Vision, structure from motion, optical flow, motion-based segmentation, and selected topics form current literature. 
(DE) Prerequisite(s): 573 or consent of instructor.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

598 Graduate Seminar (1) Topics of interest discussed in weekly seminar. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours.

599 Special Topics (1-3) Repeatability: May be repeated. Maximum 9 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

613 Nonlinear Systems Theory (3) Introduction to nonlinear systems theory with applications to control systems. Specific emphasis is given to Lyapunov Theory, Adaptive Control, Feedback Linearization and Sliding Mode Control. 
(DE) Prerequisite(s): 511 or equivalent.

614 Optimal Control (3) Deterministic and stochastic dynamic programming in continuous and discrete time, minimum principle and matrix minimum principle, computational methods in optimal control. 
(DE) Prerequisite(s): 611.

615 Control of Electric Machines (3) Models in the form of nonlinear differential equations are developed for the induction, synchronous, brushless DC and switched reluctance motors. High performance methods of control based on state space techniques are developed including field-oriented and input-output linearization control.
617 Special Topics in Systems Theory I (3) Topics of current interest to students and faculty: large-scale systems, model-order reduction, algebraic- and geometric-system theories, and advanced-design methods. (DE) Prerequisite(s): 511. Registration Permission: Consent of instructor.  
618 Special Topics in Systems Theory II (3) Topics of current interest to students and faculty: large-scale systems, model-order reduction, algebraic- and geometric-system theories, and advanced-design methods. (DE) Prerequisite(s): 511. Registration Permission: Consent of instructor.  
623 Advanced Power Electronics and Drives (3) Phase-controlled cycloconverters, cycloconverter-fed ac drives, resonant converters, vector and scalar control of synchronous machines, static Kramer drives, static Scherbius drives, VSCF generation, modern control theory in ac drives.  
625 Utility Applications of Power Electronics (3) Electric power quality, harmonics, voltage sag, reactive power compensation, transient stability. Structure and control of power converters, multilevel converters, active power filters, static series and shunt compensators, FACTS, HVDC. (DE) Prerequisite(s): 521 and 523 or consent of instructor.  
626 Solid State Power Semiconductors (3) Semiconductor physics and circuit models. Power diodes, power MOSFETs, thyristors, GTO thyristors, IGBTs, emerging devices and circuits. Wide band gap power semiconductors. Solar cell device physics. (DE) Prerequisite(s): 523 or consent of instructor.  
629 Traction Drives (3) Operating principles of traction drives for electric and hybrid electric vehicles. Low speed constant torque control mode and high speed constant power control mode. Ideal performance of the doubly fed, separately excited dc machine and the wound rotor synchronous machine. High CPSR drives based on singly-fed machines including the induction, permanent magnet synchronous, brushless dc and switched reluctance motors. Other contemporary topics in traction drive applications. (DE) Prerequisite(s): 523 or consent of instructor.  
631 Advanced Topics in Electronic Instrumentation I (3) Based on particular interests of students. Fundamental physical processes in instrumentation transducers: thermoelectric, magnetoelectric, electromagnetic and quantum-mechanical devices. (DE) Prerequisite(s): 531 and 532. Registration Permission: Consent of instructor.  
632 Advanced Topics in Electronic Instrumentation II (3) Physical operation of modern discrete, monolithic, and hybrid electronic structures and their application in signal processors. Resolution, sensitivity, response time, and noise considerations in signal processors used in modern electronic instrumentation. (DE) Prerequisite(s): 631.  
642 Wireless Communications (3) Fundamental theory and design of wireless communications systems; mobile radio propagation; modulation techniques; coding, diversity and equalization. Wireless systems and standards. (DE) Prerequisite(s): Satisfactory completion of 441 and 504.  
643 Detection and Estimation Theory (3) Detection theory; coding theory; system identification. Signals with unknown parameters; optimal filter synthesis; adaptive systems; sequential detection; suboptimal detection. (DE) Prerequisite(s): 504 or consent of instructor.  
644 Coding and Information Theory (3) Structure of algebraic and probabilistic codes; linear codes, convolutional codes, error-correcting codes, decoding methods. Identification schemes: deterministic, stochastic, and hierarchical methods. (DE) Prerequisite(s): 643.  
651 Computer-Aided Design of VLSI Systems I (3) Fabrication of microelectronic devices; computer architecture design; algorithmic state machines; partitioning; structured design methodology. (DE) Prerequisite(s): 551 and 552 or consent of instructor.  
652 Computer-Aided Design of VLSI Systems II (3) Computer-aided design tools; design and implementation of fully custom very large scale integrated (VLSI) circuits; design for testability; testing of fabricated chips. (DE) Prerequisite(s): 651.  
653 Advanced Computer Networks (3) Topics of current interest to students and faculty: high-speed Internet switch/router architectures, routing algorithms and protocols, network performance analysis and packet scheduling algorithms. Coursework will include theoretical as well as practical (simulation-based) assignments. (DE) Prerequisite(s): 553. Registration Permission: Consent of instructor.  
657 Advanced Computer Architecture and Design (3) Advanced computer architecture issues including topics such as superscalar architectures, parallel algorithms, principles of parallelism detection and vectorization compilers, interconnection networks, SIMD/MIMD machines, processor synchronization, shared and distributed memory, data coherence, cache memories, multiprocessors, multicomputers, dataflow machines, special purpose processors. (DE) Prerequisite(s): 557.  
658 Computer and Telecommunications Systems Performance Evaluation (3) Introduction to the basic tools of computer and communications systems analysis and evaluation. Deterministic and stochastic modeling concepts are presented. Queueing theory and discrete event simulation methods are studied with application to a variety of examples drawn from the computer and communications performance evaluation literature. A standard DES language is used in modeling and simulation studies. Topics of current interest such as computer input/output models, mass memory, bus models, and communications network models are discussed. A modeling project is typically required. (DE) Prerequisite(s): 504.  
659 Digital Systems Verification (3) Three critical issues for robust digital systems are design errors, manufacturing faults, and failures during operation. This course covers digital system verification, testing, and reliability for both timing and logic. In order to prepare students to deal with these issues in real designs. Verification will cover formal verification for logic and timing, and contrast with simulation. Methods for generating test vectors, scan testing, and built-in self test will be covered. MTBF will be calculated for several small systems with emphasis on models and their limitations. (DE) Prerequisite(s): 551 and 557.  
663 Advanced Plasma Physics I (3) Basic concepts of high temperature plasma physics, Magnetohydrodynamics and kinetic descriptions of plasma, plasma transport, plasma waves, equilibrium, and stability. (DE) Prerequisite(s): 541, 542 and 461, 462 or 563, 564, or consent of instructor. Comment(s): Admission to graduate seminar (1) Research in department. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated.  
664 Advanced Plasma Physics II (3) Plasma heating and radiation phenomena. Advanced topics of current interest. (DE) Prerequisite(s): 663. Comment(s): 663 and 664 must be taken in sequence.  
671 Image Processing and Robotics I (3) Three-dimensional scene modeling and recognition, multi-sensor systems. (DE) Prerequisite(s): 572 or 573 or consent of instructor.  
672 Image Processing and Robotics II (3) Stereovision, shape theory. (DE) Prerequisite(s): 671.  
673 Image Processing and Robotics III (3) Time-varying imagery, path planning and navigation. (DE) Prerequisite(s): 672.  
691 Advanced Graduate Seminar (1) Research in department. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated.  
692 Special Topics (1-3) Advanced topics of current interest to PhD students in electrical engineering. Repeatability: May be repeated. Maximum 9 hours.

Elementary Education (322)  
421 Elementary and Middle School Science and Social Studies Instruction (3) Methods and materials for teaching science and social studies. Development of functional relationships and individual entities of the two fields. Comment(s): Admission to teacher education required. Not open to students with recent course or background in teaching science and/or social studies.  
429 Language Arts/Reading Instruction in Elementary and Middle Schools (3) Language and language development as applied to teaching of oracy (listening-speaking) and aspects of literacy (reading process/readiness and writing). Comment(s): Admission to teacher education required. Not open to students with recent course in language arts methods.  
445 Early Childhood Education: Program Development and Teaching in Kindergarten (3) Curriculum planning, classroom organization and management practices for teaching young children; relationship of kindergarten to total elementary school. Comment(s): Admission to teacher education required.  
504 Studies and Theory in Language Development (3) Studies and theory of language development in children. (DE) Prerequisite(s): An elementary school language arts course or consent of instructor.
505 Elementary and Middle School Teaching Methods II (6) Applied methods of teaching reading, language arts, science, social studies and mathematics: accommodation strategies for students with diverse needs. (DE) Prerequisite(s): Course in elementary and middle school teaching methods. (DE) Corequisite(s): 575.

515 Seminar (1-3) Curriculum, instructional technology, elementary education, secondary education, or social foundations as related to goals of students' programs. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.

527 Elementary School Curriculum (3) Examination, evaluation and application of curriculum designs in elementary school. Trends and issues which affect elementary education. Registration Permission: Consent of instructor.

528 Teaching Language Arts Elementary and Middle School (3) Recent trends and current materials and methods in teaching elementary language arts (except reading). (DE) Prerequisite(s): Course in language arts or consent of instructor.

529 Practicum in Diagnosis and Remediation of Difficulties in Learning Mathematics (3) Assessment and practicum experience with children having difficulties in learning elementary school mathematics. (DE) Prerequisite(s): 523 or consent of instructor.

550 Assessment and Correction of Language Arts Difficulties (3) Procedures and materials for diagnosing and correcting language arts difficulties; analysis of children's work. (DE) Prerequisite(s): At least one language arts course or consent of instructor.

556 Curriculum for Early Childhood Education (K-3) (3) Theoretical foundations and current research in content and skill areas of curriculum for Kindergarten-Grade 3; application to local school setting. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

557 Application of Theory in Early Childhood Education (K-3) (3) Principles and practices from selected theoretical orientations. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): Course in early childhood education or consent of instructor.

584 Seminar in Early Childhood Education (3) Analysis of research and theory in early childhood education; educative process of young children. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): Course in early childhood education.

606 Research in Elementary Education (3) Analysis of research in elementary education with application to classroom teaching. (DE) Prerequisite(s): Research course.

650 Advanced Studies in Early Childhood Education (3) Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 2 graduate courses in early childhood education. Registration Permission: Consent of instructor.

651 Advanced Studies in Elementary School Language Arts (3) Selected issues in elementary school language arts. (DE) Prerequisite(s): Graduate course in elementary school language arts or consent of instructor.

Engineering Management (328)

501 Capstone Project (3-6) Application-oriented project to show competence in major academic area. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. Comment(s): Requires enrollment in engineering management.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

532 Productivity and Quality Engineering (3) Productivity and quality measures defined and used to analyze current competitive position of important sectors of American industry with respect to national and international competition. Study of management theorists and systems which promote or inhibit productivity or quality improvements.

533 Theory and Practice of Engineering Management (3) Principles of engineering management, including: business and organization design; culture, leadership, marketing and competition in global economy, motivation and performance management, empowerment, organizational behavior, and diversity. Systems thinking, learning organizations, and systems dynamics modeling. Principle application to work settings and case studies.

535 Management of Technology (3) Creativity and innovation; incorporation of advanced technology equipment; application of systems thinking; new methods in business and manufacturing organizations; justifying technology; assimilating and managing change; changing management roles; and impacts of new technologies. (DE) Prerequisite(s): 538 and Industrial Engineering 518.

536 Project Management (3) Development and management of engineering and technology projects. Project proposal preparation; resource and cost estimating; and project planning, organizing, and controlling; network diagrams and other techniques. Role of project manager: team building, conflict resolution, and contract negotiations. Discussion of typical problems and alternative solutions. Case studies and student projects. (DE) Prerequisite(s): 537 or consent of instructor.

537 Analytical Methods for Engineering Managers (3) Survey of management analysis and control systems through industrial engineering techniques. Qualitative and quantitative systems: methods analysis, work measurement, incentive systems, wage and salary development, production and inventory control, facility layout, linear programming, and applied operations research techniques. Credit Restriction(s): No credit for student with undergraduate degrees in industrial engineering.

538 New Venture Formation (3) Factors other than mechanical or chemical which enter into successful establishment of manufacturing or service enterprise. Organizational and financial planning and evaluation. Cost and location studies and market analysis to determine commercial feasibility of new ventures. (DE) Prerequisite(s): 539.

539 Strategic Management in Technical Organizations (3) Strategic planning process and strategic management in practice; corporate vision and mission; product, market, organizational, and financial strategies; external factors; commercialization of new technologies; and competition and beyond. (DE) Prerequisite(s): 553 and Industrial Engineering 518 or consent of instructor.

543 Legal and Ethical Aspects of Engineering Management (3) Legal aspects imposed by government and ethical considerations in engineering practice. Selected readings, lecture, discussion, and student presentations. Current topics from government and industry.
559 Advanced Mechanics of Materials I (3)  (See Mechanical Engineering 559.)

566 Optical Engineering I (4)  Wave optics; scalar diffraction theory; introduction to Fourier optics; ray or geometric optics; lens, mirror, gratings; paraxial design methods; introduction to aberrations.

568 Optical Engineering II (4)  Statistical optics; spontaneous and induced emission; black and gray body radiation; incoherent, partial and totally coherent radiation; mutual coherence function; detectors; radiometry.  (DE) Prerequisite(s): 541.

571 Biomechanics of Hard and Soft Tissue (3)  Introduction to terminology, physiology, and analytical methods for mechanics of living tissue. Continuum mechanics analysis of hard and soft tissue, biological fluid flows. Flow properties of blood, rheology of blood in micro vessels; bioviscoelasticity of fluids and solids, mechanical properties of blood vessels; skeletal, heart and smooth muscle; bone and cartilage. Research paper.  (Same as Biomedical Engineering 572.)

572 Biomedical Fluid Mechanics (3)  Application of fluid mechanics theory to fluid flows in living systems. Solutions to differential equations of motion for blood flow in arteries, veins and the microcirculation. Measurement of flow properties of blood and other biological fluids. Analysis of physiological flows, blood flow through arterial stenoses. Study of flow through artificial heart valves and in extracorporeal devices.  (Same as Biomedical Engineering 572.)

577 Neural Networks in Engineering (3)  (See Nuclear Engineering 577.)

578 Fuzzy Systems in Engineering (3)  (See Nuclear Engineering 578.)

581 Special Topics in Engineering Mechanics (3)  Mechanics problems related to recent developments. Repeatability: May be repeated with consent of department. Registration Permission: Consent of instructor.

585 Green Engineering (3)  (See Chemical Engineering 581.)

590 Selected Engineering Problems (2-6)  Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. Comment(s): Enrollment limited to students in problems option. Registration Permission: Consent of advisor.

595 Seminar (1)  All phases of engineering science, reports on current research at UT and UTSI. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

600 Doctoral Research and Dissertation (3-15)  Grading Restriction: P/NP only. Repeatability: May be repeated.

651 Advanced Topics in Computational Fluid Dynamics (3)  Modern approximation theory for Euler and Navier-Stokes conservation systems, compressible flow, hyperbolic forms, boundary conditions. Weak forms, extremization, finite element/volume/flux vector discrete implementations, a priori error estimates, accuracy, convergence, stability. Numerical linear algebra, approximate factorization, sparse matrix methods. Dissipation, Fourier spectral analysis, smooth and non-smooth solutions.  (Same as Aerospace Engineering 651; Mechanical Engineering 651.)

(DE) Prerequisite(s): 552.
234 COURSES OF INSTRUCTION

652 Advanced Topics in Computational Fluid Dynamics (3) Applications of modern CFD theory and code practice for Euler and Navier-Stokes conservation systems. Computer projects in incompressible/compressible flow, viscous, turbulent, reacting and/or inviscid/potential subsonic to hypersonic flows. (Same as Aerospace Engineering 662; Mechanical Engineering 652.) (DE) Prerequisite(s): 645 and 651.

653 Advanced Topics in Computational Solid Mechanics (3) Fracture mechanics; singularity solutions; non-linear constitutive problems, variable stiffness, initial strain-stress methods, plasticity, creep; geometrically non-linear problems, large deflection, stability, shell structures, solids; accuracy, convergence, adaptive grids; systems of nonlinear equations, solvers. Use of production-level finite element software. Computer projects. (Same as Aerospace Engineering 663; Mechanical Engineering 653.) (DE) Prerequisite(s): 553.

654 Advanced Topics in Computational Solid Mechanics (3) Fracture mechanics; singularity solutions; non-linear constitutive problems, variable stiffness, initial strain-stress methods, plasticity, creep; geometrically non-linear problems, large deflection, stability, shell structures, solids; accuracy, convergence, adaptive grids; systems of nonlinear equations, solvers. Use of production-level finite element software. Computer projects. (Same as Aerospace Engineering 664; Mechanical Engineering 654.) (DE) Prerequisite(s): 553.

659 Advanced Mechanics of Materials II (3) (See Mechanical Engineering 659.)

671 Advanced Topics in Applied Artificial Intelligence (3) (See Nuclear Engineering 671.)

681 Advanced Topics in Engineering Mechanics (3) Advanced problems in mechanics, group or individually. Repeatability: May be repeated with consent of department. Registration Permission: Consent of instructor.

English (339)

Students enrolling in English graduate courses must first register in the office of the Director of Graduate Studies in 306 McClung Tower.

401 Medieval Literature (3) Reading and analysis of selected medieval literary masterpieces in modern English. (Same as Medieval Studies 405.)

402 Chaucer (3) Reading and analysis of the Canterbury Tales and Troilus and Criseyde in Middle English. (Same as Medieval Studies 406.)

404 Shakespeare I: Early Plays (3) Shakespeare’s dramatic achievement before 1601. Reading and discussion of selected plays from romantic comedies, including Twelfth Night; English histories; including Henry IV; and early tragedy, including Hamlet.

405 Shakespeare II: Later Plays (3) Shakespeare’s dramatic achievement between 1601 and 1613. Reading and discussion of selected plays from great tragedies, including Othello; problem plays, including Measure for Measure; and dramatic romances, including The Tempest.

406 Renaissance Drama (3) English theatre between 1590 and 1640. Representative plays by Shakespeare’s contemporaries – Marlowe, Webster, Jonson.

409 Spenser and his Contemporaries (3) Principal achievements in prose and poetry of 16th-century authors – Spenser, Wyatt, Marlowe, More, Sidney, and Bacon.

411 Literature of the Restoration and Early 18th Century: Dryden to Pope (3) Survey of English literature and culture from 1660 to 1745.

412 Literature of Later 18th Century: Johnson to Burns (3) Survey of English literature and culture from 1745 to 1800.

413 Restoration and 18th-Century Genres and Modes (3) Study of one major genre or literary mode such as drama, novel, poetry, nonfiction, prose, satire, romance, or epic written between 1660 and 1800. Repeatability: May be repeated.

414 Romantic Poetry and Prose I (3) Emphasis on Wordsworth, Coleridge, and Blake; with readings from Lamb, De Quincey, and other prose writers.

415 Romantic Poetry and Prose II (3) Emphasis on Keats, Shelley and Byron; with readings from Hazlitt, Peacock, and other prose writers.

416 Early Victorian Literature (3) May include poetry by Tennyson and the Brownings; prose by Carlyle, Newman, and Mill.

419 Later Victorian Literature (3) May include poetry by the Pre-Raphaelites, Arnold, Hopkins, and Hardy; prose by Arnold, Ruskin, and Carroll; plays by Gilbert and Wilde.

420 The 19th-Century British Novel (3) Major novelists from Scott to Hardy.

421 Modern British Novel (3) Authors such as Joyce and Woolf through contemporary British fiction writers.

422 Women Writers in Britain (3) Emphasis on the literary consciousness and works of women writers in Britain. Course content will vary. Authors covered may include Marie de France, Margery Kempe, Aemilia Lanyer, Elizabeth Cary, Aphra Behn, Frances Burney, Mary Wollstonecraft, Mary Shelley, George Eliot, Virginia Woolf, and Doris Lessing. (Same as Women’s Studies 422.) Repeatability: May be repeated. Maximum 6 hours.

423 Colonial and Post-Colonial Literature (3) Emphasis on historical and theoretical methodologies for reading colonial and post-colonial literature.

431 Early American Literature (3) From the earliest texts to 1830, including exploration and discovery, Native American, colonial, revolutionary, and early national works.

432 American Romanticism and Transcendentalism (3) Prose and poetry of the American Renaissance, from c. 1830 to the end of the Civil War. Includes writers such as Cooper, Poe, Hawthorne, Melville, Emerson, Thoreau, Stowe, Douglass, Whitman, Dickinson.

433 American Realism and Naturalism (3) Literature from the time of the Civil War to World War I, including such writers as Twain, Howells, James, Jewett, Freeman, Crane, and Norris.

434 Modern American Literature (3) World War I to the present.

435 American Novel before 1900 (3) From earliest sentimental novels through Brown and Cooper, and major figures to 1900, including Hawthorne, Melville, Stowe, Clemens, and James.

436 Modern American Novel (3) Authors such as Faulkner, Steinbeck, Welty.

441 Southern Literature (3) Southern writing from colonial period into the 20th century, including frontier humorists, local color writers, and southern literary renaissance.

442 American Humor (3) Development of American humor from the early 19th century into the 20th century, with particular emphasis on Mark Twain. (Same as American Studies 442.)

443 Topics in Black Literature (3) Content varies according to particular genres, authors, or theories from 1845 to present, including Langston Hughes and the Harlem Renaissance, Richard Wright and Gwendolyn Brooks, writing by black women, international black literature in English, and black American autobiography. (Same as Africana Studies 443.)

451 Modern British and American Poetry (3) From Yeats and Frost to Auden, Stevens, and more recent poets.

452 Modern Drama, 1880-1945 (3) Survey of British, American, and international drama from the advent of modern drama to the end of World War II. (Same as Comparative Literature 452.)

453 Contemporary Drama (3) Survey of British, American, and international drama since World War II.

454 Twentieth-Century International Novel (3) Fiction in English translation from such writers as Kafka and Camus through contemporary authors. (Same as Comparative Literature 454.)

455 Persuasive Writing (3) Focuses on writing and analyzing persuasive texts in public, private, and academic contexts. (DE) Prerequisite(s): 355 or consent of instructor.

456 Contemporary/Postmodern Literature (3) Studies in literature written after World War II. Content will vary. Repeatability: May be repeated with consent of instructor. Maximum 6 hours.

460 Technical Editing (3) Editing technical material for publication. Principles of style, format, graphics, layout, and production management. (DE) Prerequisite(s): 360 or consent of instructor.

462 Writing for Publication (3) Principles and practices of writing for publication. Dissertations, theses, articles, and reports in science and technology. (DE) Prerequisite(s): 360 or consent of instructor.

463 Advanced Poetry Writing (3) Development of skills acquired in basic poetry-writing course. (DE) Prerequisite(s): 363 or consent of instructor.
464 Advanced Fiction Writing (3) Development of skills acquired in basic fiction-writing course.  
(DE) Prerequisite(s): 365 or consent of instructor.

466 Writing, Layout, and Production of Technical Documents (3) Principles of design for desktop publishing. Production of various documents to be incorporated into a professional portfolio.  
(DE) Prerequisite(s): 360 or consent of instructor.

470 Special Topics in Rhetoric (3) Topics vary. Repeatability: May be repeated with consent of department. Maximum 6 hours.  
(DE) Prerequisite(s): 355 or consent of instructor.

471 Sociolinguistics (3) Language in relation to society. Empirical and theoretical focus. Emphasis on large-scale units – tribes, nations, social groups. (Same as Linguistics 471.)  
(DE) Prerequisite(s): 371 or 372 or Linguistics 200 or consent of instructor.

472 American English (3) Phonological, morphological, and syntactic characteristics of major social and regional varieties of American English, with attention to their origins, functions, and implications for cultural pluralism. (Same as Linguistics 472.)  
(DE) Prerequisite(s): 371 or 372 or Linguistics 200 or consent of instructor.

474 Teaching English as a Second or Foreign Language I (3) Introduces major issues surrounding teaching ESL/EFL, including political implications of teaching ESL/EFL; introduction to second language acquisition; learning and language learning; traditional and innovative approaches to ESL/EFL; basic features of American English grammar necessary for teaching ESL. (Same as Linguistics 474.)  
(DE) Prerequisite(s): Second year of foreign language or consent of instructor.

476 Second Language Acquisition (3) How humans learn second languages. Examines theoretical models and research on such issues as differences between first and second language acquisition; the effect of age; cognitive factors in second language acquisition; learner variables; socio-cultural factors; and implications for second/foreign language instruction. (Same as Linguistics 476.)

477 Pedagogical Grammar for ESL Teachers (3) Aspects of English syntax and morphology presenting difficulties for non-native learners of English. Basic and complex sentence structures; noun and article system; and verb tense, aspect, modality, and complementation. (Same as Linguistics 477.)

479 Literary Criticism (3) Historical survey of major works of literary criticism.

480 Fairy Tale, Legend, and Myth: Folk Narrative (3) Study of forms of folk narrative: normally includes Grimm’s, Andersen’s, Irish, English, Appalachian, African, and Native American tales.

481 Studies in Folklore (3) Topics vary. Repeatability: May be repeated if topic differs. Maximum 6 hours.

482 Major Authors (3) Content varies. Concentrated study of at least one of the most influential writers in British or American literary history (e.g., Donne, Pope, Austen, Tennyson, Whitman, Faulkner, Lawrence, Baldwin, or Morrison).

483 Special Topics in Literature (3) Topics vary. Repeatability: May be repeated. Maximum 6 hours.

484 Special Topics in Writing (3) Original writing integrated with reading, usually taught by professional author. Repeatability: May be repeated. Maximum 6 hours.

485 Special Topics in Language (3) (Same as Linguistics 485.) Repeatability: May be repeated with consent of department. Maximum 6 hours.

486 Special Topics in Criticism (3) Content varies. Special topics in theoretical and practical approaches to British and American literature. Repeatability: May be repeated with consent of department. Maximum 6 hours.

489 Special Topics in Film (3) Content varies. Particular directors, film genres, national cinema movements, or other topics. (Same as Cinema Studies 489.) Repeatability: May be repeated with consent of department. Maximum 6 hours.

490 Language and Law (3) Language in the Anglo-American legal process: focus on differences between spoken and written language; lexical and syntactic pragmatics; legal discourse; and the language rights of linguistic minorities. (Same as Legal Studies 490; Linguistics 490.)  
(DE) Prerequisite(s): 371 or 372 or consent of instructor.

495 Introduction to Rhetoric and Composition (3) Introduction to the historical, theoretical, and empirical modes of inquiry in rhetoric and composition and their implications for the teaching of composition. (DE) Prerequisite(s): 355 or consent of instructor.

496 The Rhetoric of Legal Discourse (3) Applying basic principles of persuasive writing to legal materials. Writing position papers, briefs, and memoranda, students learn issue identification and argument. Critical reading and discussion of both professional and student writing. Introductory legal research techniques. No prior legal knowledge necessary. (Same as Legal Studies 496.)  
(DE) Prerequisite(s): 355 or consent of instructor.

500 Thesis (1-15) Gradation Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Gradation Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

505 Teaching Freshman Composition (3) Introduction to teaching Freshman English through study of various techniques and philosophies of composition. Required of all first-year teaching associates.

506 Introduction to Literary Research (3) Critical examination of aims of English studies, profession of English teacher, theory of literature, and methods of research: collection of information, evaluation of material, and transmission of results of scholarship.

507 Applied Criticism: The Rhetoric of Literary Forms (3) Study and application of ways in which major critics have analyzed form in poetry and prose fiction. Repeatability: May be repeated. Maximum 6 hours.

508 History of the English Language I (3) Phonological, morphological, and syntactic development of the English language: Old and Middle English. (Same as Linguistics 471.)

509 History of the English Language II (3) Phonological, morphological, and syntactic development of the English language with concentration on developments after 1500, especially in American English.

513 Readings in Mediterranean Literature (3) Reading and analysis of selected masterpieces of Old and Middle English literature and their continental sources in modern English. Repeatability: May be repeated. Maximum 9 hours.

514 Readings in Medieval Literature (3) Reading and analysis of selected masterpieces of Old and Middle English literature and their continental sources in modern English. Repeatability: May be repeated. Maximum 9 hours.

520 Readings and Analysis in Selected Areas of 16th- and 17th-Century Prose, Poetry, and Drama (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

521 Readings and Analysis in Selected Areas of 16th- and 17th-Century Prose, Poetry, and Drama (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

530 Readings in English Literature of the Restoration and 18th Century (3) Topics vary. Genre: poetry, prose, fiction, drama; or period: Restoration, early 18th century, later 18th century. Repeatability: May be repeated. Maximum 9 hours.

531 Readings in English Literature of the Restoration and 18th Century (3) Topics vary. Genre: poetry, prose, fiction, drama; or period: Restoration, earlier 18th century, later 18th century. Repeatability: May be repeated. Maximum 9 hours.

540 Readings in English Literature of the 19th Century I (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

541 Readings in English Literature of the 19th Century II (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

550 Readings in American Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

551 Readings in American Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

552 Readings in Black American Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.

560 Readings in 20th-Century Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. Repeatability: May be repeated. Maximum 9 hours.
561 Readings in 20th-Century Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. 
Repeatability: May be repeated. Maximum 9 hours.

575 Issues in Second/Foreign Language Rhetoric and Composition (3) Examination of cross-linguistic and cross-cultural issues in the development of academic writing proficiency in a second/foreign language. 
(Same as Linguistics 575.)

576 Introduction to Contemporary Criticism (3) Introductory survey of 20th-century literary criticism from New Criticism to present.

580 Fiction Writing (3) Advanced fiction projects under supervision of instructor and time for independent study. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): Extensive background in reading and writing fiction.

581 Colloquium in Poetry Writing (3) Major poetic project or continuation of project begun in 463. Individual consultation with instructor supplements class analysis; readings in contemporary poetry and theory. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 463 or consent of instructor.

582 Special Topics in Writing (1-3) Topics vary. 
Repeatability: May be repeated. Maximum 6 hours. 
Comment(s): Enrollment by consent of director of graduate studies.

583 Special Topics in Literature (3) Topics vary: genres, modes, and other literary subjects not in standard period divisions. 
Repeatability: May be repeated. Maximum 6 hours.

584 Topics in Feminist Studies (3) Topics vary. 
Repeatability: May be repeated. Maximum 9 hours.

585 Issues in Invention, Style, and Audience (3) Theoretical perspectives on contemporary research in rhetoric and composition.

586 History of Rhetoric I (3) Survey of rhetoric from Sophists to Ramus.

587 History of Rhetoric II (3) Survey of rhetoric from Bacon to present.

588 Readings in Applied Rhetoric (3) Content varies: Writing across curriculum, writing centers, technical communication, text linguistics. 
Repeatability: May be repeated. Maximum 6 hours.

589 Special Topics in Language (3) Topics vary. 
Repeatability: May be repeated. Maximum 6 hours.

590 Topics in Critical Theory (3) Topics vary. 
Repeatability: May be repeated. Maximum 9 hours.

591 Foreign Study (1-15) 
Repeatability: Not repeatable. May be taken once for 1-15 hours.

592 Off-Campus Study (1-15) 
Repeatability: Not repeatable. May be taken once for 1-15 hours.

593 Independent Study (1-15) 
Repeatability: May be repeated once. 
Comments: May be taken once in the MA program and once in the PhD program.

594 Film History, Form, and Analysis (3) Issues in film studies: history of narrative film; concept of film form; critical approaches to film study (genre, auteur, formalist, and others); and critical analysis of individual films.

600 Doctoral Research and Dissertation (3-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated.

610 Studies in Old English Language and Literature (3) Old English grammar with readings in prose and poetry.

611 Studies in Beowulf (3) Translation and critical study of Beowulf. 
(DE) Prerequisite(s): 610 or consent of instructor.

620 Studies in Medieval English Literature (3) Seminar in literature and literary genres of Medieval English literature, read in Old and Middle English. Subject matter varies from year to year. 
Repeatability: May be repeated. Maximum 9 hours.

621 Studies in Chaucer (3) Seminar in text, interpretation, and criticism of Chaucer's writings. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): Previous course in Chaucer.

630 Studies in Renaissance Literature (3) Seminars: Spenser, Milton, 17th-century prose and poetry, Shakespeare, 16th-century prose and poetry, non-Shakespearian drama. 
Repeatability: May be repeated. Maximum 9 hours.

Repeatability: May be repeated. Maximum 9 hours.

640 Studies in Restoration and 18th-Century Literature (3) Topics vary: Swift, satire, restoration literature. Johnson and Boswell, Addison and Steele, restoration drama, Dryden. 
Repeatability: May be repeated. Maximum 9 hours.

641 Studies in Restoration and 18th-Century Literature (3) Topics vary: Swift, satire, restoration literature. Johnson and Boswell, Addison and Steele, restoration drama, Dryden. 
Repeatability: May be repeated. Maximum 9 hours.

650 Studies in English Romanticism (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

651 Studies in Victorian Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

652 Studies in Victorian Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

660 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women's literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

661 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women's literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

662 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women's literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

670 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

671 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

672 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

680 Topics in English Language (3) 
Repeatability: May be repeated with consent of director of graduate studies.

682 Studies in Rhetoric and Composition (3) Content varies. Advanced work in theory and/or history of rhetoric and composition. Issues in invention, textuality, literacy, historiography, style and ethics. 
Repeatability: May be repeated. Maximum 9 hours.

686 Studies in Creative Writing (3) Content varies. Connection between theory and practice in writing. 
Repeatability: May be repeated. Maximum 9 hours.

688 Studies in Literary Criticism (3) Content varies. Advanced work in theory and history of literary criticism. 
Repeatability: May be repeated. Maximum 9 hours.

690 Special Topics (3) Content varies. History of ideas, humor, biography, autobiography, extra-literary disciplines. 
Repeatability: May be repeated. Maximum 9 hours.

694 Studies in Film (3) Content varies. Advanced work in film history and analyses. 
Repeatability: May be repeated. Maximum 6 hours.

English Education (340)

459 Teaching English in the Secondary School (3) Techniques of teaching composition, language, and literature. 
Comment(s): Admission to teacher education required.

460 Teaching Reading and Literature in the Secondary School (3) Teaching basic reading skills and literature.

507 Teaching Poetry Grades 7-12 (3) Research and theory in application to teaching of poetry. Design of strategies and materials for teaching and writing and reading of poetry. Review of texts and materials.

508 Teaching Composition in the Secondary School (3) Teaching narration, description, exposition, and argumentation; writing process and marking of student papers.

509 Teaching Fiction in the Secondary School (3) Teaching of novels and short stories.
521 Interdisciplinary Aesthetics (3) Discussions, visual and audio presentations concerned with aesthetic considerations of areas of study: geography, history, physics, literature, languages, music, visual arts and drama.

543 Teaching Language Arts in the Middle Grades (3) Activities in this class are intended to promote the professional growth of pre-service and in-service language arts teachers through study, design, and implementation of language arts curriculum and instructional strategies. In particular, methods of teaching contemporary language arts content in grades 4-8 will be explored.

590 Seminar in Teaching English in Secondary Schools (3) Content varies. Theoretical and practical approaches to teaching English in secondary school.

Repeatability: May be repeated. Maximum 9 hours.

592 Linguistics and the Teaching of English (3) Grammar, usage, semantics, dialectology, history of language, and lexicography.

597 Teaching Drama Grades 7-13 (3) Strategies and materials for teaching creative dramatics, enacting and writing of plays, reading of scripts.

598 Developing Speaking and Listening Skills, Grades 7-12 (3) Teaching approaches to nonverbal communication, interpersonal and group communication, public address and listening. Review of tests and materials.

601 Studies in English Education (3) Issues and research in teaching of English.

Entomology and Plant Pathology (341)

410 Diseases and Insects of Ornamental Plants (3) Symptoms, identification and management of diseases and insect pests that affect plants in greenhouse, nursery, and landscape environments.

(DE) Prerequisite(s): 313 or 321 or consent of instructor.

451 Plant Tissue Culture (3) Methods for the culture of cells, tissues, and organs including media preparation and maintenance of cultures.

(Same as Plant Sciences 451.)

Contact Hour Distribution: Lecture and lab.

(DE) Prerequisite(s): 110 and 120 or Biology 130 and 140 and Chemistry 120 and 130. Recommended Background: 310, 321 and 412; Microbiology 310 or 319; Plant Sciences 330.

500 Thesis (1-15)

Grading Restriction: P/INP only.

Repeatability: May be repeated.

Registration Restriction(s): Master of Science – entomology and plant pathology major.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

505 Mycology (3) Survey of the fungal kingdom and traditional allies in the context of phyla and classes. Systematics, biology, reproduction, structure-function, physiology, and ecology illustrated with fresh and preserved material and cultural techniques in laboratories.

Contact Hour Distribution: 2 hours and 1 lab.

Credit Restriction: Students cannot receive credit for both 405 and 505.

(DE) Prerequisite(s): Biology 111 and 112 or Biology 130 and 140.

507 Professional Development Seminar (1) (See Agriculture and Natural Resources 507.)

512 Soilborne Plant Pathogens (3) Causal agents; host-para site-soil environment interactions; epidemiology; detection and identification of soilborne plant pathogens; biological, cultural, and chemical control.

Credit Restriction: Students who receive credit for 512, may not enroll in 512.

(DE) Prerequisite(s): 313 or consent of instructor.

Comment(s): Master’s students only.

513 Plant Pathogenic Fungi (2) Morphology, taxonomy, and biology of fungal plant pathogens. (Same as Plant Sciences 513.)

Contact Hour Distribution: 2 hours and 2 labs weekly for 7 weeks.

(DE) Prerequisite(s): 313 or consent of instructor.

514 Bacterial Plant Diseases (2) Morphology, taxonomy, ecology, physiology, and genetics of bacterial plant pathogens; infection and disease development, pathogenesis and resistance; diagnosis, detection, effect of environment, and management of bacterial plant diseases; beneficial plant-bacterial interactions.

Contact Hour Distribution: 3 hours and 1 lab for 7 weeks.

(DE) Prerequisite(s): 313 or consent of instructor.

515 Physiology of Plant Disease (3) Biochemical and physiological events involved in host-pathogen interactions. Mechanisms of disease resistance.

Credit Restriction(s): Students taking 515 cannot receive credit for 615.

(DE) Prerequisite(s): Introductory plant physiology and pathology or consent of instructor.

Comment(s): Master’s students only.

520 Plant Parasitic Nematodes (2) Morphology, physiology, taxonomy, ecology, and management of plant parasitic nematodes, host-parasite relationships.

Contact Hour Distribution: 2 hours and 2 labs weekly for 7 weeks. Recommended Background: 8 hours of biology.

521 Plant Virology (3) Symptomatology, epidemiology, and management of virus infection; structure, morphology, replication, transmission, purification, characterization, and classification of plant viruses; serology; plant pathogenic viroids, mycoplasmas and spiroplasmas.

Contact Hour Distribution: 2 hours and 1 lab.

Prerequisite(s): 313 or consent of instructor.

523 Field Crop and Vegetable Insects (2) Identification, biology and management of insects affecting commercial vegetable and home garden crops.

Contact Hour Distribution: 1 hour and 1 lab.

(DE) Prerequisite(s): 321 or basic entomology course.

525 Medical and Veterinary Entomology (3) Morphology, taxonomy, biology and control of arthropod parasites and vectors of pathogens of humans and animals. Ecology and behavior of vectors in relation to pathogen transmission and control.

Contact Hour Distribution: 2 hours and 1 lab.

(DE) Prerequisite(s): 321 or 325 or consent of instructor.

530 Integrated Pest Management (3) Principles and application of biological, cultural, genetic, behavioral, and chemical methods of control to maintain pest populations below economic threshold levels. (Same as Plant Sciences 530.)

(DE) Prerequisite(s): 321 or consent of instructor.

531 Special Problems in Entomology (1-3) Comprehensive individual study of current problems.

Repeatability: May be repeated. Maximum 6 hours.

532 Special Problems in Plant Pathology (1-4) Comprehensive individual study of current problems.

Repeatability: May be repeated. Maximum 6 hours.

533 Concentrated Study in Entomology (1-3) Selected subjects in entomology for advanced students, concentrated in time and subject matter.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Prerequisite(s): 321 or basic entomology course.

541 Seminar (1-2) Review in oral or poster form of literature and current research in entomology or plant pathology, or report on student’s thesis research; critique and analysis of presentation effectiveness. Presentations on current topics by outside speakers.

Repeatability: May be repeated. Maximum 6 hours.

Comment(s): Master’s students only.

544 Protein Gel Electrophoresis (1) Practical experience with isolating native and denatured proteins from plants and fungi; determining protein composition. PAGE of proteins including total proteins and assays for specific enzymes (isozyme) analyses. (Same as Plant Sciences 544.)

Contact Hour Distribution: 1 hour and 4 labs weekly for 5 weeks.

Recommended Background: 8 hours of biology or botany and 8 hours of chemistry.

545 Plant Microtechnique (1) Practical light and scanning electron microscopy methods for investigating aspects of plant development, histology and pathological structures in ornamental forest and crop species. (Same as Plant Sciences 545.)

Contact Hour Distribution: 1 hour and 4 labs weekly for 5 weeks.

Recommended Background: 8 hours of biology or botany and 8 hours of chemistry.

548 Taxonomy of Adult Insects (3) Classification, phylogeny, and distribution of insects and related arthropods. Lectures on theory and practice of insect systematics and major features of insect evolution. Laboratory practice on methods of collection, preservation, and study of insects, with emphasis on order and family identification of adults. Substantial insect collection (above requirements for 448), one or more field trips, and a taxonomically oriented project required.

Credit Restriction: Students cannot receive credit for both 548 and 448.

Registration Permission: Consent of instructor.

550 Molecular Epidemiology and Mycology (3) An overview of molecular tools for exploring population biology as well as gene function with an emphasis on tools for emerging and traditional model organisms that have whole genome sequences available. The course will include lectures, assigned reading and discussion, and laboratory demonstrations.

(Same as Microbiology 550.)

Registration Restriction(s): Minimum student level – senior.

Registration Permission: Consent of instructor.
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated. Registration Restriction(s): Doctor of Philosophy – plant, soils, and insects major.

602 Advanced Topics in Entomology (1-3)
Morphology, systematics, physiology, ecology and genetics of arthropods, acipulcure, medical and veterinary entomology, insect biodiversity, and insect pathology.
Repeatability: May be repeated. Maximum 12 hours.

604 Advanced Topics in Plant Pathology (1-3)
Biological control, disease diagnosis and management, epidemiology, fungal plant pathogens, integrated pest management, molecular plant-microbe interactions, nematology, plant pathogenesis, plant pathogenic bacteria, soil- and seed-borne pathogens, and virology.
Repeatability: May be repeated. Maximum 12 hours.

606 Advanced Topics in Bioactive Natural Products (1-3)
Bioactive pesticides, ethnobotany and paleoethnobotany, ethnomedicine, biocontrol of plant pathogens, bioprospecting, natural product diversity, alternative bioactive crops, organic agriculture, allelopathy in agriculture, regulatory issues in natural product development, and bioactivity-guided isolation.
Repeatability: May be repeated. Maximum 12 hours.

608 Advanced Topics in Integrated Pest Management (1-3)
Selected issues and topics of current significance to integrated pest management: transgenics in agriculture, issues in biological control, pesticide resistance management, ethics in pest management, environmental manipulations, epidemiology of plant diseases, biological control of plant pests, induced plant resistance, plant-microbe interactions, and new pesticide chemistries.
Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 530 or consent of instructor.

612 Soilborne Plant Pathogens (3)
Causal agents; host-parasite-soil environment interactions; epidemiology; detection and identification of soilborne plant pathogens; biological, cultural, and chemical control.
Credit Restriction(s): Students who have received credit for 512 may not enroll in 612.

(DE) Prerequisite(s): 313 or consent of instructor.

615 Physiology of Plant Disease (3)
Biochemical and physiological events involved in host-pathogen interactions. Mechanisms of disease resistance.
Credit Restriction: Students who have taken 515 cannot receive credit for 615.

(DE) Prerequisite(s): Introductory plant physiology and plant pathology or consent of instructor.

Comment(s): PhD students only.

640 Seminar (1)
Review of literature and current research in entomology and plant pathology.
Repeatability: May be repeated. Maximum 2 hours.

Comment(s): PhD students only.

643 DNA Analysis (2)
Practical experience in isolating genomic DNA from prokaryotic and eukaryotic organisms, amplification of DNA using arbitrary nucleotide primers. DNA profiling techniques (DAF, ASAP, ITS ribosomal DNA and 16S bacterial gene) isolation and purification of amplified products. Data collection and analysis of relationships between organisms. (Same as Plant Sciences 643.)

Contact Hour Distribution: 1 hour and 4 labs weekly for 7 weeks.

(DE) Prerequisite(s): 12 hours biological science and 8 hours chemistry. Registration Permission: Consent of instructor.

Environmental and Soil Sciences (345)

434 Environmental Soil Chemistry (3)
Composition and chemical properties of soils and processes that govern fate and behavior of chemicals in soil environment. Topics include clay mineralogy; soil organic matter; mineral weathering and stability; aqueous speciation; surface chemistry; ion exchange, adsorption, and molecular retention; oxidation-reduction; and soil acidity, alkalinity, and salinity.

Recommended Background: Organic chemistry.

442 Soil Genes and Classification (3)
Soil genes and formation; observing and describing morphology of agricultural and forest soils; chemical and physical properties, classification. Includes 3 weekend field trips.

Contact Hour Distribution: 2 hours and 1 lab.

Recommended Background: General soils.

444 Transport Processes in Soil (3)
Basic understanding of soil physical properties and processes; influence of soil physical properties on water and chemical movement in soil; practical experience in the measurement and analysis of soil physical properties, water flow, and chemical movement in soil.

Recommended Background: General soils and physics.

462 Environmental Climatology (3)
Study of atmosphere as environment. Physical, chemical and biological factors affecting climates of various earth environments; meteorological process affecting biosystems. Climatic change and the human impact on the atmosphere, consequences of climatic change and mitigation policies, microclimates and urban climates, atmospheric pollution, extreme events and ozone depletion. Design and operation of weather information systems; automated weather stations.

Recommended Background: Computer proficiency.

500 Thesis (1-15)
Grading Restriction: P/NP only. Registration Restriction(s): Master of Science – environmental and soil sciences major.

502 Registration for Use of Facilities (3-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory-No Credit grading only.

Credit Restriction: May not be used toward degree requirements.

503 Seminar (1)
Presentations and discussions of current scientific material. (Same as Biosystems Engineering 503; Biosystems Engineering Technology 503.)

511 Soil-Plant Relationships (3)
Principles of mineral nutrition of higher plants: plant physiological characteristics that influence uptake of water and nutrients; functions of nutrient elements in plants; soil factors influencing nutrient availability to plants; important relationships at soil-plant root interface; and responses to adverse soil environmental conditions.

Contact Hour Distribution: 3 hours and 1 rec.

Recommended Background: Plant physiology.

512 Pedology (3)
Physical and chemical weathering processes, factors of soil formation, soil forming processes. Contact Hour Distribution: 2 hours and 1 lab.

Recommended Background: Soil genesis and classification.

513 Advanced Soil Chemistry (3)
Chemical properties and processes that operate in soil environment: thermodynamics of soil solutions and surface chemistry of soils, soluble complex formation, mineral solubility, electrochemical equilibria, geochemical modeling, ion exchange equilibria, surface functionality and reactivity, adsorption phenomena, and surface complexation modeling.

Recommended Background: Soil chemistry.

514 Environmental Soil Physics (3)
Principles of water, gas, heat, and solute movement in soil/water systems; application of appropriate models for the description of these processes; methods for characterizing hydraulic and chemical transport properties of soil; applications of the science of soil physics to soil science of contemporary problems in water conservation, prevention of surface/ground water contamination, and management of plant water status.

Recommended Background: Soil physics.

516 Soil Biology and Biochemistry (3)
Soil organisms and their activities in soils: soil ecology, biogeochemical cycling of important elements, organic matter dynamics, and applications of agricultural and environmental biology and biochemistry.

Contact Hour Distribution: 2 hours and one 3-hour lab.

Recommended Background: General soils.

593 Special Problems in Plant and Soil Science (1-3)
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only. Registration Restriction(s): Doctor of Philosophy – plants, soils, and insects major.

601 Special Topics in Soil Science (1-3)
Thermodynamics of soil solutions, clay structure and surface chemistry, soil mineralogy, plant mineral nutrition, soil microbiology, water movement and use by plants, soil structure, soil thermal properties, interaction in the soil-plant environment.

Repeatability: May be repeated. Maximum 6 hours.

603 Seminar (1)
Presentations and discussions of current scientific material. (Same as Biosystems Engineering 603.)

Repeatability: May be repeated. Maximum 3 hours.

613 Advanced Topics in Soil Chemistry and Fertility (2)
Topics of current significance; scientific literature.

(PE) Prerequisite(s): 513.

614 Advanced Topics in Soil Biology and Biochemistry (2)
Topics of current significance; scientific literature.

(PE) Prerequisite(s): 514.

<td>Special topics in environmental engineering.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
<tr>
<td>517</td>
<td>517 Industrial Waste Unit Operations and Processes (3)</td>
<td>Theoretical design and laboratory modeling of industrial waste treatment processes and operations.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
<tr>
<td>518</td>
<td>518 Air Quality Management/Pollution Control (3)</td>
<td>Introductory course on concepts of air pollution, analysis of relationships among sources, meteorology, effects; stack sampling; emission control systems.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
<tr>
<td>519</td>
<td>519 Design of Air Pollution Control Systems (3)</td>
<td>Design and evaluation of systems used to control emission of gaseous and particle air pollutants. Comprehensive design of specific devices and systems.</td>
<td>(DE) Prerequisite(s): 518.</td>
</tr>
<tr>
<td>520</td>
<td>River Mechanics (3)</td>
<td>An integrated study of river mechanics including the principles of open channel flow, and the fluvial processes associated with a mobile bed. Theory and analysis of open channel hydraulics include uniform, gradually- varied, rapidly- varied, spatially- varied, and unsteady flow conditions. Fluvial processes consist of sediment properties, dynamics of suspended and bedload sediment transport, adjustments in channel morphology and channel stability, channel regime theory and erodible channel design, and modeling applications.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
<tr>
<td>521</td>
<td>Floodplain and Urban Flood Management (3)</td>
<td>Review of national, regional, and local flood problems; state of the art flood damage reduction alternatives: structural and non-structural; institutional responses: policies, programs, organizations, regulations, and legal aspects: floodplain hydrology and hydraulics, HEC-1, HEC-2: floodway encroachment, flood hazard zone and damage potential determinations; cast studies.</td>
<td>(DE) Prerequisite(s): 390 or consent of instructor for non-majors.</td>
</tr>
<tr>
<td>522</td>
<td>Soil Erosion and Sediment Yield (3)</td>
<td>Theory of soil erosion and sediment yield processes from disturbed land; methods and computer models for estimating sediment yield. Erosion and sediment control theory and management practices. Local and state regulations.</td>
<td>(DE) Prerequisite(s): Civil Engineering 395 or 416.</td>
</tr>
<tr>
<td>523</td>
<td>Urban Hydrology and Stormwater Engineering (3)</td>
<td>Planning, design, modeling, management, and maintenance of urban stormwater systems. Theory and application of hydraulic and hydrologic principles to design of stormwater management systems; design of inlet structures, conveyance systems, detention/retention basins and appurtenances, and selected best management practices (BMP’s); evaluation of land-use changes of runoff quantity and quality; review, selection and application of contemporary computer models.</td>
<td>(DE) Prerequisite(s): Civil Engineering 395 or 416.</td>
</tr>
<tr>
<td>524</td>
<td>Applied Ground Water Hydrology (3)</td>
<td>Applied hydrology of multi-layered aquifer systems. Modeling of complex groundwater systems that will include: the development and implementation of conceptual, analytical and numerical models. Numerical approaches to the solution of PDEs that describe flow through porous media: boundary conditions, stability, existence and uniqueness.</td>
<td>(DE) Prerequisite(s): 485 or Geology 485 or consent of instructor.</td>
</tr>
<tr>
<td>525</td>
<td>Instrumentation and Measurement (3)</td>
<td>Lectures and laboratory class dealing with functions of the body in muscular work. Topics include physiological aspects of fatigue, training, and adaptation to environment.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
<tr>
<td>526</td>
<td>526 Biological Treatment Theory (3)</td>
<td>Theory and design applications of biological processes to treatment of wastewater and solid wastes.</td>
<td>(DE) Prerequisite(s): Civil Engineering 390 or 416.</td>
</tr>
<tr>
<td>527</td>
<td>527 Aquatic Chemistry (3)</td>
<td>Theoretical, applied and analytical chemistry related to generation, measurement and treatment of environmental contaminants.</td>
<td>(DE) Prerequisite(s): General chemistry course.</td>
</tr>
<tr>
<td>528</td>
<td>528 Air Quality Dispersion Modeling (3)</td>
<td>Diffusion in atmosphere; application of atmospheric dispersion models and evaluation of meteorological and air quality data.</td>
<td>(DE) Prerequisite(s): 527.</td>
</tr>
<tr>
<td>529</td>
<td>529 Sampling of Air Pollutants (3)</td>
<td>Standard sampling methods for particulate and gaseous air pollutant emissions from industrial processes; ambient air monitoring instrumentation/techniques.</td>
<td>(DE) Prerequisite(s): 529.</td>
</tr>
<tr>
<td>530</td>
<td>530 Applied River Mechanics (3)</td>
<td>Study of river mechanics.</td>
<td>(DE) Prerequisite(s): Civil Engineering 395 or 416.</td>
</tr>
<tr>
<td>531</td>
<td>531 Urban Hydrology and Stormwater Engineering (3)</td>
<td>Planning, design, modeling, management, and maintenance of urban stormwater systems. Theory and application of hydraulic and hydrologic principles to design of stormwater management systems; design of inlet structures, conveyance systems, detention/retention basins and appurtenances, and selected best management practices (BMP’s); evaluation of land-use changes of runoff quantity and quality; review, selection and application of contemporary computer models.</td>
<td>(DE) Prerequisite(s): Civil Engineering 395 or 416.</td>
</tr>
<tr>
<td>532</td>
<td>532 Soil Erosion and Sediment Yield (3)</td>
<td>Theory of soil erosion and sediment yield processes from disturbed land; methods and computer models for estimating sediment yield. Erosion and sediment control theory and management practices. Local and state regulations.</td>
<td>(DE) Prerequisite(s): Civil Engineering 395 or 416.</td>
</tr>
<tr>
<td>533</td>
<td>533 Applied Ground Water Hydrology (3)</td>
<td>Applied hydrology of multi-layered aquifer systems. Modeling of complex groundwater systems that will include: the development and implementation of conceptual, analytical and numerical models. Numerical approaches to the solution of PDEs that describe flow through porous media: boundary conditions, stability, existence and uniqueness.</td>
<td>(DE) Prerequisite(s): 485 or Geology 485 or consent of instructor.</td>
</tr>
<tr>
<td>534</td>
<td>534 Instrumentation and Measurement (3)</td>
<td>Lectures and laboratory class dealing with functions of the body in muscular work. Topics include physiological aspects of fatigue, training, and adaptation to environment.</td>
<td>(DE) Prerequisite(s): Consent of instructor.</td>
</tr>
</tbody>
</table>

Exercise Science (347)

480 Physiology of Exercise (3) Lecture and laboratory class dealing with functions of the body in muscular work. Topics include physiological aspects of fatigue, training, and adaptation to environment. (DE) Prerequisite(s): Biochemistry and Cellular and Molecular Biology 480. Grading Restriction: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/No Credit only. Registration Permission: Consent of instructor.

501 Special Project (3) Culminating experience for non-thesis major. Research study suitable for publication, or practicum requiring special written work. Grading Restriction: Satisfactory/No Credit grading only.
502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

508 Research in Exercise Science (3)
Research for writing of thesis and institutional review board proposals; presentation of research through free communications and poster presentations; calculation and interpretation of statistics related to common research designs used in research; and use of computer software.

509 Graduate Seminar in Public Health (1) (See Public Health 509.)

513 Biomechanics of Orthopedic Rehabilitation (3)
Effect of physical activity on musculoskeletal tissue: flexibility development and measurement, surgical implications, and rehabilitation related research.

516 Therapeutic Exercise (3)
Current research in therapeutic exercise: role of nervous system, soft tissue healing, proprioception, muscle activation patterns, and strength.

521 Physical Activity Epidemiology Methods (3)
Epidemiological foundation for research in physical activity related to individual and population-based health. Emphasis on analytic methods, surveys, and research designs. Focus on issues within special populations (e.g., elderly, children).
(DE) Prerequisite(s): Course in statistics or consent of instructor.

525 Epidemiology of Injury and Violence (3)
Epidemiologic methods to describe magnitude and examine etiology of unintentional and intentional injury. Alternative approaches for preventing or controlling occurrence of injury and violence in both general population and high risk sub-populations.

531 Biomechanics (3)
Biomechanical principles and applications to analyses of human movements. Quantitative analysis of human movements.
(DE) Prerequisite(s): General physics course.

533 Exercise Physiology (3)
Physiology of human performance: acute and chronic effects of exercise on metabolic, cardiac, pulmonary, and skeletal systems.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): Human physiology or general physiology course and a general chemistry course.

541 Special Topics (1-3)
Advanced study in selected areas of exercise science.
Repeatability: May be repeated. Maximum 6 hours.

565 Advanced Physiology of Exercise (3)
Systematic study of skeletal muscle and metabolism related to acute exercise and physical training: lectures, discussions of major scientific reviews, and appropriate laboratory experiments.
(DE) Prerequisite(s): 480 or 533.

567 Exercise Testing and Prescription (3)
Physiological adaptations to exercise training. Measurement and evaluation of cardiorespiratory function, body composition, strength, and flexibility.
(DE) Prerequisite(s): Undergraduate courses in human physiology and physiology of exercise.

569 Clinical Exercise Physiology (3)
Cardiac structure and function, interpretation of 12-lead electrocardiograms, exercise considerations for cardiac and pulmonary patient.
(DE) Prerequisite(s): 480 or 533 and 567.

570 Cardiac Rehabilitation Practicum (1-3)
Supervised experience in hospital-based exercise programs for participants with cardiac and/or pulmonary disorders. Use of telemetry monitoring, leading safe exercise regimens counseling participants on safe exercise guidelines. Presenting educational class on topic applicable to participants.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Corequisite(s): 557 and 567 or consent of instructor.

585 Seminar in Gerontology (1) (See Health 585.)

593 Independent Study (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NO only.
Repeatability: May be repeated.

601 Research Seminar (1)
Research topics in different aspects of exercise science, sport psychology, and sport sociology. (Same as Sport Studies 601.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

622 Directed Independent Research (3-6)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): For doctoral students. Others must obtain consent of instructor.

635 Physical Activity and Positive Health (3)
Review of clinical, epidemiological, and experimental evidence concerning relationship and effects of exercise on health-related components of fitness. (Same as Public Health 635.)
(DE) Prerequisite(s): Elementary statistics course, 480 or 533 and 567 or consent of instructor.

661 Seminar in Exercise and Applied Physiology (1-3)
Selected topics in exercise and environmental physiology.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 480 or 533.

664 Research Participation in Exercise Science (1-6)
Participation in research with faculty member whose interests coincide with those of student.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

681 Practicum (1-3)
Intern experience in areas of major interest. May be repeated.
Repeatability: May be repeated. Maximum 6 hours.

693 Independent Study (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

Finance (349)

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

511 Strategic Management for Creation of Financial Value (3)
Strategic issues in corporate finance, investments, and capital markets: how firms can employ financial strategies to create value. Use of derivatives, risk management, real options, fixed income securities, venture capital, initial public offerings and financial restructuring.
(DE) Prerequisite(s): Business Administration 511, 512, and 513 or consent of instructor.

512 Problems in Financial Management (3)
Readings and cases that apply finance theory to real-world investment, financing, and asset management problems.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

525 Investment Analysis and Portfolio Management (3)
Investment process, portfolio applications. Asset allocation decision in global setting; organization and functioning of financial markets; equity and bond valuation; asset valuation models; equity and bond portfolio management; options, forwards and futures contracts; evaluation of portfolio performance; and review of alternative economies and emerging markets.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

532 Commercial and Investment Banking (3)
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

551 Financial Management of a New Enterprise (3)
Financial issues associated with formation, control, and long-term planning of new enterprise. Acquisition of venture capital.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

581 Real Estate Investment and Finance (3)
Financial and market analysis used to make real estate investment decisions. Effects of variety of financing options on rate of return on income-producing properties. Effect of various financing options on consumer’s decisions to purchase. Relationship between primary and secondary mortgage markets and impact of those markets on cost and availability of funds for real estate lending. Effects of government intervention (taxation, subsidization, and regulation) in both real estate and mortgage markets.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.
593 Independent Study (3) Directed research and study. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): Business Administration 511, 512, 513, and 514, or consent of instructor.

599 Special Topics in Finance (1-3) Topics vary. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated.

641 Seminar in Finance (1-3) Capital markets, utility theory, asset pricing, theory of the firm, capital structure, dividend policy. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 641. 
Registration Permission: Consent of instructor.

651 Seminar in Corporate Finance (1-3) Recent theoretical and empirical developments in micro-finance literature. Topics vary. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 641. 
Registration Permission: Consent of instructor.

652 Seminar in Asset Pricing and Markets (1-3) Recent theoretical and empirical developments in finance. Topics vary. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 641. 
Registration Permission: Consent of instructor.

653 Seminar in Financial Institutions (1-3) Theoretical and empirical studies of financial institutions. Topics: modeling banking firm, efficiencies in banking, bank lending arrangements and asymmetric information, international competitiveness, and deposit insurance. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 641. 
Registration Permission: Consent of instructor.

654 Special Topics (1-3) Recent developments in finance. 
Grading: Satisfactory/No Credit or letter grade. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 641. 
Registration Permission: Consent of instructor.

693 Independent Study (1-6) Directed research on subject of mutual interest to student and staff member. 
Repeatability: May be repeated. Maximum 6 hours. 
Registration Permission: Consent of instructor.

Food Science and Technology (390)

410 Food Chemistry (3) Reactions of water, proteins, lipids, carbohydrates, minerals, enzymes, vitamins, and additives in foods. 
Contact Hour Distribution: 3 hours lecture. 
(DE) Prerequisite(s): Chemistry 110, Biochemistry and Cellular and Molecular Biology 310.

415 Food Analysis (4) Principles, methods and techniques for qualitative and quantitative analyses of composition and physical, chemical, and biological properties of food and food ingredients. 
Contact Hour Distribution: 3 hours and one 2-hour lab. 
(DE) Prerequisite(s): Chemistry 110 or 350.

419 Food Chemistry Lab (1) Interaction of water, proteins, lipids, carbohydrates, minerals, enzymes, vitamins, and additives in foods and methods of evaluation of chemical properties of foods. 
Contact Hour Distribution: One 2-hour lab. 
(PE) Corequisite(s): 410.

420 Food Microbiology (2) Physical, chemical and environmental factors moderating growth and survival of foodborne microorganisms; pathogenic and spoilage microorganisms affecting quality of foods and their control. 
(DE) Prerequisite(s): Microbiology 210. 
(PE) Corequisite(s): 420.

429 Food Microbiology Lab (3) Methods for examination, enumeration, cultivation and identification of foodborne microorganisms. 
(DE) Prerequisite(s): Microbiology 210. 
(PE) Corequisite(s): 420.

430 Sensory Evaluation of Food (3) Principles and methods of sensory evaluation of foods. 
Contact Hour Distribution: 2 hours and 1 lab. 
(DE) Prerequisite(s): Basic statistics course.

445 Application of Food Chemistry and Processing Principles (4) Interactions and functions of dairy, egg, cereal and other plant based ingredients during the production and storage of processed food products. 
Contact Hour Distribution: 3 hours lecture and 1 lab. 
(DE) Prerequisite(s): 340 and 410 or consent of instructor.

461 Fresh Meats (3) Basic principles in the conversion of muscle to meat and the factors that contribute to the utilization and marketing of quality fresh meat products.

462 Manufactured Meat Technology (2) Basic principles of manufacturing valued added meat products. 
Contact Hour Distribution: 1 hour lecture and 1 hour lab.

490 Food Laws and Regulations (3) A comprehensive examination of the laws and regulations designed to preserve safety, wholesomeness, and nutritional quality of the United States food supply with an in-depth analysis and discussion of precedent case studies and their impacts on laws and regulations. 
(DE) Prerequisite(s): 140. 
Registration Permission: Consent of instructor for non-majors.

495 Quality Assurance and Sanitation Practices (3) Design and evaluation of a food processing operation to produce a safe and acceptable quality food product. 
(DE) Prerequisite(s): 320 and 340 or consent of instructor.

500 Thesis (1-15) 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated.

501 Seminar (1) Individual reports and discussion on topics from current literature. 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 3 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3) 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 9 hours.

507 Professional Development Seminar (1) (See Agriculture and Natural Resources 507.)

510 Instrumental Analysis of Food (3) Modern instrumental methods for control of food manufacturing processes. 
Contact Hour Distribution: 2 hours and 1 lab. 
(DE) Prerequisite(s): 410.

515 Food Carbohydrates, Proteins and Lipids (4) Advanced study of chemical and physical attributes of carbohydrate, protein, and lipid components of foods; effects of components on production of safe and consistent quality food products; and changes during processing and/or distribution of food products. 
Contact Hour Distribution: 3 hours and 1 lab. 
(DE) Prerequisite(s): 410.

521 Advanced Food Microbiology (3) Extrinsic and intrinsic factors associated with foods and food processing that relate to growth, survival, inhibition, detection, and recovery of foodborne pathogens and spoilage organisms; traditional and current approaches to microbiological food safety and quality. 
(DE) Prerequisite(s): 420 and 429.

540 Food Product Development (3) Art, science and technology of developing and marketing new food products. 
Contact Hour Distribution: 2 hours and 1 lab. 
(DE) Prerequisite(s): 340.

541 Food Engineering (3) Transport processes in food engineering; unit operations: thermal and non-thermal processes of foods; food separations; processing and physicochemical properties of foods; calculations, design practices, and equipment used in food processing operations. 
Contact Hour Distribution: 2 hours and one 2-hour lab. 
Recommended Background: Basic calculus and physics.

590 Special Topics in Food Technology and Science (1-3) Critical reviews of current research and production concerns of food industry. 
Repeatability: May be repeated. Maximum 9 hours.

593 Directed Studies (1-3) Research on non-thesis topics chosen by student and major professor. Supervised experience in food industry or governmental laboratories. 
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated.
601 Seminar (1) Reports and directed research on current topics from current literature.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 3 hours.

515 Food Biopolymers (3) Study of biopolymers obtained from food and used in food and other industries. Chemical, physical and mechanical characterizations, chemical and physical modifications, and applications as functional ingredients, carriers, and packaging materials.
Contact Hour Distribution: 3 hours lecture.
Recommended Background: Organic chemistry and food chemistry.

620 Food Toxicology (3) Basic and applied concepts in food toxicology; toxicological aspects of processed foods. Mode of action, prevention and control of food toxicants in food supply.
(DE) Prerequisite(s): 410 and 521 or consent of instructor.

Forensic Science (310)

545 Teaching of Foreign Languages, Grades 7-12 (3) Instructional methods, lesson planning, peer-teaching; materials for teaching foreign language and culture; evaluation techniques. Required for certification in modern foreign languages and Latin.
(DE) Prerequisite(s): Completion or near completion of foreign language hours for certification. Comment(s): Enrollment requires admission to teacher education.

555 Foreign Language in the Elementary Schools Practicum (3) Experiences designing, implementing and assessing second language instruction in elementary school settings.
(DE) Prerequisite(s): 587 or consent of instructor.

556 English as a Second Language Practicum (3) Experiences designing, implementing and assessing English instruction to non-native English speakers. Course is required for ESL certification.
(DE) Prerequisite(s): 578 or consent of instructor.

578 Teaching English as a Second Language (3) Examines ESL pedagogy, practices, and instructional strategies that accommodate students in all levels of ESL/EFL settings. Required for Tennessee (PreK-12) licensure.
(DE) Prerequisite(s): 588 or consent of instructor.

588 Content-Based ESL Methods (3) Focused on designing and implementing content-based English as a Second Language instruction to enhance English language learners' academic achievement. Offered for ESL education students.
Registration Permission: Consent of instructor.

678 Advanced Studies in English as a Second Language (3) Research, curricula, assessment, trends and issues in English as a second language.
(DE) Prerequisite(s): 578 or consent of instructor.

687 Advanced Studies in Foreign Language Education (3) Research, curricula, assessment, trends and issues in foreign language education.
(DE) Prerequisite(s): 578 or consent of instructor.

Forestry (396)

422 Forest and Wildland Resource Policy (3) Policy formulation; criteria for policy determination; forest and wildland law and regulation; theory of conflict resolution; formal and informal resolution.
Comment(s): Senior standing or consent of instructor required.

423 Wildland Recreation Planning and Management (3) Planning processes, master and site planning, site design projects; management strategies, methods of visitor and recreation site management; case studies. Weekend field trips may be required.
Contact Hour Distribution: 2 hours and 1 lab.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Maximum 15 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

511 Problem Analysis in Forest Resources (3) Problem identification, analysis and solution in forest resources management. Identify, analyze and prepare written report. Topic and report must have approval of graduate committee.
Comment(s): Available only to forestry majors in the non-thesis option.

512 Seminar (1) Current developments in forestry. Required of all graduate students in residence in the fall.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 2 hours.

514 Tree Physiology (3) Tree structure, growth and development, and function, and how these are related to the environment and to cultural practices. Influence of environmental variables on plant growth and distribution; effects of forest management practices on growth and function.
Credit Restriction: Students cannot receive credit for both 514 and 414.
(DE) Prerequisite(s): Biology 111 and 112 or Biology 101 and 102.

515 Forest Conservation Workshop (1-3) Relation of forest biology, ecology and management to conservation issues; integration of current conservation issues into classroom work and student projects; environmental education strategies.
Repeatability: May be repeated. Maximum 3 hours.
Comment(s): Not available to students in forestry or wildlife and fisheries science.

520 Advanced Forest Ecology (3) Physiological ecology and adaptations of trees; relationships between overstory structure, microclimate, and understory response; regeneration ecology; competition and effects of natural and human disturbance regimes at multiple scales; forest succession and stand dynamics.
Comment(s): Requires graduate standing in forestry or biological science or consent of instructor.

521 Composite Materials from Renewable Resources (3) Manufacturing processes, science and engineering of composite materials derived from renewable resources. Overview of renewable resources and utilization; structure and properties of natural fibers, thermosets, thermoplastics, and bioplastics; fundamentals of adhesion; engineered wood composites; natural fiber reinforced composites; and mechanical property and durability testing.
(DE) Prerequisite(s): Basic understanding of polymer chemistry, engineering, physics, a silvicultural methods course, and Biology 220 or consent of instructor.

525 Woodlot Management (3) Current technologies and management strategies concerning wise use of forest resources for private, non-industrial forest landowners necessary for decision making and implementation. Contact Hour Distribution: 6.5 hours and 1 lab weekly for 6 weeks.
(DE) Prerequisite(s): 6 hours of biology sciences or consent of instructor.
Comment(s): Not available to students in forestry or wildlife and fisheries science.

530 Advanced Forest Resource Management (3) Analysis of forest problems and problems in public and private organizations. Classical forest regulation; linear and goal programming, as applied to resource management problems; advanced forest investment analysis; decision-making methods for primary forest management activities; and methodologies for incorporating non-timber values in forest management operations.
(DE) Prerequisite(s): Senior-level forest management course or consent of instructor.

550 Recreation Planning for Forests and Associated Lands (3) Planning process for recreation development on forests and associated lands; analysis and critique of specific contemporary alternatives. Includes overnight field trips.
(DE) Prerequisite(s): Senior-level course in forest recreation or consent of instructor.

580 Advanced Silviculture (3) Silvicultural characteristics, silvicultural practices and systems applied to commercially important hardwoods and softwoods. In-depth analyses of silvicultural principles involved and tools used, prescribed fire, pesticides, in regeneration and management; computer modeling of stand dynamics, structure, growth/yield.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: Silviculture course.

585 Advanced Forest Biometry (3) Application of sampling techniques to forest inventory; fixed and variable plot sampling; list sampling; Poisson sampling; regression estimators; multistage and multiphase sampling. Growth and yield predictors for even-aged and uneven-aged forests.
Recommended Background: Forest inventory and sampling coursework.

590 Advanced Topics in Forestry (1-3) Recent advances and concepts; research techniques and analysis of current problems. Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

593 Independent Study in Forestry (1-4) Repeatability: May be repeated. Maximum 6 hours.

530 Forest Growth and Development (3) Dendrochronology; forest stands; growth and development in trees; application of dendrochronology and forest stand dynamics; analysis of changes in species composition and forest stand structure (both physical and temporal) during forest succession, response of stands to disturbances (anthropogenic and natural), modeling techniques to make predictions of future stand development.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: Undergraduate course in silviculture.
Forestry, Wildlife and Fisheries (398)

410 Wildlife Habitat Evaluation and Management (3) Ecological relationships between wildlife and habitat. Evaluation, modeling, and management of wildlife habitat. Effects of land-use practices on wildlife habitat. Weekend field trips required.

Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: Undergraduate course in wildlife and fisheries.

416 Planning and Management of Forest, Wildlife and Fisheries Resources (3) Integrated forest and wildlife resource management through developing land management plans and analyzing case studies including conflict resolution.

Contact Hour Distribution: 1 hour and 2 labs.
Comment(s): To enroll, students must be at least a senior.

520 Natural Resource Issues at International Level (2) Identification and analyses of issues regarding forestry, wildlife, fisheries and woodland park resources beyond U.S. borders. Political, economic, social, and biophysical elements impacting natural resources in different parts of world: Northern Europe, Latin America, Asia, Africa, and South America. In-depth case study and class presentation required by student teams.
Credit Restriction: Not available to students who have taken 420.

535 Environmental Impacts to Natural Ecosystems (3) Current environmental problems impacting natural ecosystems: climatic change, acid deposition, air pollution, species declines, and introductions of exotic species. Management methodologies to mitigate environmental problems. Overnight field trips required.
Recommended Background: Undergraduate course in natural resource management.

540 Seminar on Integrated Resources Management in Biosphere Reserves (2) MA program, UNESCO-sanctioned global conservation initiative. Analysis of integrated resources management practices that demonstrate concept of sustainable development. Environmental policy and application of science to management practice. Applicable to majors in forestry and in wildlife and fisheries science.

570 Natural Resource Sustainability: Social, Political and Institutional Dimensions (3) Use and management of natural resources in a world of constant change, interdependent systems (environmental, social, economic and political), and inevitable conflicts, utilizing technical as well as social/political advances. Historical and current approaches to natural resource governance, associated and inherent conflicts, changes in institutions and new paradigms of collaboration, adaptive management, social learning and social capacity building.
Credit Restriction(s): Students who received credit for Forestry 570 may not receive credit for Forestry, Wildlife and Fisheries 570.
Comment(s): Graduate standing required.

590 Advanced Topics in Forestry, Wildlife and Fisheries (1-3) Recent advances and concepts, research techniques, and analysis of current problems.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.

Registration Permission: Consent of instructor.

610 Seminar in Natural Resources (2) Selected issues in natural resources and natural resource management at regional, national, or international level. Development of interdisciplinary approach to addressing problems: evaluating current state of knowledge, developing alternative actions to address problems, and identifying criteria for evaluation of alternatives.
Repeatability: May be repeated. Maximum 3 hours.

612 Seminar in Forestry, Wildlife and Fisheries (1) Current issues and developments in forestry, wildlife and fisheries. Required of all doctoral students in residence during the fall.
Repeatability: May be repeated. Maximum 3 hours.

French (405)

410 Medieval French Literature (3) Major representative works of Medieval French literature. Texts in modern French. (Same as Medieval Studies 410.)
(De) Prerequisite(s): 300-level literature course.

411 French Literature of the 16th Century (3) Highlights of 16th-century French literature. Excerpts from Rabelais and Montaigne; readings of poems from writers from Lyon and members of Pléiade.
(De) Prerequisite(s): 300-level literature course.

(De) Prerequisite(s): 300-level literature course.

413 French Literature of the 18th Century (3) Major works of the Enlightenment.
(De) Prerequisite(s): 300-level literature course.

(De) Prerequisite(s): 300-level literature course.

(De) Prerequisite(s): 300-level literature course.

420 French Cinema (3) The French cinema from its earliest days through New Wave directors. May be applied toward the French major. (Same as Cinema Studies 420.)
(De) Prerequisite(s): 300-level literature course.

421 Phonetics (3) Foundation in the science of phonetics. Practical exercises and individual performance.
Credit Restriction(s): Graduate credit is not available to students majoring in a Romance language.
(De) Prerequisite(s): 333 or 334 or 345 or permission of department.

422 Advanced Grammar (3) Improving one’s written French by studying basic and more refined structures of the French language. Writing creative free-style compositions.
(De) Prerequisite(s): 333 or 334 or 345.

423 Advanced Conversation (1) Informal conversation with native speaker on contemporary topics. Stresses in-class contact rather than outside preparation.
Contact Hour Distribution: Meets 2 hours a week.
(De) Prerequisite(s): 333 or 334 or 345.

424 Advanced Conversation (1) Informal conversation with native speaker on contemporary topics. Stresses in-class contact rather than outside preparation.
Contact Hour Distribution: Meets 2 hours a week.
(De) Prerequisite(s): 333 or 334 or 345.

425 Introduction to Descriptive Linguistics (3) Initiation into the theory and practice of techniques of linguistic analysis in the subfields of phonetics, phonology, morphology, syntax, semantics, pragmatics and historical linguistics; discussion of their relevance to the learning and teaching of foreign languages and to the study of literary texts. (Same as German 425; Linguistics 425; Russian 425; and Spanish 425.)
Recommended Background: Linguistics 200.

426 Methods of Historical Linguistics (3) (See German 426.)

429 Romance Linguistics (3) Development of Classical Latin through Vulgar Latin into major Romance languages. (Same as Linguistics 429; Spanish 429.)

430 Theatrical French (4) Comprehensive introduction to dramatic texts, performance, and theatrical production in French. Students collaborate in the creative staging of a French play and they actively participate in its public performance. May be applied toward the major as a literature course.
(De) Prerequisite(s): French 351 or French 352.

431 Highlights of French Civilization (3) Survey of French civilization from the Gauls to World War II. Historical events, daily life, all forms of arts.
(De) Prerequisite(s): French 300-level literature course.

432 Contemporary French Culture (3) Current French cultural issues placed in historical perspective with comparative emphasis. Taught in English; readings in French for majors. May be applied toward the French major.

434 Literature of Quebec (3) Survey of literature of Quebec, as well as French literature connected with North America. Readings include exploratory and missionary works, such as Voyages of Champlain and Journals of the Jesuits, as well as literature of contemporary Quebec.
(De) Prerequisite(s): 300-level literature course.
445 Advanced French for Business (3) Study of advanced contemporary French language and culture as they relate to business transactions. A comparative approach is used to explore differences and similarities between Francophone business culture(s) and those of North America and Japan. Students build upon their knowledge of business terminology while being sensitized to cultural differences and the dangers of simplistic stereotyping.

(DE) Prerequisite(s): 345 or consent of instructor.

450 Thesis (1-15)
Grading Restriction: P/NP grading only.
Repeatability: May be repeated.

501 Techniques in Literary Analysis (3) Close stylistic analysis of texts representative of different eras and different genres. Development and improvement of student’s written French. Required for MA students.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 The French Language (3) French as spoken and written from Medieval period to present.

512 Teaching a Foreign Language (3) Practical application of methods for teaching and evaluating basic language skills and foreign language skills, and cultural aspects through seminars, demonstrations, peer teaching, and observation of foreign language classes. Required of all MA and PhD students holding Graduate Teaching Assistantships, except those whose previous training or experience warrants their being excused by the department.

515 Technology Enhanced Language Learning (3) Introduction to TELL. Overview of existing software, programs, and professional literature on topic. Hands-on development of instructional Web site for teaching language, culture, or literature.

519 Bibliography and Methods of Research (3) Critical research tools and scholarly contributions in French literature and language. Practical exercises on compiling of scholarly data using computer-based and non-computer sources.

520 French and Francophone Film (3) French and Francophone culture through film.

530 French and Francophone Theater (3) Changing approaches to French and Francophone theater.

540 French Literature and Culture I (3) Literary and cultural heritage of French Middle Ages.

550 French Literature and Culture II (3) Literary and cultural heritage of 16th- and 17th-century France.

560 French Literature and Culture III (3) Literary and cultural heritage of 18th- and 19th-century France.

570 French and Francophone Literature and Culture I (3) Literary and cultural heritage of France and other Francophone countries in the first part of 20th century.

573 French and Francophone Literature and Culture II (3) Literary and cultural heritage of France and other Francophone countries from the late 20th century to present.

580 Critical Moments in French and Francophone Studies, or Linguistics (3) Contribution of France and Francophone world to evolution of literature, society, and ideas.
Repeatability: May be repeated. Maximum 12 hours.

584 Modern Theory and Criticism (3) Survey of 20th-century critical theory, including psychoanalysis, Marxism, structuralism, and more.

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

594 French Directed Readings (3)

595 French Directed Readings (3)

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

610 Doctoral Seminar in French and Francophone Studies, or Linguistics (3) Content varies.
Repeatability: May be repeated with consent of department. Maximum 12 hours.

Geography (415)

410 Global Positioning Systems and Geographic Data (3) Theory, field, and laboratory use of Global Positioning Systems for capturing digital geographic data: management of geographic data, including coordinate systems, datum issues, scanning digitizing, map standards, and uncertainty in Geographic Information Systems.
Contact Hour Distribution: 2 hours and one 2-hour lab.

411 Introduction to Geographic Information Science (3) Concepts and methods of spatial analysis and their application using geographic information systems software and techniques. Emphasizes both theoretical and applied aspects of GIS.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 310 or consent of instructor.

412 Advanced Cartography Techniques (3) Cartographic design and data display techniques for reference and thematic maps. Basic principles and methods of map reproduction.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 310 or consent of instructor.

413 Remote Sensing: Types and Applications (4) Principles and uses of remote sensing imagery, digital data, and spectral data, with particular emphasis on geographic interpretation and mapping techniques.
Contact Hour Distribution: 3 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 132.

414 Spatial Databases and Data Management (3) Types, sources, acquisition, and documentation of spatial data. Spatial database management methods and strategies for data sharing.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 411 or consent of instructor.

415 Quantitative Methods in Geography (4) Geographic application of statistical techniques, point pattern analysis, spatial analyses, and correlation and regression techniques.
Contact Hour Distribution: 3 hours lecture and 2 hours lab per week.
(DE) Prerequisite(s): Mathematics 115 or Statistics 201.

421 Geography of Folk Societies (3) Geographical study of folk culture, emphasizing traditional material culture and rural settlement, with examples drawn from eastern North America and selected foreign areas.

423 Geography of American Popular Culture (3) Geographical study of regional variation in popular cultures, especially focused on youth cultures in the United States. (Same as American Studies 423.)

432 Dendrochronology (4) Principles, techniques, and interpretation in tree-ring science. Applications in geography, climate, ecology, forestry, archaeology, and earth sciences.
Contact Hour Distribution: 3 hours and 2 hours lab per week.
(DE) Prerequisite(s): 132.

433 The Land-Surface System (3) Characteristics of surface form, water, vegetation, and surface materials, and their regional interrelationships. People as evaluators and agents of change.
(DE) Prerequisite(s): 132.

434 Climatology (3) General circulation system leading to world pattern of climates. Climatic change and modification, and interrelationships of climate and human activity.
(DE) Prerequisite(s): 131 or consent of instructor.

435 Biogeography (3) Study of the changing distribution patterns of plants and animals on a variety of spatial and temporal scales. The effects of plate tectonics, Pleistocene climatic change, and human activity of world biota.
Recommended Background: Introductory physical geography or coursework in botany or ecology.

436 Water Resources (3) Global water resources and hydrologic processes: water availability, flooding, and water quality issues examined from physical and economic geographical perspectives.
(DE) Prerequisite(s): 132.

439 Plant Geography of North America (3) Characteristics and distribution of major plant communities of Canada, the U.S., Mexico, and Central America. Relationships to climate, soil, fire, and human disturbance. Long-term history and future prospects.
Recommended Background: Introductory physical geography or coursework in botany or ecology.

441 Urban Geography of the United States (3) Concepts and theories concerning development and significance of systems of cities and internal morphology of cities in the United States.
442 Urban Social Geography (3) Geographical study of urban culture; social production of neighborhoods; social and behavioral aspects of territoriality, residential mobility, segregation, and the rise of post-industrial and global cities.

443 Rural Geography of the United States (3) Geographical appraisal of rural areas of the United States, including small towns and urban fringes. Problems and potentials of rural America.

449 Geography of Transportation (3) Examination of transportation systems, emphasizing their effects on trade patterns, land use, location, problems, and development.

450 Process Geomorphology (3) (See Geology 450.)

454 Terrain Analysis (3) Analysis of landscape history from digital elevation datasets and traditional topographic maps. Basement materials and structures; and erosional and depositional evidence, including fluvial, glacial, aeolian, and shoreline features, of past climatic and biological regimes. Recommended Background: 132 or Geology 101 and 102 or Geology 107 and 108.

466 Teaching and Learning Geography (3) Preparation of prospective teachers in content, skills, strategies, and understandings needed for effective teaching and assessment of geography in the K-12 schools. Course organization and content based largely on that of National Geography Standards.

495 Special Topics in Geography (1-4) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 8 hours. Registration Permission: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Registration Permission: Consent of instructor.

501 Colloquium in Geography (1) Discussion of departmental research, current research literature, and general topics. May be applied toward graduate degree. Registration required of resident graduate students whenever offered. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 4 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

504 Introduction to Geographical Research (1) Research interests and methods of departmental faculty. Research frontiers in geography. Required of new graduate students. Grading Restriction: Satisfactory/No Credit grading only.

505 Directed Research (2-6) Research on problems as defined by individual students. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 9 hours. Registration Permission: Written consent of instructor and department.

506 Directed Readings (2-6) Readings on topics of interest as defined by individual students. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 9 hours. Registration Permission: Written consent of instructor and department.

507 Research in Human Geography (3) Introduction to human geography’s questions, methods, and norms. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 8 hours. Registration Permission: Consent of instructor.

509 Topics in Geography (2-3) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

510 Geographic Software Design (3) Algorithms for spatial analysis, software design, and program implementation in stand alone and distributed computing environments. Registration Permission: Consent of instructor.

513 Topics in Remote Sensing (3) Applied research using imagery for interpretation and mapping of geographic data. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 413 or consent of instructor.

515 Topics in Quantitative Geography (3) Multivariate analysis applied to problems in geography; research problems utilizing appropriate computer programs; usefulness to geographic research of techniques developed by other disciplines. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 415 or consent of instructor.

517 Geographic Information Management and Processing (3) Concepts and methods in management of geographic information. Database design, manipulation, sampling and analysis. (DE) Prerequisite(s): Consent of instructor.

518 GIS Project Management (3) Interactions between management, technical, and application aspects of Geographic Information Systems projects through simulated environment of real-world GIS sites. (DE) Prerequisite(s): 411 or consent of instructor.

519 Graduate Practicum in Cartography/Remote Sensing/GIS (2-6) Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Written consent of department before registration.

521 Topics in Cultural Geography (3) Examination of trends, problems, and methods in cultural geography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 421 or consent of instructor.

532 Topics in Global Change (3) Emerging trends, anticipated problems and methods in global change research and response. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 434 or consent of instructor.

533 Topics in Physical Geography (3) Trends, problems, and methods in geomorphology or other areas of physical geography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

534 Topics in Climatology (3) Trends, problems and methods in area of climatology. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 434 or consent of instructor.

535 Topics in Biogeography (3) Examination of trends, problems, and methods in biogeography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 435 or consent of instructor.

536 Topics in Watershed Dynamics (3) Trends, problems and methods in study of watershed processes. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

541 Topics in Urban Geography (3) Analysis of research on urban systems, internal morphology, urban problems and urban spatial behavior. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 441 or consent of instructor.

545 Topics in Population Geography (3) Human population dynamics and migration, spatial variation in population composition and housing. Demographic analysis techniques.

549 Topics in the Geography of Transportation (3) Examination of trends, problems, and methods in transportation geography and transportation networks. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 449 or consent of instructor.

591 Foreign Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

592 Off-Campus Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

599 Geographic Concept and Method (3) Traditional and modern geographic thought; readings on nature, scope, problems, and methods of geography. Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated. 609 Seminar in Geography (2-3) Topics vary. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

611 Seminar in Geographic Information Science (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 517 and 518 or consent of instructor.

631 Seminar in Natural Hazards (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.
Laboratory exercises emphasize thin section and x-ray diffractometer properties of minerals, visible and infrared spectroscopy, and x-ray diffraction. Interaction of electromagnetic radiation and crystalline solids. Optical principles for evaluating stabilities of mineral assemblages, aqueous systems include phase diagrams, partitioning of trace elements, thermodynamics and applications of X-ray diffraction. Phase identification, quantitative determination of mineral abundances in mixtures, and crystal structure determination. Recommended Background: Mineralogy or consent of instructor.

Contact Hour Distribution: 3 hours lecture. Recommended Background: Introductory geology and calculus or consent of instructor.

410 Mineral Science (3) Crystal chemistry of rock-forming minerals. Interaction of electromagnetic radiation and crystalline solids. Optical properties of minerals, visible and infrared spectroscopy, and x-ray diffraction. Recommended Background: Mineralogy or consent of instructor. Contact Hour Distribution: 2 lectures and one 2-hour lab. Recommended Background: Mineralogy or consent of instructor.

440 Field Geology (5) Summer field course for advanced undergraduate geology majors and first-year graduate students in geology. Taught off-campus and requires the full time of the student. Course provides a synthesis of the major aspects of the geological sciences in societal context. Field techniques demonstrated, practiced, and applied to solution of geologic problems. Recommended Background: At least 16 hours of mineralogy, petrology, paleontology, sedimentology and stratigraphy, or structural geology and geophysics. Registration Permission: Consent of instructor.

450 Process Geomorphology (3) Integrative approach to the development of the surface of Earth based upon case histories, maps, remote sensing imagery. (Same as Geography 450.) Contact Hour Distribution: 2 hours and one 2-hour lab. Recommended Background: Introductory geology or consent of instructor.

455 Basic Environmental Geology (3) Applications of the geological sciences toward a comprehension of the effects of geological processes on humans and effects of human activities on the Earth’s environments. Contact Hour Distribution: 2 hours and one 3-hour lab or field period. Recommended Background: Introductory geology or consent of instructor.

460 Principles of Geochemistry (4) Applications of chemical principles to geologic systems with emphasis on problem-solving techniques. Topics include phase diagrams, partitioning of trace elements, thermodynamic principles for determining stabilities of mineral assemblages, aqueous solutions, and applications of radiogenic and stable isotopes to geologic systems. Contact Hour Distribution: 3 hours and one 2-hour tutorial. Recommended Background: General chemistry, calculus, mineralogy and petrology or consent of instructor.
545 Siliciclastic Petrogenesis (4) Origin and evolution of siliciclastic sediments from a geological and petrographic perspective. Emphasis on a quantitative treatment of major elements, trace elements and rare earth elements to extract provenance, weathering, and diagenesis information. Contact Hour Distribution: 2 lectures per week, one 2-hour lab. Recommended Background: Mineralogy, optical mineralogy and sedimentology and stratigraphy or consent of instructor.

546 Carbonate Sedimentology and Geochemistry (4) Environments of deposition and diagenesis of carbonate rocks; introduction to carbonate chemistry, carbonate equilibria, and the precipitation of carbonate minerals; abiotic vs. biotic control of carbonate precipitation; secular change in carbonate mineralogy and fabric through geology time. Petrographic observation, synthesis of petrographic and geochemical datasets, critical analysis of scientific literature, and oral/written presentation. Contact Hour Distribution: 3 lecture/discussion hours per week and one 2-hour lab. Recommended Background: General chemistry, mineralogy and sedimentology and stratigraphy or consent of instructor.

556 Ice-Age Environments and Global Climate Change (3) (See Ecology and Evolutionary Biology 556.)

557 Quaternary Ecology (3) (See Ecology and Evolutionary Biology 557.)

561 Organic Geochemistry (3) Fundamentals of organic geochemistry; primary production, diagenesis, and preservation of organic matter in the sedimentary rock record; and reconstruction of ancient geologic environments using biomarker compounds. Contact Hour Distribution: 3 lecture hours. Recommended Background: General chemistry or consent of instructor.

563 Stable Isotope Geochemistry (3) Theoretical aspects of isotope fractionation and applications to geologic systems. Isotope exchange, variations in natural waters, diagenetic, hydrothermal and metamorphic systems. Recommended Background: General chemistry or consent of instructor.

565 Chemical Petrology (3) Application of thermodynamics to geologic materials. Thermodynamics of condensed phases, solutions, thermodynamic stability, heterogeneous multicomponent phase equilibria, and conduction of heat through earth. Recommended Background: Calculus, general chemistry and physical chemistry or consent of instructor.

568 Geochemical Analysis (3) Collection and treatment of geochemical data using electron microprobe, x-ray fluorescence, and atomic absorption spectrophotometry techniques. Contact Hour Distribution: 2 hours lecture and one 2-hour lab. Recommended Background: General chemistry and mineralogy or consent of instructor.

570 Advanced Structural Geology (4) Current topics in structural geology and tectonics of mountain belts; recent literature. Contact Hour Distribution: 3 hours lecture and 1 lab or seminar. Recommended Background: Structural geology or consent of instructor.

572 Fracture Analysis (3) Field and subsurface characterization, and mechanical development of natural fractures: role in groundwater flow. (Same as Civil Engineering 572.) Recommended Background: Structural geology or consent of instructor.

575 Tectonics (4) Evolution of Earth’s lithosphere in context of plate tectonics theory. Formation of continents through comparative anatomy of mountain belts, including Appalachians, Alps, Uralis, Caledonians, Cordillera, Andes, and Himalayas. Contact Hour Distribution: 3 hours lecture and 1 seminar. Recommended Background: Structural geology course. Registration Permission: Consent of instructor.

585 Contaminant Hydrogeology (3) Physical transport processes, isotopes and groundwater age dating, processes influencing inorganic, organic and microbial contaminants, sampling and monitoring methods, remediation of contaminated groundwater, aquifer protection. Recommended Background: Calculus, physics, hydrogeology and geochemistry or aquatic chemistry. Registration Permission: Consent of instructor.

590 Special Problems in Geology (1-3) Student- or instructor-initiated course offered at the convenience of the department, with focus on specialized topics in the geological sciences. Repeatability: May be repeated. Maximum 12 hours. Registration Permission: Consent of instructor.

591 Foreign Study (1-12) Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to the geology major. Registration Permission: Consent of instructor.

592 Off-Campus Study (1-12) Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to the geology major. Registration Permission: Consent of instructor.

593 Independent Study (1-12) Student or instructor initiated independent study. Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to completion of graduate coursework requirements. Registration Permission: Consent of instructor.

595 Selected Topics in Geology (1) Presentation of research by faculty and visiting scientists. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): Registration required each spring and fall semester for resident full-time graduate students, except when registered for 596.

596 Geology Colloquium (1) Preparation and oral presentation of scientific material. Grade based on content, preparation, presentation, and instructor critique in departmental seminar. Comment(s): Registration required once during residence for each graduate student.

600 Doctoral Research and Dissertation (3-15) P/NP only. Grading Restriction: P/NP only. Repeatability: May be repeated.

630 Seminar in Petrology (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

640 Seminar in Sedimentary Geology (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

650 Seminar in Geomorphology and Quaternary Geology (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

660 Seminar in Geochemistry (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

670 Seminar in Structural Geology (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

675 Seminar in Geophysics (3) Advanced treatment of selected topics in geophysics. Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

685 Seminar in Hydrogeology (3) Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

German (433)

411 Advanced Conversation and Composition (3) (DE) Prerequisite(s): 311 and 312 or consent of department.

412 Advanced Conversation and Composition (3) (DE) Prerequisite(s): 311 and 312 or consent of department.

415 German Special Topics (3) Repeatability: May be repeated. Maximum 6 hours.

416 Metropolis Revisited (3) The 20th-century German or Austrian metropolis in the mirror of history, literature, theory, art, architecture, and music. Taught in English. (DE) Prerequisite(s): 101 and 102 or simultaneous enrollment in that sequence and consent of instructor.
419 German Fairy Tales and Literary Fantasies (3) How and why forms of literary fantasies ranging from apocalyptic dreams to enchanted visions have changed over the centuries. Strong interdisciplinary component, tracing interconnections between philosophy, religion and literary history, as well as exploring the relationship between literary, musical, and artistic representations of specific themes.

420 Selected Topics in German Literature from 1750 to the Present (3) (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

425 Introduction to Descriptive Linguistics (3) (See French 425.)

426 Methods of Historical Linguistics (3) Phonetics, distinctive feature analysis, sound change types, nature of sound change, principles of reconstruction, and fundamental assumptions about language change through time. Non-phonological linguistic change, language families, Proto-Indo-European, and other proto-languages. (Same as French 426, Linguistics 426; Russian 426, Spanish 426.)

431 Images of Nature and the Body in German Culture (3) Representations of nature from idyllic refuge and object of praise to scientific object and precarious resource. Other themes include sexuality, the body, childhood, and aging. Discussions based on literary and documentary texts and films.

432 German Creative Thinking: Interdisciplinary Dialogues (3) Interdisciplinary component between German literature and art, music, philosophy, theatrical praxis, psychology, dance, anthropology, history, and the sciences. Comparative analyses of literary and non-fictional texts, films, and other media.

433 Nation, Race, and Ethnicity (3) Examination of cultural constructions of nation, race, and ethnicity and how they have challenged each other and developed in German-speaking countries since the eighteenth century. Close study and analysis of fiction, non-fiction, and films that address controversial topics such as assimilation, integration, racial/ethnic identity formation and multiculturalism.

434 Extraordinary Wo(Men)-Outcasts, Rebels, Martyrs and Saints (3) Examination of German texts and visual media that have challenged mainstream thinking throughout the centuries. Strong interdisciplinary component, focusing on literary and artistic forms that depict struggles involving religion, politics and gender.

435 Structure of the German Language (3) Contrastive English-German segmental and suprasegmental phonemes, contrastive English-German linguistic structures, selected topics in advanced German grammar and syntactic analysis. (Same as Linguistics 435.)

436 History of the German Language (3) Development of German language from Indo-European through Proto-Germanic, Old High German, Middle High German to New High German. Internal and external linguistic history of German speech. (Same as Linguistics 436.)

450 Thesis (1-15) Grading Restriction: P/NP only.

500 Thesis (1-15) Grading Restriction: P/NP only. Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

510 German Phonetics and Advanced Grammar (3) Advanced work in phonetics, pronunciation, and selected topics in German grammar. For teachers and prospective teachers.

512 Teaching a Foreign Language (3) Practical application of methods for teaching and evaluating basic language skills and foreign language skills and cultural knowledge. Through seminars, demonstrations, peer teaching, and observation of foreign language classes. Required of all MA and PhD students holding Graduate Teaching Assistantships, except those whose previous training or experience warrants their being excused by the department.

519 Bibliography and Methods of Research (3) Critical research tools and scholarly contributions in German literature and language. Practical exercises on compiling of scholarly data using computer-based and non-computer sources.

541 Medieval German Language and Literature (3) Introduction to Middle High German.

550 Studies in German Literature (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

552 German Enlightenment, Rococo, and Sturm unD Drang (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

553 German Classicism and Romanticism (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

554 German Realism and Naturalism (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

555 Modern German Literature 1890-1945 (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

556 Modern German Literature 1945-Present (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

560 German Literary Theory and Criticism (3)

561 Directed Readings in German Language and Literature (3)

562 Directed Readings in German Language and Literature (3)

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

621 Seminar in German Literature (3) Repeatability: May be repeated. Maximum 18 hours.

622 Seminar in German Literature (3) Repeatability: May be repeated. Maximum 18 hours.

631 Seminar in German and Germanic Philology (3)

632 Seminar in German and Germanic Philology (3)

Global Studies (440)

482 Special Topics in Global Cinema (3) (See Modern Foreign Languages and Literatures 482.)

Health (449)

400 Consumer Health (3) Major consumer health care providers and health care services. Selecting, purchasing, evaluating and financing medical and health care services/products. (Same as Public Health 400.)

406 Death, Dying and Bereavement (3) Aspects of dying, death and handling the trauma of loss. Medical, financial, physical, legal, and social implications of death.

420 Sex Education As it relates to Human Sexuality (3) Science of human sexuality. Emphasis on the trends, issues, and content of sex education.

425 Women's Health (3) Factors influencing women's health and women as consumers in nation's health service delivery systems. Study of health problems/concerns of women and techniques for prevention, maintenance and/or correction. (Same as Women's Studies 425.)

430 Suicide and Crisis Intervention (3) Factors which make suicide a serious health problem. Assessment, intervention, and prevention techniques.
435 Substance Use and Abuse (3) Drug and alcohol abuse problems and suspected causes; pharmacology of drugs and effects on society; strategies for intervention and education.

465 Aging and Health (3) Aging process in a health perspective as it relates to health promotion and wellness of the aged.

500 Thesis (1-15)
Grading Restriction: P/NC only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

520 Sex Education and Human Sexuality (3) Advanced in-depth discussion of health setting, development of research skills and problem identification, media used in school, community, or health care facility.

530 Health Promotion and Health Education Program Development (3) Theories and principles of health promotion program development; methodology, marketing, public relations. Health education as vehicle for health promotion.

540 Evaluation in Health Promotion and Health Education (3) Evaluation principles and methodologies as related to health promotion products, programs, and outcomes. Construction of instruments for use in assessing health education outcomes.

570 Special Topics (1-3) For graduate students, in-service teachers and other health professionals. Health/wellness or health promotion issues.
Repeatability: May be repeated. Maximum 12 hours.

585 Seminar in Gerontology (1) Scope of gerontology as discipline and as related to other academic and professional disciplines. Speakers both internal and external to the University of Tennessee, Knoxville. (Same as Counselor Education 585; Educational Psychology 585; Exercise Science 585; Nursing 585; Public Health 585; Social Work 585; Sociology 585.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

590 Research Methods in Health (3) Basic research techniques in a variety of health settings. Development of research skills and problem identification for research topic. (Same as Public Health 590; Safety 592.)

593 Directed Independent Studies (1-3) Individual identification and study of health/wellness or health promotion problem/issue. Specific proposal must be presented to instructor before registration.
Repeatability: May be repeated. Maximum 12 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NC only.
Repeatability: May be repeated.

601 Internship/Research in Safety and Health (3-6) (See Safety 601.)

610 Critical Analysis of Writing and Research (3) Analysis of writing and research in health-related areas.

620 Advanced Research Techniques in Health (3) Advanced theory and techniques of research design and methodologies in health discipline. (DE) Prerequisite(s): 590 and 610.

650 Health Aspects of Gerontology (3) Knowledge and understanding of biological, psychological and sociological aspects of aging as related to health and wellness of individual. (Same as Public Health 650.)

655 Seminar in Nation's Health (3) Comprehensive study of definition, determinants, resources and health status of nation. (Same as Public Health 655.)

660 International Health (3) Study of quality of health, health promotion and health services in countries throughout world. (Same as Public Health 660.)

Higher Education Administration (461)

455 Seminar in Student Leadership (1) Topics to be assigned. Designed to develop knowledge and skills in leadership roles for resident assistants, student government leaders, student activities, and other student organizations.
Repeatability: May be repeated. Maximum 3 hours.

500 Thesis (1-15)
Grading Restriction: P/NC only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. May not be used toward degree requirements.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.

513 Administrative and Organizational Theory (3) (See Educational Administration 513.)

514 Leadership Themes in Literature (3) Review and analysis of selected literature works – novels, biographies, poetry, plays, essays, personal letters and speeches; history – for lessons that enhance understanding of leadership role, values, and effectiveness.

516 Research Methods (3) (See Educational Administration 516.)

534 Program Evaluation in Education (3) (See Curriculum, Educational Research, and Evaluation 534.)

536 Policy Issues in Higher Education Quality Assurance (3) Exploration of historic and contemporary approaches to definition and demonstration of quality in education and examination of contemporary policy issues related to quality assurance.

537 Student Assessment in Higher Education (3) Outcome assessment in American higher education: origins of assessment policies, rationales for assessment policy and practice, constructs and outcomes typically assessed, methods for conducting assessment, and uses of assessment data. Philosophies, priorities, and values, recent assessment efforts in higher education.

542 The College Student and the Court (3) Legal precedent affecting student personnel services in public higher education. Student discipline, housing, dress, organizations, activities fees, tuition and related federal regulations.

543 American Higher Education in Transition (3) History, philosophy, purposes, functions, organizations and programs in American higher education.

570 Student Affairs Administration in Higher Education: Theory and Practice (3) Historical, philosophical and organizational perspective. Functional areas comprising field and major issues.

572 Student Development Theory and Practice in Higher Education (3) Theoretical framework of college student personnel services and practical application of theory in student services environment. Applicable administrative theory, human development theory and evaluation assessment techniques.

574 The College Student (3) Critical examination of the characteristics and concerns of current college students in relation to the direction and provision of student services and student personnel administration.

593 Independent Study (1-3)
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

595 Special Topics (1-3)
Repeatability: May be repeated. Maximum 12 hours.

599 Internship in College Student Personnel (1-6)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NC only.
Repeatability: May be repeated.

604 Seminar in Educational Administration and Policy Studies (1-4)
Directed readings and research in educational administration.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

605 Advanced Seminar in Administrative Theory (3) Interdisciplinary seminar. Readings selected by faculty for research and scholarly value from early to current classic theoretical studies and current periodical literature in administrative and organizational theory. (Same as Educational Administration 605.)

606 Leadership Forum (1-3) (See Educational Administration 606.)

614 Statistics for Educational Administrators (3) (See Educational Administration 614.)

615 Research Design (3) (See Educational Administration 615.)

616 Research Methods (3) (See Educational Administration 616.)
617 Case Study Methods in Educational Research (3) (See as Educational Administration 617.)

619 Administration and Governance of Higher Education (3) Trends, structure and process of collegiate governance. Development of understanding of administrative theory and practice in higher education.

629 Seminar in Policy Issues in Education (3) (See Educational Administration 629.)

640 Policy Issues in College and University Law (3) Legal precedent affecting organizations, administration, and finance of higher education. Academic freedom, faculty termination, religion, tort liability, administrative law, academic due process and affirmative action in employment.

645 Curriculum and Instruction in Higher Education (3) Examination of teaching, learning and curriculum in higher education.

650 Fiscal Policy Issues in Higher Education (3) Revenue sources, appropriation process, budget procedures, cost analysis, and fiscal management in public and independent colleges and universities.

658 Conflict Management (3) Social conflict and its management. Causes of interpersonal, inter-group, and organizational conflict, skills and strategies used to manage conflict, conflict management models associated with different sectors of human activity, and current organizational practices for managing destructive conflict. (Same as Educational Administration 658.)

670 Values and Ethics in Educational Leadership (3) Examination of moral and ethical dimensions of the work of educational leaders. (Same as Educational Administration 670.)

680 Administration of Complex Organizations (3) (See Educational Administration 680.)

693 Independent Study (1-3)

Repeatability: May be repeated. Maximum 12 hours.

695 Special Topics (1-3)

Repeatability: May be repeated. Maximum 12 hours.

History (462)

500 Thesis (1-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

510 Foundations of Graduate Study in History (3) Assumptions and methods of historians. Required of all candidates for advanced degrees.

511 Teaching World History (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in world history.

512 Teaching Western Civilization (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in western civilization.

513 Teaching United States History (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in U.S. history.

515 Introduction to American History to 1840s (3) Survey of major themes, methodologies, and interpretations in early American historiography.

516 Introduction to American History, 1840s – present (3) Survey of major themes, methodologies, and interpretations in modern American historiography.

521 MA Readings (3) Directed readings in preparation for MA examinations.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 6 hours.

Comment(s): Open only to master’s candidates in history.

531 Topics in Pre-modern Europe (3) Reading seminar: secondary sources on pre-modern European movements and trends. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

532 Topics in Modern Europe (3) Reading seminar: secondary sources on movements and trends that are multinational in focus. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

533 Topics in European National History (3) Reading seminar: secondary sources on intra-national topics, usually British, Russian, German, or French. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

541 Topics in Early American History (3) Reading seminar: secondary sources on early North American history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

542 Topics in 19th-Century United States (3) Reading seminar: secondary sources on 19th-century United States. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

543 Topics in 20th-Century United States (3) Reading seminar: secondary sources on 20th-century United States. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

544 Topics in U.S. Environmental History (3) Reading seminar: secondary sources on U.S. environmental history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

551 Topics in the History of Foreign Relations (3) Reading seminar: secondary sources on foreign relations. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

552 Topics in United States Social and Economic History (3) Reading seminar: secondary sources on military history, military operations, social impact of war, and naval strategy in foreign policy.

Repeatability: May be repeated. Maximum 15 hours.

553 Topics in European Social and Economic History (3) Reading seminar: secondary sources on social or economic history of European nations. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

554 Topics in Asian History (3) Reading seminar: secondary sources on Asian history; East Asia and Middle East. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

555 Topics in United States Regional and Local History (3) Reading seminar: secondary sources on regions, states and cities of the South.

Repeatability: May be repeated. Maximum 15 hours.

556 Topics in Jewish History (3) Reading seminar: secondary sources on Jewish history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

557 Topics in Cultural and Intellectual History (3) Reading seminar: secondary sources on cultural and intellectual history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

558 Topics in United States Social and Economic History (3) Reading seminar: secondary sources on social or economic history of United States. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

559 Topics in Jewish History (3) Reading seminar: secondary sources on Jewish history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

561 Topics in Latin American History (3) Reading seminar: secondary sources on Latin America. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

562 Topics in Asian History (3) Reading seminar: secondary sources on Asian history; East Asia and Middle East. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

560 Topics in History (3) Reading seminar: secondary sources for new topics. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

565 Topics in World History (3) Reading seminar in transnational themes involving analysis of two or more world cultures. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

591 Foreign Study (1-12)

Repeatability: May be repeated. Maximum 12 hours.

592 Off-Campus Study (1-12)

Repeatability: May be repeated. Maximum 12 hours.

593 Independent Study (1-12)

Repeatability: May be repeated. Maximum 12 hours.

600 Doctoral Research and Dissertation (3-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

621 Directed Readings (3) Directed readings to prepare candidate for doctoral comprehensive examination.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 6 hours.

630 Seminar in Pre-Modern European History (3) Research seminar in primary sources. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

632 Seminar in Modern European History (3) Research seminar in primary sources culminating in scholarly paper in modern European history. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.

641 Seminar in 17th- and 18th-Century America (3) Research seminar in primary sources. Focus varies.

Repeatability: May be repeated. Maximum 15 hours.
Repeatability: May be repeated. Maximum 15 hours.

Repeatability: May be repeated. Maximum 15 hours.

651 Seminar in Military and Foreign Relations History (3) Research seminar in primary sources culminating in scholarly paper in military or foreign relations history. Focus varies. Not restricted by national grouping.
Repeatability: May be repeated. Maximum 15 hours.

658 Seminar in United States Regional and Local History (3) Research seminar in primary sources culminating in scholarly paper in regional and local history. Focus varies.
Repeatability: May be repeated. Maximum 15 hours.

Hotel, Restaurant, and Tourism (514)

423 Marketing for Hospitality and Tourism (3) Marketing principles and practices specifically applied to the hospitality and tourism industry. Includes the analyses of various hospitality and tourism marketing strategies and the implications of those strategies. Develops the use of marketing tools as an integral part of the hospitality and tourism operation.
(DE) Prerequisite(s): 210, 211, 224, and Marketing 300 or consent of instructor.

435 Conventions and Meetings: Pursuit and Attainment (3) Discussion of types of conventions/meetings, roles of meeting planners, identifying decision makers, site selection, negotiating, budgeting, marketing and gaining commitment from group.
(DE) Prerequisite(s): 210, 211, and 390 or consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Professional Project (3-6) Application-oriented, capstone project to show competence in major academic area.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to hotel, restaurant, and tourism students in nonthesis option.
Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Trends and Issues in Service Management (3) Examination of current and emerging trends and issues in the consumer product and services industry. Implications of trends and their managerial and strategic applications in services management.

523 Tourism Analysis (3) Trade theory and regional analysis methodologies applied to tourism and the service industry, including travel balance account, interregional transactions flow, economic impacts, environmental economics, demand theory and forecasting.

524 Tourism Destination Development (3) Relationship of economic theory and planning principles to tourism development. Includes the application of pre-feasibility analysis to tourism projects and the evaluation of various types of tourism and components of tourism.

532 Human Resource Management in Services Industry (3) Analysis of significant organizational processes and practices in management of human resources within consumer product and service industry.

534 Special Topics in Foodservice and Lodging Administration (1-3) Lecture/discussion format. Contemporary developments and trends in industry.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

535 Directed Study in Foodservice and Lodging Administration (1-3) Problems selected for study by student with guidance of faculty member.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

537 Seminar in Foodservice and Lodging Administration (1)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.

542 Advanced Hotel Administration (3) Strategic management of hotel organizations. Theoretical and applied literature on formulation and implementation of strategy; external and internal factors relevant for business and corporate level decisions. Consideration of role of marketing in hotel firms. Analysis of industry and case studies.
( DE) Prerequisite(s): 531 and 532.

547 Field Experience (3-9) Experience in food- or lodging-related industry or agency under supervision of faculty member.
Grading Restriction: Satisfactory/No Credit grading only.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

614 Trends and Issues in Hospitality and Tourism (3) Examination of contemporary issues in hospitality and tourism.

615 Literature and Thought in Hospitality and Tourism (3) Evaluation of hospitality and tourism management literature with emphasis upon research literature, development of scholarly thought, and identification of potential areas of further study.

Human Ecology (520)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (3)
Grading Restriction: Satisfactory/No Credit grading only.

509 Implementation of Human Resource Development Systems (3) The internship provides experiential learning for students who come to human resource development without practical real world experience. The internship is an opportunity to apply classroom knowledge, obtain additional human resource experience, and reflect on the knowledge and experience. The corporate experience provides additional human resource knowledge and assists the student in research and career advancement.
(DE) Prerequisite(s): 510.

510 Foundations of Human Resources (3) Students develop a working definition and understanding of the foundations that grid the academic discipline and profession of Human Resources. Students develop knowledge of the historical, theoretical, and philosophical foundations as well as the core models of learning, performance, change and management that promote best practices in the field. Students are introduced to the disciplines of training and development, human expertise, organizational development, and management including human resource management goals and activities.

511 Issues and Trends in Human Resource Development (3) Study of current, emerging, and future issues and trends in Human Resource Development research and practice. Linking research and practice, importance of theory to inform practice, research needs reflected in practice, cycle of how researchers and practitioners learn, how they design practice, and how they evaluate to inform policy.
( DE) Prerequisite(s): 510.

513 Special Topics in Human Resource Development (1-3) Topics vary in research, theory and current issues in human resources.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

514 Individual Study in Human Resource Development (3) Approval form must be filed in the office of the program liaison.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of supervising instructor.
517 Career Development (3) Examination of processes and practices that facilitate the individual’s leadership development, performance improvement and career goals in relation to the organization’s present and future human resource needs, including identification of personal responsibilities and organizational opportunities through successful career development systems.

518 Performance Improvement Systems and Technologies (3) Provides studies of concepts, strategies, tools, and trends of performance improvement technologies. Major emphasis will be on the planning, facilitating, and implementation of performance technologies that support human resource functions and facilitate their value to organizations. 

(DE) Prerequisite(s): 510 and 511.

519 Human Resource Problems (3) Accommodates experiential learning for students who have a background in human resource development. In an employment context, students identify, analyze design, develop, implement, and evaluate a practical human resource development intervention. 

(DE) Prerequisite(s): 510 and 511.

520 Collaborative Strategies in Human Resource Development (3) Examines the strategies for collaboration and teambuilding within organizational systems. The course assists human resource professionals understand the processes associated with teambuilding including defining types of teams, rewarding and evaluating team performance, operating principles and communication within teams. The primary focus of this course will be creating the high performance team. 

(DE) Prerequisite(s): 510.

556 Organizational Development Strategies (3) Overview of the roles, strategies, and challenges of organizational development with a focus on the dynamics of organizational change and the internal integration of organizational culture in a global context. 

(DE) Corequisite(s): 510.

557 Design Strategies (3) Design methodology for business and industry interventions; development of instructor-based, technology-based, and self-directed training for training and development and consulting. 

(DE) Corequisite(s): 510.

559 Evaluation Strategies (3) Evaluation strategies for professional settings. This course examines the importance of evaluation, how to conduct appropriate evaluations, instrumentation and analysis strategies, how to assess the return-on-investment, and guidelines for creating an evaluation report. 

(DE) Prerequisite(s): 557.

561 Strategic Human Resource Development (3) Overviews how human resource development increases organizational competitive advantage. Human capital theory, systems theory and systems integration emerge as theoretical frameworks for linking human resource development with business strategy to attain strategic initiatives. Value creation for human resource development stakeholders, management of human resource development resources, and continuous improvement of human resource development processes are emphasized. Students explore the role of human resource development in organizational visioning, planning, leadership development, innovating, and economic development. 

(DE) Corequisite(s): 510.

563 Organizational Communication Strategies (3) Students investigate organizational communication theory, purposes, channels, practices, styles, approaches, skills, and tools. Process improvement strategies span internal, and external communication and target oral, written, and nonverbal communications that occur in face-to-face, technology-mediated, and blended organizational communication contexts. 

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated. 

602 Proseminar I in Human Resource Development (3) Basic thought, concepts, and issues required for advanced graduate study in human resource development. Must be taken during the first year of study in the program. 

Registration Permission: Consent of instructor for non-program students. 

603 Proseminar II in Human Resource Development (3) Basic thought, concepts, and issues required for advanced graduate study in human resource development. Must be taken during the first year of study in the program. 

Registration Permission: Consent of instructor for non-program students. 

605 Seminar in Organizational Theory and Environmental Context (3) Organizational structure and basic systems influencing individual, group and organizational behavior with an emphasis on environmental context impacting worker performance and opportunities for learning transfer. Ecological approach to organizational effectiveness is addressed. 

(DE) Prerequisite(s): 602 and 603.

606 Research in Human Resource Development (3) Theory and application of qualitative approaches to social science and human resource development research. Emphasis is on ethnographic methods to obtain in-depth information about behaviors and beliefs of people in natural settings. Use of methods: structured interviews using heuristic elicitation methodology, participant/observation and case studies. 

(DE) Prerequisite(s): 602 and 603.

607 Seminar in Organizational Communication Processes (3) Students study how the elements and complexities of organizational communication lead to potential miscommunications. This course involves analysis of contemporary and leading-edge organizational communication systems and processes. Students address prevention and minimization of destructive system and process complexities, and maximization of constructive elements; and explore organizational and individual accountability for creating, sustaining, and improving organizational communication systems, processes, and environments. 

(DE) Prerequisite(s): 602 and 603.

608 Seminar in Work/Life Interface Issues (3) Interface of work/life topics; how does work and life issues interconnect and influence each other from a psychosocial perspective? The goal of the course will be to help human resource professionals better understand and address the critical linkages between work and life to encourage personal and professional well-being. 

(DE) Prerequisite(s): 602 and 603.

609 Seminar in Technological Frameworks for Human Resource Development (3) Provides instruction and discussions on technology and human performance issues in today’s organization. Topics include technology diffusion, performance improvement technologies, and privacy and ergonomic issues in utilizing technologies to improve human performance in organizations. 

(DE) Prerequisite(s): 602 and 603.

611 Internship in Human Resource Development (3) Field experience in relevant organizations. 

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. 

Registration Permission: Consent of instructor. 

613 Seminar in Selected Topics (3) Topics in human resource development. 

Repeatability: May be repeated Maximum 6 hours. 

(DE) Prerequisite(s): 602 and 603.

Industrial and Organizational Psychology (568)

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is complete. 

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. 

Registration Permission: Consent of instructor. 

525 Research in Industrial/Organizational Psychology (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. 

Credit Restriction: May not be used toward degree requirements.

567 Proseminar in Industrial/Organizational Psychology (3) Basic thought, concepts, and issues required for advanced graduate study in industrial and organizational psychology. Must be taken during first year of study in program. 

Registration Permission: Consent of instructor required for non-program students. 

568 Proseminar in Industrial/Organizational Psychology (3) Basic thought, concepts, and issues required for advanced graduate study in industrial and organizational psychology. Must be taken during first year of study in program. 

Registration Permission: Consent of instructor required for non-program students. 

569 Applied Measurement for Industrial/Organizational Psychology (3) Basic techniques for collection and evaluation of individual and organizational data using both classical and modern psychometric techniques. Relevant statistical models: reliability analysis, and exploratory and confirmatory factor analyses.
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

605 Advanced Research Methods in Psychology (3) Critical analysis of new and evolving techniques for psychological research; new statistical and psychometric methods.

610 Individuals in Organizations Seminar (3) Bridging principles and processes which link individual attributes with more macro organization concerns: culture, climate, and group decision making.

611 Seminar in Organizational Leadership (3) Current theories, concepts, and issues associated with psychology of organizational leadership.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

612 Seminar in Work Motivation (3) Current theories, concepts, and issues associated with psychology of work motivation.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

613 Seminar in Performance Appraisal (3) Current issues, problems, and research in performance appraisal and criterion development; applications in compensation.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

614 Seminar in Employee Selection (3) Current issues, concerns, and methods used in employee selection.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

615 Seminar in Organizational Training and Development (3) Current issues, problems, and research in training and development.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

625 Topics in Organizational Psychology (3) Topics vary. Repeatability: May be repeated. Maximum 9 hours.

626 Topics in Industrial Psychology (3) Topics vary. Repeatability: May be repeated. Maximum 9 hours.

627 Structural Equation Models in Organizational Research (3) Issues related to analysis of organizational data using structural equation and related techniques.

628 Personality Assessment (3) Review of key domains of social cognition: measurement systems which use individual differences in social-cognitive biases as basis for measuring personality.

635 Ethical and Professional Issues in Industrial/Organizational Psychology (3) Issues involved with ethical practice in research, academic, organizational, and consulting situations.

650 Supervised Practicum, Internship or Field Training in Industrial/Organizational Psychology (1-15) One credit hour per 30 hours of practice.
Grading Restriction: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

Industrial Engineering (556)
Note: Any 400-level course required for the Bachelor of Science in Industrial Engineering at the University of Tennessee, Knoxville, may not be used for graduate credit in the MS program.

401 Integrated Manufacturing Systems (3) NC and CNC machine tools, robotics and related materials handling systems, hard automation, alternative integrated manufacturing systems, and manufacturing information/control systems.
(DE) Prerequisite(s): 330.

402 Production System Planning and Control (3) Theory and application of forecasting systems including regression and time series models. Independent demand inventory models, including development of safety stock. All modules of Manufacturing Resource Planning (MRP) Systems: master production scheduling, resource requirements planning, bill of material and inventory file structures, material requirements planning, capacity planning, shop floor and purchase order control. Overview of just-in-time inventory concepts and MRP’s role in manufacturing automation.
(DE) Prerequisite(s): 202.

421 Information Systems Analysis and Design (3) Systems engineering approach to analysis and design of systems of information. Topics include: system development life cycle, system analysis methodologies, data analysis techniques, system design, joint application design, and rapid application design. Lab introduces analysis and design software tools.

422 Senior Problems Analysis (3) Current real-world problems will be drawn from local production and service organizations and presented by personnel from these organizations. Senior industrial engineering student teams will solve these real-world problems under the guidance of their instructor using industrial engineering methodology. These problems emphasize problem definitions, analysis, and presentation with considerations for engineering standards and realistic economic, environmental, ethical, safety, social, political, and other pertinent constraints.

427 Introduction to Lean Systems (3) Introduces a framework to implement improvements within an enterprise. This framework will focus on designing both the physical system and the associated information system. The students will be introduced to the basic concepts of facilities design based upon process design and requirements. The design of the physical and information systems will be based on integrating the concepts, terminology, and tools of lean enterprise and Six Sigma. Activities will include case studies, industry based projects, and the preparation of written engineering reports.
(DE) Corequisite(s): 306 and 402.

440 Process Improvement Through Planned Experimentation (3) Review of fundamentals of continuous improvement, advanced statistical process control techniques, and strategies for short production runs. Use of experimental design techniques to improve processes, including single and multiple-factor designs, blocking and confounding, and fractional designs. Full factorial designs are compared to fractional designs to balance experimental efficiency with loss of information. Lab component utilizes statistical and simulation software to provide hands-on experience.
(DE) Prerequisite(s): 300.

455 Human-Computer Interaction (3) Introduction to the analysis, design, production, and implementation of systems requiring interaction between humans and computers (HCI). Includes human sensory systems, human memory capacity, computer hardware/software requirements, input/output device design, and error message handling.
(DE) Prerequisite(s): Computer programming course.

483 Introduction to Reliability Engineering (3) (See Nuclear Engineering 483.)

484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Design Project (1-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Industrial Engineering Methods Review (3) Survey of industrial engineering tools and techniques applied to analysis, design, and improvement of manufacturing systems. Students who do not have an undergraduate degree in industrial engineering must enroll in this course.
Grading Restriction: Satisfactory/No Credit grading only.
Credit Restriction(s): May not be applied toward degree requirements.
Comment(s): Admission to dual MS-MBA program required.

504 Product Development Process (1) (See Mechanical Engineering 504.)

506 Product Selection and Evaluation (2) (See Mechanical Engineering 506.)

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)
508 Integrated Product, Process and Manufacturing System Design (3) Different manufacturing system configurations. Relationships between product design and processing requirements, design specifications and manufacturing costs. Finalizing design specifications and selecting processes. Analysis of manufacturing system costs. Presentation of factors affecting system design. Case studies and team projects. (Same as Mechanical Engineering 508.)

509 Multidisciplinary Project (1) Venue for multidisciplinary student teams to coordinate design and manufacturing tasks of product to be developed. Project management (budget and schedule), assignment of tasks for team members, and concurrent design and manufacturing. Design concepts and product feature reviews by potential customers/investors. (Same as Aerospace Engineering 509; Biomedical Engineering 509; Chemical Engineering 509; Electrical and Computer Engineering 509; Materials Science Engineering 509; Mechanical Engineering 509; Nuclear Engineering 509.)

Registration Permission: Consent of instructor.

511 Business Planning and Commercialization (3) Complex issues of product development and business planning required to deliver new product from concept to market. Strategic issues that emerge during product development cycle, beginning with concept to product development to commercialization to eventual product introduction or dismissal. Management practices for successful product development and product management.

Registration Permission: Consent of instructor.

513 Facilities Planning and Design (3) Modern materials handling techniques, computer-aided layout techniques, application of operation research models, and use of these to develop manufacturing facility. (DE) Prerequisite(s): 403 or consent of instructor.

514 Advanced Information Systems Analysis and Design (3) Systems analysis and systems control concepts applied to systems of information. Role of Industrial engineering in office and factory of future. Management support systems, decision support systems, and integrated support systems.

515 Advanced Production and Inventory Systems (3) Advanced topics in production planning and inventory systems. Material requirements planning; production planning and master scheduling; just-in-time concepts; distribution requirements planning; and other selected topics. (DE) Prerequisite(s): 402 or consent of instructor.

516 Statistical Methods in Industrial Engineering (3) Application of classical statistical techniques to industrial engineering problems. Statistical and technical thinking in managerial context of organizational improvement; descriptive statistics and distribution theory; relationship between statistical process control techniques and classical statistical tools; parameter estimation and hypothesis testing; goodness-of-fit testing; linear regression and correlation; analysis of variance; single and multiple factor experimental design. (DE) Prerequisite(s): Statistics 251 or equivalent.

517 Reliability Engineering (3) Continuous time random processes with applications to availability of equipment and manufacturing systems. Failure density and failure data analysis. Maintainability. Reliability-based criteria for product acceptance. (DE) Prerequisite(s): 516.

518 Advanced Engineering Economic Analysis (3) Application of engineering economic analysis in complex decision situations. Inflation and price changes; uncertainty evaluation using non-probabilistic techniques; capital financing and project allocation; evaluations involving equipment replacement, investment of utilities, and public works projects; probabilistic risk analysis including computer simulation and decision trees; multi-attributed decision analysis; and other advanced topics. (DE) Prerequisite(s): 405 and Statistics 251.

519 Human Factors Engineering and Ergonomics (3) Application of human factor and ergonomic concepts and principles to design and analysis of manned systems and products. Human as biomechanical system; human information processing; minimization of human error; anthropometry; anatomy and physiology; physical and mental workload; effects of environmental factors; temperature, lighting, weightlessness, and vibration on humans; manual materials handling and back injuries; design of workstations and office ergonomics; design of displays and controls; hand tool design; and cumulative trauma injuries. (DE) Prerequisite(s): Statistics 251 or consent of instructor.

520 Human Factors and Product Safety Engineering (3) Role of human factors and safety engineering, legal implications in product design, product liability, system safety, and system failure analysis. Product testing, reliability, and system safety analysis techniques. Case histories of accident investigations, reconstruction, causality, and product liability litigation. (DE) Prerequisite(s): 519 or consent of instructor.

521 Advanced Human Factors Engineering Methodology (3) Advanced methodologies used in human factors engineering. Observational methods; function/task analysis; computerized human factors design methods; human reliability and error prediction; evaluation of human-machine interface; modeling techniques; questionnaire and survey design; experimental design, and other selected topics. (DE) Prerequisite(s): 519 or consent of instructor.

522 Optimization Methods in Industrial Engineering (3) Classical optimization applied to constrained and unconstrained, non-linear, multi-variable functions; search techniques; decision making under uncertainty; game theory; and dynamic programming. (DE) Prerequisite(s): 401 and 508 or consent of instructor.

525 Systems Modeling and Simulation (3) Modeling of discrete systems using current simulation software and Monte-Carlo simulation. Problem definition, input distributions, output data analysis, model validation and verification, variance reduction techniques, animation of models, and design of simulation experiments. Case studies in variety of domains for simulation modeling. (DE) Prerequisite(s): 506 or 525.

526 Advanced Applications of Systems Modeling and Simulation (3) Modeling of discrete, continuous, and combined systems using current simulation software. Development of flexible simulation models to enhance accessibility of simulation models for experimentation. Development of distributed simulation models to represent and test production and supply chain systems. (Same as Management Science 526.) (DE) Prerequisite(s): 506 or 525.

527 Lean Production Systems (3) Characteristics and performance of mass and lean production systems. Lean production concepts and principles. Planning, designing and implementing lean production systems: line balancing, set-up time reduction, cost management, maintenance support and other selected topics. Application at enterprise level to achieve strategic competitive goals. (DE) Prerequisite(s): 515 or consent of instructor.

550 Graduate Seminar (1) A seminar to guide and familiarize graduate students of engineering to the process of thesis and/or dissertation research. This includes selection of committee members, research management and guidelines, basics of data analysis and presentation, and guidelines for writing grant and research proposals. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): Admission to graduate program required.

552 Advanced Linear Programming and Extensions (3) Linear programming solution procedures, duality, sensitivity, and parametric analysis; and quadratic, separable, integer, and goal programming. (DE) Prerequisite(s): 301.

554 Advanced Development of Information Systems (3) Presents algorithms commonly needed to implement advanced information systems. Different types of data structures are presented in an attempt to find the model that best suits a given problem. Includes in-depth discussion of Visual Basic modules. Involves the transformation of problems into programming paradigms, and encodes solutions using the Microsoft Visual Basic 6 rapid application development tool. Activities will include case studies and demonstrations to supplement lectures. Practical problems and projects will be assigned. (DE) Prerequisite(s): 314 or consent of instructor.

555 Advanced Topics in Human-Computer Interactions (3) This course is a combination seminar/hands-on all phases of the product development lifecycle, examining the impact of human-computer interactions (HCI design course that covers) at each. It focuses on a user-centered approach to product design, addressing and applying usability to physical design and web designs. The course includes lectures, discussions, demonstrations and field trip to a local usability lab. (DE) Prerequisite(s): 455 or consent of instructor.
556 Data Mining in Engineering and Manufacturing (3) This course will include the following components: the process of knowledge discovery; popular data mining tools such as classification, regression, and clustering; advanced data mining techniques; application of data mining in manufacturing, engineering design, and security; and research project. (Same as Chemical Engineering 556.)
(De) Prerequisite(s): 516 or equivalent.

561 Application of Multivariate Statistics to Process Modeling and Data Analysis (3) (See Chemical Engineering 561.)

591 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

592 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

593 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Operations Research Models in Engineering Economy (3) Mathematical programming techniques applied to capital budgeting; advanced topics in multiple attribute decision analysis; Bayesian analysis of sequential decision making; artificial intelligence in complex decision analyses.
(De) Prerequisite(s): 518 and 523.

602 Nonlinear Optimization (3) (See Management Science 602.)

606 Advanced Topics in Human Factors, Safety and Biomechanical Engineering (3) Application of advanced engineering analysis and design methods to manned system safety, epidemiology of accidents and injuries, and study of injury causal mechanisms. Injury models and theories and development of injury, loss, and risk reduction techniques. Current research issues in manned systems analysis and design. Research into system failures: prevention of injuries.
Registration Permission: Consent of instructor.

691 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

692 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

693 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

Information Management (558)

541 Advanced Database Systems (3) Illustrates and applies advanced database techniques including data modeling, database design, SQL, stored procedures, multi-user databases and web databases. Also covered are data security and control issues related to multi-user databases. In addition to MS Access, this course makes use of the Oracle database to introduce concepts and implement assignments. A database project is a major component of this course.
(De) Prerequisite(s): 541 or consent of instructor.

542 Application Security and Controls (3) Introduces students to data security, systems controls, and privacy issues regarding Internet applications.
(De) Prerequisite(s): 541 or consent of instructor.

543 Systems Audit Security and Controls (3) Discusses information systems security, auditing/assurance, planning, and control issues. The course examines security and control issues primarily at the operating system level.
(De) Prerequisite(s): 541 or consent of instructor.

549 Enterprise Planning, Security and Controls (3) Examines the use of enterprise information systems to achieve strategic and operational advantage, to support managerial decision making, and to achieve operational control.
(De) Prerequisite(s): 541 or consent of instructor.

Information Sciences (560)

450 Writing About Science and Medicine (3) (See Journalism and Electronic Media 450.)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration and Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Information Environment (3) Generation, production, management, dissemination, and use of information. Roles of information in society, information seeking and user behavior, information industry, economics of information products and services, technological and organizational change, information professions, and issues.

520 Information Representation and Organization (3) The structure and organization of intellectual content regardless of format. Emphasis on how content is created, exchanged, and stored so it can be found. Includes standards and best practice for describing and characterizing intellectual content.

521 Cataloging and Classification (3) Basic library-oriented cataloging and classification techniques, tools, and supporting operations. Descriptive cataloging, choice and form of non-subject entries, subject heading work, general classification, authority control, bibliographic utilities, online library catalogs.

523 Abstracting and Indexing (3) Philosophies, standards, and procedures for manual and automatic document indexing, back-of-the-book indexing, vocabulary control, thesaurus construction, and abstracting.

530 Information Access and Retrieval (3) Information access, retrieval, and use. Information seeking, user interfaces, information services and tools. Database structure, search engines, query logic, and evaluation of retrieval system performance.

531 Sources and Services for the Social Sciences (3) Information sources in political science, sociology, psychology, geography, history, anthropology, business, and education.

532 Sources and Services for Science and Engineering (3) Information sources in engineering, physical and life sciences.

533 Sources and Services for the Humanities (3) Information sources in philosophy, religion, fine arts, performing arts, literature and language.

534 Government Information Sources (3) Selection, acquisition, organization, and utilization of government information in variety of formats from legislative, judicial and executive branches of federal, state, local, and international government and intergovernmental agencies.

535 Advanced Information Retrieval (3) Bibliographic, non-bibliographic, full-text databases, e.g., non-bibliographic formula and structure databases, contents-page/full-text databases, patents; document delivery alternatives, evaluation, and testing.

536 The Information Society (3) Competing theoretical positions and definitions regarding the existence and importance of the information society; historical evolution and selected key contributors of information society theories; issues of globalization including critical perspectives of economic, social, political, and cultural aspects.

537 Information Industry (3) Issues and trends concerning information industry: products and services. Standards, enabling technologies, choice of distribution media, entrepreneurial opportunities. Legal, ethical, and quality concerns.

538 Economics of Information (3) Costing and pricing of information; value of information and value added services; cost-benefit analysis and tradeoffs; policy issues related to economic aspects of information exchange and transfer.

539 Information Policy (3) Role of government in creation and exchange of information; review of key national and international policy areas relevant to information creation, production, and distribution; development of information policies for organizations.
540 Research Methods for Information Professionals (3) Research methods in a variety of information environments; primary and secondary research; research project design; research results interpretation; analysis of published research; techniques supporting research process.

550 Management of Information Organizations (3) Supervisory and management concepts, strategies, and techniques applicable to information professionals working in libraries, archives, records management, and other information organizations.

551 School Library Media Centers (3) Planning, implementing, and evaluating school library programs. Curricular involvement, role of technology, site-based management, relationships with district and state services.

552 Academic Libraries (3) Mission, status, and history of academic libraries and academic librarianship in community colleges, colleges and universities; trends in higher education, information technology, and government’s impact on public, technical, and administrative services.

553 Specialized Information Agencies and Services (3) Development and present status, scope and objectives. Information resources external to organization.

554 Public Library Management and Services (3) Development, roles, political environment, governance, organization, fiscal management, services, marketing, and performance evaluations.

555 Scientific and Technical Communications (3) Evolution of scientific and technical communication; current trends; role of formal and informal communications; major STI organizations and their roles.

556 Knowledge Management for Information Professionals (3) Covers classic theories of knowledge and theories of first and second-generation knowledge management paradigms. Introduces related disciplines and the knowledge lifecycle, types of knowledge, organizational learning, intellectual capital, communities of practice, knowledge ecologies, knowledge audits, knowledge sharing repurposing of information, uses of information technology, and roles of information professionals in developing knowledge management initiatives.

557 User Instruction (3) Theory, strategy, design, and practice in providing instructional services and technology for end users of information and information systems. Includes practical experience.

558 Library Services for a Diverse Society (3) Examines the issues of diversity and multiculturalism in libraries and librarianship. Considers general issues affecting institutions in addition to libraries. Examines specific social characteristics and the social/cultural groups constructed around these characteristics. Considers the needs of such groups, and library responses to these needs, and how to create a more diverse library profession.

560 Development and Management of Collections (3) Selecting and preserving a variety of items (tangible and intangible) to meet needs of particular users; community analysis; policies and procedures; evaluation; purchasing.

561 Contemporary Book Publishing (3) Creation, design, production, marketing, and distribution; various types of publishers.

563 Graphic Design and Media (3) Principles and practice in visual aspects of communications. Graphic design, typography, production techniques and publication design, as these apply to electronic information delivery systems.

564 Archives and Records Management (3) Objectives and functional elements of records systems, archival programs, management information systems and techniques within various types of organizations. Management of information internal to organizations.

566 Business Intelligence for Information Professionals (3) Principles and practices of gathering and synthesizing business intelligence, including competitive intelligence, environmental scanning, and issues management; information evaluation and synthesis; role of strategic information in modern organizations.

567 Information Network Applications (3) Scholarly and community-based electronic communications. National and international standards, tools, resources; identification, analysis, evaluation, and management of tools and resources; construction of local technologies as developed and applicable.

572 Resources and Services for Young Adults (3) Critical survey of books and related materials for young adults; personal, vocational, and recreational needs and interests. Evaluation, selection, and utilization for school and public libraries.

573 Programming for Children and Young Adults (3) Philosophy and objectives of public and school library services for children and young adults. Reading, listening, and viewing guidance for individuals and groups. Program planning, implementation, and evaluation.

574 Resources and Services for Adults (3) Examines strategies and procedures for developing programs in libraries. The course provides public service librarians with the knowledge and skills to create, evaluate, and improve programs with some emphasis on reader’s advisory.

575 Valuing Diversity: International and Intercultural Resources for Youth (3) Examines texts and materials for youth that reflect the contemporary settings and lives of young people from all over the world. This course will review the scholarship of literature and film to determine how to recognize stereotypes; how to understand publishing worlds; and how to recognize universal themes that transcend ethnicity, religion, gender, class, and nationhood.

576 Storytelling in Libraries and Classrooms (3) Examines the history of those who influenced the programming and stories of storytelling. Additionally, the course will offer techniques and sources for selecting, preparing and telling stories to library and classroom audience.

580 Information Science Theory (3) Definitions of information, information sciences, and information technology; theories of information, information representation, retrieval, and transfer; standards and technologies for information processing and distribution; research front; bibliometrics and infometrics; relationships with other disciplines.

582 Information Systems Planning and Evaluation (3) Information systems used in libraries and information agencies. Emphasizes planning, evaluation and system implementation. Covers usability engineering, interface design, and human computer interaction.

583 Information Systems Problems and Principles (3) Use of systems theory and analytical tools for understanding and improving information systems. Emphasizes the interaction between technology, processes, and stakeholders. Focuses on problem identification and problem-solving techniques, system design representations, object-oriented system design, system prototyping, and project management.

584 Database Management Systems (3) Defining data needs, data structures, role of operating systems in data management, file organization, database management systems, logical data models, internal data models, database administration and evaluation. Design and implementation of application using database management system.

585 Information Technologies (3) Evolution, trends, capabilities, and limitations of technologies applied to information capture, storage, preservation, access, and distribution.

586 Information Retrieval Systems (3) Historical perspective on information retrieval research; statistical and probabilistic retrieval techniques; cognitive user modeling; expert intermediary systems; associations, relations and hypertext.

587 Mining the Web (3) Covers strategies for mining the Web, Web engines and directories, cognitive accessibility, Web design and development, and usability engineering.

588 Human-Computer Interaction (3) Survey of human-computer interaction and introduction to human and technological factors of importance to design of usable information systems. Basic phenomena of human perception, cognition, memory, and problem solving, and relationship to user-centered design. Methods and techniques for interaction design and evaluation.

590 Problems in Information Sciences (3-6) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

591 Independent Project or Research (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.
594 Graduate Research Participation (3) Advanced research techniques under supervision of staff research director whose area coincides with interests of student.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of advisor and research director.

595 Student Teaching in School Library Information Center (9)
Planned professional semester: full day school library work and classroom observation activities.
Grading Restriction: Satisfactory/No Credit grading only.

596 Field-Based Experience in School Library Information Centers (2) Prescribed activities to gain competencies in a school library information center setting. Must be taken twice.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

599 Practicum (3-6) Opportunity to translate theory into practice under guidance of qualified information professionals.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): Completion of core and pertinent advanced courses relevant to student’s practicum design.
Comment(s): 3.0 GPA required.
Registration Permission: Consent of advisor and approval of practicum coordinator.

601 Advanced Seminar in Information Sciences (3) Theories, research, and traditional practices of information representation, organization, and access and retrieval. Research opportunities and methods. Relationship to and interaction with other disciplines.

Instructional Technology (569)

521 Computer Applications in Education (3) Use and integration of technology in educational settings to support teaching and learning.
(DE) Prerequisite(s): Basic computer operations or consent of instructor.

566 Administering Instructional Media Programs (3) Leadership roles and responsibilities of professional media administrator in variety of organizational settings.

569 Media and Technology Production Techniques (3) Workshop strategy: basic photography, audio production, multi and single camera TV production, basic digital video editing, and other media/technology techniques important for improving communication in variety of presentation or instructional settings.

570 Instructional Systems Design (3) Application of theory and research of instructional systems design to solve instructional problems in educational settings.

571 Desktop Publishing for Educators (3) Use of computer-based desktop publishing and graphics software and related hardware in designing and producing instructional and informational products.

573 Introduction to Multimedia in Instruction (3) Selected computer-based multimedia production tools and use to produce instructional materials based on specific learner characteristics and objectives.

575 The Internet: Implications for Teaching and Learning (3) Investigation of Internet, its origin and historical development. Hands-on use of Internet for consuming, sharing, and publishing information. Relevant issues regarding legal and ethical issues, evaluation, responsible use, propriety rights. Participants will need unrestricted access to a personal computer connected to the Internet to complete all course activities.
Comment(s): Requires admission to an ITES program or consent of instructor.

576 Advanced Interactive Multimedia for Instruction (3) Design and production of educational and interactive Web sites using advanced software. Development of effective interactive methods for enhancing teaching and learning supported by principles of planning, designing, creating, testing, and evaluating.
(DE) Prerequisite(s): 573.

577 Internet-Mediated Collaborative Learning (3) Use of the Internet to conduct collaborative learning activities among diverse, geographically-distributed participants. Participants will need unrestricted access to the Internet to complete all course activities.
(DE) Prerequisite(s): 575 or 521.

578 Web Design (3) Design and development of instructional Web sites using basic design principles and visual Web editor software.

669 Instructional Media Research (3) Identification, location, and collection of developmental and experimental research on instructional media. Application of research.

670 Constructivist Perspectives in Instructional Technology (3) Effectively designed technology based teaching strategies can enhance learning in a wide variety of subjects and learners from K-12 students to adults. This course will examine the theories, principles, and applications of constructivism with emphasis on technology based constructivist strategies and instructional designs for online and classroom learning.

678 Seminar in Instructional Technology (1) Readings and discussions based on current literature, research, theories and practices in instructional technology.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

680 Designing Problem-Based Learning Environments (3) Development and integration of problem-based learning pedagogy into curriculum. Examination of literature to understand theoretical perspective for design of this type of learning environment.

Instructional Technology and Educational Studies (570)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.

518 Educational Specialist Research and Thesis (3)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

593 Independent Study (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.

594 Supervised Readings (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.

595 Special Topics (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Foundations of Research, Scholarship & Doctoral Study (3) Introduction to PhD program concentrations in ITES: research requirements, meaning of scholarship in academe and issues/problems in education.
Comment(s): Admission to a PhD program in ITES required.

689 Internship (1-3) Experiences in application of principles and practices of curriculum development and instructional improvement.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Program prerequisites.
Registration Permission: Consent of instructor.

693 Independent Study (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.

694 Supervised Reading (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.

695 Special Topics (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated.
Italian (584)

401 Dante and Medieval Culture (3) Introduction to the significance of this great Italian writer. (Same as Medieval Studies 401.)

(Requires Prerequisite(s): 212 or consent of instructor.)

402 Petrarch and Boccaccio (3) (Same as Medieval Studies 402.)

(Requires Prerequisite(s): 212 or consent of instructor.)

403 Literature of the Rinascimento (3) From Pulci to Tasso, Quattrocento and Cinquecento.

(Requires Prerequisite(s): 212 or consent of instructor.)

406 The Modern Italian Novel (3)

(Requires Prerequisite(s): 212 or consent of instructor.)

409 Directed Readings (3)

410 Italian Theatre (3) Survey of Italian theatre from Renaissance to present.

(Requires Prerequisite(s): 212 or consent of instructor.)

421 Topics in Italian Literature and Cinema (3) Examination of Italian literature and cinema from 1930 to the present focusing on literary works translated into English and adapted into film. Objectives of the course are to investigate the relationship between literature and cinema and to achieve a greater understanding of Italian culture since 1930. Films will be shown in Italian with English subtitles. (Same as Cinema Studies 421.)

Repeatability: May be repeated. Maximum 6 hours.

510 Readings in Italian Literature (3) Topics vary.

Repeatability: May be repeated. Maximum 6 hours.

591 Foreign Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

Japanese (589)

451 Readings in Pre-Modern Japanese Literature (3) (See Asian Languages 451.)

452 Readings in Modern Japanese Literature (3) (See Asian Languages 452.)

Journalism and Electronic Media (592)

412 Opinion Writing (3) Analysis of editorial positions and practices. Writing editorials/columns for newspapers, magazines, corporate publications, and electronic media (radio, television, cable, Internet), with emphasis upon study and use of rhetorical devices and logic.

(Requires Prerequisite(s): 212 or consent of instructor.)

414 Magazine and Feature Writing (3) Techniques of writing features and in-depth articles for mass circulation and specialized magazines or newspapers. Organizing and presenting material, with attention to problems in areas such as business, science, agriculture, and the humanities.

(Requires Prerequisite(s): 203 or consent of instructor.)

415 Magazine Industry Workshop (3) Introduction to the magazine industry including management, design, writing and editing, and interactivity. Analysis of print and electronic format magazines. Planning new products for the marketplace.

(Requires Prerequisite(s): 414 or consent of instructor.)

430 Public Affairs Reporting (3) Reporting including database reporting and writing about courts, government and public agencies. Event and issue-oriented journalism of politics and public affairs.

(Requires Prerequisite(s): 414 or consent of instructor.)

433 Editing and Layout for Print/Web (3) Editing and layout for newspapers, magazines, and online publishing.

(Requires Prerequisite(s): 203 or consent of instructor.)

450 Writing About Science and Medicine (3) Writing workshop to analyze examples of successful science writing and write series of articles for general public based on scientific journals, news conferences, technical meetings and interviews. (Same as Information Sciences 450.)

Registration Permission: Consent of instructor.

451 Environmental Writing (3) Writing for news media (including the Internet) on such environmental issues as sprawl, forests, air pollution, energy, and invasive species. Students hear presentations from and interview experts in environmental science and reporting. Exemplary environmental writing is analyzed.

Registration Permission: Consent of instructor.

460 Electronic News Operations (3) Production of news programs for television, cable and the Internet. Advanced course in electronic news gathering, reporting, digital videography, non-linear editing, and producing. Computerized newsroom and studio are utilized.

(Requires Prerequisite(s): 411.)

470 Cable, Broadband, and Interactive Digital Media (3) History and structure of cable television and other broadband delivery systems (DBS, Internet, etc.). Development of digital broadcasting, interactive television, and other broadband media systems and digital technologies. Regulatory, policy, programming, and management issues arising from new media and digital technologies.

(Requires Prerequisite(s): 275 or consent of instructor.)

475 Sports Writing (3) Writing sports stories, features and columns. Sports writing is considered from the standpoint of sports reporters, sports information specialists and others with an interest in writing about sports.

488 Web Publishing (3) Cross-disciplinary approach to design and production of on-line publications. Emphasis on researching, planning, site content and design, and the economic, legal and ethical issues involved in online publishing.

Registration Permission: Consent of instructor.

(Requires Prerequisite(s): 290 or consent of instructor.)

491 Foreign Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

500 Thesis (1-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when the student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

503 Workshop in Journalism across the Media I (3) Techniques of writing, reporting, and editing for print and Web. Also includes graphics, layout, and photography. Overview of the history, technology, and economics of newspapers, magazines, and the Internet. Consideration of the First Amendment.

Credit Restriction: Cannot be counted toward the number of hours required for the Master of Science degree.

504 Workshop in Journalism across the Media II (3) Techniques of writing, reporting, and editing for electronic media. Also includes video production. Overview of the history, technology, and economics of cable, broadcasting, and satellite. Consideration of the impact of rules, regulations, and policies of the Federal Communications Commission. Comparison of techniques in print, Web, and electronic media. Creating material for one medium and using it in another.

Credit Restriction: Cannot be counted toward the number of hours required for the Master of Science degree.

510 International Journalism (3) Studies the development and impact of international and trans-national media systems on journalism today. Examines the implications for reporters, editors, and publishers in print, broadcasting, cable, satellite, and the Internet as well as the effects on audiences, societies, global cultures, and political economies. Comparative analysis of media, media practices, and flow of information throughout the world.

Comment(s): Requires admission to the program or consent of the instructor.

512 Mass Media Research Methods (3) Applications of communication research techniques for management. Gathering and analysis of data for assessing media audiences and message impacts.

Comment(s): Requires admission to the program or consent of the instructor.

515 Advanced Reporting across the Media (3) Developing good story ideas, researching them, and translating them into suitable material for news in print, broadcasting, cable, and the Internet. Using video and graphics to reinforce the story concept. Considering the needs of the media and the audience. Theories of how content changes as the medium changes.

520 Seminar in Political Communication (3) Relationships among mass media, public relations and government and their roles in democratic society. Governmental public relations, political campaigns, coverage of military, executive, legislative and judicial branches of government, special interest groups and public access to government information.
522 Seminar in Journalism Issues and Theory (3) Discussion of the important issues in journalism from a variety of theoretical viewpoints. Study of the basic literature on theory involving journalism (print, broadcasting, cable, and the Internet) and its application to current problems.

525 Public Opinion (3) Role of press in developing and influencing public consensus. Social theories of public opinion and analysis of media’s response. (Same as Public Relations 525.)

550 Writing And Editing Projects (3) Specialized writing or editing in interests: agriculture, politics, labor, finance, science, technical, general publications.

Registration Permission: Consent of instructor.

554 Seminar in Mass Media and Health and Risk (3) Mass communication and health communication theories examined as they relate to intended and unintended effects on individual behavior and on public health policy. Setting of media’s agenda on health and risk. Interaction of scientists, journalists, and public on scientific, technological, and medical questions.

Registration permission: Consent of instructor.

555 Seminar in Media Economics and New Technology (3) Electronic and print media ownership, finance and corporate structure. Roles of new technologies and marketing techniques in changing media content and function in future.

Comment(s): Requires admission to the program or consent of the instructor.

560 Advanced Web Publishing (3) Electronic research and publishing. Social, legal and ethical challenges surrounding online publishing. Project planning and storyboarding techniques for designing and creating site on Web.

590 Project (3) Capstone project under guidance of faculty. Applications of principles from previous coursework.

Grading Restriction: Satisfactory/No Credit grading only.

593 Seminar in Journalism And Electronic Media Issues (3) Contemporary topics in communications.

Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

597 Independent Study (3)

Registration Permission: Consent of instructor.

Judaic Studies (595)

405 Modern Jewish Thought (3) (See Religious Studies 405.)

425 Early Christian and Byzantine Art to 1350 (3) (See Art History 425.)

431 Medieval Art of the West, 800-1400 (3) (See Art History 431.)

Latin American Studies (600)

431 Topics in the Literature and Language of Portuguese-Speaking World (3) (See Portuguese 431)

432 Topics in the Literature and Language of Portuguese-Speaking World (3) (See Portuguese 432.)

456 Latin American Government and Politics (3) (See Political Science 456.)

465 Latin American Film and Culture (3) (See Spanish 465.)

479 Disenchanted Texts in Hispanic Literature (3) (See Spanish 479.)

510 Special Topics (3)

Repeatability: May be repeated. Maximum 6 hours.

Law (613)

801 Civil Procedure I (3) Binding effect of judgments, selecting proper court (jurisdiction and venue), ascertaining applicable law, and federal and state practice.

803 Contracts I (3) Basic agreement process and legal protections afforded contracts: offer and acceptance, consideration and other bases for enforcing promises; the Statute of Frauds, unconscionability and other controls of promissory liability. Introduction to relevant portions of Article 2 of the Uniform Commercial Code.

804 Contracts II (3) Continuation of Contracts I. Issues arising after contract formation; interpretation, duty of good faith; conditions, impracticability and frustration of purpose; remedies; third party beneficiaries; assignment and delegation. Considerable coverage of Article 2 of the Uniform Commercial Code with respect to remedies, anticipatory repudiation, impracticability and good faith.

805 Legal Process I (3) Lawyer-like use of cases and statutes in prediction and persuasion. Analysis and synthesis of common law decisions; statutory interpretation; fundamentals of expository legal writing and legal research.

806 Legal Process II (3) Continuation of Legal Process I. Formal legal writing, appellate procedure, and oral advocacy.

807 Torts I (3) Intentional torts, defenses and privileges related to intentional torts; negligence: standard of care, professional malpractice, and liability of owners and occupiers of land; defenses based on plaintiff's conduct; contributory and comparative negligence, assumption of risk, failure to take precautions, and avoidable consequences; causation, proximate cause; duty rules; and questions of joint and several or several liability.

808 Torts II (3) Vicarious liability and related concepts; strict liability for dangerous animals and abnormally dangerous activities; products liability; nuisance, defamation and invasion of privacy; economic torts: misrepresentation and interference with contract and prospective opportunities; immunities: those of government, governmental employees, charities and family members, and damages.

809 Criminal Law (3) Substantive aspects of criminal law; general principles applicable to all criminal conduct; specific analysis of particular crimes; defenses to crimes.

810 Property (4) Introductory course treating issues of ownership, possession, and title in the areas of: landlord-tenant relations; estates in land and future interests; co-ownership and marital property; real estate sales agreements and conveyances; title assurance and recording statutes; servitudes; and selected aspects of nuisance law, eminent domain and zoning.

812 Constitutional Law (4) Fundamental principles of American constitutional law: federalism, separation of powers, equal protection of law, and constitutional protection of other fundamental individual rights.

813 Evidence (4) Rules regulating introduction and exclusion of oral, written and demonstrative evidence at trials and other proceedings, including relevance, competence, impeachment, hearsay, privilege, expert testimony, authentication, and judicial notice.

(DE) Corequisite(s): 920 for students electing concentration in advocacy.

814 Legal Profession (3) Legal, professional and ethical standards applicable to lawyers.

Credit Restriction: Not open to students who have taken 815.

815 Introduction to Advocacy and Professional Responsibility (3) Theory and morality of advocacy in adversarial system, and legal, ethical, and professional standards applicable to lawyers and especially lawyers as advocates.

818 Fundamental Concepts of Income Taxation (3) Introduction to basic statutory analysis, fundamental principles of federal individual income tax, and pervasive income tax concerns that arise in practice. Federal concept of gross income, pattern of exclusions, exemptions and deductions from gross income used to arrive at tax base; special treatment of capital gains and losses; and rate structure.

819 Economic Principles of Income Taxation (3) Survey of time value of money and related economic principles in federal income tax system. Taxation of employment compensation arrangements and of various financial arrangements and products, and introduction to tax accounting.

(DE) Prerequisite(s): 818.
821 Administrative Law (3) Administrative agency decision-making processes and judicial review of administrative decisions; procedural standards for informal and formal administrative adjudication and rule-making (attention to federal Administrative Procedure Act); constitutional due process standards in administrative settings; and availability, scope and timing of judicial review of agency actions.

822 Legislation (3) Interpretation and drafting of statutes, legislative processes, and legislative power; comparison of judicial views on legislative process with both realities of legislative process and applicable constitutional principles.

827 Business Associations (4) Legal problems associated with the formation, operation, and dissolution of unincorporated and incorporated business firms; legal rights of duties of firm participants (principals and agents; partners, joint venturers, limited partners, limited liability partners, and members and managers of limited liability companies; and corporate shareholders, directors, and officers) and others with whom those participants interact in connection with the firm’s business.

828 Corporate Finance (3) Legal issues arising in conjunction with the purchase, sale, and repurchase of securities in capital formation and investment transactions, including: private and public debt, equity, and convertible securities offerings; dividends and other shareholder distributions; and mergers and acquisitions. (DE) Prerequisite(s): 827.

830 Securities Regulation (3) Basic structure and operation of the federal securities laws, including legal issues associated with: primary and secondary public and private securities offerings; Section 11 of the Securities Act of 1933, as amended, Rule 10b-5 under the Securities Exchange Act of 1934, as amended, and other antifraud provisions; periodic reporting and other disclosure requirements; the regulation of proxy solicitations, tender offers, and securities transactions involving officers, directors, and other insiders; and the regulation of stock markets and professional service providers in the securities industry. (DE) Prerequisite or (DE) Corequisite: 827.

833 Representative Enterprises (3-5) Capstone course for concentration in business transactions. Simulated business transactions and completion of major planning drafting project. Transactions vary: formation of new business, acquisition of existing business, development of real estate project, various financing transactions and corporation reorganizations. (DE) Prerequisite(s): Completion of all courses for concentration in business transactions.

834 Antitrust (3) Federal antitrust laws; monopolization, price-fixing, group boycotts, and anticompetitive practices generally; government enforcement techniques and private treble damage suits.

840 Commercial Law (4) Basic coverage of most significant provisions of Uniform Commercial Code: security interests in personal property (Art. 9 of U.C.C.); undisclosed bankruptcy; Bankruptcy Code provisions); commercial paper, including checks, notes and other negotiable instruments (Arts. 3 and 4 of U.C.C.); sales of goods, including coverage of portions of Art. 2 of U.C.C. not covered in Contracts.

842 Contract Drafting Seminar (2) Practical fundamentals of drafting contracts of different types.

843 Debtor-Creditor Law (3) Basic elements of federal bankruptcy law: claims, property of estate, automatic stay, trustee’s avoidance powers, assumption and rejection of contracts, priority of distributions, and distinction between liquidation and rehabilitation. Enforcing judgments outside of bankruptcy.

844 Business Reorganizations and Workouts (3) An examination of reorganization under chapter 11 of the United States Bankruptcy Code from petition date to confirmation of a plan of reorganization as well as coverage of the use of extensions, compositions, workouts and other non-bankruptcy methods of adjusting the rights or parties to business transactions. Although not required as prerequisites, an understanding of the subject matter of Commercial Law and especially Debtor/Creditor law is strongly recommended. The course satisfies the expository writing requirement.

847 Advanced Constitutional Law (2-3) Advanced study of issues in American constitutional law. Specific course offerings vary. Subjects include: constitutional structure of American governmental institutions, federalism, separation of governmental powers: relationship between legislative and executive branches, relationship among states and between states and federal government, and constitutional amendment process; state constitutional law, Tennessee constitution and differences between state and federal constitutional law; Bill of Rights and 14th Amendment to Constitution: constitutional rights as protected by Bill of Rights and 14th Amendment. Repeatability: May be repeated under different topic. (DE) Prerequisite(s): 812.

848 Civil Rights Actions (3) Litigation to vindicate constitutional rights in private actions against the government and its officials, as well as rights protected by other civil rights legislation: elements of cause of action under 42 U.S.C. sec. 1983; actions against federal government officials under the Bivens doctrine; institutional and individual immunities; relationship between state and federal courts in civil rights actions; and remedies for violations of constitutional and other civil rights.

849 Discrimination and the Law (3) Comparison of race, sex, and other forms of discrimination with respect to education, employment, housing, political participation and other social and economic activities; historical landmarks and current issues in discrimination law.

850 Supreme Court (3) History of Supreme Court and of procedures by which Court arrives at decisions; influences of justices’ ideology and role of Court in political system.

854 Investigatory Criminal Procedure (3) Police practices and constitutional rights of persons charged with crimes: arrest; search and seizure; identification; interrogation and confessions; electronic eavesdropping; and right to counsel.

855 Adjudicatory Criminal Procedure (3) Pre- and post-trial procedures in criminal case: bail; preliminary hearing; grand jury; prosecutorial discretion; discovery, speedy trial; plea bargaining; jury trial; and double jeopardy. Federal Rules of Criminal Procedure.

859 Criminal Law Seminar (2) Advanced problems in criminal law and administration of justice. (DE) Prerequisite(s): 809.

862 Family Law (3) Survey of laws affecting formal and informal family relationships: premartial disputes; ante nuptial contracts; creation of common law and formal marriage; legal effects of marriage; support obligations within family; legal separation, annulment, divorce, alimony, and property settlements; child custody and child support; abortion; illegitimacy.

863 Children and the Law (3) Legal relationships between children, families and state; juvenile justice; foster care; adoption; educational issues: special education; child abuse and neglect; health care and income maintenance; advocacy for children and families.

866 Environmental Law and Policy (3) Study, through methods of public policy analysis, of responses of legal system to environmental problems: environmental litigation; Clean Air Act; Clean Water Act; National Environmental Policy Act; and selected regulatory issues.

867 Environmental Law Seminar (2) Selected topics in environmental law.

868 Natural Resources (3) Considers how our society allocates and regulates the use of natural resources, including national parks, national forests, coastal resources, minerals, timber, and wildlife.

873 American Legal History (3) Selected topics in American legal history.

877 Jurisprudence (3) Critical or comparative examination of legal theories, concepts, and problems: legal positivism; natural law theory; legal realism; idealism; historical jurisprudence; utilitarianism; Kantianism; sociological jurisprudence; policy science; and critical studies.

879 Law and Economics (3) Relationship between legal and economic thought; application of basic economic concepts to legal problems; economics in legal decision making; scholarly support for and criticism of economic analysis of law. Designed for students with no undergraduate background in economics or mathematics.

881 Law and Literature (3) Reading literary works, development of philosophical and reading technique applicable to both law and life.

886 Public International Law (3) Law-creating processes and doctrines; principles and rules of law that regulate mutual behavior of states and other entities in international system.
887 International Business Transactions (2-3) Doing business with foreign persons and in foreign countries; acquisition and use of property within foreign country; regulation of international business transactions by international organizations and foreign governments; analysis of international conventions and laws of foreign countries affecting business and comparison of those conventions and laws with United States law.

895 Labor Relations Law (3) Political, social and economic influences in development of labor relations law; collective bargaining; employee-employer relations; employment discrimination; legally prescribed minimum standards of compensation and safety; restraints on termination of employment; regulation of retirement systems.

905 Advocacy Clinic (6) Supervised fieldwork requiring students to assume substantial responsibility for representing clients with various civil and criminal legal problems. Exploration and development of fundamental professional skills involved in practicing law: interviewing and counseling clients, negotiating with other attorneys, planning for transactions and dispute resolutions, initiating and defending claims, conducting factual investigations, and presenting evidence.

908 Mediation Clinic (3) Mediation process, theory, strategy, tactics and skills through readings, simulations, and service as mediators in general sessions court and other settings; mediation ethics, relationship of mediation to other dispute resolution methods, roles of attorneys in mediation, and writing of mediation agreements.

909 Non-profit Corporations (3) Examines federal and state laws that govern non-profit corporations and offers practical clinical experience representing local corporations. Teams of students conduct "legal audits" of local non-profit corporations, make presentations to administrators and directors, draft corporate documents, and help clients resolve legal problems.

914 Alternative Dispute Resolution (3) Survey course on various alternatives to the conventional trial process. Introduces several of the more popular alternatives, including negotiation, mediation, and arbitration. Satisfies planning and drafting requirement.

915 Conflict of Laws (3) Jurisdiction, foreign judgments, and conflict of laws.

916 Federal Courts (3) Jurisdiction of federal courts; conflicts between federal and state judicial systems.

918 Remedies (3) Judicial remedies: damages, restitution, and equitable relief; availability, limitations and measurement of various remedies; comparison of contract, tort and property-related remedies.

920 Trial Practice (3) Litigation through simulation, trial problems and preparation: basic trial strategy, professional responsibility, fact investigation and witness preparation; discovery and presentation of evidence: selection and instruction of juries; opening and closing arguments. Written work: pleadings, motions, interrogatories or memoranda.

921 Pre-Trial Litigation (3) Civil pre-trial process. Drafting of actual pre-trial documents in civil cases: complaint, motions for preliminary injunction, class certification papers, motions to dismiss and for summary judgment, and various discovery papers.

922 Advanced Trial Advocacy (3) Study and development of trial skills: trial preparation, advanced direct and cross-examination, expert witnesses, jury selection, jury instruction, technology in courtroom, and motion practice.

927 Interviewing, Counseling and Negotiation (3) Development of conceptual and practical frameworks for understanding interviewing, counseling and negotiation, and lawyer’s role in tasks. Readings of different methods, strategies and perspectives from recent literature involving lawyering skills. Simulations and videotape critiques, drafting of documents, role play of different issues and techniques of dispute resolution.

928 Case Development and Resolution (4) Theory and development of skills for case development and management: interviewing, counseling, and fact investigation. Ways of resolving disputes without litigation.

935 Gratuitous Transfers (3) Gifts; will substitutes; nature, creation, termination and modification of trusts; intestate succession; execution, revocation, probate and contest of wills; statutory protections against disinheritance; and introduction to powers of appointment, basic problems of will construction, powers of attorney, and planning for disability and death.

937 Estate Planning Seminar (2) Estate planning problems: relationship to estate planning of law and practice of fiduciary administration, insurance, property, wills, future interests, trusts, corporations, and partnerships. Required drafting of basic documents and explanation of documents.

940 Land Finance Law (3) Financing devices: mortgages, deeds of trust and land contracts; problems of priorities; transfer of secured interests when debt assumed or taken subject to security interest; default, exercise of equity of redemption and/or statutory right of redemption; mechanics’ and material men’s liens; contemporary developments in areas as condominiums, cooperatives, housing subdivisions, and shopping centers.

941 Land Acquisition and Development Seminar (2) Simulated repre- sentation of various parties: sellers, buyers, construction lenders, perma- nent lenders, architects, contractors, subcontractors and consultants, in development of real estate project. Negotiation and drafting of documents essential in large commercial development.

944 Business Law Clinic (6) Supervised fieldwork assuming substantial responsibility for representing clients with various business and transactional matters. Exploration and development of fundamental professional skills involved in practicing business and transactional law. Interviewing and counseling clients, negotiation and drafting of documents, representation of other professional prosecutors in office. Assist in investigation of crimes, serving of warrants, interviewing and preparation of witnesses, drafting of relevant documents, negotiation and formal presentation of guilty pleas, presentation of cases to grand jury, and representation of government in preliminary hearings and felony trials.

947 Prosecution Externship (6) Supervised fieldwork required to be ad- ministered as prosecutor and to assume substantial responsibility for prosecution of criminal cases in state or federal courts. Classes on Tennessee or federal criminal law and procedure and prosecution function. Under direct supervision of full-time, experienced prosecutor and other professional prosecutors in office. Assist in investigation of crimes, interview and preparation of witnesses, drafting of relevant documents, negotiation and formal presentation of guilty pleas, presentation of cases to grand jury, and representation of government in preliminary hearings and felony trials.

954 Copyright Law (3) Considers copyright theory, doctrine, and practice and how the law is changing in response to globalization and advances in information technology. Topics include the subject matter of the copyright, the exclusive rights provided by the Copyright Act, substantive and procedural aspects of infringement actions, and remedies. Satisfies expository writing requirement.

955 Patent Law (3) Covers the major aspects of patent law, primarily as applied in the U.S. Patentability, including patentable subject matter, utility, enablement and written description, novelty, and nonobviousness; infringement; ownership and licensing; and remedies. Emphasizes essential legal principles, useful as background for non-patent lawyers and as a foundation for patent lawyers.

956 Entertainment Law (3) Role of law and lawyer in entertainment in- dustry. Course content varies. Music industry—music lawyer; art/artist/manager relationships; recording contract negotiations; industry labor unions; and performing right organizations.
957 Law, Science and Technology (3) Legal implications of advanced technologies; adaptation of law to challenges posed by new kinds of knowledge and new ways of doing things. Biotechnology, regulation of scientific research, space law, legal issues relating to new information technologies, nanotechnologies, and others designated by instructor.

958 Women and The Law (3) Treatment and status of women in American legal system: women as political actors, as family members, as participants in workforce, as targets of violence and as members of legal professions; introduction to current competing approaches to gender justice.

959 Intellectual Property (3) Intellectual property and related interests under federal and state law; patents; trademarks; trade secrets; copyright; right of publicity; unfair competition.

960 Employee Benefits Law (2-3) Employee Retirement Income Security Act, federal law governing employee benefit plans sponsored by private employers; problem methods of instruction: questions, issues, and problems involving employee benefit plans likely to arise in general litigation or business transaction practice. For three credit hours, includes Chapter 400 of Internal Revenue Code.

962 Law and Medicine Seminar (2) Effects of legal rules on delivery and quality of medical care: nature of physician-patient relationship; unauthorized practice of medicine; medical education, licensing and specialization; hospital staff privileges; medical malpractice liability: standard of care, proof, causation, defenses, and damages; protection of patient autonomy; Consent, informed consent, conception and abortion, choice of treatment, and death and dying; control of communicable diseases; organ transplantation and medical resource allocation.

963 Health Care Law and Regulation (3) Surveys legal issues confronting the American health care system, considering federal and state law. Topics include quality control; licensing and accreditation; access to health care, including private health insurance, managed care, Medicare, Medicaid, and emergency health care; privacy regulations; relationships between health care entities and physicians; fraud and abuse regulations; antitrust considerations; and research restriction. Satisfies expository writing requirement if student elects to write a paper.

964 Health Care Policy (2) Considers ethical perspectives on health care policy, relating to decisions both on individual patient care and on systemic resource allocation. Considers basic theories of bioethics, including how these ethical perspectives may inform analysis of current issues in health care law and policy and how they are expressed in the national policy debate. Topics include organizing and financing health care, quality and accountability in health care, equality and discrimination in access to health care, privacy issues raised by new technology, legal and ethical issues in managed care, and tort reform. Satisfies the perspectives requirement.

965 Community Development (3) Considers legal issues faced by under-represented constituencies. Students work on law-related field projects under lawyer supervision, collaborating with organizations that serve or advocate for the under-represented in and around Knoxville. Projects may include legal research, legislative drafting and advocacy, creation of educational materials or events, empirical research, and recording of oral histories.

966 Community Legal Education (3) Considers how to advance the law-related education of under-represented constituencies. Under lawyer supervision, students work on law-related education projects for the under-represented in and around Knoxville. Projects may include classroom talks, and the creation, development or production of law-related written materials, skits, interactive workshops, videos, or Web pages. Satisfies the perspectives requirement.

967 Media Impact on Justice (3) Explores the impact that the media has on the perception and reality of justice in the United States, including its impact on courts, counsel, legislatures, and executive branches.

972 Income Taxation of Business Organizations (3) Survey and comparative analysis of federal patterns of income taxation of partnerships, subchapter C corporations, subchapter S corporations, and limited liability companies; introduction to tax planning and business planning. Required written exercises: drafting of portions of partnership agreements, opinion letters, and legal memoranda.

973 Wealth Transfer Taxation (3) Taxation of gratuitous transfers of wealth during life (gift tax) and at death (estate tax) and of generation skipping transfers.

975 Tax Theory (3) Method and purposes of governmental revenue collection through examination of economic and political theory; comparative analysis of various actual and proposed patterns of taxation: income tax, consumption tax, sales tax, and value-added tax. Required preparation of expository essay on aspect of tax theory chosen by student.

978 Transactional Tax Planning (3) Advanced study of taxation of business organizations: tax treatment of business acquisitions, tax planning for financially troubled entities, and review of recent transactions involving cutting-edge tax planning and shaping changes in law.

979 Tax Exempt Organizations (3) Federal tax laws governing the income taxation of not-for-profit organizations; taxation of gifts and bequests made to not-for-profit organizations by individuals; division of topics between tax, law, and economics.

980 Insurance (3) Types of insurance: life, property, health, accident and liability insurance; regulation of insurance industry; interpretation of insurance contracts; insurable interest requirement; conditions, warranties and representations; coverage and exclusions; duties of agents; excess liability; subrogation; and bad faith actions against insurers. Liability insurance defense problems: duty to defend, notice and cooperation issues, and conflicts of interest.

983 Products Liability (3) Scope of doctrine and theories of recovery; potential plaintiffs and defendants; statutory and contractual limitations on recovery; damages; causation; and defenses.

985 Workers’ Compensation (3) Workers’ Compensation system for compensating victims of work-related accidents and diseases: requirements for covered employer-employee relationship; accidental injuries or occupational diseases arising out of and in course of employment; causation; nature of medical, disability, and death benefits; exclusiveness of compensation remedy against employer and co-employees; and rights and liabilities of non-employers; administrative and procedural aspects of Workers’ Compensation practice and various law reform measures.

990 Issues in the Law (3) Selected topics.
Repeatability: May be repeated.

991 Issues in the Law Seminar (2) Selected topics.
Repeatability: May be repeated.

993 Directed Research (1-2) Independent research and writing under direct supervision of faculty member. Proposals must be approved by the supervising faculty member and by the dean or the dean’s designee.

Repeatability: May be taken a maximum of once each semester during last 2 years of study.

994 Independent Study (1-4) Independent study under direct supervision of faculty member. Proposals must be approved by the supervising faculty member and by the dean or the dean’s designee.

Repeatability: May be taken a maximum of once each semester during the last 3 semesters of study.

995 Transactions: The Tennessee Journal of Business Law (1-2) Performance of duties of staff member or editor of Transactions: The Tennessee Journal of Business Law. Responsibilities vary each semester, including writing of case synopsis, writing of article, and/or performing other assigned duties related to operation. Members of Transactions who are not on senior editorial board receive one hour of credit for successfully completing two consecutive semesters of service. Members of senior editorial board receive two hours of credit for each full year of satisfactory service.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

996 Law Review (1) Performance of duties as staff member or editor of Tennessee Law Review. Responsibilities vary each semester as specified in Tennessee Law Review Policy Manual: writing of case note, comment or article, and/or performance of other assigned duties related to operations of Tennessee Law Review. Completion of potentially publishable comment or article for Tennessee Law Review satisfies expository writing requirement.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: Does not count toward total number of elective upper-division courses taken.

997 moot Court (1) Participation as member of faculty-supervised interscholastic moot court competition.
Repeatability: May be repeated.

Credit Restriction: Does not count toward total number of elective upper-division courses taken Satisfactory/No Credit.

998 Planning and Drafting Project (1) Preparation and completion of planning and drafting project under faculty supervision in conjunction with substantive courses when such planning and drafting option is provided by course instructor.

Repeatability: May be repeated.
Legal Studies (617)
430 United States Constitutional Law: Sources of Power and Restraint (3) (See Political Science 430.)
431 United States Constitutional Law: Civil Rights and Liberties (3) (See Political Science 431.)
435 Criminal Law and Procedure (3) (See Political Science 435.)
442 Administrative Law (3) (See Political Science 442.)
445 Administration of Justice (3) (See Political Science 445.)
451 Criminal Justice (3) (See Sociology 451.)
455 Society and Law (3) (See Sociology 455.)
490 Language and Law (3) (See English 490.)
496 The Rhetoric of Legal Discourse (3) (See English 496.)

Life Sciences (621)
500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Graduate Research Participation (3-12) Special advanced research project not related to dissertation research. Topics chosen with consent of instructor.
Repeatability: May be repeated. Maximum 12 hours.

505 Research Rotation (2) Laboratory rotations with faculty member on clearly defined projects. Written proposal and oral report.
Repeatability: May be repeated. Maximum 8 hours.

507 Bioinformatics and Computational Biology (1-3) Topics to be covered include the application of computing, modeling, data analysis, and information technology to fundamental problems in the life sciences.
Repeatability: May be repeated. Maximum 12 hours.

510 Special Topics in Life Sciences (1-3) Specializations in biotechnology; cellular, molecular, and developmental biology; environmental toxicology; ethology; plant, physiology, and genetics; and physiology.
Repeatability: May be repeated. Maximum 9 hours.

515 Introduction to Genome Science and Technology I (1) Introduction to research in genome science and technology concentration.
Grading Restriction: Satisfactory/No Credit grading only.

516 Introduction to Genome Science and Technology II (1) Science and ethics of practice of science.
Grading Restriction: Satisfactory/No Credit grading only.

520 Genome Science and Technology I (4) Overview of genomics, advanced genetics principles.

521 Genome Science and Technology II (4) Analytical technologies and special techniques.

540 Colloquium (1) Invited speakers. Topics announced in advance.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

541 Colloquium (1) Invited speakers. Topics announced in advance.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

550 Mammalian Genetics and Genomics (3) Genetic variation, inheritance, phenotypic traits, molecular genetics and genomics, mutagenesis in laboratory rodents and other mammals.
(DE) Prerequisite(s): 520 and 521.

591 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

595 Special Topics in Genome Science and Technology (1-3) Tutorials or lectures in variety of special topics to be chosen by instructor.
Repeatability: May be repeated. Maximum 12 hours.

596 Special Topics in Genome Science and Technology (1-3) Tutorials or lectures in variety of special topics to be chosen by instructor.
Repeatability: May be repeated. Maximum 12 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

615 Journal Club in Genome Science and Technology (1) Reading and discussion based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

695 Advanced Topics in Genome Science and Technology (1-3) Tutorials or lectures on variety of advanced topics to be chosen by instructor.
Repeatability: May be repeated. Maximum 12 hours.

696 Advanced Topics in Genome Science and Technology (1-3) Tutorials or lectures on variety of advanced topics to be chosen by instructor.
Repeatability: May be repeated. Maximum 12 hours.

Linguistics (623)
400 Topics in Linguistics (3)
Repeatability: May be repeated. Maximum 6 hours.

411 Linguistic Anthropology (3) (See Anthropology 411.)

423 The Development of Diachronic and Synchronic Linguistics (3) Development of Western linguistic thought from the Hebrews and Greeks through modern times. Readings from Boas, Sapir, Bloomfield, and others.
(DE) Prerequisite(s): 9 hours of courses required for undergraduate linguistics concentration (300-level or above) or consent of instructor.

425 Introduction to Descriptive Linguistics (3) (See French 425.)

426 Methods of Historical Linguistics (3) (See German 426.)

429 Romance Linguistics (3) (See French 429.)

431 Topics in Hispanic Linguistics (3) (See Spanish 430.)

435 Structure of the German Language (3) (See German 435.)

436 History of the German Language (3) (See German 436.)

471 Sociolinguistics (3) (See English 471.)

472 American English (3) (See English 472.)

474 Teaching English as a Second or Foreign Language I (3) (See English 474.)

476 Second Language Acquisition (3) (See English 476.)

477 Pedagogical Grammar for ESL Teachers (3) (See English 477.)

485 Special Topics in Language (3) (See English 485.)

490 Language and Law (3) (See English 490.)

510 Special Topics (3)
Repeatability: May be repeated. Maximum 6 hours.

575 Issues in Second/Foreign Language Rhetoric and Composition (3) (See English 575.)

Logistics (626)
502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Statistics and Operations Management (3) (See Operations and Management Science 540.)

546 Logistics and Supply Chain Strategy (3) Development of strategy for logistics systems and supply chain processes. Executive-level integration of logistics strategy with marketing, production, finance, and other decision areas.
(DE) Prerequisite(s): 510 and Business Administration 511, 512, 513, and 514.

547 Global Logistics and Supply Chain Management (3) Logistics strategy in global firm: materials management, international sourcing and procurement, global production and distribution, import/export activity. Design and operation of supply chains in global environment.
(DE) Prerequisite(s): 510 and Business Administration 511, 512, 513, and 514.

593 Independent Study (3-6) Directed research and study.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

599 Special Topics in Logistics (3-6) Seminar designed to study specific current problem areas in logistics. Topic announced prior to offering.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.
Management (625)
440 Organizational Psychology (3) (See Psychology 440.)
500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

511 Organizational Theory: Integrated Structure and Behavior (3)
   Cases, group projects, discussion; organizational theories, organizational effectiveness; contextual factors of organizations: environment, size, technology; organizational structure configurations, organization design; social influences on organization effectiveness: motivation, leadership, group behavior, intergroup relations, organization change and development.

521 Human Resource Management (3) Personnel functions and human resources management. Community relations, recruiting, selection, training, performance evaluation, wage and salary administration, legal framework as it affects personnel.

551 Management of New Ventures (3)
   Integration of various functional disciplines and their application to general management of ventures formed both within larger corporations and independently. Preparation of a venture plan, case analysis.

571 International Management (3)
   Analysis of environment of international business firms and impact of internal and external factors on managerial decisions.

593 Directed Independent Study (1-3)
   Topic of mutual interest. Available only by prearrangement with supervising faculty member.
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated. Maximum 6 hours.

595 Selected Topics in Current Management Issues (3)
   In-depth consideration of current issues. Managerial impact of emerging topics.
   Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

Management Science (627)
500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

526 Advanced Applications of Systems Modeling and Simulation (3)
   (See Industrial Engineering 526.)

531 Mathematical Programming (3)
   Linear programming solution procedures, duality, sensitivity, and parametric analysis, linear-fractional, piecewise-linear, separable and integer programming, transportation linear programs.
   (DE) Prerequisite(s): Fundamentals of matrix algebra course.

532 Stochastic Models in Management Science (3)
   Discrete-time Markov chains, Poisson processes, continuous-time Markov chains, renewal theory, and queueing theory.
   (DE) Prerequisite(s): Statistics 563 and mathematical analysis course or consent of instructor.

533 Computational Mathematical Programming (3)
   Computational aspects of mathematical programming models, in particular for large systems.
   (DE) Prerequisite(s): 531 and proficiency in computer language.

534 Management Science Methods in Business (3)
   Application of methods from 531, 532, and 533 to real world problems in business/industry.

551 Organizational Theory: Integrated Structure and Behavior (3)
   Cases, group projects, discussion; organizational theories, organizational effectiveness; contextual factors of organizations: environment, size, technology; organizational structure configurations, organization design; social influences on organization effectiveness: motivation, leadership, group behavior, intergroup relations, organization change and development.

593 Management Science Problems (1-6)
   Directed research on subject of mutual interest.

600 Doctoral Research and Dissertation (3-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

621 Network Flows (3)
   Treatment of network optimization algorithms, transportation and transshipment models and primal-dual and primal-dual basis tree methods.
   (DE) Prerequisite(s): 531 or equivalent.

631 Integer Programming (3)
   Theoretical and computational aspects of linear programming with integer variables, branch and bound, cutting plane, and group theoretic algorithms.

651 Nonlinear Optimization (3)
   Kuhn-Tucker theory in nonlinear programming, solution procedures for constrained and unconstrained nonlinear programs, search techniques, quadratic programming, duality and sensitivity analysis. (Same as Industrial Engineering 602.)
   (DE) Prerequisite(s): 531 or equivalent and proficiency in computer language.

681 Special Topics (3)
   Repeatability: May be repeated. Maximum 9 hours.
   (DE) Prerequisite(s): 531 and 532.
   Registration Permission: Consent of instructor.

691 Management Science Seminar (1)
   Subjects selected from current literature.
   Grading Restriction: Satisfactory/No Credit grading only.

692 Management Science Seminar (1)
   Subjects selected from current literature.
   Grading Restriction: Satisfactory/No Credit grading only.

Marketing (632)
502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

510 Principles of Marketing Management for Non-MBA Students (3)
   For students from other disciplines interested in obtaining knowledge of marketing discipline at graduate level.

520 Marketing and Customer Value (3)
   Frameworks, techniques, and processes required for customer relationship management and demand planning in organizations. Twin problems of analyzing markets and customers and translating these analyses into actionable marketing strategies.
   (DE) Prerequisite(s): Business Administration 511, 512, and 513 or consent of instructor.
530 MBA Marketing Concentration (6) Product management: Complex, interdisciplinary nature of product development and product management. Strategic issues during product life cycle, from idea conception to product development to commercialization to eventual product dismissal. Integrated communications: Strategies and tactics associated with communicating value to customers. One-to-one marketing approaches, role of personal selling in communication mix, and advertising and promotions management. Global marketing management: Cross-national forces that enable firms to design and maintain competitive marketing and supply chain networks across multiple geographic locations.

(DE) Prerequisite(s): 520 and Business Administration 511, 512, 513, and 514.

593 Independent Study (3) Directed research and study.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): MBA core.
Registration Permission: Consent of instructor.

599 Special Topics Seminar (3) Topics vary: market forecasting, market segmentation, services marketing, marketing channels, and related issues.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

611 Theoretical Foundations (3) Theoretical foundations and frame-works essential to business research. Historical and philosophy of sci-ence perspectives. (Same as Logistics 611.)

612 Quantitative Research Methods (3) Quantitative research process: problem formulation, Measurement reliability, validity and scale development, Experimental design and analysis, survey design and analysis, sampling, ethical considerations, and international issues in quantitative research. (Same as Logistics 612.)

613 Qualitative Research Methods (3) Examination of qualitative research theoretical perspectives. Application of qualitative research methods to theory building research. Topics include formu-lating research questions, designing qualitative research studies, sam-ping, data generation techniques, data analysis techniques, evaluating qualitative research, and writing qualitative research reports.

614 Contemporary Marketing Thought (3) Representative topics comprising content of marketing knowledge; macromarketing, markets, chan-nels, and competitive behavior; marketing strategy; marketing mix tools; and ethical issues in marketing. Examination of research for contributions to advancing knowledge and opportunities for new research. Offered every other year.

Registration Permission: Consent of instructor.

615 Consumer Behavior Research (3) Theoretical perspective and re-search methodology. Application of qualitative research methods to theory building research. Topics include formu-lating research questions, designing qualitative research studies, sam-ping, data generation techniques, data analysis techniques, evaluating qualitative research, and writing qualitative research reports.

616 Measurement (3) Measurement and measurement process: design and development of tools, process of testing, and determination of reli-a-bility and validity.

617 Special Topics (3) Topics vary: marketing strategy, advanced conSUMER behavior, research methodology, influence and persuasion theory, and strategy, pricing issues, international marketing issues, and nonprof-it organization marketing issues.

693 Independent Study (1-6) Directed research on subject of mutual in-terest to student and staff member.
Repeatability: May be repeated. Maximum 6 hours.

5429 Introduction to Ceramic Matrix Composites (3) Characteristics of composites: ceramic matrix composites; macromechanics and materials design; overview of fabrication techniques; microstructural characterization; physical and mechanical property evaluation; current and potential applications.
(DE) Prerequisite(s): 201 and Engineering Science 321.

470 Environmental Degradation of Materials (3) Mechanisms, measure-ment techniques and control of environmental degradation processes in metals, polymers, ceramics and composites; materials selection and design considerations. Recommended for chemical engineering, me-chanical engineering and engineering science and mechanics majors.
(DE) Prerequisite(s): 201.

472 Fundamental Principles of Composite Materials (3) Physical prin-ciples basic to the design, manufacture, and application of fiber rein-forced polymers, metals and ceramics.
(DE) Prerequisite(s): 302 or equivalent.

474 Biomaterials (3) Metals, polymers and ceramics utilized in orthope-dic, cardiovascular, and dental surgical implant devices; corrosion and degradation problems; material properties of primary importance; tissue response to synthetic materials. Recommended for engineering science and mechanics majors.
(DE) Prerequisite(s): 201.

484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses univer-sity facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Graduate Seminar in Materials Science and Engineering (1)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Comment(s): Admission to graduate program required.

504 Graduate Seminar in Polymer Engineering (1)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Comment(s): Admission to graduate program required.

505 Engineering Analysis (3) (See Chemical Engineering 505.)

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)

509 Multidisciplinary Project (1) (Same as Industrial Engineering 509.)

511 Fundamentals of Materials Science and Engineering I (3) Chemical bonding, structures, defects, scattering, thermodynamics, diffusion, phase diagrams, microstructures, and phase transformations.

512 Fundamentals of Materials Science and Engineering II (3) Physical properties: electrical and thermal conduction, elementary quantum physics, band theory, dielectric materials, magnetic and optical proper-ties. Mechanical behavior: stress and strain at a point, elastic constitu-tive equations, phenomenological bulk behavior, and deformation mechanisms.

(DE) Prerequisite(s): 511.

516 Mechanical Metallurgy (3) Deformation and fracture of metals and alloys: dislocation theory, strengthening mechanisms, macro-scale de-scriptions of plasticity, fracture mechanics, fatigue, and time-dependent behavior.
(DE) Prerequisite(s): 512.

522 Defects in Crystals (3) Analytical and experimental analysis of de-fect interactions in solids.
(DE) Prerequisite(s): 421 or consent of instructor.

Materials Science and Engineering (638)

405 Structural Characterization of Materials (4) X-ray diffraction and fluorescence; scanning and transmission electron microscopy; microan-alytical techniques.

421 Mechanical Behavior of Materials II (3) Description of stress and strain; linear elastic constitutive equations; isotropic and anisotropic mod-uli in various materials; yield criteria; brittle fracture; crazing; plastic strain constitutive equations; forming operations and limit criteria.
(DE) Prerequisite(s): 302 and Engineering Science 321.
524 Metallurgical Thermodynamics (3) Applications of chemical thermodynamics to metallurgical problems; refining, oxidation, surface treatments, alloy systems.  
(DE) Prerequisite(s): 570 or equivalent.

525 Welding Metallurgy (3) Welding processes; physical metallurgy of welding; phase transformations; heat flow; residual stresses; theories of hot cracking, cold cracking and porosity formation; applications to process utilization.  
(DE) Prerequisite(s): 470 or consent of instructor.

526 Welding Metallurgy (3) Welding processes; physical metallurgy of welding; phase transformations; heat flow; residual stresses; theories of hot cracking, cold cracking and porosity formation; applications to process utilization.

528 Ceramic Matrix Composites: Material and Mechanics (3) (See Engineering Science 528.)

531 Advanced Corrosion (3) Analyses of corrosion processes in terms of polarization measurements and Pourbaix diagram. Influence of environmental and mechanical factors contributing to pitting, crevice, fretting, wear, fatigue and stress corrosion.  
(DE) Prerequisite(s): Course in mechanical behavior.

(DE) Prerequisite(s): Course in mechanical behavior.

540 Basic Polymer Chemistry (3) Synthesis, reactions and degradation of polymers. Molecular characterization: solution methods and spectroscopy.  
(DE) Prerequisite(s): Semester of organic chemistry and thermodynamics.

541 Polymer Rheology (3) Deformation and flow of polymeric materials. Development of empirical models, linear viscoelasticity and finite strain constitutive equations; material functions, temperature dependence and rheometry with applications to synthesis and processing. Elementary kinetic theory of elastic dumbbell suspensions. (Same as Chemical Engineering 541.)  
(DE) Prerequisite(s): Chemical Engineering 240 or equivalent.

542 Further Topics in Polymer Processing (3) Description and analysis of selected polymer processing operations.  
(DE) Prerequisite(s): 541.

543 Basic Polymer Physics (3) Essential structure-property relations in materials. Physical structure of polymers. Mechanical, electrical and thermal properties.  
(DE) Corequisite(s): 540.

544 Polymer Solution Thermodynamics and Characterization (3) Theories of solutions, statistical thermodynamics. Characterization, treatment of chromatography, viscosity, light scattering and osmotic pressure.  
(DE) Prerequisite(s): Undergraduate physical chemistry course.

545 Polymer Engineering Processing and Characterization Laboratory (3) Polymer film casting, film blowing, mixing and extrusion are operated and studied. Flow rates, temperatures, pressures and velocity profiles are acquired and used in finite element modeling and simulation to correlate the polymeric material properties and morphology. Supporting instrumentation includes linear viscoelastic rheometry, capillary microscopy, SEM, OM, FTIR, etc. Fundamentals of processing-structure-property relationships are documented in a literature review paper.  
Registration Permission: Consent of instructor.

546 Mechanical Properties of Solid Polymers (3) Types of mechanical behavior; Hookean and rubber elasticity; plastic deformation; fracture; linear viscoelasticity; dynamic mechanical behavior and testing; loss tangent; experimental methods. Introduction to mechanical properties of polymeric composites.

549 Laboratory Methods in Polymer Engineering (1) Basic experimental techniques and instrumentation associated with characterization, x-ray and light scattering, calorimetry, rheometry, mechanical properties of solid polymers, polymer processing operations.  
Grading Restriction: Satisfactory/No Credit grading only.  
(DE) Prerequisite(s): 540 or equivalent.

550 Laboratory Methods in Polymer Engineering (2) Basic experimental techniques and instrumentation associated with characterization, x-ray and light scattering, calorimetry, rheometry, mechanical properties of solid polymers, polymer processing operations.  
(DE) Prerequisite(s): 540 or equivalent.

552 Fiber Science (3) Physical properties, mechanical properties and microstructure of polymeric fibers; relation to end-use properties.  
(DE) Prerequisite(s): Organic chemistry course and thermal physics course.

553 Nonwovens Science and Technology I (3) Nonwoven fabric technology; different web forming processes; and relationships among the chemical, morphological and mechanical properties of fibers and orientation in webs to final performance properties of bonded structures.  
(DE) Prerequisite(s): Organic chemistry course or consent of instructor.

554 Nonwovens Science and Technology II (3) Interrelations between mechanics of production and mechanical properties of nonwoven fabrics; characterization of fiber morphology and web structure; chemistry of non-woven binders and finishes; and engineering of specific fabric properties.  
(DE) Prerequisite(s): 553 or equivalent.

555 Laboratory Methods in Nonwovens Processing and Characterization (3) Laboratory experience in nonwovens fabrication processes and characterization techniques. Effect of processing conditions on structure development and properties of different types of webs.  
(DE) Prerequisite(s): 552 and 553.

560 Principles of Ceramic Processing (3) Treatment of ceramic processing; raw materials preparation and characterization; powder consolidation; drying, firing, sintering techniques, mechanisms and kinetics.  
(DE) Prerequisite(s): 360 or equivalent.

570 Optical Microscopy (4) Basic compound and polarization microscopy for imaging. Optical property measurements, and structure elucidation. Other methods of optical microscopy.  
Contact Hour Distribution: 3 hours and 2 labs.  
(DE) Prerequisite(s): Physics 232 and Physics 240.

572 X-Ray Diffraction (3) Symmetry of crystals, space group theory, reciprocal lattice and application to definition of structures; powder and single crystal x-ray techniques; introduction to crystal structure determination; characterization of orientation; application to inorganic, metallic and polymer structures.

575 Surface Characterization (3) Analytical techniques for characterizing surfaces of textile materials. Applications of well-established techniques: spectroscopy and microscopy.  
(DE) Prerequisite(s): 552.

576 Special Topics in Materials Science and Engineering (3) Topics of current significance and interest. Repeatability: May be repeated.  
Registration Permission: Consent of instructor.

Registration Permission: Consent of faculty committee.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

600 Doctoral Research and Dissertation (3-15)  
Grading Restriction: P/NP only.  
Repeatability: May be repeated.

621 Theoretical Metallurgy (3) Topics in solid state physics as applied to metallurgy; introduction to quantum theory, specific heats, electron theory of solids, electrical and thermal conductivity, magnetic properties, theories of alloy formation, etc.  
Registration Permission: Consent of instructor.

625 Materials Lifetime Science and Engineering I (3) Fundamentals of aqueous and high-temperature corrosion and fatigue; methods of materials lifetime modeling.  
(DE) Prerequisite(s): 531 and 532 or consent of instructor.

626 Materials Lifetime Science and Engineering II (3) Interactions between corrosion and fatigue at ambient and high temperatures; lifetime modeling of materials simultaneously subjected to corrosion and fatigue.  
(DE) Prerequisite(s): 625.

627 Case Studies in Materials Lifetime Science and Engineering (3) Studies of, and participation in, industrial analyses of lifetimes of structural materials subjected to aqueous-corrosion/fatigue and high-temperature-oxidation/fatigue, performed as part of the student’s industrial and national-laboratory internship programs.  
(DE) Prerequisite(s): 531 and 532 or consent of instructor.

628 Graduate Seminar in Materials Lifetime Science and Engineering (1) Seminars by students, faculty, and visiting scholars on materials lifetime science and engineering; processes, mechanisms, and materials lifetime modeling.  
Grading Restriction: Satisfactory/No Credit grading only.  
(DE) Prerequisite(s): 531 and 532 or consent of instructor.
Mathematics (641)

400 History of Mathematics (3) Development of major ideas in mathematics from ancient to modern times and the influence of these ideas in science, technology, philosophy, art, and other areas. Includes at least one in-class essay examination and 3,000 words of writing outside class.

(DE) Prerequisite(s): 251 or 257 and 300.

403 Mathematical Methods for Engineers and Scientists (3) Matrix computations, numerical methods, partial differential equations, Sturm-Liouville Theory and special functions as used in engineering and science.

Credit Restriction: Does not satisfy major requirements for the mathematics major (Bachelor of Science or Master of Science).

(DE) Prerequisite(s): 231, 241, and familiarity with operating system and programming language.

404 Applied Vector Calculus (3) Topics from multivariable and vector calculus: line and surface integrals, divergence theorem and the theorems of Gauss and Stokes.

(DE) Prerequisite(s): 241 or 247.

405 Models in Biology (3) Difference and differential equation models of biological systems.

Credit Restriction: May not be applied toward graduate degree.

411 Mathematical Modeling (3) Construction and analysis of mathematical models used in science and industry. Projects emphasized.

(DE) Prerequisite(s): 231, 241, and 251 or 257.

421 Combinatorics (3) Introduction to problems of construction and enumeration for discrete structures such as sequences, partitions, graphs, finite fields and geometries, and experimental designs.

(DE) Prerequisite(s): 323 or consent of instructor.

423 Probability I (3) Axiomatic probability, multivariate distributions, conditional probability and expectations, methods of moment generating/characteristic functions. Laws of large numbers and central limit theorem.

(DE) Prerequisite(s): 300-level probability course or consent of instructor.

424 Probability II (3) Elements of stochastic processes: Random walk, Markov chains and Poisson processes. Other topics as selected by the instructor.

(DE) Prerequisite(s): 423.

425 Statistics (3) Derivation of standard statistical distributions: t, F and X2; independence of sample mean and variance; basic limit theorems; point and interval estimation, Bayesian estimates; statistical hypotheses, Neyman-Pearson theorem; likelihood ratio and other parametric and non-parametric tests; sufficient statistics.

(DE) Prerequisite(s): 323 or consent of instructor.

(DE) Prerequisite(s): 200 or 251 or 257 or 231.

435 Partial Differential Equations (3) Separation of variables, Fourier series, solution of Laplace, wave, and heat equations.

(DE) Prerequisite(s): 231 or 241 or 247.

443 Complex Variables I (3) Introduction to the theory of functions of a complex variable, including residue theory and contour integrals.

(DE) Prerequisite(s): 241 or 247.

445 Advanced Calculus I (3) Introduction to the theory of sequences, series, differentiation, and Riemann integration of functions of one or more variables.

(DE) Prerequisite(s): 241 or 247 and 300 or consent of instructor.

446 Advanced Calculus II (3) Introduction to the theory of sequences, series, differentiation, and Riemann integration of functions of one or more variables.

(DE) Prerequisite(s): 241 or 247 and 300 or consent of instructor.

447 Honors: Advanced Calculus I (3) Honors version of 445.

(DE) Prerequisite(s): 341 or consent of instructor.

448 Honors: Advanced Calculus II (3) Honors version of 446.

(DE) Prerequisite(s): 341 or consent of instructor.

453 Matrix Algebra II (3) Advanced topics in matrix theory including Jordan canonical form.

(DE) Prerequisite(s): 251 or 257.

455 Abstract Algebra I (3) Introduction to algebraic structures such as groups, rings, fields, vector spaces, and linear transformations.

(DE) Prerequisite(s): 251 or 257 and 300 or consent of instructor.

456 Abstract Algebra II (3) Introduction to algebraic structures such as groups, rings, fields, vector spaces, and linear transformations.

(DE) Prerequisite(s): 251 or 257 and 300 or consent of instructor.
457 Honors: Abstract Algebra I (3) Honors version of 455.
(DE) Prerequisite(s): 351 or consent of instructor.

458 Honors: Abstract Algebra II (3) Honors version of 456.
(DE) Prerequisite(s): 351 or consent of instructor.

460 Geometry (3) Axiomatic and historical development of neutral, Euclidean, and hyperbolic geometry stressing proof technique and critical reasoning. Models of Non-Euclidean geometries.
(DE) Prerequisite(s): 300 or consent of instructor.

461 Topology (3) Includes topology of line and plane, separation properties, compactness, connectedness, continuous functions, homeomorphisms, continua and topological invariants.
(DE) Prerequisite(s): 241 or 247 and 300 or consent of instructor.

471 Numerical Analysis (3) Introduction to computation, instabilities, and rounding. Interpolation and approximation by polynomials and piecewise polynomials. Quadrature and numerical solution of initial and boundary value problems of ordinary differential equations, stiff systems. (Same as Computer Science 471.)
(DE) Prerequisite(s): 371 or consent of instructor.

472 Numerical Algebra (3) Direct and iterative methods for systems of linear equations. Solution of single nonlinear equation and nonlinear systems. Orthogonal decomposition, least squares and algebraic eigenvalue problem. (Same as Computer Science 472.)
(DE) Prerequisite(s): 371 or consent of instructor. Recommended Background: 453.

475 Industrial Mathematics (3) Modeling, analysis, and computation applied to scientific/technical/industrial problems.
(DE) Prerequisite(s): 231 and familiarity with an operating system and a programming language (e.g. 171, 371, or Computer Science 102).

490 Readings in Mathematics (1-3) Open to superior students. Independent study with faculty guidance.
Repeatability: May be repeated. Maximum 9 hours.
Comment(s): Consent of faculty mentor to supervise independent work required.
Registration Permission: Consent of department head.

499 Seminar in Mathematics (1-3) Topics vary. Requires out-of-class projects and in-class presentations by students. Students must register for the number of credit hours announced for a particular seminar.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

504 Discrete Mathematics for Teachers (3) Mathematical logic and methods of argument, sets, functions and relations, combinatorics. Normally, the first graduate course for students seeking Master of Mathematics degree.
Credit Restriction(s): May not apply toward mathematics major (Master of Science).
Recommended Background: 1 year of calculus or equivalent.
Comment(s): For students in Master of Mathematics program and for students in graduate programs in the College of Education, Health, and Human Sciences.

505 Analysis for Teachers (3) Development of differential and integral calculus, proofs of basic theorems.
Credit Restriction(s): May not apply toward mathematics major (Master of Science).
Recommended Background: 1 year of calculus or equivalent.
Comment(s): For students in Master of Mathematics program and for students in graduate programs in the College of Education, Health, and Human Sciences.

506 Algebra for Teachers (3) Algebraic structures: integral domains and fields and their applications to algebra of integers and polynomials.
Credit Restriction(s): May not apply toward mathematics major (Master of Science).
Recommended Background: 1 year of calculus or equivalent.
Comment(s): For students in Master of Mathematics program and for students in graduate programs in the College of Education, Health, and Human Sciences.

Credit Restriction(s): May not apply toward mathematics major (Master of Science).
Recommended Background: 1 year of calculus or equivalent.
Comment(s): For Students in Master of Mathematics program and for students in graduate programs in the College of Education, Health, and Human Sciences.
524 Probability (3) Pertinent facts from measure theory; definition of abstract probability spaces; Kolmogorov’s existence theorem; series of independent random variables and laws of large numbers; general theory of distributions of random vectors and their characteristic functions; weak convergence concept, weak compactness and Levy’s continuity theorem in Euclidean spaces; infinitely divisible distributions and central limit problem; general concept and properties of conditional expectation, martingales, Doob’s martingale and optional sampling theorems.

(DE) Prerequisite(s): 445 and 446. Recommended Background: 423.

525 Statistics (3) Pertinent facts from probability theory; formulation of statistical models; sufficiency, Fisher-Neyman factorization theorem, exponential families, Bayesian models; methods of estimation and optimality theory; uniform minimum variance unbiased estimates, asymptotic efficiency and optimality; the confidence procedures and hypothesis testing; optimal tests and confidence intervals, the Neyman-Pearson lemma, uniformly most powerful tests; general linear models, estimation and tests in linear models; non-parametric models, rank methods for comparison, linear regression and independence, robust tests; topics from decision theory.

(DE) Prerequisite(s): 445 and 446. Recommended Background: 425.

526 Statistics (3) Pertinent facts from probability theory; formulation of statistical models; sufficiency, Fisher-Neyman factorization theorem, exponential families, Bayesian models; methods of estimation and optimality theory; uniform minimum variance unbiased estimates, asymptotic efficiency and optimality; the confidence procedures and hypothesis testing; optimal tests and confidence intervals, the Neyman-Pearson lemma, uniformly most powerful tests; general linear models, estimation and tests in linear models; non-parametric models, rank methods for comparison, linear regression and independence, robust tests; topics from decision theory.

(DE) Prerequisite(s): 445 and 446. Recommended Background: 425.

527 Stochastic Modeling (3) Models in probability applied to real world situations; queuing theory; branching processes; Monte Carlo simulation.

(DE) Prerequisite(s): 445 and 446 or consent of instructor.

529 Seminar in Stochastics (1-3)

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 231, 251, 445, and 446.

(DE) Prerequisite(s): 231, 251, 445, and 446.

534 Calculus of Variations (3) Necessary conditions for extrema. Euler’s equation, broken extremals, Weierstrass-Erdmann conditions. Sufficient conditions for extrema-Legendre’s and Jacobi’s conditions, conjugate points. Multiple integrals.

(DE) Prerequisite(s): 431.

535 Partial Differential Equations (3) First order equations, classification of equations and properties of elliptic, hyperbolic, and parabolic equations in several variables.

(DE) Prerequisite(s): 445, 446, and 231 or consent of instructor.

536 Partial Differential Equations (3) First order equations, classification of equations and properties of elliptic, hyperbolic, and parabolic equations in several variables.

(DE) Prerequisite(s): 445, 446, and 231 or consent of instructor.

537 Mathematical Principles of Continuum Mechanics (3) Conservation principles, equations of equilibrium and motion for fluids and elastic solids, constitutive relations and stress, convexity properties, bifurcation phenomena, existence theory.

(DE) Prerequisite(s): 431, 435, and 446 or 448 or consent of instructor.

538 Mathematical Principles of Continuum Mechanics (3) Conservation principles, equations of equilibrium and motion for fluids and elastic solids, constitutive relations and stress, convexity properties, bifurcation phenomena, existence theory.

(DE) Prerequisite(s): 431, 435, and 446 or 448 or consent of instructor.

539 Seminar in Differential Equations (1-3)

Repeatability: May be repeated. Maximum 12 hours. Registration Permission: Consent of instructor.

542 Real and Complex Analysis (3) Measure theory, Lebesgue integration, Holder and Minkowski inequalities, Radon-Nikodym theorem, Frullani’s theorem, holomorphic functions, Cauchy’s theorem, Maximum Modulus theorem, Schwarz’s lemma, normal families, Riemann mapping theorem.

(DE) Prerequisite(s): 445 and 446.

543 Real and Complex Analysis (3) Measure theory, Lebesgue integration, Holder and Minkowski inequalities, Radon-Nikodym theorem, Frullani’s theorem, holomorphic functions, Cauchy’s theorem, Maximum Modulus theorem, Schwarz’s lemma, normal families, Riemann mapping theorem.

(DE) Prerequisite(s): 445 and 446.

547 Applied Linear Analysis (3) Banach and Hilbert spaces, linear operators and spectral theory with applications to integral and differential equations, optimization, numerical analysis, and quantum mechanics, Sobolev spaces and embedding theorems.

(DE) Prerequisite(s): 445 and 446.

548 Applied Linear Analysis (3) Banach and Hilbert spaces, linear operators and spectral theory with applications to integral and differential equations, optimization, numerical analysis, and quantum mechanics, Sobolev spaces and embedding theorems.

(DE) Prerequisite(s): 445 and 446. Recommended Background: 425.

549 Seminar in Analysis (1-3)

Repeatability: May be repeated. Maximum 12 hours.

551 Modern Algebra (3) Groups, rings, modules and linear algebra, fields and Galois theory.

(DE) Prerequisite(s): 445 and 455 and 456 or consent of instructor. Comment(s): 551 and 552 must be taken in sequence.

552 Modern Algebra (3) Groups, rings, modules and linear algebra, fields and Galois theory.

(DE) Prerequisite(s): 445 and 456 or consent of instructor. Comment(s): 551 and 552 must be taken in sequence.

553 Linear Programming (3) Theory and applications.

(DE) Prerequisite(s): 445 or consent of instructor and programming ability.

554 Nonlinear Programming (3) Theory and applications.

(DE) Prerequisite(s): 553. Recommended Background: 445 and 446.

555 Number Theory (3) Introduction to algebraic number theory.

(DE) Prerequisite(s): 445 and 456 or consent of instructor.

556 Number Theory (3) Introduction to algebraic number theory.

(DE) Prerequisite(s): 455 and 456 or consent of instructor.

559 Seminar in Algebra (1-3)

Repeatability: May be repeated. Maximum 12 hours. Registration Permission: Consent of instructor.

563 Differential Geometry (3) Classical differential geometry in two and higher dimensions: curves and surfaces in Euclidean space, Gauss map, curvature, Gauss-Bonnet theorem, hyperbolic geometry. Manifolds and Riemannian metrics; connections, geodesics, Jacobi fields, sectional curvature. Differential forms and moving frames.

(DE) Prerequisite(s): 445 and 446 or consent of instructor.

564 Differential Geometry (3) Classical differential geometry in two and higher dimensions: curves and surfaces in Euclidean space, Gauss map, curvature, Gauss-Bonnet theorem, hyperbolic geometry. Manifolds and Riemannian metrics; connections, geodesics, Jacobi fields, sectional curvature. Differential forms and moving frames.

(DE) Prerequisite(s): 445 and 446 or consent of instructor.

569 Seminar in Topology (1-3)

Repeatability: May be repeated. Maximum 12 hours.

(DE) Prerequisite(s): 445, 446, 453, 471, and 472.
(De) Prerequisite(s): 445, 446, 453, 471, and 472.
574 Finite Element Methods (3) Finite element techniques for solution of boundary and initial-boundary value problems. Variational formulation. Finite dimensional subspaces and their approximating properties; rates of convergence. Computer implementation. (Same as Computer Science 574.)
(De) Prerequisite(s): 445, 471, and either 453 or 472.
Recommended Background: 445, 446, and 573.
575 Matrix Theory and Techniques in Numerical Analysis (3) Advanced topics in study of iterative and direct methods for large systems of linear equations; sparse matrix analysis, relationship to modern computer architectures. (Same as Computer Science 575.)
Repeatability: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): 453, 471, and 472 or consent of instructor.
577 Optimization (3) Major topics in optimization with problems developed from real-world applications including constrained and unconstrained optimization analysis of major algorithms and utilization of appropriate software.
(De) Prerequisite(s): 453, 445, 446, and a numerical algorithms course.
(De) Prerequisite(s): 435 or 512 or 515, and a Fortran or C course or consent of instructor.
579 Seminar in Numerical Mathematics (1-3)
Repeatability: May be repeated. Maximum 12 hours.
581 Mathematical Ecology (3) Deterministic and stochastic models of populations, communities, and ecosystems. (Same as Ecology and Evolutionary Biology 581.)
(De) Prerequisite(s): 431 and 453 or consent of instructor.
582 Mathematical Ecology (3) Deterministic and stochastic models of populations, communities, and ecosystems. (Same as Ecology and Evolutionary Biology 582.)
(De) Prerequisite(s): 431 and 453 or consent of instructor.
583 Mathematical Evolutionary Theory (3) Population genetics and evolutionary ecology. (Same as Ecology and Evolutionary Biology 585.)
(De) Prerequisite(s): 431 and 453 or consent of instructor.
585 Optimal Control Theory (3) Deterministic optimal control. Examples involving calculus of variations, optimal trajectories, and engineering control problems. Introduction to stochastic control.
(De) Prerequisite(s): 431, 445, and 446 or consent of instructor.
589 Seminar in Mathematical Ecology (1-3)
Repeatability: May be repeated. Maximum 12 hours.
593 Independent Study (1-12)
Repeatability: May be repeated. Maximum 12 hours.
598 Graduate Reading in Mathematics (1-3) Independent study with faculty guidance.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Graduate standing required.
Registration Permission: Consent of instructor.
599 Seminar in Mathematical Presentations (1)
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
617 Lie Algebras in Mechanics and Physics (3) Analytical tools of mechanics and physics arising from differentiable manifolds, tensors, Lie derivatives, Lie groups, differential forms, Lie algebras, applications to Hamiltonian mechanics, adiabatic and barotropic fluids and plasmas, numerical methods in continuum mechanics.
(De) Prerequisite(s): 431, 435, 547, 571, and 572.
619 Seminar in Applied Mathematics (1-3)
Repeatability: May be repeated. Maximum 12 hours.
623 Advanced Probability (3) Selected topics in modern theory of probability and stochastic processes: Itô’s calculus and stochastic differential equations, integration prediction theory, ergodic theory, probability on algebraic structures, limit theorems, geometry and probability in Banach spaces, probability methods in analysis.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 523 and 524 or consent of instructor.
624 Advanced Probability (3) Selected topics in modern theory of probability and stochastic processes: Itô’s calculus and stochastic differential equations, integration prediction theory, ergodic theory, probability on algebraic structures, limit theorems, geometry and probability in Banach spaces, probability methods in analysis.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 523 and 524 or consent of instructor.
629 Seminar in Combinatorics (1-3)
Repeatability: May be repeated with consent of department. Maximum 12 hours.
631 Advanced Ordinary Differential Equations (3) Theory of ordinary differential equations from advanced viewpoint. Topics from current literature. Subject matter varies according to interests and preparations of students.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 531 and 532 or consent of instructor.
632 Advanced Ordinary Differential Equations (3) Theory of ordinary differential equations from advanced viewpoint. Topics from current literature. Subject matter varies according to interests and preparations of students.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 531 and 532 or consent of instructor.
635 Advanced Partial Differential Equations (3) Selected topics in classical and modern theoretical partial differential equations.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 545 and 546.
636 Advanced Partial Differential Equations (3) Selected topics in classical and modern theoretical partial differential equations.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 545 and 546.
(De) Prerequisite(s): 545 and 546.
(De) Prerequisite(s): 545 and 546.
643 Harmonic Analysis (3) Fourier series and Fourier transforms on Euclidean spaces or topological groups: convergence, summability, uniqueness, inversion, duality, Plancherel transform, Hilbert transform, Hardy-Littlewood maximal function, interpolation of operators, or Fefferman-Stein duality.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 545 and 546.
644 Harmonic Analysis (3) Fourier series and Fourier transforms on Euclidean spaces or topological groups: convergence, summability, uniqueness, inversion, duality, Plancherel transform, Hilbert transform, Hardy-Littlewood maximal function, interpolation of operators, or Fefferman-Stein duality.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 545 and 546.
649 Seminar in Analysis (1-3)
Repeatability: May be repeated with consent of department. Maximum 12 hours.
651 Advanced Modern Algebra (3) Selected topics in modern algebra or number theory.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 551 and 552 or consent of instructor.
652 Advanced Modern Algebra (3) Selected topics in modern algebra or number theory.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
(De) Prerequisite(s): 551 and 552 or consent of instructor.
659 Seminar in Algebra (1-3)
Repeatability: May be repeated with consent of department. Maximum 12 hours.
Registration Permission: Consent of instructor.
661 Modern Topology (3) Technical background to current literature in topology. Topics vary.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
662 Modern Topology (3) Technical background to current literature in topology. Topics vary.
Repeatability: May be repeated with consent of department. Maximum 12 hours.
663 Algebraic Topology (3) Homology, cohomology and homotopy theories; duality theorems and Hurewicz isomorphism theorem.  
Repeatability: May be repeated with consent of department. Maximum 12 hours.  
(DE) Prerequisite(s): One year of abstract algebra, 561, 562, 455 and 456 or 551 and 552.

664 Algebraic Topology (3) Homology, cohomology and homotopy theories; duality theorems and Hurewicz isomorphism theorem.  
Repeatability: May be repeated with consent of department. Maximum 12 hours.  
(DE) Prerequisite(s): One year of abstract algebra, 561, 562, 455 and 456 or 551 and 552.

667 Advanced Differential Geometry (3) Selected topics from Riemannian geometry and analysis on manifolds: Lie groups, metric geometry, spectrum of Laplacian, Hodge Theory, variational problems, curvature and topology of manifolds.  
Repeatability: May be repeated with consent of department. Maximum 12 hours.  
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

668 Advanced Differential Geometry (3) Selected topics from Riemannian geometry and analysis on manifolds: Lie groups, metric geometry, spectrum of Laplacian, Hodge Theory, variational problems, curvature and topology of manifolds.  
Repeatability: May be repeated with consent of department. Maximum 12 hours.  
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

669 Seminar in Topology (3)  
Repeatability: May be repeated with consent of department. Maximum 12 hours.

Repeatability: May be repeated with consent of department. Maximum 12 hours.  
(DE) Prerequisite(s): 547, 548, 573, and 574.

679 Seminar in Numerical Mathematics (1-3)  
Repeatability: May be repeated with consent of department. Maximum 12 hours.

681 Advanced Mathematical Ecology (3) Selected topics in theoretical and applied mathematical ecology: population, community, ecosystem ecology and applied topics such as demography, ecotoxicology, epidemiology, environmental change, and resource management. (Same as Ecology and Evolutionary Biology 681.)  
Repeatability: May be repeated. Maximum 6 hours.  
(DE) Prerequisite(s): 581 and 582.

682 Advanced Mathematical Ecology (3) Selected topics in theoretical and applied mathematical ecology: population, community, ecosystem ecology and applied topics such as demography, ecotoxicology, epidemiology, environmental change, and resource management. (Same as Ecology and Evolutionary Biology 682.)  
Repeatability: May be repeated. Maximum 6 hours.  
(DE) Prerequisite(s): 581 and 582.

Mathematics Education (642)

485 Teaching Mathematics, Grades 7-12 (3) Preparation of teaching plans, evaluation, materials for teaching mathematics; teaching simulation and directed observation in schools.  
Comment(s): Admission to teacher education required.

522 Programs and Materials in School Mathematics (3) Examination, development and use of materials for creating an active learning environment for learning mathematics for all ages.

523 Diagnosis and Correction of Children's Difficulties in Learning Mathematics (3) Children's difficulties in learning mathematics and procedures for helping classroom teachers correct difficulties.  
(DE) Prerequisite(s): 522 or consent of instructor.

530 Teaching Mathematics to Young Children: K-4 (3) Unit planning, daily planning, grouping and other strategies of teaching mathematics. Course is for those with little preparation in teaching elementary school mathematics.

534 Teaching Mathematics in Middle School: 5-8 (3) Unit planning, daily planning, grouping and other strategies of teaching mathematics. Course is for those with little preparation in teaching elementary school mathematics.

581 Mathematics Curriculum (3) Past, present and future issues influencing mathematics curriculum in schools, elementary through college. Teacher's role in curriculum development and implementation. Ratios for curriculum decisions.

583 Teaching Mathematics in Senior High Schools and Community Colleges (3) Topics appropriate for high school and community/junior college mathematics curriculum. Special problems related to enrichment, problem solving, and use of microcomputers. Opportunities for special projects.

622 Research Trends in Mathematics Teacher Education (3) Analysis of current research trends in mathematics teacher education and impact of current research on development of teachers both pre-service and in-service.  
(DE) Prerequisite(s): Minimum 9 hours of 500-level mathematics education courses.

683 Advanced Studies in Mathematics Education (3) Analysis of current research in mathematics education and implications of research for classroom practice.  
(DE) Prerequisite(s): 2 graduate courses in mathematics education.

Mechanical Engineering (650)

Not all the courses listed below are available at both the University of Tennessee, Knoxville, and UT-MSI campuses.

449 Mechanical Engineering Laboratory (3) Designing, conducting and reporting results of experimental exercises. Test standards and specifications. Analysis of data and formation of conclusions.  
(DE) Prerequisite(s): 544 and 345.  
(DE) Corequisite(s): 475.

451 Control Systems (3) Analysis and design of feedback control systems using transient and frequency response techniques, stability analysis in the time and frequency domain.  
(DE) Prerequisite(s): 363.

452 Finite Element Analysis (3) Conversion of fundamental conservation principles in mechanics to simulation form via finite element implementation; applications in heat transfer, solid mechanics, mechanical vibrations, fluid mechanics and heat/mass transport. Extensive computer lab experiments using Matlab-based and commercial software systems.  
(DE) Prerequisite(s): 321, 344, and 363.

466 Elements of Machine Design II (3) Application of strength and properties of materials, design factors, theories of failure to design of machine elements. Mini-design experiences.  
(DE) Prerequisite(s): 321 and Materials Science and Engineering 201.

475 Thermal Engineering (3) Thermal systems with emphasis on turbo-machinery, heat exchangers, gas-vapor mixtures and psychrometry, fuels and combustion; chemical equilibrium; system analysis and design.  
(DE) Prerequisite(s): 344.

483 Introduction to Reliability Engineering (3) (See Nuclear Engineering 483.)

484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.)

494 Selected Topics in Mechanical Engineering (1-4) Problems and topics related to developments and practice in mechanical engineering.  
Repeatability: Not Repeatable. May be taken once for 1-4 hours.  
Registration Permission: Consent of instructor.

495 Selected Topics in Mechanical Engineering (1-4) Problems and topics related to developments and practice in mechanical engineering.  
Repeatability: Not Repeatable. May be taken once for 1-4 hours.  
Registration Permission: Consent of instructor.

500 Thesis (1-15)  
Grading Restriction: P/NP only.  
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated.  
Credit Restriction: May not be used toward degree requirements.

504 Product Development Process (1) Basic elements in product development process and project management. Business and engineering interactions to development and commercial manufacturing of new products. Multidisciplinary teams to explore possible new product opportunities. (Same as Industrial Engineering 504.)  
Registration Permission: Consent of instructor.

505 Mechatronics (3) Application of microcomputers to control electromechanical devices. Application and theory: dynamics of machine control, assembly language programming, microcontroller architecture, stepping and DC motors, photoreluctive devices, A/D, D/A, integrated circuits  
(DE) Prerequisite(s): Electronics and computer circuits course.  
Registration Permission: Consent of instructor.
506 Product Selection and Evaluation (2) Development of operational requirements and features for new product having potential for business venture. Market potential, design feasibility and manufacturing requirements. Design alternatives created and evaluated against set of performance requirements determined from market analysis. Preferred product concept selected by end of semester. (Same as Industrial Engineering 506.) (DE) Prerequisite(s): 504.

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)

508 Integrated Product, Process and Manufacturing System Design (3) (See Industrial Engineering 508.)

509 Multidisciplinary Project (1) (See Industrial Engineering 509.)

510 Prototype Development and Evaluation (3) Prototype of selected product made and tested against required operating conditions. Design changes implemented to meet customer’s needs. Fabrication drawings and manufacturing plans finalized for introduction of product to marketplace. Prototype development managed using project management plan. (DE) Prerequisite(s): 555.

512 Heat Transfer II (3) Analysis of steady-state and time-dependent heat conduction by numerical methods. Analysis of laminar and turbulent convection heat transfer in internal and external flows, forced and buoyancy driven flows. (DE) Prerequisite(s): 541.

514 Phase Change Heat Transfer (3) Mechanisms and modeling of nucleate, transition and film boiling processes; critical heat flux; forced convection boiling and post dry-out heat transfer; condensation processes; heterogeneous nucleation; drops and film condensation; flow condensation; liquid-solid phase change processes; moving phase fronts; mathematical modeling. (DE) Prerequisite(s): 344 and 511.

519 Technology Product Development and Entrepreneurship (3) Technology and innovation, technology transfer, patent protection, legal formation and intellectual property, knowledge management, generation, and transmission, launching a technology based business, sources of capital, small business growth and operation. Multidisciplinary teams will be assigned a project based on a technological product. (DE) Prerequisite(s): 506 or consent of instructor.

521 Thermodynamics I (3) Macroscopic thermodynamics, including First and Second Law analyses, availability, phase and chemical equilibrium criteria, combustion, gas mixtures, and property relations, determination of thermodynamic properties from molecular structure, spectroscopic data, kinetic theory, statistical mechanics, quantum physics, Schroedinger equation. (DE) Prerequisite(s): 332.

522 Thermodynamics II (3) Macroscopic thermodynamics, including First and Second Law analyses, availability, phase and chemical equilibrium criteria, combustion, gas mixtures, and property relations, determination of thermodynamic properties from molecular structure, spectroscopic data, kinetic theory, statistical mechanics, quantum physics, Schroedinger equation. (DE) Prerequisite(s): 332.

523 Special Topics in Thermodynamics (3) Application of thermodynamics to topics of current interest in mechanical engineering. Registration Permission: Consent of instructor.

525 Combustion and Chemically Reacting Flows I (3) Fundamentals: thermochemistry, chemical kinetics and conservation equations; phenomenological approach to laminar flames; diffusion and premixed flame theory; single droplet combustion; deflagration and detonation theory; stabilization of combustion waves in laminar streams; flammability limits of premixed laminar flames; introduction to turbulent flames. (DE) Prerequisite(s): 522 and 541 or consent of instructor.

526 Combustion and Chemically Reacting Flows II (3) Advanced topics: phenomenological approaches to turbulent flames; fundamentals of turbulent flow; application of probability density functions to turbulent flames; turbulent reacting flows with premixed and/or non-premixed reactants; spray combustion models; fluidized bed combustion; chemically reacting boundary layer flows; gas turbine and/or rocket motor combustors; furnaces; introduction to supersonic combustion and hypersonic flows. (DE) Prerequisite(s): 525.

527 Thermal Systems Analysis I (3) Application of basic principles of heat transfer, fluid mechanics, and thermodynamics to develop solution models for parametric analysis of thermal systems problems via commercial software. (DE) Prerequisite(s): 544.

531 Advanced Biomechanics I (3) (See Biomedical Engineering 531.)

533 Dynamics (3) Kinematics and dynamics of particles in three dimensions. Rotating coordinate systems. Hamilton’s principle. Lagrange’s equations of motion. Kinematics and dynamics of rigid bodies. (Same as Aerospace Engineering 533; Engineering Science 533.) (DE) Prerequisite(s): 391 or Mathematics 431 and an undergraduate vibrations course.

534 Mechanical Vibrations (3) Vibrations of linear, discrete, undamped and damped systems. Lagrange’s equations for holonomic systems. Modal analysis. Laplace transform. Response to mechanical transients. (Same as Aerospace Engineering 535; Biomedical Engineering 534; Engineering Science 534.) (DE) Prerequisite(s): An undergraduate vibrations course.

537 Mechanical Systems Analysis (3) Application of basic principles of rigid body dynamics, strength of materials, and continuum mechanics to development of models for parametric analysis of mechanical systems using commercial software. (DE) Prerequisite(s): 231 and 321.

539 Continuum Mechanics (3) (See Engineering Science 539.)

541 Fluid Mechanics I (3) Derivation of equations governing flow of incompressible and viscous fluids (conservation of mass, conservation of energy). Equations of state and constitutive relations. Euler and Navier-Stokes forms and dimensionalization. Exact solutions and introduction to potential and boundary-layer flows. (Same as Aerospace Engineering 541; Biomedical Engineering 541; Engineering Science 541.) (DE) Prerequisite(s): A fluid mechanics course.

542 Fluid Mechanics II (3) Equations of viscous fluid flows. Basic concepts and equations of turbulent flow. Separation, stability and transition. Laminar and turbulent boundary-layer flows. Exact, approximate, and numerical solutions. (Same as Aerospace Engineering 542; Engineering Science 542.) (DE) Prerequisite(s): 541.

547 Advanced Linear Control (3) Multivariable feedback systems; transfer function and state-space techniques; stability of linear systems; controllability and robustness; control system design. (DE) Prerequisite(s): 507 or equivalent.

551 Mechanical Engineering Design (3) Design of mechanical engineering devices and systems. Registration Permission: Consent of instructor.

552 Mechanical Engineering Design (3) Design of mechanical engineering devices and systems. Registration Permission: Consent of instructor.

555 Human Vibrations Analysis and Protection (3) (See Biomedical Engineering 555.)
559 Advanced Mechanics of Materials I (3) Elasticity in three dimensions: equations of equilibrium, strain-displacement relations, compatibility, constitutive equations. Energy methods. Beams on elastic foundation, unsymmetrical bending, shear center, beam-columns, buckling, plastic collapse. (Same as Aerospace Engineering 559; Biomedical Engineering 559; Engineering Science 559.)

(DE) Prerequisite(s): 321.

561 Finite Elements for Engineering Applications (3) (See Engineering Science 551.)

562 Computational Fluid-Thermal Systems (3) (See Engineering Science 552.)

563 Computational Solid Mechanics (3) (See Engineering Science 553.)

567 Smart Structures and Materials (3) Constitutive modeling and characteristics of piezoelectric materials, electrostrictive materials, magnetostrictive materials, shape memory alloys, electro rheological and magnetorheological fluids, and electro active polymers. Energy methods for static and dynamic analysis of piezoelectric bimorph and other smart systems.

(DE) Prerequisite(s): 321 and 363 or consent of instructor.

577 Neural Networks in Engineering (3) (See Nuclear Engineering 577.)

581 Rocket Propulsion I (3) Rocket propulsion fundamentals; thermodynamics of nonreacting and chemically reacting ideal gases, rocket nozzle design; ideal rocket performance parameters; rocket heat transfer, chemistry of propellants; liquid rocket engine systems; ground testing; introduction to solid propellant rockets.

Registration Permission: Consent of instructor.

582 Rocket Propulsion II (3) Solid propellant rocket performance, homogeneous and heterogeneous propellant chemistry and combustion system performance; thermal decomposition and gas phase reaction models; effect of chamber pressure and additives on solid propellant burn rates, erosive burning; analysis of two-phase solid rocket exhaust flow. Introduction to nuclear and electric propulsion; electrical resistance and electric field (ion) engine performance, magnetohydrodynamic thrusters, traveling wave thrusters; exotic propulsion systems.

Registration Permission: Consent of instructor.

584 Turbomachinery Systems I (3) Ideal cycle analysis of turbine engines, real cycle analysis, component performance analysis, component design and systems integration (inlets, nozzles, combustors, compressors, turbines), flowthrough theory, turbine engine component matching, transient operation, surge and rotating stall, engine control systems, structural considerations.

Comment(s): First-year graduate standing required.

Registration Permission: Consent of instructor.

585 Turbomachinery Systems II (3) Ideal cycle analysis of turbine engines, real cycle analysis, component performance analysis, component design and systems integration (inlets, nozzles, combustors, compressors, turbines), flowthrough theory, turbine engine component matching, transient operation, surge and rotating stall, engine control systems, structural considerations.

Comment(s): First-year graduate standing required.

Registration Permission: Consent of instructor.

586 Mechanics and Control of Robotic Manipulators (3) Fundamentals of robotic manipulation: kinematics and dynamics of manipulators, control systems design, trajectory planning, advanced force and impedance control strategies.

(DE) Prerequisite(s): 451 and 533.

(DE) Prerequisite(s): 363.

588 Introduction to Hybrid Electric Vehicles (3) Series, parallel, and dual configurations. Sizing and analysis of typical HEV components: motors, auxiliary power sources, on-board energy storage, and fuels. Steady-state HEV force and power modeling schemes. Power train design using various computer simulation tools.

Registration Permission: Consent of instructor.

589 Hybrid Electric Vehicle Control Systems Design and Analysis (3) Dynamic modeling, simulation and analysis of complete hybrid electric vehicle systems. Linear control design techniques and discrete logic design applied to HEV power trains and operating mode controls. Digital and real-time control and hardware issues of automotive systems. Design and human factors engineering issues of vehicle controls and displays.

(DE) Prerequisite(s): 588 or consent of instructor.

590 Selected Engineering Problems (2-6) Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Comment(s): Enrollment limited to students in the problems option.

Registration Permission: Consent of advisor.

594 Culminating Integrated Project Report (3) Final phase of product development process. Multidisciplinary teams submit and defend comprehensive project report. Report includes all engineering and business considerations needed to convince potential investors to fund proposed business venture. (Same as Chemical Engineering 594; Electrical and Computer Engineering 594; Industrial Engineering 594; Materials Science and Engineering 594; Nuclear Engineering 594.)

Registration Permission: Consent of instructor.

595 Seminar (1) All phases of mechanical engineering, reports on current research at the University of Tennessee, Knoxville, and the University of Tennessee Space Institute.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

599 Special Topics in Mechanical Engineering (1-3) Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

610 Advanced Topics in Thermal/Fluid Science (3) Advanced theory and applications in the thermal/fluid sciences.

Registration Permission: Consent of instructor.

613 Advanced Radiation Heat Transfer (3) Radiation heat transfer in absorbing, emitting and scattering media; interaction of thermal radiation with conduction and convection heat transfer.

(DE) Prerequisite(s): 511 and 512.

615 Engineering Optics and Optical Techniques (3) Closely related optical theories to engineering applications for advanced optical measurements and diagnostic techniques. This course also provides knowledge for engineers in the areas of micro/nano/bio-fluidics and energy transport using and developing optical techniques.

Registration Permission: Consent of instructor.

621 Advanced Topics in Solid Mechanics (3) Advanced theory and applications in mechanics, dynamics, vibrations, and strength of materials.

Repeatability: May be repeated. Maximum 9 hours.

Registration Permission: Consent of instructor.

631 Advanced Biomechanics II (3) (See Biomedical Engineering 631.)

642 Advanced Topics in Thermodynamics (3) Comparison of macroscopic and microscopic approach; equilibrium of pure substances, metastable states. Non-equilibrium thermodynamics.

Registration Permission: Consent of advisor.

(DE) Prerequisite(s): 540 and 542.

647 Nonlinear Control Systems (3) Qualitative behavior of nonlinear systems; Lyapunov stability theory; passivity and absolute stability theory; frequency domain methods; nonlinear feedback systems; nonlinear design techniques.

(DE) Prerequisite(s): 547 or Electrical and Computer Engineering 512.

651 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 651.)

652 Advanced Topics in Computational Fluid Dynamics (3) (See Engineering Science 652.)

653 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 653.)

654 Advanced Topics in Computational Solid Mechanics (3) (See Engineering Science 654.)

659 Advanced Mechanics of Materials II (3) Plane stress and plane strain in rectangular and polar coordinates; stress functions. Torsion of noncircular sections. Disks, thick-walled tubes, thick-walled pressure vessels. Theory of rectangular and circular plates, plates with holes, axisymmetric shells. Stress concentrations. (Same as Aerospace Engineering 659; Biomedical Engineering 659; Engineering Science 659.)

(DE) Prerequisite(s): 559 or consent of instructor.
661 Advanced Vibrations (3) Analysis of linear and nonlinear single degree of freedom systems. Random vibration. Mechanical transients.
(DE) Prerequisite(s): 534.

671 Advanced Topics in Applied Artificial Intelligence (3) (See Nuclear Engineering 671.)

(DE) Prerequisite(s): 586 or consent of instructor.

(DE) Prerequisite(s): 589.

Medieval Studies (674)
401 Dante and Medieval Culture (3) (See Italian 401.)

402 Petrarch and Boccaccio (3) (See Italian 402.)

405 Medieval Literature (3) (See English 401.)

406 Chaucer (3) (See English 402.)

410 Medieval French Literature (3) (See French 410.)

415 Medieval Architecture (3) (See Architecture 415.)

431 Medieval Art of the West, 800-1400 (3) (See Art History 431.)

441 Northern European Painting, 1350-1600 (3) (See Art History 441.)

451 The Art of Italy, 1250-1450 (3) (See Art History 451.)

475 Ancient and Medieval Political Thought (3) (See Political Science 475.)

510 Special Topics (3)
Repeatability: May be repeated. Maximum 6 hours.

Microbiology (684)
410 Bacterial Physiology (3) Modern concepts of structure and function of bacterial cell.
(DE) Prerequisite(s): 310.

411 Bacterial Genetics (3) Transmission and expression of genetic information by bacteria.
(DE) Prerequisite(s): 310.

420 Medical Microbiology (3) Disease-producing microorganisms, including bacteria, rickettsia, chlamydia, and fungi.
(DE) Prerequisite(s): 310.

429 Medical Microbiology Laboratory (2) Laboratory exercises in medically important areas of microbiology including microorganisms, pathogenesis, and immunology.
(DE) Prerequisite(s): 319 and 430.

430 Immunology (3) Principles of inflammation and immunity; immunoglobulin structure and theories of formation and diversity; complemen, hypersensitivities, cell cooperation and recognitions in immune mechanisms; soluble factors.
(DE) Prerequisite(s): Biology 240.

440 Virology (3) Pathogenesis and molecular biology of viruses.
(DE) Prerequisite(s): 310.

470 Microbial Ecology (3) Physiological diversity and taxonomy of microorganisms from natural environments. Functional role of microorganisms in natural and simulated ecosystems.
(DE) Prerequisite(s): 310.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

540 Genomics and Bioinformatics (3) Fundamentals of a new scientific discipline based on sequencing genomes (entire DNA) of individual organisms. Goals, principles and types of genome analysis are covered in a traditional lecture course. Computational tools for genome analysis (bioinformatics) are presented in both lecture and hands-on (computer-laboratory) settings.
Credit Restriction: Students may not receive credit for both 480 and 540.

550 Molecular Epidemiology and Mycology (3) (See Entomology and Plant Pathology 550.)

575 Applied Microbiology and Bioengineering (3) (See Chemical Engineering 575.)

591 Foreign Study (1-9)
Repeatability: May be repeated. Maximum 9 hours.

592 Off-Campus Study (1-9)
Repeatability: May be repeated. Maximum 9 hours.

593 Independent Study (1-9)
Repeatability: May be repeated. Maximum 9 hours.

595 General Seminar (1) Lectures and seminars by invited speakers, faculty, and graduate students.
Repeatability: May be repeated. Maximum 18 hours.

596 Laboratory Rotation (1) Familiarization with research areas in department through series of rotations in laboratories of individual faculty members.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 3 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Journal Club in Microbial Physiology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

602 Journal Club in Microbial Pathogenesis (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

603 Journal Club in Immunology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

604 Journal Club in Virology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

605 Journal Club in Microbial Genetics (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

606 Journal Club in Microbial Ecology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 18 hours.

610 Topics in Microbial Physiology (1-3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 410 or consent of instructor.

620 Topics in Microbial Pathogenesis (1-3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 420 and 430 or consent of instructor.

630 Topics in Immunology (1-3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 430 or consent of instructor.

640 Topics in Virology (1-3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 440 or consent of instructor.

660 Topics in Eukaryotic Pathogens (3)
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

650 Topics in Microbial and Molecular Genetics (1-3)
Repeatability: May be repeated. Maximum 12 hours.
(See Biological Sciences 650.)
Modern Foreign Languages and Literatures (686)

482 Special Topics in Global Cinema (3) Content varies. Focus from global perspectives on directors, stars, film genres, national and regional cinema movements or other topics. Taught in English. (Same as Cinema Studies 482, Global Studies 482.)
Registration Permission: Consent of instructor.
Comment(s): Requires audition or consent of instructor.
Repeatability: May be repeated. Maximum 6 hours.

582 Special Topics in Global Cinema (3) Content varies. Focus from global perspectives on particular directors, stars, film genres, national and regional cinema movements, film theory/criticism, or other topics. Taught in English. (Same as Cinema Studies 582.)
Registration Permission: Consent of instructor.
Comment(s): Requires audition or consent of instructor.
Repeatability: May be repeated. Maximum 6 hours.

Music Education (707)

510 Foundations of Music Education (3) Historical, philosophical and aesthetic bases.
Registration Permission: Consent of instructor.

520 Research in Music Education (3) Definition of research problems, data collection and analysis, and research report writing. Application of knowledge of research techniques to analysis of existing research literature in music education.
Registration Permission: Consent of instructor.

Registration Permission: Consent of instructor.

570 Studies in Multicultural Music Education (3) Study of music literature, art and customs of various cultures appropriate for students in K-8. Strategies and techniques for teaching music at this level.

571 Musical Repertoire Laboratory (2) Examination and production of musicals appropriate for student in grades K-8. Addresses singing, dancing, acting, costumes, set design, traditional and non-traditional instruments ensembles.
Registration Permission: Consent of instructor.

574 Analysis for Teaching for Professional Development (2) Strategies to document and analyze effectiveness of teaching and professional development. Study and application of various approaches.
Registration Permission: Consent of instructor.

575 Professional Internship in Teaching (1-8) Teaching and teaching-related experiences in professional settings in public schools.
Grading Restriction: Satisfactory/No Credit grading only.
Registration Permission: Consent of instructor.

580 Seminar in Music Education (3) Class investigation and individual reporting of pertinent topics and issues in music education.
Registration Permission: Consent of instructor.

590 Special Topics in Music Education (1-3) Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

591 Clinical Studies (4) Group and individual seminar activities during full-time internship. Application and evaluation of professional core competencies. Completion and presentation of portfolio and analysis of teaching project.
Registration Permission: Consent of instructor.

593 Special Problems in Music Education (3) Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

Music Ensemble (708)

502 Jazz-Saxophone Ensemble (1) Repeatability: May be repeated. Maximum 4 hours.
Comment(s): Requires audition or consent of instructor.

503 Small Jazz Ensemble (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

504 Jazz Ensemble (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

505 Studio Orchestra (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

506 Trombone Choir (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

510 Percussion Ensemble (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

511 Marimba Choir (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

515 Chamber Music Ensemble (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

530 Chamber Singers (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

540 Opera Theatre (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

550 Concert Band (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

552 Symphonic Band (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

553 Wind Ensemble (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

554 Varsity Band (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

559 Marching Band (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

570 Symphony Orchestra (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

580 Concert Choir (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

583 Men’s Chorale (1) Repeatability: May be repeated. Maximum 4 hours.
Comment(s): Requires audition or consent of instructor.

589 Women’s Chorale (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

599 Accompanying (1) Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Requires audition or consent of instructor.

Music General (698)

500 Thesis (1-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Graduate Recital (2)

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Music Bibliography (3) Bibliographic methodology in music.

511 Lecture Recital (2)

520 Musical Styles (3) Elements of design and their role in definition of musical styles.
Registration Permission: Consent of instructor.

521 Special Topics in Performance (1-3) Registration Permission: Consent of school director.
540 Secondary Applied Music (1) May be taken by music majors desiring applied study on a 2nd or 3rd instrument.  
Repeatability: May be repeated. Maximum 12 hours.  
Comment(s): Requires audition and payment of applied music fee.

Music Instrumental (710)

490 Instrumental Conducting (3) Knowledge and skills in instrumental conducting; various periods and composers and relationship of different styles to the conductor’s art; musical analysis and practice in conducting.  
(DE) Prerequisite(s): Music Education 320 or equivalent.

580 Band History and Literature I (3) Antiquity to 1900.  
581 Band History and Literature II (3) 1900 to present.

583 Recitative for Instrumental Conductors (1) Problems in conducting recitatives.  
Grading Restriction: Satisfactory/No Credit grading only.  
Registration Permission: Consent of instructor.

584 Practicum for Instrumental Conductors (1) Intern experience in field other than area of major interest.  
Grading Restriction: Satisfactory/No Credit grading only.

590 Advanced Instrumental Conducting (2) Physical techniques of conducting, study and analysis of scores, rehearsal techniques. Attention to individual problems. Requires applied music fee.  
Repeatability: May be repeated. Maximum 8 hours.  
Registration Permission: Consent of instructor.

595 Instrumental Conducting Performance (1) Preparation and juried performance of band or orchestral work(s).  
Registration Permission: Consent of instructor.

Music Jazz (711)

410 Advanced Improvisation (3) Development of individual skills and solving individual problems in jazz improvisation.  
(DE) Prerequisite(s): 210 and 220.

420 Jazz Pedagogy (1) Methods and materials relating to teaching of jazz, designing and administering jazz programs, and rehearsal techniques for jazz ensembles.  
Registration Permission: Consent of instructor.

520 Seminar in Jazz (3) Topic varies.

Music Keyboard (712)

410 Organ Practicum (1) Improvisation, hymn playing, and accompanying on the organ.  
Repeatability: May be repeated. Maximum 3 hours.  
Comment(s): Requires organ proficiency at the 200 level.

420 Piano Literature I (3) From 1750 to the middle 19th century.  
430 Piano Literature II (3) Middle 19th century to the present.

460 The Organ and its Literature I (3) Development of the organ and organ literature from the Middle Ages to approximately 1750; problems of style and interpretation; pedagogical literature and methods.  
(DE) Corequisite(s): Musicology 110.  
Registration Permission: Consent of instructor.

470 The Organ and its Literature II (3) Development of the organ and organ literature from 1750 to the present; problems of style and interpretation; pedagogical literature and methods.  
(DE) Corequisite(s): Musicology 110.  
Registration Permission: Consent of instructor.

480 Teaching Class Piano (3) Historical survey and evaluation of teaching materials and methodology for college and/or adult beginning piano classes, with collateral teaching experience.  
Registration Permission: Consent of instructor.

485 Suzuki Piano Method I (2) Study of the philosophy, procedures, and literature of the Suzuki Piano Methods Books I and II.  
Comment(s): 485 and 495 must be taken in sequence.  
Registration Permission: Consent of instructor.

490 Internship (2) Opportunity for pedagogy students to gain experience in teaching beginning students under the supervision of experienced instructors.  
Contact Hour Distribution: Includes weekly discussion seminars.

491 Internship (2) Opportunity for pedagogy students to gain experience in teaching beginning students under the supervision of experienced instructors.  
Contact Hour Distribution: Includes weekly discussion seminars.

495 Suzuki Piano Method II (2) Study of procedures and literature of the Suzuki Piano Method Books III and above.  
Comment(s): 485 and 495 must be taken in sequence.  
Registration Permission: Consent of instructor.

520 Piano Literature Seminar (3) Topics vary.  
Repeatability: May be repeated. Maximum 9 hours.

531 Recital Project (2) Vocal recital. Preparation and accompaniment of full recital for accompanying concentrations only.  
Registration Permission: Consent of instructor.

540 Advanced Piano Pedagogy (2) Topics vary. Evaluation and study of methods and materials for teaching piano at all levels. Supervised laboratory teaching.  
Repeatability: May be repeated. Maximum 8 hours.  
Registration Permission: Consent of instructor.

541 Recital Project (2) Instrumental recital. Preparation and accompaniment of full recital for accompanying concentrations only.  
Registration Permission: Consent of instructor.

560 Organ Literature Seminar (3) Topics vary.  
Repeatability: May be repeated. Maximum 6 hours.

Music Performance (713)

403 Flute (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 304 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 304.  
Registration Permission: Consent of instructor.

404 Flute (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 403 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 403.  
Registration Permission: Consent of instructor.

405 Oboe (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 306 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 306.  
Registration Permission: Consent of instructor.

406 Oboe (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 405 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 405.  
Registration Permission: Consent of instructor.

410 Bassoon (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 311 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 311.  
Registration Permission: Consent of instructor.

411 Bassoon (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 410 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 410.  
Registration Permission: Consent of instructor.

415 Clarinet (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 316 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 316.  
Registration Permission: Consent of instructor.

416 Clarinet (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 415 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 415.  
Registration Permission: Consent of instructor.

420 Saxophone (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 321 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 321.  
Registration Permission: Consent of instructor.

421 Saxophone (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 420 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 420.  
Registration Permission: Consent of instructor.
425 Horn (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 326 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 326.
Registration Permission: Consent of instructor.

426 Horn (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 425 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 425.
Registration Permission: Consent of instructor.

430 Trumpet (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 331 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 331.
Registration Permission: Consent of instructor.

431 Trumpet (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 430. and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 430.
Registration Permission: Consent of instructor.

435 Trombone (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 435 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 435.
Registration Permission: Consent of instructor.

436 Trombone (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 336 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 336.
Registration Permission: Consent of instructor.

441 Baritone (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 440. and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 440.
Registration Permission: Consent of instructor.

445 Tuba (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 345 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 345.
Registration Permission: Consent of instructor.

446 Tuba (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 445 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 445.
Registration Permission: Consent of instructor.

450 Percussion (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 351 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 351.
Registration Permission: Consent of instructor.

451 Percussion (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 450 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 450.
Registration Permission: Consent of instructor.

455 Voice (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 355 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 355.
Registration Permission: Consent of instructor.

456 Voice (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 455 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 455.
Registration Permission: Consent of instructor.

460 Violin (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 361 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 361.
Registration Permission: Consent of instructor.

461 Violin (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 460 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 460.
Registration Permission: Consent of instructor.

465 Viola (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 366 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 366.
Registration Permission: Consent of instructor.

466 Viola (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 465 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 465.
Registration Permission: Consent of instructor.

470 Cello (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 371 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 371.
Registration Permission: Consent of instructor.

471 Cello (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 470 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 470.
Registration Permission: Consent of instructor.

472 Electric Bass (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 373 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 373.
Registration Permission: Consent of instructor.

473 Electric Bass (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 472 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 472.
Registration Permission: Consent of instructor.

474 String Bass (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 375 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 375.
Registration Permission: Consent of instructor.

475 String Bass (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 474 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 474.
Registration Permission: Consent of instructor.

480 Piano (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 380 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 380.
Registration Permission: Consent of instructor.

481 Piano (1-3)
Repeatability: May be repeated. Maximum 8 hours.
(DE) Prerequisite(s): 480 and Music General 101.
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 480.
Registration Permission: Consent of instructor.
510 Bassoon (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 384 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 384.  
Registration Permission: Consent of instructor.

505 Oboe (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
(DE) Prerequisite(s): 483 and Music General 101.  
Comment(s): Requires audition, registration for ensemble appropriate to degree program, and C or higher in 483.  
Registration Permission: Consent of instructor.

503 Flute (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

515 Clarinet (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

520 Saxophone (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

525 Horn (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

530 Trumpet (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

535 Trombone (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

540 Baritone (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

545 Tuba (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

550 Percussion (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

551 Accompanying and Coaching (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

555 Voice (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

560 Violin (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

565 Viola (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

570 Cello (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

572 Electric Bass (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

575 String Bass (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

580 Piano (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

583 Guitar (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

585 Harpsichord (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

590 Organ (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

594 Composition (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.
555 Composition with Electronic Media (1-3)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

599 Improvisation (1-4)  
Repeatability: May be repeated. Maximum 8 hours.  
Comment(s): Requires audition.  
Registration Permission: Consent of instructor.

Music Technology (717)  
540 Computer Music Transcription (3)  
Projects in notation, playback, and publication of music incorporating elements of word processing, graphic design, sequencing, and page layout. Study of MIDI protocol as applied to computer music workstation design.  
Credit Restriction: May not be applied toward the concentration in music theory with technology emphasis.  
Registration Permission: Consent of instructor.

550 Computer Projects (3)  
High-level programming languages used to design and implement computer-managed instruction; Internet development tools; writing of documentation for computer projects.  
(DE) Prerequisite(s): 540 or equivalent.

560 Technology in Music Research (3)  
Use of technology for research projects in music analysis or pedagogy; development and execution of research project.  
(DE) Prerequisite(s): 550.

Music Theory (714)  
430 Counterpoint I (3)  
Study of species counterpoint in modal and tonal styles with emphasis on works of Palestrina and J.S. Bach.  
(DE) Prerequisite(s): 210 with a grade of C or higher.

440 Counterpoint II (3)  
Writing of contrapuntal forms of the 18th century and fugue analysis of works from the 18th through the 20th centuries.  
(DE) Prerequisite(s): 430 with grade C or higher.

450 Choral Arranging (2)  
Analysis of scores and writing of arrangements for choruses.  
(DE) Prerequisite(s): 210 and 240 with grade C or higher or consent of instructor.

520 Analytical Techniques (3)  
Analytical techniques, contemporary approaches. Tonal and neotonal music.  
Registration Permission: Consent of instructor.

530 Music Theory Pedagogy (3)  
Techniques, methods, and materials involved in college-level theory programs. Use of technology and review of existing software.  
Registration Permission: Consent of instructor.

553 Independent Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.  
Registration Permission: Consent of director.

Music Voice (715)  
410 Song Literature I (2)  
German songs.  
Credit Restriction: Graduate credit not available for students in vocal performance.  

420 Song Literature II (2)  
French, Italian, Russian, Scandinavian, Czechoslovakian, British, and American art songs.  
Credit Restriction: Graduate credit not available for students in vocal performance.

425 Functional Diction for Singers (3)  
Comprehensive survey of singing diction in six languages: English, French, German, Italian, Latin and Spanish. Basic instruction in the International Phonetic Alphabet; development of basic diction skills; overview of diction styles and traditions in each language; survey of diction resources and reference materials.  
Comment(s): Does not fulfill deficiency requirements for graduate students in voice or accompanying.

510 Vocal Literature Seminar (3)  
Topics vary.  
Repeatability: May be repeated. Maximum 6 hours.

520 Performance Techniques for Singers I (1)  
Improvisation, movement, and basic techniques for dramatic vocal performance.  
Repeatability: May be repeated. Maximum 2 hours.  
Comment(s): Restricted to students in a vocal concentration.

530 Opera Performance (1)  
For satisfaction of performance requirement. May be fulfilled by undertaking a major operatic role or by demonstrating a cumulative performance record which may include a project approved and supervised by the voice faculty.  
Repeatability: May be repeated. Maximum 4 hours.  
Registration Permission: Consent of instructor.

540 Opera Production (1-3)  
Repeatability: May be repeated. Maximum 6 hours.  
Registration Permission: Consent of instructor.

550 Advanced Vocal Pedagogy I (2)  
Study of vocal production, examination of different methods.  
Registration Permission: Consent of instructor.

560 Advanced Vocal Pedagogy II (2)  
Study of teaching materials, observation of studio teaching, analysis of vocal problems in selected students, and supervised teaching.

565 Special Projects in Vocal Pedagogy (3)  
Course is available only for graduate students majoring in vocal pedagogy.  
Registration Permission: Consent of instructor.

570 Vocal Chamber Music Performance (1)  
For satisfaction of performance requirement. May be used to substitute for Music Voice 530 when approved and supervised by the voice faculty.  
Registration Permission: Consent of instructor.

575 Internship in Vocal Pedagogy I (1)  
Opportunity for vocal pedagogy students to develop and improve applied teaching skills through a shared practicum experience in a seminar setting. Includes supervised instruction.  
Repeatability: May be repeated. Maximum 2 hours.  
Comment(s): Available only for graduate students majoring in vocal pedagogy.  
Registration Permission: Consent of instructor.

580 Choral Literature I (2)  
A historical survey of the development of the major choral genre.

585 Choral Literature II (2)  
A survey by historical period of choral literature that is considered part of the standard choral repertoire.

590 Advanced Choral Conducting (2)  
Expansion and continued refinement of conducting technique. Score reading and preparation, rehearsal techniques, and interpretation of styles and performance practices.  
Repeatability: May be repeated. Maximum 8 hours.

594 Project in Choral Conducting Performance (1-3)  
Public performance, critical document, recording project.  
Repeatability: May be repeated. Maximum 36 hours.  
Registration Permission: Consent of instructor.

595 Choral Conducting Seminar (3)  
Topics vary.  
Repeatability: May be repeated. Maximum 36 hours.  
(DE) Prerequisite(s): 590 or consent of instructor.

Musicology (706)  
410 Studies in Genre (3)  
Historical, cultural, analytical, and musicological issues related to a single musical genre, style, or repertory. Topics vary.  
Repeatability: May be repeated. Maximum 6 hours.

420 History of Opera (3)  
The development of opera from its inception to the present. Readings and discussion focus on an understanding of the historical trajectory of opera, both as a musico-theatrical work and as a cultural practice.  
Recommended Background: 100-level musicology course.  
Registration Permission: Consent of instructor.

430 History of the Symphony (3)  
Overview of orchestral repertories from 1600 to the present.  
Recommended Background: 100-level musicology course.  
Registration Permission: Consent of instructor.

450 Composer Seminar (3)  
Biographical, historical, and cultural study of a composer, or a group of related composers. Topics vary.  
Repeatability: May be repeated. Maximum 6 hours.

460 Music Aesthetics (3)  
Nature of music and musical experience, sense perception and emotions, music, and role of artist in society. Aesthetic viewpoint of individuals and historical eras through selected writings.

480 Music in Christian Worship (3)  
Hymnody, liturgies, and liturgical music.

540 Medieval and Renaissance Music (3)  
Musical phenomena from c. 900 to c. 1600, selected from chant, troubadour song, early polyphony, madrigal, mass, and motet. Genres considered against historical, cultural, analytical, and literary frameworks, including words-music relationships, the role of music in devotion, sacred and secular interchanges, oral and written transmissions.  
(DE) Prerequisite(s): 400.  
(DE) Corequisite(s): Music General 510.  
Registration Permission: Consent of instructor.
550 Music in the Baroque Period (3) Aspects of western European art music, c. 1600 to c. 1750, from historical and cultural perspectives. Genre, national identities, the roles of voices and instruments, the emergence of tonality, issues of gender, and music's role in social, religious and performance practices. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510. Registration Permission: Consent of instructor.

560 Music in the Classic Period (3) The development of classical style from preclassic to the music of Haydn, Mozart and early Beethoven. Focus on aesthetic, cultural and social frameworks pertaining to various genres and composers. Selected vocal and orchestral works examined with respect to themes of appropriation, politics, narratives, and biographical references. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510. Registration Permission: Consent of instructor.

570 Music in the 19th Century (3) Music of the nineteenth century from Beethoven to the post-Romantics with a focus on aesthetic, cultural and social contexts. Opera, symphony, art song, piano works, and others examined against the frameworks of cultural theory, gender studies, orientalism, politics and philosophy. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510. Registration Permission: Consent of instructor.

585 Topics in Music of the Americas (3) Historical or cultural study of a topic concerned with music and musical practice in the Americas. Topics vary. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510. Registration Permission: Consent of instructor.

586 Topics in Opera (3) Topics vary within operatic repertory from the 17th century to the present including music and drama; interdisciplinary, race, or gender studies; realism; nationalism; expressionism; minimalism. Repeatability: May be repeated. Maximum 6 hours.

590 Introduction to Ethnomusicology (3) Ethnomusicology as scholarly discipline. History, theories, and methodologies as applied to study of music in culture. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510. Registration Permission: Consent of instructor.

595 Independent Study (1-15) (DE) Prerequisite(s): 551. Registration Permission: Consent of director.

595 Seminar in Ethnomusicology (3) Exploration of a methodological, theoretical, or ethnographic topic in ethnomusicology. Topics vary. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 400. (DE) Corequisite(s): Music General 510.

596 Seminar in Historical Musicology (3) Topics vary; specific musical genre, composer, or phenomenon. Repeatability: May be repeated. Maximum 6 hours.

Nuclear Engineering (716)

403 Nuclear and Radiological Engineering Laboratory II (3) Cross section measurements, diffusion properties of neutrons, shielding, dynamics and controls, alpha and beta spectroscopy, radiation fields and dosimetry. (DE) Prerequisite(s): 301.\n
404 Nuclear Fuel Cycle (3) Topics include mining, milling, fabrication, in-core management, reprocessing, waste disposal, regulatory and radiation health issues and requirements. (DE) Prerequisite(s): 470 or equivalent.

406 Radiation Shielding (3) Types of radiation sources, fundamentals of gamma ray and neutron attenuation, biological effects, approximate methods of shield design, discrete ordinates, and Monte Carlo. (DE) Prerequisite(s): Physics 232.

421 Introduction to Nuclear Criticality Safety (3) Fundamentals of nuclear criticality safety; criticality accidents; safety standards; overview of experiments, computational methods, and applications. (DE) Prerequisite(s): 301.

431 Radiation Protection (3) External and internal dosimetry, biological effects of radiation, radiation detection, radiation risk assessment. (DE) Prerequisite(s): 301.

470 Nuclear Reactor Theory I (3) Fundamentals of reactor physics relative to cross sections, kinematics of elastic scattering, reactor kinetics, reactor systems and nuclear data. Analytical and numerical methods applicable to general criticality problems, eigenvalue searches, perturbation theory, and multigroup diffusion equations. (DE) Prerequisite(s): 301.

483 Introduction to Reliability Engineering (3) Probabilistic failure models, parameter estimation (maximum likelihood, Bayes techniques), model identification and comparison, accelerated life tests, failure prediction, system reliability, preventive maintenance and warranties. (Same as Chemical Engineering 453; Industrial Engineering 483; Mechanical Engineering 483.) Registration Permission: Consent of instructor.

484 Introduction to Maintainability Engineering (3) Principles of maintainability and reliability engineering, and maintenance management. Topics include information extraction from machinery measurements, rotating machinery diagnostics, nondestructive testing, life prediction, failure models, lubrication oil analysis, establishing predictive maintenance programs, and computerized maintenance management systems. (Same as Chemical Engineering 484; Industrial Engineering 484; Materials Science and Engineering 484; Mechanical Engineering 484.) Registration Permission: Consent of instructor.

494 Special Topics in Nuclear Engineering (3) Problems related to recent developments and practice. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Introduction to Reliability Engineering (3) Fundamentals of reliability and electronics associated with radiation detection and measurement, methods of data analysis. Applicability of particular detector measurements and fundamentals of radiation detection instrumentation operation. (DE) Prerequisite(s): 551.

511 Transport Processes in Nuclear Engineering (3) Rheology of Newtonian and non-Newtonian fluids; integral and system conservation equations for single and multi-component fluids; in-depth development of differential conservation equations for mass, energy, and momentum; exact and approximate solutions of equations of motion; boundary layer analysis; numerical analysis of fluid flow and heat transfer.

512 Transport Processes in Nuclear Engineering (3) Rheology of Newtonian and non-Newtonian fluids; integral and system conservation equations for single and multi-component fluids; in-depth development of differential conservation equations for mass, energy, and momentum; exact and approximate solutions of equations of motion; boundary layer analysis; numerical analysis of fluid flow and heat transfer.

521 Nuclear Systems Dynamics and Control (3) Introduction to state variable methods for system dynamics and control analysis and application of these methods to nuclear plant dynamics, simulation and control problems.

522 Experimental Methods in Reactor Dynamics (3) Introduction to time domain and frequency domain techniques. Measurement, analysis, and interpretation of process signals for reactor surveillance and diagnostics. Introduction to time-series modeling. (DE) Prerequisite(s): 521.

541 Reactor Fuel Management (3) Topics relative to in-core fuel management. Applicable topics in reactor physics, fuel depletion, isotopic inventories, reactivity control and numerical methods. (DE) Prerequisite(s): 470 or consent of instructor.

543 Selected Topics in Nuclear Criticality Safety (3) Criticality safety computational and experimental methods for enrichment, fabrication, storage, reprocessing, and transport applications; overview of safety practices and regulatory requirements. (DE) Prerequisite(s): 421 or consent of instructor.

550 Radiation Measurements Laboratory (3) Physics and electronics associated with radiation detection and measurement, methods of data analysis. Applicability of particular detector measurements and fundamentals of radiation detection instrumentation operation. (DE) Prerequisite(s): 551.

552 Radiological Assessment and Dosimetry (3) Transport of radionuclides in environment, food chain pathways, internal dosimetry and personnel dosimetry. (DE) Prerequisite(s): 551 or consent of instructor.

553 Radiation Risk Analysis (3) Methods for radiation risk prediction, survival analysis, parameter estimation, real data analysis, extrapolation techniques. (DE) Prerequisite(s): 552 or consent of instructor.

567 Medical Physics I (3) Ionizing radiation use in radiation therapy to cause controlled biological effects in cancer patients. Physics of interaction of various radiation modalities with body equivalent materials and physical aspects of clinical applications. Contact Hour Distribution: Lecture and lab. Registration Permission: Consent of instructor.

568 Medical Physics II (3) Physics of ionizing radiation therapy with emphasis on quality assurance, treatment planning, radiation protection, and special treatment procedures. Contact Hour Distribution: Lecture and lab. (DE) Prerequisite(s): 567.

571 Reactor Theory and Design (3) Analytical and numerical techniques for neutronic modeling of nuclear systems. Forward and adjoint Boltzmann transport equation. Multigroup diffusion theory. Core analysis methods and codes. (DE) Prerequisite(s): 470 or consent of instructor.

572 Nuclear System Design (3) Design and analysis of a nuclear system, interface with non-nuclear aspects of system design: system reliability and economics; class project. Registration Permission: Consent of instructor.

577 Neural Networks in Engineering (3) Neural network technology for use in intelligent systems; rationale for neural computing, structure of neural computing systems, programming. (Same as Biomedical Engineering 577; Engineering Science 577; Mechanical Engineering 577.) Registration Permission: Consent of instructor.

578 Fuzzy Systems in Engineering (3) Fuzzy numbers, fuzzy environment, uncertainty and randomness, approximate reasoning, fuzzy models and structures, decision process in fuzzy environment, fuzzy computing, fuzzy logic controllers, fuzzy expert systems and other engineering applications. (Same as Engineering Science 578.)

579 Advanced Monitoring and Diagnostic Techniques (3) Fundamentals of monitoring and diagnostics and application of advanced statistical and artificial intelligence based techniques such as ridge regression, principal component analysis (PCA), linear and non-linear partial least squares (PLS), neural networks, and fuzzy logic. (DE) Prerequisite(s): Statistics 571. Registration Permission: Consent of instructor.

581 Reactor Shielding (3) Application of analytic/deterministic solutions of Boltzmann transport equation to shield design problems. Spherical harmonics, moments method, discrete ordinates, adjoint calculations, coupled analysis, and fast reactor shield design. (DE) Prerequisite(s): 406 or equivalent.

582 Monte Carlo Analysis (3) General overview of the Monte Carlo Method for solving problems in physics and engineering. Random sampling, evaluation of integrals, analog particle transport, techniques of variance reduction, forward and adjoint modes of analysis, importance function biasing, splitting/weight window survival biasing and contribution theory. Particular emphasis on solving neutral particle radiation transport problems using the MCNP code system. Registration Permission: Consent of instructor.

585 Process System Reliability and Safety (3) Qualitative and quantitative techniques for assessing and improving process systems reliability and safety. Fault tree analysis and associated dependent failure analysis. (Same as Chemical Engineering 585.) Registration Permission: Consent of instructor.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.) Registration Permission: Consent of instructor.

597 Special Topics in Nuclear Engineering (3) Lectures and recitation on recent advances in nuclear engineering. Repeatability: May be repeated with consent of instructor. Registration Permission: Consent of instructor.

598 Nuclear Engineering Practice (3-9) Experience in solving and reporting on engineering problems. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Comment(s): Enrollment limited to alternative plan students. Registration Permission: Consent of department.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: IP/No Credit only. Repeatability: May be repeated.

611 Selected Topics in Reactor Theory (3) Transport theory, control rod theory, stochastic methods. Selected topics from literature. (DE) Prerequisite(s): 572.

612 Selected Topics in Reactor Theory (3) Transport theory, control rod theory, stochastic methods. Selected topics from literature. (DE) Prerequisite(s): 572.

621 Selected Topics in Radiation Protection (3) Repeatability: May be repeated with consent of department. (DE) Prerequisite(s): 551 and 552.

671 Advanced Topics in Applied Artificial Intelligence (3) Recent advances in engineering applications of artificial intelligence. (Same as Engineering Science 671; Mechanical Engineering 671.) (DE) Prerequisite(s): 577.

697 Special Topics in Nuclear Engineering (3) Investigation of new developments. Repeatability: May be repeated with consent of department. Registration Permission: Consent of instructor.

Nursing (720)

400 Aging and Society (3) An examination of the health and social effects of longevity and the aging process including societal and personal attitudes about old age. Resources, trends, issues, and potentials of aging are explored. Volunteer community service, a service learning component, is required. Comment(s): Open to students in all colleges.

402 Gerontology Practicum (3) Off-campus supervised experience in gerontology. Offered as part of the undergraduate gerontology minor. Comment(s): Open to students in all colleges. Registration Permission: Consent of instructor.

409 Genetic Disorders, Vulnerable Families and Health Advocacy (3) Examination of health and social implications of Human Genome Project, with emphasis on genetic disorders that result in chronic illness or disability. Strategies for building collaborative partnerships to effect health advocacy for vulnerable populations.

500 Thesis (1-15) Grading Restriction: P/No Credit only. Repeatability: May be repeated. Registration Restriction(s): Master of Science in Nursing – nursing major.

501 Nursing Research: Methods, Design, and Analysis (3) Basic principles of research process in application to clinical questions; critical evaluation of nursing and health-related research. (DE) Prerequisite or (DE) Corequisite: Graduate level statistics course.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

504 Advanced Health/Physical Assessment (3) Development of advanced clinical reasoning and assessment skills to determine client health status and needs. Application of physiological, pathophysiological, and psychosocial concepts with implications for advanced practice nursing. Contact Hour Distribution: 2.5 didactic and 5.5 lab. Registration Restriction(s): Master of Science in Nursing – nursing major.

505 Advanced Clinical Pharmacology (3) Pharmaceutical agents utilized to treat common, recurrent health problems; indications, contraindications, side and interactive effects of commonly prescribed drugs. (DE) Prerequisite(s): Undergraduate pharmacology course or consent of instructor.

(RE) Prerequisite(s): 505.
Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

507 Concepts for Advanced Practice Nursing: Health Promotion and Health Policy (4) Exploration of advanced nursing practice in health promotion and the organizational, social, ethical, political, economic, and technological factors that impact advanced practice nursing and the delivery/promotion of health care.

Contact Hour Distribution: 3 didactic and 1 seminar.
Registration Restriction(s): Master of Science in Nursing – nursing major.

509 Graduate Seminar in Public Health (1) (See Public Health 509.)

510 Theoretical Foundations of Nursing (3) Historical evolution of nursing science; nursing’s metaparadigm and selected philosophies, conceptual models and theories as structures which guide critical thinking in analysis, reasoning, and decision making for advanced practice nursing.

511 Statistical Applications to Nursing Research (3) Descriptive and inferential statistics; statistical concepts and applications to clinical settings and their applications to advanced practice nursing.

515 Advanced Pathophysiology for Nursing Practice (3) Advanced physiologic and pathophysiologic concepts, principles, and theories applied to deviations of human systems.

(DE) Prerequisite(s): Undergraduate pathophysiology course.

516 Advanced Pathophysiology: Neurological/Cardiovascular with Anesthesia Implications (2) Review of anatomy and physiology and integration of pathophysiology involved in patients requiring anesthetic care for cardiac surgical procedures (both children and adults) with and without cardiopulmonary bypass, intercalan surgical procedures for vascular and mass occupying lesions, patients requiring somatosensory evoked potential monitoring, and patients requiring anesthesia for non-cardiac and non-neurological procedures who present with either neurological and/or cardiovascular comorbidity.

(RE) Prerequisite(s): 524 and 525.
(DE) Corequisite(s): 523.
Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

517 Advanced Pathophysiology: Respiratory/Renal with Anesthesia Implications (2) Review of anatomy and physiology and integration of pathophysiology involved in administration of anesthesia for patients who present with renal or respiratory pathology. Pathological implications of acute and chronic renal failure, renal transplantation, pulmonary disease states: obstructive and restrictive diseases, one lung ventilation, and acute pulmonary disease states and their management.

(RE) Prerequisite(s): 524 and 525.
(DE) Corequisite(s): 523.
Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

518 Advanced Pathophysiology: Obstetrics/Regional Anesthesia (2) Review of anatomy and physiology and integration of pathophysiology involved in administration of regional blockade of upper and lower extremities. Local anesthetic pharmacology, indication for regional anesthesia, contraindications to specific blockade, and techniques for clinical administration of regional blockade. Regional anesthetic considerations for obstetric patient.

(RE) Prerequisite(s): 524 and 525.
(DE) Corequisite(s): 523.
Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

519 Psychopharmacology in Advanced Practice (3) Examination of the neurobiological basis of psychiatric illness and the use of psychopharmacological agents to modify symptoms and outcomes. Evaluation of the role of psychotropic medications in relation to the use of other psychotherapeutic interventions.

(DE) Prerequisite(s): Undergraduate pharmacology course or consent of instructor.

522 Integrated Health Science for Anesthesia (3) Fundamental principles of chemistry and physics as related to practice of nurse anesthesia. Correlation of principles to clinical anesthesia practice.

(DE) Prerequisite(s) or (DE) Corequisite(s): 524.
Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

523 Advanced Principles of Nurse Anesthesia Practice (2) Advanced concepts/principles of anesthetic management and legal implications of nurse anesthesia practice.

Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

524 Basic Principles of Anesthesia I (3) An introduction to the scientific principles upon which anesthesia administration is based. The focus of this course (part one of a two-part series) is on the sound basic principles in the administration of regional anesthesia delivery for the beginning practitioner.

Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

525 Basic Principles of Anesthesia II (3) A continuation of 524 which builds upon the previous course to provide advanced elementary scientific principles upon which nurse anesthetists implement plans of care which have been developed. The focus of this course (part two of a two-part series) is on the sound basic principles in the administration of advanced anesthesia delivery for the beginning practitioner.

Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

526 Professional Issues in Nurse Anesthesia (2) Exploration of historical and current issues surrounding nurse anesthesia education, practice, and the profession.

Registration Restriction(s): Master of Science in Nursing – nursing major/nurse anesthesia concentration.

527 Nursing of Women and Children: Clinical Experience in Children’s Health (1-5) Clinical experience in the role of pediatric nurse practitioner or clinical nurse specialist in variety of health care settings serving children.

Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 15 hours.

(DE) Corequisite(s): 550 or 551.

528 Well Child Care: Assessment of Growth, Development, and Behavior (2) Comprehensive and preventative care for the well child. Appropriate screening tools and related development theories. Focus is on the well child ages 0 to 21 years.

Contact Hour Distribution: 2 didactic and 4 practicum.

(DE) Prerequisite(s): 504 and 505.

(62) Prerequisite(s): 515.

(RE) Prerequisite(s) or (DE) Corequisite(s): 507.
Registration Restriction(s): Master of Science in Nursing – nursing major.

531 Adult Health Nursing II (7) Continuation of 530. Delivery, provision, and management of health care for adult groups and communities.

Contact Hour Distribution: 2 didactic and 5 practicum.

(RE) Prerequisite(s): 530 and 501.
Registration Restriction(s): Master of Science in Nursing – nursing major.

Contact Hour Distribution: 2 didactic and 3 practicum/field supervision.

(DE) Corequisite(s): 532.

533 Homeland Security I (5) Advanced planning and leadership in response to human-made and natural disasters, as well as mass casualties related to terrorism or breach of homeland security.

Contact Hour Distribution: 2 didactic and 3 practicum/field supervision.

(DE) Corequisite(s): 532.

534 Homeland Security II (5) Continuation of Homeland Security I, providing emphasis on incident management, including ethical issues, and the impact of culture and psychology on the human response to terrorism, disaster, mass casualty events, and large population emergencies.

Contact Hour Distribution: 2 didactic and 3 practicum/field supervision.

(RE) Prerequisite(s): 533.

535 Homeland Security III (7) Application of advanced practice knowledge and skills to assess preparedness for mass casualty and homeland security disasters, toxic exposures or terrorist activity; to mobility available resources; and effectively use communication to integrate local response into broader area, national, and international response.

Contact Hour Distribution: 2 didactic and 5 practicum/field supervision.

(RE) Prerequisite(s): 534.

536 Homeland Security IV (8) Advanced care concepts provided to those affected by specific types of disasters, toxic exposures, terrorist events, or large population emergencies.

Contact Hour Distribution: 2 didactic and 6 practicum/field supervision.

(RE) Prerequisite(s): 535.
Registration Restriction(s): Master of Science in Nursing – nursing major.
573 Family Nurse Practitioner III (8) Continuation of 572. Advanced nursing management of multiple/complex health problems of individuals and families in all developmental life stages; role refinement and exploration of major issues of the family nurse practitioner; clinical experience in a variety of settings.
Contact Hour Distribution: 2 didactic and 6 practicum.
(Re) Prerequisite(s): 501 and 572.
(De) Prerequisite or (De) Corequisite: 582.

577 Special Topics (1-3) Topic is determined by faculty and student interest.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

582 Scholarly Inquiry for Advanced Practice Nursing (3) Non-thesis option. Utilization of research process through experiential or critical evaluation of science in area of interest. Conducted under faculty guidance and culminating in scholarly product.
Repeatability: May be repeated. Maximum 6 hours.

583 Directed Clinical Practice (1-10) Additional opportunities for advanced nursing practice. Objectives to be developed collaboratively by student and faculty.
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 14 hours.
Comment(s): Enrollment in or completion of graduate-level courses in clinical nursing required.

585 Seminar in Gerontology (1) (See Health 585.)

590 Nursing Administration: Macro-Analysis (6) Exploration, analysis, and application of selected organizational, management, and leadership theories and financial principles to delivery of nursing services. Structure, functions, organization, behaviors, and adaptive processes of health care organizations.
Contact Hour Distribution: 2 didactic and 4 practicum.
(Re) Prerequisite(s): 510.
(De) Prerequisite or (De) Corequisite: 501 and 507.

591 Nursing Administration: Micro-Analysis (6) Utilization of human and financial resources, conflict resolution, and organizational development with application to mid-level and top-level nursing administration positions.
Contact Hour Distribution: 2 didactic and 4 practicum.
(Re) Prerequisite(s): 510.
(De) Prerequisite or (De) Corequisite: 501 and 507.

593 Independent Study (1-3) Repeatability: May be repeated. Maximum 6 hours.
Registration Restriction(s): Doctor of Philosophy – nursing major.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction(s): Doctor of Philosophy – nursing major.

601 Philosophy and Theory for Nursing Science (3) Philosophical and historical context of knowledge for nursing science; in-depth analysis of health-related theories as frameworks for knowledge-building; concept development in theory building.
Registration Restriction(s): Doctor of Philosophy – nursing major.

603 Nursing Research and Inquiry (3) Philosophical, theoretical and methodological bases for nursing inquiry.
(Re) Prerequisite(s): 601.

605 Middle-Range Theoretical Formulations for Nursing Science Development (3) Extant and emerging middle-range theories instrumental in nursing science development.
(Re) Prerequisite(s): 603.
(De) Corequisite(s): 608.
Recommended Background: Inferential statistics course.

606 Nursing Research Seminar (3) Selected topics pertaining to dissertation proposal process, research experience, and defense.

607 Qualitative Nursing Research (3) Critique and application of qualitative nursing research methods.
(Re) Prerequisite(s): 603.

608 Quantitative Nursing Research (3) Critique and application of quantitative nursing research methods.
(Re) Prerequisite(s): 603.
(De) Prerequisite or (De) Corequisite: Multivariate statistics course.

609 Research Practicum (1-3) Supervised individual or group research experience under guidance of faculty.
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

610 Nursing Science Seminar (2) Critical Analysis and synthesis of literature in selected focus area within nursing science.
Registration Restriction(s): Doctor of Philosophy, nursing major.

612 Health and Nursing Policy/Planning (3) Policies affecting nursing education and practice; health policies and political processes; interactions between health professionals, consumer groups, and government in health policy development and health planning activities.

613 Nursing Leadership in Complex Systems (3) Analysis and evaluation of nursing leadership/management in complex professional, academic and health care systems.

614 Nursing Preceptorship (1-3) Individually-designed practicum, field, or internship experiences in variety of administrative, educational, research, or clinical practice settings.
Repeatability: May be repeated. Maximum 6 hours.
(Re) Prerequisite(s): 601.

Nutrition (726)

500 Thesis (1-15) Grading Restriction: P/ NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

509 Graduate Seminar in Public Health (1) (See Public Health 509.)

511 Advances in Carbohydrate, Lipid and Protein Metabolism (4) The physiological impact of dietary carbohydrates, lipids and proteins, with an emphasis on nutritional and hormonal regulation of intermediary metabolism, bioenergetics and gene regulation.
(De) Prerequisite(s): Advanced nutrition course.

512 Advances in Vitamin and Mineral Metabolism (3) Advances in the requirements, utilization, metabolism and physiological impact of micro and macronutrients with an emphasis on vitamins and minerals in the context of human nutrition.
(De) Prerequisite(s): Advanced nutrition course.

513 Community Nutrition I (3) Orientation to community; assessment of nutrition problems, needs, and resources; functional roles of public health nutritionist. Concurrent field experiences.
(De) Prerequisite(s): Advanced nutrition course or consent of instructor.

514 Community Nutrition II (3) Planning, implementation, and evaluation of public health nutrition programs. Concurrent field experiences.
(De) Prerequisite(s): 513 or consent of instructor.

515 Field Study in Community Nutrition (1-12) Personal participation in and analysis of state or regional community nutrition program. Location of in-depth study to be selected in consultation with instructor.
Grading Restriction: Satisfactory/No Credit grading only.
(De) Prerequisite(s): 513 and 514.
Registration Permission: Consent of instructor.

516 Maternal and Child Nutrition (3) Nutrition principles related to growth and development during pregnancy, infancy, and childhood to age 5, high risk conditions.
(De) Prerequisite(s): Advanced nutrition course or consent of instructor.

517 Childhood and Adolescent Nutrition (3) Application of nutrition principles to school age children; effects of diseases on growth and health maintenance; nutritional assessment and counseling for nutrition.
(De) Prerequisite(s): Advanced nutrition course or consent of instructor.

518 Nutrition and Aging (3) Nutritional problems of adults; nutritional requirements, dietary intakes; affects of nutrition on biological aging.
(De) Prerequisite(s): Advanced nutrition course or consent of instructor.

521 Physiological Basis for Diet and Disease (3) Altered nutrient needs as result of metabolic changes that occur in selected disease states.
(De) Prerequisite(s): Nutrition in disease course or consent of instructor.

522 Nutrition Counseling (2) Individual eating habits and disorders, evaluation strategies for effectiveness of helping process.
(De) Prerequisite(s): Nutrition in disease course or consent of instructor.

530 Molecular Application in Nutrient-Gene Interaction (1) Theories and applications of gene regulation methodologies. Experimentation with DNA and RNA, RNA and DNA isolation and analysis to illustrate nutrient regulation of gene expression.
Contact Hour Distribution: Combination or lab and lecture.

540 Seminar in Nutrition (1) Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
541 Research Methods (2) Basic principles of planning, conducting, and interpreting nutrition and foodservice systems administration research.
(De) Prerequisite(s): 6 graduate hours in nutrition and food system administration and statistics.

544 Survey Methods in Food and Nutrition (2) Application of survey research methods to nutrition projects: assessment of food consumption, nutrient intake, nutritional status, sociocultural-economic parameters, food production and service.
(De) Prerequisite or (De) Corequisite: 541.

547 Field Experience (3-9) Experience in food-related industry or agency under supervision of faculty member.
Grading Restriction: Satisfactory/No Credit grading only.
Registration Permission: Consent of instructor.

548 Directed Study in Nutrition (1-3) Advanced study in nutrition.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

549 Special Topics (1-3) Recent advances in nutrition or food systems administration.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

602 Advanced Topics in Nutrition Science (1-3) Comprehensive individual study and group discussion of topics related to current problems in nutrition.
Repeatability: May be repeated.
(De) Prerequisite(s): 512 or consent of instructor.

Operations and Management Science (738)

540 Statistics and Operations Management (3) Analysis of methods and models for understanding supply chain flows processes. Introduction to management strategies and techniques applicable to design of systems in logistics and operations processes. (Same as Logistics 510.)
(De) Prerequisite(s): Business Administration 511, 512, and 513 or consent of instructor.

541 Operations Management (3) Techniques applicable to design of systems in operations planning and control in manufacturing and service industries. Modeling real-world systems through problem definition, supporting data structure design, model design, solution, implementation, and maintenance.
(De) Prerequisite(s): 540 or Logistics 510 or consent of instructor.

Philosophy (745)

400 Special Topics (3)
Repeatability: May be repeated if topic differs. Maximum 6 hours.

411 Modern Religious Philosophies (3) (See Religious Studies 411.)

419 Science as Method (3) (See Ecology and Evolutionary Biology 419.)

420 Topics in History of Philosophy (3) One or more figures or movements from antiquity through mid-20th century.
Repeatability: May be repeated. Maximum 6 hours.
(De) Prerequisite(s): 6 hours of philosophy courses or consent of instructor.

435 Intermediate Formal Logic (3) Metatheory of formal logic and philosophy of logic.
Registration Permission: Consent of instructor.

440 Contemporary Ethical Theory (3) Topics in meta-ethics or ethics.
(De) Prerequisite(s): 6 hours of philosophy courses or consent of instructor.

443 Advanced Business Ethics (3) Advanced topics in business ethics.
Repeatability: May be repeated if topic differs. Maximum 6 hours.
(De) Prerequisite(s): One of the following – 241, 242, 243, 244, 245, 246, 340.

445 Advanced Environmental Ethics (3) Advanced topics in environmental ethics.
Repeatability: May be repeated if topic differs. Maximum 6 hours.
(De) Prerequisite(s): One of the following – 241, 242, 243, 244, 245, 246, 340.

446 Advanced Bioethics (3) Advanced topics in bioethics.
Repeatability: May be repeated if topic differs. Maximum 6 hours.
(De) Prerequisite(s): One of the following – 241, 242, 243, 244, 245, 246, 340.

462 Philosophy of Biology (3) An introduction to current issues in the philosophy of biology. Specific problems vary, but will likely include: the nature of natural selection, adaptation, and fitness; the level of selection debate; the nature of species; the interaction of environment and organism, and others.
(De) Prerequisite(s): Upper-division coursework in philosophy or biology or consent of instructor.

472 Philosophy of Language (3) Problems of meaning, reference and truth. What is the relation between words and the world? How do sentences manage to be about the world? What is it for something to be true?
(De) Prerequisite(s): 3 philosophy courses 200 level or above.

473 Philosophy of Mind (3) Problems of mind and body in relation to consciousness and personal identity.
(De) Prerequisite(s): 6 hours of philosophy courses or consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 15 hours.
Credit Restriction: May not be used toward degree requirements.

510 Philosophical Research (1-15) Paper workshop (writing, revising papers, getting papers ready to publish).
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 15 hours.
Credit Restriction: May not be applied toward degree requirements.

520 Topics in Ancient or Medieval Philosophy (3) Intensive critical work on major philosopher or school.
Repeatability: May be repeated. Maximum 9 hours.

522 Topics in Modern Philosophy (3) Intensive critical work on major philosopher or school.
Repeatability: May be repeated. Maximum 9 hours.

524 Topics in 20th-Century Philosophy (3) Intensive critical work on major philosopher or school.
Repeatability: May be repeated. Maximum 9 hours.

528 Topics in Contemporary Philosophy (3) Intensive critical work on themes in late 20th-century philosophy.
Repeatability: May be repeated. Maximum 9 hours.

540 Topics in Ethics or Value Theory (3)
Repeatability: May be repeated. Maximum 9 hours.

542 Topics in History of Ethics (3) Dominant movements in history of ethics.
Repeatability: May be repeated. Maximum 9 hours.

543 Topics in Business Ethics (3) Content may vary.
Repeatability: May be repeated if content differs. Maximum 9 hours.

544 Topics in Applied Ethics (3) Content may vary.
Repeatability: May be repeated. Maximum 9 hours.

545 Topics in Environmental Ethics (3) Content may vary.
Repeatability: May be repeated if content differs. Maximum 9 hours.

546 Topics n Bioethics (3) Content may vary.
Repeatability: May be repeated if content varies. Maximum 9 hours.

549 Practicum in Applied Ethics (1-3)
Repeatability: May be repeated if content differs. Maximum 9 hours.
Credit Restriction: Does not count toward hours required for the degree.

577 Topics in Mind (3) Relation of mental to physical and of role of words in discourse for mental activities, thinking and feeling.
Repeatability: May be repeated. Maximum 9 hours.

585 Special Topics (3)
Repeatability: May be repeated. Maximum 9 hours.

589 PhD Practicum in Applied Ethics (1-15) Supervised experience in such settings as health care, business, legal, or environmental institutions.
Repeatability: May be repeated. Maximum 30 hours.
Credit Restriction: Does not count toward hours required for the degree.
Comment(s): Open to PhD students in philosophy with consent of the Graduate Committee.

590 Topics in Social and Political Philosophy (3) Philosophical problems concerning social and political life: family, state, freedom, justice; major theoretical responses: anarchism, social contract, Marxism.
Repeatability: May be repeated. Maximum 9 hours.

591 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.
593 Independent Study (1-15)
Grading Restriction: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only. Repeatability: May be repeated.

601 Proseminar (3) Topically focused seminar with emphasis on development of philosophical skills and methods. Required of all first-year graduate students in philosophy.

620 Topics in Ancient or Medieval Philosophy (3)
Repeatability: May be repeated. Maximum 9 hours.

622 Topics in Modern Philosophy (3)
Repeatability: May be repeated. Maximum 9 hours.

624 Topics in Contemporary Philosophy (3)
Repeatability: May be repeated. Maximum 9 hours.

640 Topics in Ethics or Value Theory (3)
Repeatability: May be repeated. Maximum 9 hours.

644 Topics in Applied Ethics (3) Content may vary. Repeatability: May be repeated if content differs. Maximum 9 hours.

Physics (773)

411 Introduction to Quantum Mechanics (3) Fundamental principles of quantum mechanics and methods of calculation. Solution of the Schrödinger equation for simple systems. Application to atomic, molecular, nuclear, and condensed matter physics. (DE) Prerequisite(s): 240 or equivalent and Mathematics 435. Comment(s): 411 and 412 must be taken in sequence.

412 Introduction to Quantum Mechanics (3) Fundamental principles of quantum mechanics and methods of calculation. Solution of the Schrödinger equation for simple systems. Application to atomic, molecular, nuclear, and condensed matter physics. (DE) Prerequisite(s): 240 or equivalent and Mathematics 435. Comment(s): 411 and 412 must be taken in sequence.

421 Modern Optics (4) Transmission of light in uniform, isotropic media; reflection and transmission at interfaces; mathematics of wave motion and interference effects. Rudiments of Fourier optics and holography. Contact Hour Distribution: 3 hours and 3 labs. (DE) Prerequisite(s): 411 or 136 or 138 or 232. Registration Permission: Consent of instructor.

431 Electricity and Magnetism (3) Electrostatics, magnetostatics, coupled electric and magnetic fields, Maxwell's Equations, electromagnetic waves and radiation. (DE) Prerequisite(s): 136 or 138 or 232.

432 Electricity and Magnetism (3) Electrostatics, magnetostatics, coupled electric and magnetic fields, Maxwell's Equations, electromagnetic waves and radiation. (DE) Prerequisite(s): 136 or 138 or 232.

461 Modern Physics Laboratory (3) Introduction to fundamental and modern techniques in experimental physics, and to the theory and practice of measurement and data analysis. Selected experiments in nuclear, atomic, molecular and solid state physics, and modern optics. Contact Hour Distribution: 6 hours lab per week. (DE) Prerequisite(s): 411 or 412.

462 Modern Physics Laboratory (3) Advanced experiments and experimental techniques in modern physics; experimental team work. Thorough quantum mechanical interpretation of results and preparation of scientific reports. Contact Hour Distribution: 6 hours lab per week. (DE) Prerequisite(s): 411 or 412.

490 Senior Seminar (1-3) Topics of current interest. Repeatability: May be repeated with consent of department. Maximum 6 hours.

500 Thesis (1-15)
Grading Restriction: P/NP only. Repeatability: May be repeated.

501 Graduate Research Participation (3) Advanced research techniques under supervision of staff research director whose research area coincides with interests of student. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated with consent of department. Maximum 18 hours. Comment(s): Open to all graduate students in good standing. Registration Permission: Consent of department and research director.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Physics Colloquium (1) Lectures and discussion on current research topics. Continuous registration required for current graduate students. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.

505 Physics of Fluids (3) Fluid physics, overview of fluid mechanics and associated computational techniques; general description of laminar and turbulent flows; subsonic, supersonic and hypersonic flows; continuum, transitional and free-molecular flows; pipe flow, nozzle flow and sonic orifice expansion flows; reacting and nonreacting flowfields; shock-tube physics; and introduction to method of characteristics and Monte Carlo computational techniques.

506 Experimental Methods (3) Introduction to experimental methods of spectroscopy through hands on operation of FTIR, Raman, NMR, photo-electron, laser and mass spectrometers. Principles and hazards of cw and pulsed lasers, radiation detectors, photomultiplier tubes, image intensifiers, image converters; high-vacuum systems including cryogenic-based devices, data acquisition techniques including lock-in amplifiers, box-car integrators, digital electronics methods and micro-computer data acquisition.

507 Contemporary Optics (3) Topics in geometrical, physical, Fourier, and nonlinear optics and introductory laser physics. Extensive use of computer calculations and design of practical and sophisticated optical systems.

508 Laser Physics (3) Mode analysis, stable and unstable resonators; rate equations and population inversion, saturation, relaxation oscillations, fluctuations and noise, laser stability; quantum theory of laser, photon coherence; mode-locking, Q-switching and frequency stabilization; specific laser types: semiconductor and solid-state, excimer, copper vapor and dye lasers.

511 Theoretical Physics I (3) Concepts and applications in applied physics. Topics: one-body, two-body and rigid body dynamics, ideal fluid, small vibrations and waves, elements of special relativity, electrostatic and magneto-static problems, and other modern applications of current interest, in areas of biophysics and astrophysics. Recommended background: Familiarity with computational methods.

512 Theoretical Physics II (3) Concepts and applications in applied physics. Topics: electrostatic and magneto-static problems, EM waves, duality and quantization, absorption and emission, statistical ensemble and thermal equilibrium, and other modern applications of current interest, in areas of quantum chemistry, biophysics, optics, spectroscopy, and astrophysics. Recommended background: Familiarity with computational methods.

513 Problems in Theoretical Physics I (3) Fundamentals of physics: classical mechanics (Newtonian mechanics, Lagrangian and Hamiltonian dynamics) and electrodynamics and magnetostatics.

514 Problems in Theoretical Physics II (3) Fundamentals of physics: electrodynamics, relativity, and quantum mechanics.

521 Quantum Mechanics (3) Fundamental principles of quantum mechanics, angular momentum, electron spin, particles in electric and magnetic fields, perturbation theory, variational methods, scattering theory; second quantization, quantization of electromagnetic field, emission, absorption, and scattering of light, bremsstrahlung, pair creation and annihilation. Application of quantum mechanics to problems of atomic, molecular, nuclear, and solid state physics.

522 Quantum Mechanics (3) Fundamental principles of quantum mechanics, angular momentum, electron spin, particles in electric and magnetic fields, perturbation theory, variational methods, scattering theory; second quantization, quantization of electromagnetic field, emission, absorption, and scattering of light, bremsstrahlung, pair creation and annihilation. Application of quantum mechanics to problems of atomic, molecular, nuclear, and solid state physics. (DE) Prerequisite(s): 521.

531 Classical Mechanics (3) Variational formulation, Lagrange's and Hamilton's equations, constraints, canonical transformations, Hamilton-Jacobi theory and action-angle variables.

532 Advanced Classical Mechanics (3) Advanced topics in classical mechanics, KAM theorem and Hamiltonian chaos, dissipative chaos. Topics may vary according to interest of students and instructor. (DE) Prerequisite(s): 531.
541 Electromagnetic Theory (3) Review of electrostatics, magnetostatics, and quasi-static problems; Maxwell’s field equations and their solutions in dielectric and conducting media; electromagnetic waves, relativistic, retarded potentials and gauge transformations, radiation produced by accelerating charges.

(DE) Prerequisite(s): 571.

542 Electromagnetic Theory (3) Advanced treatment of Electrodynamics, collisions between charged particles, bremsstrahlung, multipole fields. Topics may vary according to interest of students and instructor.

(DE) Prerequisite(s): 541.

551 Statistical Mechanics (3) Ergodic theory, classical ensemble theory, quantum mechanical ensembles, relation of statistical mechanics to thermodynamics, transport theory and approach to equilibrium, phase transition, fluctuations and correlations.

(DE) Prerequisite(s): 521, 531, and 571.

561 The Theory of Relativity (3) Geometry of space-time, relativistic electrodynamics, particle mechanics and continuum mechanics, Einstein’s field equations, Schwarzschild solutions, the classical test of general relativity.

(DE) Prerequisite or (DE) Corequisite: 531 and 541.

Green’s functions, integral transforms, integral equations, spherical harmonics, and functions, calculus of variations. (Same as Mathematics 517.)

Recommended Background: Advanced calculus and differential equations.

572 Mathematical Methods in Physics II (3) Advanced Problems. Topics may vary according to interests of students and instructor. (Same as Mathematics 518.)

(DE) Prerequisite(s): 571.

(DE) Prerequisite(s): 571 or consent of instructor.

591 Foreign Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

594 Special Problems (3) Especially assigned theoretical or experimental work on problems not covered in other courses.

Repeatability: May be repeated. Maximum 9 hours.

599 Seminars (1-3) (a) Mechanics; (b) Radiation; (c) Heat and Thermodynamics; (d) Electricity and Magnetism; (e) Modern Physics.

Repeatability: May be repeated with consent of department. Maximum 18 hours.

600 Doctoral Research and Dissertation (3-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

601 Atomic Physics (3) Survey of research problems and methods. Topics of current interest.

Comment(s): Intended for all graduate students.

602 Atomic Physics (3) Advanced problems.

Comment(s): For students specializing in the field.

605 Laser Spectroscopy (3) Applications of lasers to spectroscopy of atomic and molecular systems; absorption, laser-induced fluorescence, and Raman spectroscopy; molecular and atomic coherence, quantum beats, resonance fluorescence, photon echoes, self-induced transparency; saturation and Doppler-free spectroscopy; laser cooling and trapping.

(DE) Prerequisite(s): 521 and 541.

606 Nonlinear Optics (3) Nonlinear optical susceptibilities, wave propagation in nonlinear media, sum-frequency and difference frequency generation, harmonic generation, parametric amplification and oscillation, stimulated Raman processes, two- and multi-photon processes, four-wave mixing and phase conjugation, transient coherent optical effects and free induction decay, optical breakdown and nonlinear effects in plasmas.

(DE) Prerequisite(s): 522.

610 Quantum Optics (3) Quantum theory of emission and absorption of radiation; frequency-dependent susceptibility; coherence theory; field quantization and coherent photon states; interaction of radiation with atoms; photon optics, counting and higher-order coherence; atomic scattering phenomena.

(DE) Prerequisite(s): 521.

611 Advanced Quantum Mechanics and Field Theory (3) Survey of problems and methods. Topics of current interest.

Comment(s): Intended for all graduate students.

612 Advanced Topics in Quantum Field Theory (3) Renormalization, Lamb shift, anomalous magnetic moments, gauge theories, electroweak theory, quantum chromodynamics, grand unified theories, and advanced topics in laser physics and quantum optics. Topics vary according to interest of students, instructor, and present state of physics.

(DE) Prerequisite(s): 611 or consent of instructor.

615 Astrophysics and Cosmology (3) Stellar evolution: hydrostatic equilibrium, energy production and transport, star birth, main sequence, red giants, variable stars, and stellar explosions. General relativitiy and gravitational, white dwarfs, neutron stars, pulsars, and black holes.

616 Astrophysics and Cosmology (3) Galaxies and the interstellar medium. Active galaxies, quasars, and supermassive black holes. Large-scale structure, the expanding Universe, cosmology, big bang, cosmic background radiation, inflation, dark matter, formation of structure, and fate of the Universe. The Planck scale and quantum gravity.

621 Nuclear Physics (3) Survey of research problems and methods. Topics of current interest.

Comment(s): Intended for all graduate students.

622 Nuclear Physics (3) Advanced problems.

Comment(s): Intended for students specializing in the field.

626 Elementary Particle Physics (3) Survey of elementary particle physics: experimental methods, conservation laws, invariance principles, and models of interactions.

Comment(s): Intended for all graduate students.

627 Elementary Particle Physics (3) Advanced topics – quark models, electroweak interactions, and unification of elementary forces.

Comment(s): Intended for students specializing in the field.

642 Advanced Topics in Modern Physics (3) Advanced theoretical or experimental topics not covered in other courses.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

643 Computational Physics (3) Developing computer algorithms for solving representative problems in various fields of physics, celestial dynamics in astrophysics, boundary value problems in electromagnetism, atomic and nuclear structures, band structure in solid state physics, transport problems in statistical mechanics, Monte Carlo simulation of liquid, fitting and interpolation of data, correlation analysis, or optimization strategy.

(DE) Prerequisite(s): 521, 531, and 571.

671 Advanced Solid State Physics (3) Survey of research problems and methods. Topics of current interest.

Comment(s): Intended for all graduate students.

672 Advanced Solid State Physics (3) Advanced problems.

Comment(s): Intended for students specializing in the field.

Plant Sciences (791)

410 Nursery Management and Production (3) Management methods as applied to retail and wholesale nurseries and landscape contracting firms. Methods of producing liners, container and field-grown woody ornamental plants.

Contact Hour Distribution: 2 hours and 1 lab.

(DE) Prerequisite(s): 220, 330, and Environmental and Soil Sciences 210 or consent of instructor.

427 Management and Administration of Public Horticulture Institutions (2) Management of resources in non-profit institutions, support organizations and communities. Theoretical framework and institutional management; basic planning and programming; financial accounting and budgeting; development and fund raising; personnel policies; volunteer development; marketing and publicity; legal issues; relationships between staff and governing boards; the use of information technology in management and governance systems; and conservation/preservation roles in community development.

(DE) Prerequisite(s): 226.

429 Field Study of Public Horticulture Institutions (2) Extended 10-12 day field study of various public horticulture institutions such as botanical gardens, arboreta, historical grounds, zoos, conservatories, cemeteries, and nature preservers. Application and travel fee required.

(DE) Prerequisite(s): 226.

434 Fruit and Vegetable Crops (3) Botanical description, geographical distribution, general cultural practices of warm and cool season vegetables, small fruits, and deciduous tree fruits. A Saturday field trip is required.

Contact Hour Distribution: 2 hours lecture and one 2-hour lab.

(DE) Prerequisite(s): 120 and Biology 110 and 120.
435 Field and Forage Crops (2) Agronomic principles of crop production and management. Crop improvement, cropping systems, tillage, fertilization, pest management, harvest and utilization of major field and forage crops. Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): 335.

436 Plant and Garden Photography (2) Principles and techniques of photography as they relate to plants and gardens. Study of equipment options and field shooting under various weather conditions and in different seasons.

Registration Permission: Consent of instructor.

437 Public Garden Operations and Management (2) Analysis of year-round operations and management of public gardens. Case studies involving time and labor management, budget development and management, implementation of volunteer programs, information dissemination methods for public outreach, management of grounds and facilities using the University of Tennessee Institute of Agriculture Gardens as a model. (DE) Prerequisite(s): 226.

441 Advanced Turfgrass Management (2) Principles and scientific basis of turfgrass culture; adaptation, ecology, physiology, climatic influences on grass culture; clipping and water management; design.

Contact Hour Distribution: 1-hour lecture and one 1-hour lab. (DE) Prerequisite(s): 240.

442 Turf Root-zone Construction (2) Construction and management of root-zones for home lawns, golf courses and athletic fields.

(DE) Prerequisite(s): Environmental and Soil Sciences 210.

446 Horticultural Therapy (2) Introduction to the application of horticulture as therapy for treatment, rehabilitation and/or training of individuals with disabilities.

448 Horticultural Internet Technology (3) Creation and management of information resources for the internet, with a focus on development of visual and oral communications skills through a series of individual and team exercises in writing, graphics and public speaking.

(DE) Prerequisite(s): Communication Studies 210 or 240.

450 Specialty Landscape Construction (3) Methods of design, materials, and construction techniques for specialized components of the landscape industry. Irrigation systems, outdoor lighting, garden ponds and water features.

451 Plant Tissue Culture (3) (See Entomology and Plant Physiology 451.)

454 Plant Biotechniques (3) Lectures will discuss recombinant DNA technology, molecular assisted breeding of economically important crops, gene cloning and transformation technologies. Examples will be given of food and ornamental crops, pharmaceuticals, and renewable energy sources produced using biotechnology as well as potential risks of this technology. Labs will include electrophoresis, tissue culture, plasmid preps, genomic DNA preps, PCR, plant transformation, genonomic techniques.

Contact Hour Distribution: 1-hour lecture and one 3-hour lab. (DE) Prerequisite(s): 353 or Biology 240.

457 Weed Management (2) Principles of weed interference, integrated management, herbicide selectivity and behavior, specific recommendations for various crop and non-crop situations. (DE) Prerequisite(s): Environmental and Soil Sciences 210.

458 Turf Weed Management Lab (1) Laboratory addressing practices and principles presented in 457, from the standpoint of turf.

(DE) Prerequisite(s): Environmental and Soil Sciences 210. (DE) Prerequisite or (DE) Corequisite: 457.

459 Agronomy Weed Management Lab (1) Laboratory addressing practices and principles presented in 457, from the standpoint of agronomy.

(DE) Prerequisite(s): Environmental and Soil Sciences 210. (DE) Prerequisite or (DE) Corequisite: 457.

480 Advanced Landscape Design (3) Comprehensive application of landscape design skills to a variety of project experiences with an emphasis on landscape planning and analysis, planting design, and materials estimating.

Contact Hour Distribution: Two 3-hour labs. (DE) Prerequisite(s): 280 and 380.

485 Computer Aided Landscape Design (3) Overview of Computer Aided Design (CAD) as it relates to landscape design and construction. Emphasis on development of landscape design drawings through utilization of LANDCAD software.

Contact Hour Distribution: Two 3-hour labs. (DE) Prerequisite(s): 280, 380, and Agriculture and Natural Resources 290 or Computer Sciences 100.

494 Professional Horticultural Communications (3) Communication for public horticulturists through written, oral and visual media. Emphasis on communication skills using proper writing techniques and grammar for print media, brochure design using desktop publishing, slide show development, oral presentations, and video use for educational and informational presentations in ornamental horticulture.

(DE) Prerequisite(s): Agriculture and Natural Resources 290 or Computer Sciences 100.

500 Thesis (1-15)

Grading Restriction: P/NP only. Repeatability: May be repeated.

501 Special Topics in Plant Sciences (1-3) Topics to be assigned. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

503 Non-Thesis Project (1-2) Library, field, or laboratory project under supervision of faculty member.

Repeatability: May be repeated. Maximum 4 hours.

Comment(s): For students in non-thesis option only.

504 Seminar (1) Presentations and discussion of topics. Repeatability: May be repeated. Maximum 2 hours.

505 Seminar Preparation (1) Application of speaking, writing, and organizational skills in preparation and presentation of scientific material to both scientific and general audiences. Preparation of abstracts for scientific presentations. Required of all entering graduate students during their first year of graduate study.

507 Professional Development Seminar (1) (See Agriculture and Natural Resources 507.)

513 Plant Pathogenic Fungi (2) (See Entomology and Plant Pathology 513.)

521 Flowering Physiology (1) General phenomenology, photoperiodism, thermoperiodism, interactions of external factors, juvenility, and hormonal regulation.

Contact Hour Distribution: 3 hours weekly for 5 weeks. (DE) Prerequisite(s): Introductory plant physiology course.

522 Drought Physiology (1) Biophysical and biochemical aspects of plant water relations and drought physiology.

Contact Hour Distribution: 3 hours weekly for 5 weeks. (DE) Prerequisite(s): Introductory plant physiology course.

530 Integrated Pest Management (3) (See Entomology and Plant Physiology 530.)

532 Environmental Crop Physiology and Ecology (3) General and specific relations among environmental factors, crop organisms, and agricultural systems. Interrelationships of atmospheric gases in photosynthesis, evapotranspiration and foliar injury. Relationships of temperature stress, vernalization and bud dormancy to crop production. Influences of maturation ripening and senescence on post-harvest quality of fruit, vegetable, grain and forage crops.

Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): Plant physiology course.

536 Ecology of Grazing Land Systems (3) Multi-university, field-oriented course. Components and functions of grazing lands and how these vary in different ecoregions; research needs, objectives and techniques in soil-plant-animal research; forage-livestock ecology and systems in grazing lands (cropland, pastureland, rangeland and forestland); role of forages in conservation practices, wildlife habitats, and sustainable agriculture; and industries involved with forages and livestock. Requires two-week field trip, inclusive report, and examination.

Registration Permission: Consent of instructor.

544 Protein Gel Electrophoresis (1) (See Entomology and Plant Pathology 544.)

545 Plant Microtechnique (1) (See Entomology and Plant Pathology 545.)

551 Organismal Plant Genetics (3) Discovery of genetics, polyploidy, extrachromosomal inheritance, apomixis, incompatibility systems, mutations, controlling elements, quantitative inheritance and heritability.

(DE) Prerequisite(s): 561 and a general genetics course.
561 Statistics for Biological Research (3) Application of statistics to interpretation of biological research. Notation, descriptive statistics, probability, distributions, confidence intervals, t- and chi-square tests, analysis of variance, mean separation procedures, linear regression and correlation.
Credit Restriction: Students may not receive credit for both 561 and 461.
(DE) Prerequisite(s): Mathematics 125 or 152.

571 Design and Analysis of Biological Research (3) (See Animal Science 571.)

592 Internship (1-2) Application of horticulture and design principles and practices in supervised, professional setting, approved by department.
Grading Restriction: Satisfactory/No Credit or letter grade.

593 Problems in Plant Sciences (1-3) Independent study. Current topic related to technology, science or design.
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

603 Special Topics in Crop Physiology and Ecology (1-3) Microclimatology of agroecosystems, crop dormancy and responses to stress, physiology of crop growth and reproduction. Interactions of physiology and germplasm in crop production, theory and application of quantitative methods in crop physiology and ecology research.
Repeatability: May be repeated. Maximum 6 hours.

605 Special Topics in Plant Breeding and Genetics (1-3) Genotype by environment interactions, estimation of quantitative parameters, mutations, chromosome dynamics, polyploidy, genetic engineering, interspecific hybridization, linkage, screening methods, genome organization. Parental germplasm, hybridization, population formation, inbreeding, genetic variance, heritability, selection methods, molecular genetic markers, genetically engineered crops.
(DE) Prerequisite(s): 571 and a general genetics course.

Political Science (801)

Credit Restriction: May not be applied toward requirements for the Master of Science in Planning.

425 Media and Politics (3) Examines the interrelationship between the political system and the media from a political science perspective.

430 United States Constitutional Law: Sources of Power and Restraint (3) Judicial review, constitutional powers of the President and Congress, federalism, sources of regulatory authority, and constitutional protection of political and economic rights. (Same as Legal Studies 430.)

431 United States Constitutional Law: Civil Rights and Liberties (3) Current issues in civil rights and liberties including: first amendment freedoms, equal protection, privacy and the rights of the accused. (Same as Legal Studies 431.)

435 Criminal Law and Procedure (3) An overview of substantive and procedural law in the criminal justice field with emphasis on constitutional questions and public policy issues. (Same as Legal Studies 435.)

441 Public Budgeting (3) The process, participants, and politics of government budgeting with emphasis on federal government budgeting. Includes an overview of budget reform measures and their effectiveness.

442 Administrative Law (3) Legal dimensions of administrative power and procedures, and constitutional controls over administrators. (Same as Legal Studies 442.)

445 Administration of Justice (3) Administration and processes of justice system, including judicial administration and decision making in trial and appellate courts. (Same as Legal Studies 445.)

446 Housing (3) Nature and demand for housing in the U.S. and abroad. U.S. experience. Private market processes and public influences. Problems of change in housing supply, impact of new technology, and governmental programs to increase supply and quality of housing.

451 Ethnic Conflict in Foreign Countries (3) Examines political and violent conflict among ethnic and national groups and the challenges these conflicts pose for democratic and democratizing states.

452 Black African Politics (3) Recent evolution and current political environment of black African nations. (Same as Africana Studies 452.)

454 Government and Politics of China and Japan (3) Political setting, structure and political processes in China and Japan.

456 Latin American Government and Politics (3) Introduction to the political development of Latin America with an emphasis on contemporary politics. (Same as Latin American Studies 456.)

459 Government and Politics of Russia and Eastern Europe (3) System transformation, political processes and governmental structure in Russia and Eastern European countries.

461 Policy Making in Democracies (3) Comparative approach to theory and process of making public policies.

463 Contemporary Middle East Politics (3) Governments and movements in the Middle East, their characteristics, bases, and interrelationships.

471 International Political Economy (3) The politics of international economics. Topics include globalization, development, trade, crime, the IMF, the WTO, the environment and challenges to the status quo.

473 Negotiation, Bargaining and Diplomacy (3) Diplomacy, negotiation, and foreign policy decision making. Theories of diplomacy and negotiation are applied in a simulation focusing on issues from international crime and global economic stability to world health and the environment.

474 International Organization (3) Constitutional framework and key functions of the United Nations. Topics include collective security, peacekeeping, human rights, development, regional organizations, and the role of the Secretary-General.

475 Ancient and Medieval Political Thought (3) Major western political thinkers from Socrates to Marsilio of Padua. (Same as Medieval Studies 475.)

476 Modern Political Thought (3) Major western political thinkers from Machiavelli to Marx.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Scope and Methods in Political Science (3) Procedures of analysis in political science.

511 Research Design (3) Methods for planning and executing research, from case studies to experimental designs: development of research questions and hypotheses; measurement issues; and validity of inferences.

512 Quantitative Political Analysis (3) Methods and techniques in quantitative political analysis: univariate and bivariate statistics.

513 Quantitative Political Analysis (3) Methods and techniques in quantitative political analysis: multivariate model building.

514 Research and Methodology in Public Administration (3) Basic assumptions and techniques of research in public administration; measurement, analysis, and reporting of data.

520 Political Theory (3) Survey of major ideas, thinkers and works of Western political theory.

522 American Political Thought (3) Systematic examination of the normative and empirical theories of leading American political thinkers from the colonial period to the present.

530 American Government and Politics (3) Survey of literature, approaches to research and analysis, critical examination of major works, and overviews of research in various sub fields.
Repeatability: May be repeated with consent of department. Maximum 9 hours.

531 Theory of Planning (3) Analysis of nature and objectives of planning process; role of planners and planning function in public decision making.
532 Presidency (3) Systematic examination of the structure, functions and powers of the American presidency as they have evolved from the founding to the present.

533 Congress (3) Formal, empirical and theoretical approaches to and models of the institutional workings of Congress and the behavior of legislators.

535 Mass Political Behavior (3) Theoretical and empirical analyses of public opinion, political socialization, political attitudes and behavior, especially voting behavior.

537 Political Parties and Interest Groups (3) Theoretical and empirical examination of the structure, functions and operations of political parties and interest groups.

539 State and Local Government and Politics (3) Theoretical and empirical analysis of government, politics, policymaking and public administration at the state and local levels.

540 Public Law (3) Selective examination of published research and current approaches in sub fields of constitutional law, judicial process, and judicial behavior.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

544 Information Systems and Networks in Planning (3) Use and impact of computer-based information systems and global networks in planning and public management. Development of practical skills in design of planning-decision support systems, databases, Internet-based tools and geographic information systems (GIS).

545 Planning Research Methods (3) Overall structuring of social science research in planning practice: familiarity with structure of planning literature information sources, decision processes and tools, practice in posing research questions relevant to planning, evaluation methods.

547 Planning Technology (3) Relationships between information technology, society and planning. Overview of other advanced technologies, economic development, and associated social and planning issues.

548 Public Policy Process (3) Theoretical, formal and empirical analysis of the roles, functions and decision-making processes of public policymakers, including legislative, executive and judicial actors.

549 Environmental Policy (3) Overview of contemporary environmental policy and its evolution. Examines the roles of values in the environmental arena. Provides a framework for policy analysis and analytical tools for selection and choosing among policy options.

550 Public Administration (3) Overview of public administration theory and function.

552 Organization Theory (3) Appraisal of major theories of organization and their applicability to public sector.

555 Planning and Transportation (3) (See Civil Engineering 558.)

556 Policy Analysis (3) Strategies and techniques for identification and analysis of public problems and policy solutions.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

558 The Politics of Administration (3) Examination of public administration in context of American political system, policy making and political roles of public administrators and agencies.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

560 Public Financial Administration (3) Principles and techniques of public finance at state and local levels: budget preparation, execution and audit, risk management, capital planning, major tax structures, economic forecasting, cash management, and debt administration.

562 Public Management (3) Interpersonal and leadership skills, techniques and methods for planning, decision making, and implementation of management strategies in public sector.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

566 Ethics, Values, and Morality in Public Administration (3) Moral-ethical-value dilemmas confronting administrators in American political system.

569 Internship in Public Administration (3-9)

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

Comments: Open to students participating in approved internship programs.

570 Comparative Government and Politics (3) Selected topics in modern governments.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

572 The Politics of Development (3) Selected topics dealing with political problems of less developed countries.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

574 Planning and Transportation (3) (See Civil Engineering 558.)

575 Area Seminar in Comparative Government and Politics (3) Selected topics in area studies: African, Asia, Latin America, Middle East, Soviet Union and Eastern Europe or Western Europe.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

578 Topics in Planning (3) History of planning, structure and development of urban areas, operations of contemporary planning, trends and issues.

583 Economic Analysis and Development (3) Basic methods of policy analysis and planning. Planning for economic change in cities and regions. Economic development and planning process.

584 Environmental Planning (3) Role of planners and planning in maintenance of balance between natural and built environment.

585 Planning Methods (4) Preparation of comprehensive plans for urban areas and regions. Development of baseline data and forecasts, formulation of alternative plans and strategies, and development of plan implementation programs.

586 Planning and Property Development (3) Process of urban physical growth and change: functioning of private sector real estate development and its relationship to planning. Partnership roles of public and private sectors in urban development and redevelopment.

587 Legal Aspects of Planning (3) Legal basis for planning and guiding community development. Legal tools of planning.

588 Sustainable Communities (3) Overview of sustainable communities. Project-based classwork and fieldwork.

590 Practicum in Planning (3)

Registration Permission: Consent of instructor.

591 Foreign Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)

Repeatability: May be repeated. Maximum 15 hours.

594 College Teaching in Political Science (1) Instructional effectiveness, techniques, organization, materials for teaching political science at college level.

Registration Permission: Consent of instructor.

595 Readings and Special Problems in Political Science (1-3)

Repeatability: May be repeated. Maximum 15 hours.

Registration Permission: Consent of instructor.

596 Workshops in Computer Applications (1) Training in software applications to support research and decision-making tasks in public service. Successful completion certifies proficiency of MPA students in use of software applications for personal computer.

Grading Restriction: Satisfactory/No Credit grading only.

597 Special Topics in Planning (1-3)

Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

598 Problems in Planning (1-3)

Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)

Grading Restriction: P/INP only.

Repeatability: May be repeated.

610 Special Topics in Empirical Theory and Methodology (3) Advanced methods and procedures of analysis in political science.

Repeatability: May be repeated with consent of department. Maximum 9 hours.

628 Topics in Political Theory (3) Selected issues and problems in normative political theory. Specific content determined by instructor.

Repeatability: May be repeated with consent of instructor. Maximum 9 hours.

639 Special Topics in American Government and Politics (3) Advanced study of selected topics.

Repeatability: May be repeated with consent of instructor. Maximum 9 hours.

</table>

**Portuguese (811)**

| 400 Portuguese for Speakers of Another Romance Language (3) | Accelerated class for beginning students of Portuguese with strong background in another Romance language. Introduction to grammar, reading, and culture of Portugal and Brazil. |
| (DE) Prerequisite(s): 3 hours at the 300-level in another Romance language. |
| 431 Topics in the Literature and Language of Portuguese-speaking World (3) | Outstanding works of literature and culture from the countries where Portuguese is spoken. Topics may vary. (Same as Latin American Studies 431.) |
| Repeatability: May be repeated. Maximum 12 hours. |
| (DE) Prerequisite(s): At least one course at the 300-level. |
| 432 Topics in the Literature and Language of Portuguese-speaking World (3) | Outstanding works of literature and culture from the countries where Portuguese is spoken. Topics may vary. (Same as Latin American Studies 432.) |
| Repeatability: May be repeated. Maximum 12 hours. |
| (DE) Prerequisite(s): At least one course at the 300-level. |
| 591 Foreign Study (1-15) | Repeatability: May be repeated. Maximum 15 hours. |
| 592 Off-Campus Study (1-15) | Repeatability: May be repeated. Maximum 15 hours. |
| 593 Independent Study (1-15) | Repeatability: May be repeated. Maximum 15 hours. |

**Psychology (830)**

| (DE) Prerequisite(s): 110 or consent of instructor. |
| 409 Group Facilitation (3) | Study of theory and technique through supervised experience in small groups. |
| Repeatability: May be repeated. Maximum 6 hours. |
| (DE) Prerequisite(s): General psychology course or consent of instructor. |
| 410 Sensory Processes and Perception (3) | Physiological and psychological theories of perception. Emphasis on audition and vision. |
| (DE) Prerequisite(s): 385 or Mathematics 115 or Statistics 201 or graduate standing. |
| 415 Psychology of Religion (3) | History of psychology of religion with an examination of various philosophical and empirical orientations. Exploration of the psychological function of religion for individuals and society. (Same as Religious Studies 415.) |
| (DE) Prerequisite(s): 110 or consent of instructor. | 420 History and Systems of Psychology (3) | History of psychological thought. Classical approaches and recent developments. |
| (DE) Prerequisite(s): 110 or consent of instructor or graduate standing. |
| 424 Psychology and the Law (3) | Psychological aspects of legal systems. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 430 Health Psychology (3) | Psychological factors related to health and illness, including stress, personality, and environment. Applications of psychological treatments to physical illness. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 434 Psychology of Gender (3) | Biological, psychological, and social factors in gender. Importance of gender roles and stereotypes for behavior and experience. (Same as Women’s Studies 434.) |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 440 Organizational Psychology (3) | Social-psychological analysis of organizations, emphasizing role-theory and systems theory. (Same as Management 440.) |
| (DE) Prerequisite(s): 110 and 360 or consent of instructor. |
| (DE) Prerequisite(s): 110 and 385 or Statistics 201 or consent of instructor. |
| 446 Advanced Measurement and Testing (3) | Emphasis on mental test theories including classical test and item response theories. |
| (DE) Prerequisite(s): 445. |
| 450 Comparative Animal Behavior (3) | (See Ecology and Evolutionary Biology 450.) |
| 459 Comparative Animal Behavior Laboratory (3) | (See Ecology and Evolutionary Biology 459.) |
| 461 Physiological Psychology (3) | Nervous system and physiological correlates of behavior. Biological basis of emotion, learning, memory and stress. |
| (DE) Prerequisite(s): 110 or consent of instructor and one of the following sequences – Biology 101 and 102, Biology 130 and 140, or Anthropology 110 and 210. |
| 470 Theories of Personality (3) | Major theories of human personality and their development. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 475 Adolescent Development (3) | Theoretical perspectives and empirical research findings pertinent to adolescent development. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 480 Theories of Learning (3) | Classical and current approaches to learning and cognition. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 482 Topics in Psychology (3) | Intensive analysis of special topics, such as African-American psychology or evaluation of programs in the community. |
| Repeatability: May be repeated. Maximum 6 hours. |
| (DE) Prerequisite(s): 110 or consent of instructor. |
| 489 Supervised Research (1-9) | Repeatability: May be repeated. Maximum 12 hours. |
| Registration Permission: Consent of instructor. |
| 500 Thesis (1-15) | Grading Restriction: P/NP only. |
| Repeatability: May be repeated. |
| 502 Registration for Use of Facilities (1-15) | Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. |
| Grading Restriction: Satisfactory/No Credit grading only. |
| Repeatability: May be repeated. |
| Credit Restriction: May not be used toward degree requirements. |
| 505 Research Design (3) | Techniques for planning and conducting research in controlled and natural settings: experiments, quasi-experiments, observational studies, surveys, and program-evaluations. Development of questions and hypotheses for study. Design of studies to maximize validity. |
| Registration Permission: Consent of instructor. |
| 507 Foundations of Applied Psychology (3) | Fundamental methods for application of psychology principles and techniques in community, organizational, and industrial settings, and related ethical and theoretical issues. |
| (DE) Prerequisite(s): 505 and consent of instructor. |
508 Readings and Special Issues in Psychology (1-3)  
Repeatability: May be repeated. Maximum 9 hours.  
Registration Permission: Consent of instructor.

509 Research Practicum (1-3) Required of first-year graduate students in psychology.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated. Maximum 9 hours.

510 Topics in Psychology (3) Intensive examination of selected issues in psychology.  
Repeatability: May be repeated. Maximum 9 hours.  
Registration Permission: Consent of instructor.

511 Developmental Psychology (3) Normal processes of human socialization; physical, cognitive, and emotional development from conception through infancy, childhood, adolescence.  
Repeatability: May be repeated. Maximum 6 hours.  
Registration Permission: Consent of instructor.

512 Life-Span Development (3) Theories and research concerning normal human development throughout life, adulthood and old age.  
Registration Permission: Consent of instructor.

513 Foundations of Psychology: Biological Factors, Perception, Learning, Thinking, Motivation (3) Intensive survey.  
Registration Permission: Consent of instructor.

515 Colloquium in Experimental Psychology (1) Research and practical issues in experimental psychology.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated. Maximum 4 hours.  
Registration Permission: Consent of instructor.

517 Foundations of Counseling Psychology (3) History, theory, research and practice of counseling psychology.  
Repeatability: May be repeated. Maximum 6 hours.

521 Analysis of Variance for Social Sciences (3) Analysis of variance and statistical theory: application within social science framework. Contrasts among means, trend analysis, analysis of covariance, analysis of factorial designs, and multivariate approaches to analysis of within subjects data.

522 Multiple Regression for Social Sciences (3) Complexities of regression analysis and theory: application within social science framework. Bivariate correlation and regression, multiple regression, analysis of variable sets, interactions among continuous predictors, reducing collinearity between main effects and application of multiple regression to testing procedures of mediation and moderation.

526 General Vertebrate Neuroanatomy (3) Lecture and laboratory. Structure and functioning of central and peripheral nervous system.  
(DE) Prerequisite(s): 451 or equivalent.  
Registration Permission: Consent of instructor.

Registration Permission: Consent of instructor.

528 College Teaching in Psychology (3) Concepts, techniques, and materials for teaching psychology at college and/or university level. Supervised practice.  
Grading Restriction: Satisfactory/No Credit grading only.  
Registration Permission: Consent of instructor.

543 Cognitive Science (3) Theories and research.  
Repeatability: May be repeated. Maximum 6 hours.  
Registration Permission: Consent of instructor.

545 Advanced Animal Behavior (3) (See Ecology and Evolutionary Biology 545.)

546 Ethological Psychology (3) Basic ethology and comparative psychology. Implications for human behavior. (Same as Ecology and Evolutionary Biology 546.)  
Registration Permission: Consent of instructor.

547 Conceptual Foundations of Evolution and Behavior (3) Critical evaluation of seminal writings on theory and methods in comparative analysis of behavior. (Same as Ecology and Evolutionary Biology 547.)

550 Social Psychology (3) Survey of theory and research concerning interpersonal interaction and individual behavior in social context.

554 Laboratory in Psychometrics (3) Further learning about psychometrics theories: item response theory (modern mental test theory), factor analysis, and applications of those methods using computer programs to simulated or empirical data.  
Repeatability: May be repeated. Maximum 6 hours.  
Registration Permission: 555.

555 Psychometrics (3) Basic concepts: factor analysis, scaling, test theories, probability models and their applications, computerized adaptive testing and other topics.  
(DE) Prerequisite(s): Statistics 537 and 538.  
Repeatability: May be repeated. Maximum 6 hours.

556 Interviewing and Observation (3) Sensitizing students to own feelings and beliefs and to feelings of interviewee, and analysis of language content, style, and body language. Exploration of various important aspects of interviewee’s life.  
(DE) Corequisite(s): 559.  
Comment(s): Admission to doctoral program in clinical psychology or consent of instructor required.

559 Laboratory in Interviewing and Observation (1)  
(DE) Corequisite(s): 558.  
Comment(s): Admission to doctoral program in clinical psychology or consent of instructor.

560 Psychology of Learning (3) Review of current evidence from research involving human and/or non-human animals.  
Repeatability: May be repeated. Maximum 6 hours.  
(DE) Prerequisite(s): 400.  
Registration Permission: Consent of instructor.

565 History and Systems of Psychology (3) History of philosophy concerning psychology. Major systems of psychology which emerged during 20th century.  
Comment(s): Graduate standing required.

567 Group Dynamics and Methods (3) (See Counselor Education 554.)

568 Prepracticum in Career Development (3) Didactic instruction and practice in counseling and career exploration.  
Comment(s): Admission to doctoral concentration in counseling psychology required.

569 Practicum in Counseling (3) (See Counselor Education 555.)

570 Personality: Theory and Research I (3) Advanced survey of psychodynamic and neo-Freudian approaches to personality; related research.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

571 Personality: Theory and Research II (3) Advanced survey of behavioral and humanistic approaches to personality; related research.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

572 Individual Cognitive Assessment in Counseling (3) Basic concepts and applications in individual assessment of intelligence; proficiency in administrative scoring, interpretation for Wechsler, adults and children, Stanford-Binet.  
Grading Restriction: Satisfactory/No Credit grading only.  
(DE) Prerequisite(s): 455 and Counselor Education 525.

573 Descriptive and Theoretical Psychopathology (3) Current psychiatric taxonomic system. Theories of etiology for various diagnostic categories. Examples from written case vignettes and recorded interviews.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

574 Cross-Cultural Counseling: Theory and Research (3) (See Counselor Education 570.)

576 Object Relations (3) European and American conceptions of normal and psychopathological development of object relations. Significance for psychotherapy, psychoanalysis, and psychoanalytic theory.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

580 Research Questions and Designs (3) Question-asking process in research and strategies or designs through which answers might be derived.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

593 Independent, Off-campus, or Foreign Study (1-15)  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated. Maximum 9 hours.  
Registration Permission: Consent of instructor.

594 Psychological Assessment I (3) Basic concepts and techniques of adult assessment: intelligence tests and personality tests.  
Comment(s): Admission to clinical psychology concentration or consent of instructor required.

595 Psychological Assessment II (3) Basic concepts and techniques of adult assessment, intelligence tests and personality tests.  
(DE) Prerequisite(s): 594 or consent of instructor.  
Comment(s): Admission to doctoral concentration in clinical psychology or consent of instructor required.
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/INP only.
Repeatability: May be repeated.

601 Seminar in Psychology (3)
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

602 Seminar in Applied Psychometrics (3)
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 555 and 557.
Registration Permission: Consent of instructor.

610 Seminar in Applied Psychology (3)
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

613 Seminar in Existential-Phenomenological Psychology (3)
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

617 Seminar in Cognitive Science (3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 543.
Registration Permission: Consent of instructor.

623 Seminar in Methods of Naturalistic Research (3)
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 546 or consent of instructor.

625 Advanced Study in Personality (3) Theory, research and conceptual analysis of studies with application to education and counseling. (Same as Counselor Education 625.)
(DE) Prerequisite(s): 470 or equivalent.

635 Ethical, Legal, and Professional Issues Psychology (3) Research, human services, teaching, and public policy. (Same as Counselor Education 635; Educational Psychology 635.)
Grading Restriction: Satisfactory/No Credit grading only.
Comment(s): Admission to the doctoral program in psychology or consent of instructor required.

661 Education Implications of Neuropsychology (3) Theory and assessment. Common syndromes and their behavioral and cognitive manifestations.
(DE) Prerequisite(s): 461 or consent of instructor.

667 Personality and Vocational Assessment (3) Use and interpretation of personality and vocational measures in assessment of clients. (Same as Counselor Education 671.)
(DE) Prerequisite(s): 445 or Counselor Education 525 or consent of instructor.

670 Psychotherapy I (3) Theories and principles.
Comment(s): Admission to doctoral concentration in clinical psychology or consent of instructor required.

671 Psychotherapy II (3) Theories and principles.
(DE) Prerequisite(s): 670.
Comment(s): Admission to doctoral concentration in clinical psychology or consent of instructor required.

672 Psychological Dysfunction (3) Classification methods, dynamics and treatment of dysfunctional individuals in counseling. (DE) Prerequisite(s): 625 and a course in abnormal psychology or consent of instructor.

673 Laboratory in Psychotherapy (2)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Corequisite(s): 670 or 671.
Comment(s): Admission to doctoral concentration in clinical psychology or consent of instructor required.

674 Practicum in Counseling Psychology (3) Supervised practice of individual counseling. Minimum 135 clock hours required each semester.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 445 or equivalent and 569.
Comment(s): Admission to doctoral concentration in counseling required.
Registration Permission: Consent of instructor.

675 Advanced Theory and Practice in Group Counseling (3) Theories and supervised practice.
(DE) Prerequisite(s): 567.
Registration Permission: Consent of instructor.

676 Field Placement in Counseling Psychology (3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 674.
Comment(s): Admission to the doctoral concentration in counseling psychology required.

678 Theory and Practice of Counseling Supervision (3) Theory and practice of supervision in counseling.
Grading Restriction: Satisfactory/No Credit grading only.
(DE) Prerequisite(s): 674 or consent of instructor.

679 Internship in Counseling Psychology (1-6) Supervised employment in departmentally approved counseling psychology internship sites.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Admission to the doctoral concentration in counseling psychology required.
Registration Permission: Consent of instructor.

683 Seminar in Behavioral Medicine (3) Current research and theory concerning relationships between behavior and health.
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

695 Field Placement in Clinical Psychology (3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 24 hours.
Comment(s): Admission to the doctoral concentration in clinical psychology required.
Registration Permission: Consent of instructor.

696 Advanced Psychology Clinic Placement (1-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 24 hours.
Comment(s): Admission to the doctoral concentration in clinical psychology or consent of instructor required.
Registration Permission: Consent of instructor.

697 Supervised Field Work in Applied Psychology (1-6) Guided practice in applying psychological principles and techniques in industrial, organizational, and community settings.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 505, 507, 555, and 557.
Registration Permission: Consent of instructor.

Public Health (839)

400 Consumer Health (3) (See Health 400.)

493 Directed Independent Study (1-3) Individual study of selected issues.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

509 Graduate Seminar in Public Health (1) In-depth discussion of timely topics reflecting scope of public health as discipline and its interrelation with many other academic and professional disciplines. Speakers both internal and external. (Same as Exercise Science 509; Nursing 509; Nutrition 509; Social Work 509.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 4 hours.

510 Environmental and Occupational Health (3) Health risks and complexities of personal and community environments impacting individual’s health and response to a diverse and dynamic world. Principles of occupational safety and health. Survey of contemporary environmental issues and their implications for healthful living.
Comment(s): Admission to MPH or public health nutrition (MS) programs or consent of instructor required.
520 Public Health Policy and Administration (3) Administrative considerations of community-based health care programs and public health practice. Health policy formulation, political environment and governmental involvement in health, legal responsibilities, and managerial concepts/techniques/process.

521 Organization Theory and Health Care Delivery (3) Administrative and Organization theory related to health facilities; operation and management. Community hospital. Case discussions and problem-solving exercises; managerial functions and skills.

523 Management in Extended Care Settings (3) Managerial concepts and theoretical foundations essential to supervision and administration of domiciliary health services programs. Management and operation of health services programs for patients and clients in settings which provide activities of daily living and special psychosocial environmental needs. Programs for home health services, comprehensive medical rehabilitation, nursing homes, congregate living centers and similar type health programs.

525 Financial Management of Health Programs (3) Financial management concepts and practices applied to health services programs. Fundamentals of budgeting, cost-accounting, rate setting, financial reporting and control. Opportunities to apply techniques.

530 Biostatistics (3) Application of descriptive and inferential statistical methods to health-related programs and problems. Microcomputer applications, use and interpretation of vital statistics and introductory research methodology preparatory for first course in epidemiology.

531 Principles of Epidemiology (3) Distribution and determinants of health-related outcomes in specified populations, with application to control of health problems. Historical origins of discipline, hypothesis formulation, research design, data and error sources, measures of frequency and association, etiologic reasoning, disease screening, and injury control.

540 Biostatistics (3) Application of descriptive and inferential statistical methods to health-related programs and problems. Microcomputer applications, use and interpretation of vital statistics and introductory research methodology preparatory for first course in epidemiology.

544 Statistical Software for the Health Professional (3) An intermediate level, survey of three software packages used by public health professionals, including Microsoft Excel, Epi Info, and SAS. For students in the applied epidemiology graduate certificate program, data management and analysis using the software packages are explored. As a continuation of biostatistics and the introduction and advanced courses in epidemiology, this capstone course emphasizes application.

550 Principles and Practices of Community Health Education (3) Theoretical foundations for community health education; opportunities for skill development in variety of educational processes; and introduction to community health analysis.

552 Community Health Problem Solving (4) Dynamics of community organization, community needs assessment, educational interventions, and application of program planning and evaluation techniques. Opportunities to practice skills in realistic setting.

555 Health and Society (3) Understanding of social and behavioral factors which influence health status and care in America. Application to behavior in health-related organization. Social and psychological aspects of disease; sociocultural aspects of health care delivery systems, political economy of health and illness, impact of social movements on health, and social consequences of health legislation.

560 Theories and Techniques in Health Planning (4) Overview of health planning concepts and methodologies; systems-oriented planning process. Major elements of planning: formulation and conceptualization of problem, plan design, evaluation and implementation. Health problems of institutions, communities and selected population groups, appropriate diagnoses, and programs for addressing needs.

580 Special Topics (3) Repeatability: May be repeated if topic differs. Maximum 6 hours. Registration Permission: Consent of instructor.

585 Seminar in Gerontology (1) (See Health 585.)

587 Internship (3) Internship (community health education, gerontology, or health planning/administration) in either approved organization or research setting under supervision of designated preceptor. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): MPH admission and one semester advance notice required. Registration Permission: Consent of major advisor.

588 Internship (3) Internship (community health education, gerontology, or health planning/administration) in either approved organization or research setting under supervision of designated preceptor. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): MPH admission and one semester advance notice required. Registration Permission: Consent of major advisor.

589 Internship (3) Internship (community health education, gerontology, or health planning/administration) in either approved organization or research setting under supervision of designated preceptor. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): MPH admission and one semester advance notice required. Available only for approved extended placements. Registration Permission: Consent of major advisor.

590 Research Methods in Health (3) (See Health 590.)

593 Directed Independent Study (1-3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

595 Physical Activity and Positive Health (3) (See Exercise Science 635.)

597 Independent Study (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

590 Research Methods in Health (3) (See Health 590.)

593 Directed Independent Study (1-3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

595 Physical Activity and Positive Health (3) (See Exercise Science 635.)

597 Independent Study (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.
Reading Education (847)

434 Topics in Reading Education (1-6)
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): Course in reading education.
Comment(s): Admission to teacher education required.

461 Developing Reading Skills in Content Fields (3) Teaching reading and study skills in content areas of school program. Extensive assessment of textbooks. Emphasis on middle school and high school.

500 Internship (3) Professional work in public relations supervised by communications manager with faculty approval. No retroactive credit for previous work experience.
(DE) Prerequisite(s): Completion of core curriculum.

Reading Education (847)

530 Teaching Reading in Elementary and Middle Schools (3) Trends in methods, materials, basic approaches, skill development and assessment procedures for teaching reading at elementary school level.
(DE) Prerequisite(s): Course in teaching of reading or consent of instructor.

533 Reading in Community College: Research and Theory (3) Analysis of components of effective community college reading programs. Attention to research bases.
(DE) Prerequisite(s): Course in reading education or consent of instructor.

534 Seminar in Reading Education (1-6)
Repeatability: May be repeated. Maximum 6 hours.

536 Psychology of Reading (3) Reading act, relationship between learning theory and reading, role of reading in child's overall intellectual development. Affective and cultural factors.
(DE) Prerequisite(s): 500-level course in reading education or consent of instructor.

537 Diagnosis and Correction of Classroom Reading Problems (3) Procedures, methodologies and materials for diagnosing and correcting classroom reading problems.
(DE) Prerequisite(s): Course in reading education or equivalent teaching experience or consent of instructor.

538 Practicum in Diagnosis of Reading Problems (3) Theoretical and practical applications of specific reading diagnostic instruments; testing of elementary and/or secondary school students, preparing case study reports, and conducting parent conferences.
(DE) Prerequisite(s): Course in diagnosis and correction of classroom reading problems or consent of instructor.

539 Practicum in Remediation of Reading Problems (3) Application of learning and teaching methodology in working with elementary and/or secondary school students on one-to-one or small-group basis.

540 Teaching the Struggling Adolescent Reader (3) Methods of teaching middle and high school students who do not have sufficient reading skill to successfully engage in required reading.
(DE) Prerequisite(s): Course in reading education, or equivalent teaching experience, or consent of instructor.

543 Literacy and Literature in the Middle Grades (3) Problems and issues particular to teaching reading in the middle grades including teaching reading in an integrated curriculum, dealing with students reading below grade level, and teaching concept vocabulary. The literature base for early adolescents will be explored and analyzed.

554 Developmental Reading Practicum (3) Diagnosing and teaching children having developmental and corrective reading needs in regular classrooms.
(DE) Prerequisite(s): Course in diagnosis and correction of reading problems or consent of instructor.

554 Developmental Reading Practicum (3) Diagnosing and teaching children having developmental and corrective reading needs in regular classrooms.
(DE) Prerequisite(s): Course in diagnosis and correction of reading problems or consent of instructor.

602 Seminar in Reading Education (1-6)
Repeatability: May be repeated. Maximum 6 hours.

603 Advanced Studies and Theoretical Models of Reading (3) Research on reading processes. Current theoretical models related to how learners process print.
(DE) Prerequisite(s): 500-level courses in reading education or consent of instructor.

605 Organizing and Administering Reading Programs (3) Diagnosing and teaching children having developmental and corrective reading needs in the regular classroom.
(DE) Prerequisite(s): Course in diagnosis and correction of reading problems or consent of instructor.

Recreation and Leisure Studies (853)

415 Development of Recreation, Leisure, and Athletic Facilities (3) Principles of designing, planning, equipping, and operating various facilities. Elements of risk management and safety are incorporated into the design process.
(DE) Prerequisite(s): 310 and Sport Management 350 or consent of instructor.

430 Organization and Administration of Leisure Services (3) Principles of administration applied to provision of leisure services offered by public, private, non-profit, and/or commercial enterprises. Organizational structures, human resource management, diversity, evaluation, legal authority, introduction to budgeting and fiscal procedures, professional responsibility, and career management.
(DE) Prerequisite(s): 310 or Sport Management 350.

440 Dimensions of Commercial Recreation and Leisure Enterprises (3) Organizational structures, delivery systems, financing private enterprises and operating selected profit centers in a variety of settings. Special attention is given to market performance and economic impact.
(DE) Prerequisite(s): 201 or consent of instructor.

450 Special Topics in Recreation and Leisure Studies (1-6) Development of special topics in recreation/therapeutic recreation and leisure. Repeatability: May be repeated. Maximum 6 hours.

470 Tourism and Leisure Industries (3) An examination of the symbiotic relationship between tourism and various sectors of the leisure industry. Use of resources, both natural and developed, and the economic impacts of these ventures. Sociocultural impacts upon the venue and how the venue impacts the local population.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.
Registration Restriction: Recreation and leisure studies major.

511 Perspectives and Trends in Leisure Studies and Services (3) Basic role of leisure delivery systems in today's society, scope of leisure behavior, developmental features of leisure and recreation. Current trends, problems, laws, and issues affected by and/or affecting delivery of leisure services.
Registration Permission: Consent of instructor.

515 Philosophical and Conceptual Foundations of Leisure (3) Philosophy of leisure and recreation; nature of philosophy, concepts of leisure, recreation, play, work, and other factors, history of field, and relationship of ideas to contemporary society and to professional practice.

520 Program Design and Evaluation in Therapeutic Recreation (3) History, philosophy, nature, purpose, special populations served, programing process, professional aspects of therapeutic recreation. Basic overview of aspects of leisure delivery systems.

521 Facilitation Techniques in Therapeutic Recreation (3) Role of therapeutic recreation in clinical and non-clinical settings; application of life-style planning, self-awareness, values clarification and assertiveness training in therapeutic recreation, relationship of leisure education to therapeutic recreation.
(DE) Prerequisite(s): 520 or consent of instructor.

522 Clinical Aspects in Therapeutic Recreation (3) Concepts and techniques utilized by experienced and advanced therapeutic recreation specialist: clinical issues, comprehensive program concerns, administrative funding and trends in practice of therapeutic recreation services.

540 Fiscal Policies for Recreation and Sports Related Organizations and Facilities (3) Application of fiscal policies and procedures to operation of recreation and sports related organizations and facilities. Finance, revenue generating strategies, cash and inventory control, commercial/public cooperative ventures and microcomputer applications.
(DE) Prerequisite(s): 430 or consent of instructor.

541 Management and Operation of Recreation and Sport Related Facilities (3) Research for making program and management decisions, process of cost analysis, and basic design and maintenance of recreation and sport related facilities.
Registration Permission: Consent of instructor.
Rehabilitation Counseling (852)

530 Orientation to Rehabilitation (3) History, philosophy, legal and economic bases, current issues, and practices in public and private rehabilitation programs. Qualifications of service providers. Assessment, planning, development, and provision of services to people who have disabilities and vocational handicaps. Identification, mobilization, and utilization of rehabilitation resources.

532 Caseload Management in Rehabilitation (3) Techniques and procedures involved in management of caseloads in Federal-State vocational rehabilitation agencies, private rehabilitation companies, and public or private rehabilitation facilities. Analysis of appropriate industrial management models related to rehabilitation programs.

533 Job Analysis, Development, and Placement (3) Determining employment-readiness of people with disabilities, identifying appropriate jobs for selected clients, and assisting clients in seeking, obtaining, and retaining employment. Job analysis, job modification and re-engineering, marketing, and employer-serving techniques; legislation impacting job placement; supported work; and use of occupational information.

537 Vocational Evaluation: Clinical Methods (3) Process, principles, and techniques used to assist individuals in determining and understanding their own work behavior and vocational potential. Selection and use of occupational exploration programs and work samples; application of situational tasks, job tryouts, and simulated work experiences in vocational evaluation. Clinical interpretation of data through formal staff conference, vocational counseling, and report writing.

538 Disability Management (3) Return-to-work issues in disability management programs: early intervention, quality services, and cost containment; standards and procedures for rehabilitation counselors/case managers in private sector rehabilitation.

541 Psychosocial Aspects of Disability (3) Psychosocial impact of disability on person and family. Reaction to loss, coping with disability, and societal rehabilitation.

543 Medical Aspects of Disability (3) Etiology and clinical symptoms related to disabling conditions served by special education and rehabilitation personnel. Restrictive measures to eliminate or minimize resulting handicaps. Skills necessary to communicate with lay and professional persons.

545 The Rehabilitation Interview (3) Interview as used in assessment and planning with people who have disabilities and vocational handicaps.

547 Practicum in Rehabilitation (3) Supervised experience in area of rehabilitation; application of concepts, principles, and skills.

549 Internship in Rehabilitation Counseling (12) Supervised practice in rehabilitation counseling. Full time clinical experience for second-year students. Requires 600 clock-hours.

579 Special Topics (1-3) Grading Restriction: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 9 hours.

591 Research Project in Rehabilitation Counseling (3) Explore and research rehabilitation counseling issues directly related to employment, counselor functions, and/or treatment variables.

592 Assistive Technology in Rehabilitation (3) Technology as applied to needs of school age and post-secondary age students/clients. Delivery of assistive technology services; software programs and assistive devices; delivery systems, interdisciplinary evaluation/planning, and funding issues.

593 Independent Study (1-3) Grading Restriction: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours.

Religious Studies (863)

401 Texts and the Study of Texts (3) Systematic introduction to the nature and function of (primarily, but not exclusively, oral and written) texts and textual traditions in the study of religion. How texts are made and used historically, how they are recovered and created by scholars, how they are interpreted by religious communities and scholars.

405 Modern Jewish Thought (3) History, culture, and geography of the now Israeli portion of the Levant from 1850 to present. The founding of the modern state of Israel in 1948 and the political complexities of the Middle East. Israeli culture and literature. (Same as Judaic Studies 405.)

411 Modern Religious Philosophies (3) Religious implications of major Western thinkers and movements from Nicolas of Cusa to the 19th-century German Idealists. (Same as Philosophy 411.)

415 Psychology of Religion (3) (See Psychology 415.)

425 Seminar in Western Religions (3) Selected figures, themes, movements, and problems.

427 Seminar in Comparative Religion (3) Selected figures, themes, movements, and problems.

430 Seminar in American Religion (3) Selected figures, themes, movements, and problems.

440 Seminar in Comparative Religion (3) Selected figures, themes, movements, and problems.

490 Readings and Research in Religious Studies (3) Repeatable. May be repeated. Maximum 12 hours.

499 Proseminar in Religious Studies (3) For advanced students in religious studies, required for majors. Selected topics, e.g., nature and function of myth in religion, problem of evil, transcendence, theories of religion, hermeneutics, integrating various disciplines involved in study of religion.

505 Religious Texts and Contexts (3) Critical study of texts and their interpretations: sacred texts, canons, commentaries, religious autobiographies, and religious themes in literature.

506 Historical Study of Religions (3) Description and analysis of religious traditions, phenomena, and themes.

507 Religion, Power and Society (3) Studies of religions in relation to social structure and political institutions: issues of gender, race, class, ethnicity, caste, slavery, religion and the state, globalization and human rights.

510 Introduction to Pedagogy of Religious Studies (3) Conceptualization, methodology, and practice of teaching about religion and religions in the public university context.

513 Religion, the Arts, and the Media (3) Material and expressive culture, religion and journalism, mass communication technologies, popular culture, issues of representation, cultural studies methodologies.

514 Religion and Healing (3) Ecology of religion, nature, shamanism, healing of body and mind, spirituality, religious dimensions of medical ethics.

520 Readings in the Study of Religion (1-6) Repeatable. May be repeated. Maximum 12 hours.

532 Topics in the History of Religions (3) Registrant Permission: Consent of instructor.

533 Topics in Religious Thought (3) Registrant Permission: Consent of instructor.
550 Critical Explorations in Religious Studies (3) Critical examination of selected phenomena of religion from a contemporary theoretical or thematic perspectives. Required for MA students in philosophy major/religious studies concentration.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Prerequisite(s): 503.

551 Comparative Historical Explorations in Religious Studies (3) Critical examination of parallel or contrasting historical phenomena from two or more religious traditions. Required for MA students in philosophy major/religious studies concentration.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Prerequisite(s): 503.

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

Retail and Consumer Sciences (865)

412 Direct Retail Methods (3) Issues concerning the use of direct selling methods to sell goods and services. Emphasizes analysis of consumers and product/service types for integrated direct retail methods. The direct retailing methods in this course include direct mail, catalogs, telemarketing, infomercials, and electronic commerce (Internet).

(DE) Prerequisite(s): 210, 341, and Marketing 300.

415 Retail Promotion (3) In-store promotional activities: development of retail promotion strategies; evaluation of retail promotions; supplementary focus on advertising and other methods to communicate in-store promotions.

(DE) Prerequisite(s): 210, and Marketing 300.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

501 Professional Project (3-6) Application-oriented, capstone project to show competence in major academic area.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. Comments: Enrollment limited to students in retail and consumer sciences concentration/non-thesis option. Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

(DE) Prerequisite(s): Retail management course.

538 Consumer Product and Service Development (3) Critical analysis of consumer product and service development process in services industry. Strategies for developing consumer products, services, programs, and service processes from conception to implementation and evaluation.

541 Consumer Analysis in Services Management (3) Analysis of consumer behavior in consumer products and services industry. Development of knowledge to positively impact services marketing organizations through marketing, environmental and product/services strategies based upon consumer behavior knowledge. Investigations of qualitative and quantitative methodologies to conduct elementary consumer research.

562 Research Methods (3) Fundamentals of science method, advancement of science, methodology and method of research. Issues and concepts of basic and applied research.

(DE) Prerequisite(s): Statistics 531 or equivalent.

590 Research Seminar (1) Research topics in retail and consumer sciences.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

593 Directed Study (1-3) Individual problems in retailing and consumer sciences.

Repeatability: May be repeated. Maximum 9 hours.

(DE) Prerequisite(s): 9 hours of graduate coursework in retail and consumer sciences.

595 Special Topics in Retail and Consumer Sciences (1-3) Lecture, group discussion on specialized topics: retail industry structure, international trade, international retailing, consumer affairs, entrepreneurship, small business management, issues in retail management, issues in retail strategy, quality perception by consumers, product and service value, retailing to children, retailing and special populations, special research methods.

Repeatability: May be repeated. Maximum 9 hours.

(DE) Prerequisite(s): 9 hours of graduate coursework.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.

Repeatability: May be repeated.

614 Theory in Retail Environment (3) Analysis and evaluation of theory in retail environment and its application to research in retailing.

(DE) Prerequisite(s): 562 or equivalent.

615 Retail and Consumer Sciences Literature and Thought (3) Evaluation of retail and consumer sciences literature with emphasis upon research literature, development of scholarly thought, and identification of potential areas of further study.

(DE) Prerequisite(s): 562 or equivalent.

616 Research Methods, Models and Measurement in Retail and Consumer Sciences (3) Quantitative and qualitative methods and analytical concepts in the research process. Formulation of models and measurement of consumer sciences constructs.

(DE) Prerequisite(s): 562 and Statistics 538.

625 Strategic Managerial Retailing (3) Decision-making orientation that integrates strategic framework components with preparation and analysis of specific retail case situations.

(DE) Prerequisite(s): 510 or equivalent.

641 Retail Consumer Behavior (3) Theories and concepts from social science in relation to ultimate consumer’s behavior.

(DE) Prerequisite(s): 541 or equivalent.

695 Advanced Topics in Retail and Consumer Sciences (3) Lecture, group discussion, individual research on advanced topics and research areas of current significance to retail and consumer sciences.

Repeatability: May be repeated. Maximum 9 hours.

(DE) Prerequisite(s): 9 graduate hours in consumer sciences.

Russian (886)

401 Advanced Grammar, Conversation, and Composition (3) (DE) Prerequisite(s): 312 or equivalent.

402 Advanced Grammar, Conversation, and Composition (3) (DE) Prerequisite(s): 312 or equivalent.

425 Introduction to Descriptive Linguistics (3) (See French 425.)

426 Methods of Historical Linguistics (3) (See German 426.)

430 Selected Topics in Russian Literature (3) Repeatability: May be repeated if topic differs. Maximum 9 hours.

451 Senior Seminar (3) Intensive study of language, literary style, and literary criticism based on selected major novels.

Comment(s): For majors in Russian; minors admitted at discretion of instructor.

452 Senior Seminar (3) Intensive study of language, literary style, and literary criticism based on selected major novels.

Comment(s): For majors in Russian; minors admitted at discretion of instructor.

510 Russian Phonetics and Advanced Grammar (3) Phonetics, pronunciation, stylistics, and selected topics in Russian grammar. For teachers and prospective teachers.

Registration Permission: Consent of instructor.

550 Studies in Russian Literature (3) Content varies.

Repeatability: May be repeated. Maximum 9 hours.

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Repeatability: May be repeated. Maximum 15 hours.
Safety (890)

443 Sports and Recreational Safety (3) Accident prevention and injury control in sports activities; philosophy of sports safety; human environmental factors and interrelationship in sports injury and control; risk-taking and decision solution strategies; and contributions of sports medicine to safety.

Contact Hour Distribution: 3 hours and 2 labs.

452 Safety Principles and Practices (3) An introduction to the general principles, practices, and procedures in occupational and community safety. A survey of historical and present safety issues, problems, and practices addressing safety of individuals and groups in work-site, school, community, transportation, and industrial settings.

500 Thesis (1-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

532 Behavioral Problems in Safety Education and Accident Prevention (3) Problems of behavior, causes of accidents, and application of principles of psychology in development of safe behavior in all segments of environment.

533 Problems and Research in Accident Prevention (3) Safety problems found in wide variety of accidents that occur in community; findings of current research in behavioral sciences as related to variation incidence of accidents.

534 Organization, Administration and Supervision of Safety Programs (3) National, state and local level programs; administrative, instructional, and supervisory aspects. Implementation of relevant programs.

535 Emergency Management (3) Civil and defense problems: tornadoes, floods, fires, mass civil disorders, and nuclear and personnel attack by alien countries.

536 Safety Instrumentation (3) Selection, calibration, maintenance, and use of sampling instruments available to safety practitioner for evaluating exposures of workers to physical stresses and airborne contaminants.

537 Advanced Emergency Management (3) Advanced study in emergency and hazard mitigation, planning, response and recovery. Theory and practice in identification of appropriate emergency warning systems, hazard assessment, facility inspection, plan development and implementation.

(DE) Prerequisite(s): 535.

560 Fire Risk Management (3) Development, implementation, and management of comprehensive fire safety program. Basic fire risk management concepts, interpretation of codes and exposure to basic fire analysis techniques.

564 Personnel Policies in Safety Management (3) Contemporary practices in the organization and operation of safety and health programs.

572 Graduate Workshop in Safety (3) Special safety education problems. For advanced graduate students, teachers, supervisors, and administrators.

Repeatability: May be repeated. Maximum 12 hours.

590 Special Topics (1-3) Advanced study in selected disciplinary or professional area of safety education/management.

Repeatability: May be repeated. Maximum 12 hours.

592 Research Methods in Health (3) (See Health 590.)

593 Directed Independent Study (1-3) Individual identification and study of problem/issue in safety. Extensive reading and critical analysis of safety literature. Requires specific proposal to instructor before registration.

Repeatability: May be repeated. Maximum 12 hours.

601 Internship/Research in Safety and Health (3-6) Field experience. Significant problem identified, researched, and reported in acceptable form. (Same as Health 601.)

Repeatability: May be repeated. Maximum 6 hours.

School Psychology (901)

540 Seminar in School Psychology (3) Essentials of theory and practice of school psychology as professional specialty. Consideration of historical and current issues in school psychology.

541 Psychoeducational Assessment (3) Direct, psychometric and naturalistic assessment methods in learning environments.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Prerequisite(s): Counselor Education 525 or equivalent.

Comment(s): Requires admission to school psychology major or consent of instructor.

542 Practicum in Psychoeducational Assessment (3) Application of assessment skills to clients in learning environments.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 6 hours.

(DE) Corequisite(s): 541.

Comment(s): Requires admission to school psychology major or consent of instructor.

545 Psychoeducational Consultation (3) Use of two and three-person models of consultation in educational and therapeutic settings based on behavioral, ecological, social learning and cognitive-behavioral theories.

546 Practicum in Consultation and Intervention (3) Application of consulting and intervention skills to educational settings.

Grading Restriction: Satisfactory/No Credit grading only.

(DE) Prerequisite(s): 545.

Comment(s): Requires admission to the school psychology major or consent of instructor.

549 Internship in School Psychology (1-6) Supervised employment in unit approved school psychology internship sites.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 12 hours.

Comment(s): Requires admission to school psychology major.

Registration Permission: Consent of instructor.

649 Advanced Internship in School Psychology (1-9) Supervised experience as school psychologist in unit-approved internship site for doctoral level students.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 9 hours.

Comment(s): Admission to doctoral school psychology concentration required.

650 Professional Practice in School Psychology (1) Field setting to facilitate academic, social and interpersonal development of children and adults. School and mental health settings for intervention, consultation, prevention, and assessment services.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 9 hours.

690 Psychopathology of Childhood (3) Descriptive and critical study of psychopathology of childhood and of systems of nomenclature applied to individuals with mental disorders: nomenclature provided in State Department of Education’s Student Evaluation Manual and Diagnostic and Statistical Manual of Mental Disorders of American Psychiatric Association.

Science Education (899)

496 Teaching Science Grades 7-12 (3) Methods, materials, recent trends in science and environmental education programs for secondary schools.

Comment(s): Admission to teacher education required.

Repeatability: May be repeated. Maximum 9 hours.

509 Education for Sustainable Development: Making Connections (3) Holistic and interdisciplinary approach that encourages educators and learners to engage in dialogue in order to acquire through experiences and creativity skills and knowledge needed to maintain a balance between socio-economic, political and environmental goals.

510 Theoretical Foundations of Environmental Education (3) Study of history and philosophy of environmental education, pedagogical approaches, and current status, including model programs and standards for environmental education. Addresses implementation of environmental education in formal and non-formal educational settings. A technology-enhanced course with both online and fieldwork components.

531 Teaching Science to Young Children: K-4 (3) Recent trends in methods, materials and content in teaching science to students in grades K-4.
543 Teaching Science in the Middle Grades (3) Activities in this class are intended to promote the professional growth of pre-service and in-service science teachers by studying science curriculum and instructional strategies. In particular, methods of teaching contemporary science content in grades 4-8 will be explored.

565 Instructional Trends and Issues in Science Education (3) Analysis of current trends in science instruction, instructional issues facing elementary, secondary, and community college science teachers, and application of learning theory to teaching biological, physical, and environmental sciences.

(Pre) Prerequisite(s): 496.

572 Nature of Mathematics and Science Education (3) Teaching and assessment of mathematics and science based upon student conceptions of nature of mathematics and science.

628 Advanced Studies in Science Education (3) Analysis of current research in science education and implications for research for classroom practice.

Repeatability: May be repeated. Maximum 6 hours.

696 Research Trends in Science Education (3) Analysis of current research trends in science education and relationship of such trends within broader educational community.

Social Science Education (900)

454 Teaching Strategies and Issues in Social Studies Education (3) Goals, objectives, techniques, materials, and evaluation; directed observation in public schools, preparation of teaching plans and materials; simulated teaching experiences.

Comment(s): Admission to teacher education required.

521 Teaching Social Studies in Elementary and Middle Schools (3) Planning and techniques. Trends in curriculum, development of concepts and generalizations, integration of social sciences.

(Pre) Prerequisite(s): Course in teaching of social studies or consent of instructor.

525 Strategies, Programs and Materials for Teaching Elementary Social Studies (3) Analysis of new and innovative social studies program materials and techniques. Exploration of current trends in social studies education.

(Pre) Prerequisite(s): Course in teaching of social studies or consent of instructor.

543 Teaching Social Studies in the Middle Grades (3) Activities in this class are intended to promote the professional growth of pre-service and in-service social studies teachers through study, design, and implementation of social studies curriculum and instructional strategies. In particular, methods of teaching contemporary social science content in grades 4-8 will be explored.

585 Teaching Secondary School Social Studies (3) Strategies, projects, materials, and programs in social studies.

(Pre) Prerequisite(s): Undergraduate course in teaching of social studies or consent of instructor.

599 Seminar in Social Studies Education (3) Research, trends, and issues in secondary social studies.

621 Seminar in Social Studies Research and Theory (3) Status of research and theory. Needed research, related research from other fields, and application of research.

(Pre) Prerequisite(s): Recent course in teaching of social studies or consent of instructor.

Social Work (905)

Graduate students majoring in fields other than social work are admitted to certain social work courses with the approval of the College of Social Work and the student’s major professor.

500 Thesis (1-15) Graduation Restriction: P/NP only. Repeatability: May be repeated.

501 Foundations of Social Work Practice I (3) Survey of history, mission, and identity of profession. Basic theory, professional values and ethics, and methods generic to social work practice at various systems levels. Assessment, planning, communication, intervention, and evaluation skills.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

503 Foundations of Social Work Practice II (3) Generalist practice with family and small group systems. Ecological theory to frame understanding of such systems and their adaptation to environments. Various social work roles and intervention strategies pertaining to client systems.

504 Foundations of Social Work Practice III (3) Basic theory, methods, problems, and strategies in implementing planned change within and among larger social systems; task groups, human service organizations, and community systems. Various social work roles and intervention strategies.

506 Social Work Research (3) Research methodologies with respect to evolution and application to social work theory and practice. History and philosophies of science; problem formulation; research design; ethics; instrument use and construction; data collection; analysis and reporting; and evaluation and utilization of research.

508 Practicum in Social Work Research (3-6) Supervised practice in application of research methods to social work.

Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.

509 Graduate Seminar in Public Health (1) (See Public Health 509.)

514 Human Behavior in the Social Environment I (3) Life cycle from infancy through adolescence. Major social science theories that inform social work profession’s understanding of human behavior and social systems from ecological perspective. Interactions among biological, social, psychological, and cultural systems on development across life cycle. Effects of ethnic, racial, economic, gender, and sexual orientation variables.

515 Human Behavior in the Social Environment II (3) From young adulthood through senescence. Major social science theories that inform social work profession’s understanding of human behavior and social systems from ecological perspective. Interactions among biological, social, psychological, and cultural systems on development across life cycle. Effects of ethnic, racial, economic, gender, and sexual orientation variables.

516 Social Welfare Policy and Services (3) Development of contemporary social policy at local, state, national, and international levels. Contribution of social work professionals to formal policy-making process through which macro social change is effected and through which aggregate social welfare services are proposed, authorized, financed, and programmed. Theories of complex organizations applied to social welfare service delivery settings.

518 Social Work and Oppression (3) Sources, dynamics, and impact of oppression in U.S. society as manifested in both social/ecological/economic systems and personal experience. Connections among various forms of oppression: racism, sexism, classism, and heterosexism, and forces that perpetuate such conditions.

521 Clinical Social Work Practice with Individuals (3) Theories, knowledge, and skills for clinical practice with individuals from ecological perspective. Therapeutic process and intervention strategies, incorporating content from psychodynamic and cognitive practice models, and specific client problems.

523 Clinical Social Work Practice with Families (3) Concepts related to understanding and analyzing family dynamics and interactional patterns from perspective of major family therapy models. Techniques of intervention in terms of application to families with varied system and individual problems and to families from varied social and cultural backgrounds.

524 Psychopathology and Social Deviance (3) Assessment of psycho social functioning of individuals. Examination of mental disorders: clinical presentation problems, causes, and processes. Ecological perspective. (Pre) Prerequisite(s): Foundation or consent of instructor.

525 Clinical Social Work Practice with Groups (3) Theoretical and historical approaches to social work with groups and clinical principles supporting specific types of group work used in clinical practice and associated leader interventions.

526 Evaluating Clinical Practice (3) History and philosophies, conceptual approaches, techniques and methods in the practice and use of primitive research as applied to implementation and evaluation of direct services to clients.

530 Seminar in Clinical Social Work (2-3) Topics in theory and practice of clinical social work with individuals, couples, families and groups.

Repeatability: May be repeated. Maximum 6 hours.
**COURSES OF INSTRUCTION**

### Sociology (915)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Description</th>

### Additional Courses

- **532 Short-Term Interventions (3)**

- **534 Social Work Interventions with Children and Adolescents (3)**
  - Various practice modalities for assessing and intervening with children and adolescents.

- **535 School Social Work (3)**
  - Place of school as community institution and resource. Methods, processes, and techniques employed in school social work.

- **540 General Topics in Social Work (3)**
  - Current topics in advanced social work. (May be repeated. Maximum 6 hours.)

- **541 Leadership and Management in Human Services (3)**
  - Management practices and leadership skills required in development and management of human services delivery systems. Issues regarding human resources management, resource allocation, strategic planning, and organizational dynamics.

- **543 Financial Management and Resource Development (3)**
  - Administrative decision making related to financial planning and resource allocation in human service organizations. Knowledge and skills in budgeting, allocating, expenditure control, fundraising, grant writing, marketing, and evaluation.

- **547 Evaluation Research (3)**
  - History and philosophies, conceptual approaches, techniques and methods, and issues in practice and utilization of evaluation research as applied to development and evaluation of social work programs and policies. Issues pertaining to strengths and limitations of various evaluation methods, microcomputer application of data, and measurement of program goals and objectives.

- **550 Seminar in Management and Community Practice (2-3)**
  - Topics in theory and practice of management and community practice. (May be repeated. Maximum 6 hours.)

- **552 Community Organization (3)**
  - Locality development, social planning and social action as practice models for development of resources to meet human needs.

- **566 Social Gerontology (3)**
  - Physical, psychological and social aspects of aging, and major social policies and programs.

- **580 Field Practice (3)**
  - Instruction and supervision in social work practice. Grading Restriction: Satisfactory/No Credit grading only.

- **581 Field Practice (3)**
  - Instruction and supervision in social work practice. Grading Restriction: Satisfactory/No Credit grading only.

- **582 Field Practice (2-6)**
  - Advanced field practice in clinical social work or management and community practice. Full-time students must enroll for six credit hours. Grading Restriction: Satisfactory/No Credit grading only. Repeatable: May be repeated. Maximum 6 hours.

- **583 Field Practice (2-6)**
  - Advanced field practice in clinical social work or management and community practice. Full-time students must enroll for six credit hours. Grading Restriction: Satisfactory/No Credit grading only. Repeatable: May be repeated. Maximum 6 hours.

- **584 Field Practice (3)**
  - Field practice for summer session advanced standing students only. Grading Restriction: Satisfactory/No Credit grading only.

- **585 Seminar in Gerontology (1)** *(See Health 585.)*

- **593 Independent Study (1-6)**
  - Individualized study, student selects, designs, and completes examination of special issue or problem. Repeatable: May be repeated. Maximum 6 hours.

- **600 Doctoral Research and Dissertation (3-15)**
  - Graduation Restriction: P/NP only. Repeatable: May be repeated.

- **601 Research for Social Work Practice I (3)**
  - Epistemological and methodological considerations for both quantitative and qualitative research for social work practice.

- **602 Research for Social Work Practice II (3)**
  - Epistemological and methodological considerations for both quantitative and qualitative research for social work practice.

- **604 Research in Social Service Settings (3)**
  - Advanced research, under faculty supervision, of practice issues in community agency.

- **605 Analysis of Social Work Data I (3)**
  - Techniques for quantitative analysis of social work data: unique data analysis problems encountered in social work research.

- **606 Analysis of Social Work Data II (3)**
  - Techniques for quantitative analysis of social work data: unique data analysis problems encountered in social work research.

- **612 Social Work Practice and Its Social Context I (3)**
  - Critical analysis of knowledge bases of major practice modalities in direct intervention.

- **613 Social Work Practice and Its Social Context II (3)**
  - Critical analysis of knowledge bases of major practice in administration and planning.

- **640 History of American Social Work (3)**
  - Social, cultural, economic and political contexts for development of social work profession, development of education for profession, and modern welfare system.

- **650 Programs and Legislation for Children and Families (3)**
  - Background, purposes, and current issues surrounding major social welfare and health programs serving disadvantaged children and their families: Social Security Act (Title IV, Child Welfare and AFDC; Title V, the Maternal and Child Health Block Grant; Title XIX, Medicaid), Head Start, WIC and other nutrition programs, and Healthy Start. Current issues and controversies: legislative changes.

- **660 Issues in Social Work Knowledge Building (3)**
  - Advanced seminar in theory and model building in direct intervention, administration and planning. Repeatable: May be repeated. Maximum 9 hours.

- **662 Directed Study in Social Work Research (3)**
  - Advanced individual study, under faculty guidance, of social work practice issues. Repeatable: May be repeated. Maximum 9 hours. (DE) Prerequisite(s): First-year required PhD courses or consent of instructor.

- **670 Critical Literature Reviews (3)**
  - Techniques and methods for conducting critical reviews of literature: conceptual and methodological critiques of existing research. Grading Restriction: Satisfactory/No Credit grading only.

- **680 Seminar in Management and Community Practice (2-3)**
  - Topics in theory and practice of management and community practice. Repeatable: May be repeated. Maximum 6 hours.
502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

504 Sociological Foundations of Political Economy (3) Survey of contemporary sociological theories of political economy, sources of political and economic power and conflict.

505 Foundations of Criminology (3) Critical overview of contemporary developments in criminology, theories of crime causation and theories of responses to crime.

506 Social Justice and Public Policy (3) Examines the formulation and consequences of public policy, analyzing the general public policy process model, the model's specific applications to criminal justice policy, environmental policy, and economic and political policies; and techniques of policy evaluation research.

507 Foundations of Social Psychology (3) Current and classical theoretical perspectives in social psychology.

510 Professional Preparation (1) A variety of one-credit seminars that offer training in specific aspects of professional socialization. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.

521 Sociological Theory I (3) Assessment of what sociological theory is; its major figures and their approaches to understanding society.

531 Research Methods in Sociology (3) Research design, measurement, sampling, quantitative and qualitative data collection techniques, data, reduction, and analysis.

534 Advanced Sociological Analysis (3) Underlying assumptions and logical procedures used by sociologists in formulating explanations; foundations of sociological research strategies and techniques.

541 Collective Behavior, Social Movements, Social Change (3) Basic theory and research on conditions of social unrest in human collectivities and efforts of collectives to change existing society.

543 Sociology of Development (3) Sociological theories and studies of development: modernization, colonialism, dependency; comparative impact of various development paths upon selected aspects of social structure and change.

551 Juvenile Delinquency and the Social Structure (3) This course examines how juvenile delinquency policies are shaped by social structures and changes in social perceptions of childhood, crime, and punishment.

560 Environmental Sociology (3) Systematic treatment of current research in environmental sociology. Social impact analysis and conflicts over environmental issues.

562 Sociology of Environmental Policy (3) Examines the history of environmental use and environmental protection; the policy process; the institutional and cultural barriers to improved environmental policies; and potential policies for sustainability.

585 Seminar in Gerontology (1) (See Health 585.)

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

599 Readings (3) Selected topics. Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

622 Sociological Theory II (3) Distinct schools of sociological theory and contributions of their principal exponents. (DE) Prerequisite(s): 521 or consent of instructor.

629 Supplemental Readings in Sociological Theory (3) Individual guidance. Preparation for comprehensive examination. Grading Restriction: Satisfactory/No Credit grading only. Registration Permission: Consent of instructor.

633 Survey Design and Analysis (3) Systematic exploration of survey problems through student participation in design and analysis of survey. (Same as Child and Family Studies 633.) (DE) Prerequisite(s): 531 or consent of instructor.

636 Field Research (3) Research experience in selected field sites using techniques of interviewing, participant observation, and other methods of field research. (DE) Prerequisite(s): 531 or consent of instructor.

639 Supplementary Readings in Methodology (3) Individual guidance. Preparation for comprehensive examination. Grading Restriction: Satisfactory/No Credit grading only. Registration Permission: Consent of department.

644 Political Sociology (3) Critical examination of theories of state and political processes.

645 Advanced Studies in Political Economy (3) Topical seminar. (DE) Prerequisite(s): 504 or consent of instructor. Repeatability: May be repeated. Maximum 6 hours.

649 Supplementary Readings (3) Grading Restriction: Satisfactory/No Credit grading only. Registration Permission: Consent of instructor.

653 Sociology of Law (3) Intensive examination of selected topics in sociology of law. (DE) Prerequisite(s): 505 or consent of instructor.

655 Advanced Studies in Criminology (3) Intensive examination of selected topics in criminology. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 505 or consent of instructor.

661 Environmental Theory (3) Historical and contemporary studies of interaction between humans and their environment. Registration Permission: Consent of instructor.

665 Advanced Studies in Environmental Sociology (3) Topical seminar covering particular lines of research and theory within area. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

675 Advanced Studies in Social Psychology (3) Selected contemporary research issues related to social psychological theories. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 541 or consent of instructor.

695 Advanced Special Topics (3) Topic of special interest or student-initiated courses that will not be regularly offered. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

Spanish (924)

421 Phonetics (3) (DE) Prerequisite(s): 323 or consent of instructor.

422 Advanced Grammar and Translation (3) Structure of the grammatical system of Spanish. In-depth analysis of selected syntactic phenomena with practical illustration/application and exercise in Spanish-English and English-Spanish translation. Emphasis on finer points of grammatical structures. (DE) Prerequisite(s): 323. Comment(s): Not available to native or bilingual students of Spanish without consent of department.

423 Advanced Composition and Conversation (3) Develops writing and speaking skills to the advanced level, covering a wide range of topics and situations and including a variety of in-class and extra-class activities. (DE) Prerequisite(s): 323 or consent of department. Comment(s): Not available for credit for students whose level of proficiency in Spanish is superior as defined by the ACTFL.

425 Introduction to Descriptive Linguistics (3) (See French 425.)

426 Methods of Historical Linguistics (3) (See German 426.)

429 Romance Linguistics (3) (See French 429.)

430 Topics in Hispanic Linguistics (3) Introduction to the study of the Spanish language through different areas of linguistics such as phonology, morphology, syntax, semantics, sociolinguistics, dialectology, and second language acquisition. (Same as Linguistics 431.) Repeatability: May be repeated with consent of department. Maximum 6 hours. (DE) Prerequisite(s): 323.
433 Images of Woman in Hispanic Literature (3) Examines major His-panic texts (and/or women authors) in light of the relation of female indi-viduality to a particular social context, the role of women in society, patri-archal tradition, woman as cultural and as aesthetic value (the feminine symbolic), and feminist theoretical issues.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

434 Hispanic Culture through Film (3) Analysis of selected films on subjects concerning life, culture, and artistic traditions in the Hispanic world; exploration of ideological, philosophical, social, and political impli-cations of films and a comparison of them with treatments of related sub-jects in other types of artistic production. Taught in Spanish. (Same as Cinema Studies 434.)

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

461 Special Topics (3) Focus on aspects of Hispanic literature, culture, linguistics, or foreign language pedagogy; Topics vary.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

465 Latin American Film and Culture (3) Explores Latin American and Latino/a films and videos from 1900s to present as works of art and in light of political, cultural, and social contexts. Taught in English. (Same as Cinema Studies 465; Latin American Studies 465.)

Contact Hour Distribution: 1 hour lecture, 2 hours screening, and 1 hour discus-sion.

479 Disenchanted Texts in Hispanic Literature (3) Texts representing trends and periods of renewal in Spain and Latin American countries. Se-lected topics on traditions in crisis. Content will vary. (Same as Latin American Studies 479).

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

480 Social Forces in Hispanic Literary Expression (3) Analysis of major Hispanic texts that address factors and events that influenced and/or continue to influence social and cultural evolution of the Hispanic world, including literature itself.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

482 Trends in Hispanic Thought (3) Intellectual/philosophical currents represented in literary works, selected thinkers, or movements from his-torical periods of Spain and Latin American countries.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

484 Race, Ethnicity, and Nation in Hispanic Literature (3) Close read-ing and analysis of literary texts that deal with issues of race and ethnic-ity in the Hispanic world, with regard to identity and concepts of national-ity. Possible course topics: mestizaje; conceptual distinctions between race and ethnicity in Latin America; indigenismo; afrocentrism; issues of monarchy and empire; relationship between Jews, Christians, and Moors in Spain.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

486 Literary and Artistic Movements in the Hispanic World (3) Exam-ination of relationships (thematic, cultural, socio-political, aesthetic, philo-sophical, etc.) between specific trends in literature and other artistic media, in light of historical contexts in which those relationships emerged.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

489 Topics in Hispanic Civilization (3) Analysis of major trends, issues and/or movements in the civilizations of Spain and Spanish America. Po- litical, literary, and cultural perspectives dealing with topics from the Mid-dle Ages to present day may be explored.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

(Pre) Prerequisite(s): 323, 330, and completion of 9 additional hours of upper-di- vision Spanish.

500 Thesis (1-15)

Grading Restriction: P/NP only.

Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses univer-sity facilities and/or faculty time before degree is completed.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

512 Teaching a Foreign Language (3) Practical application of methods for teaching and evaluating basic language skills and cultural aspects through seminars, demonstrations, peer teaching, and observation of for- eign language classes. Required of all MA and PhD students holding Graduate Teaching Assistantships, except those whose previous training or experience warrants their being excused by the department.

533 Old Spanish (3) Evolution of Spanish language from its origins through the 15th century.

532 Medieval Spanish Literature (3) Literary works of the 11th through 15th century. Application of literary theories to understanding of literature, nature and evolution of major literary genres during Spanish Middle Ages, and socio-historical contexts of medieval works.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

533 Golden Age Prose (3) Wide range of prose fiction in Spain during the 16th and 17th centuries: Moorish, picarolesque, sentimental, pastoral and transgressive tales, exemplary novels, and dialogues.

534 Don Quijote (3) Cervantes' masterpiece in socio-cultural and literary context of its times: study of thematic, structural, and stylistic issues: cri-sis of aristocracy, Quixotic madness, discrepant cognitive and ethical per-spectives, satiric irony, culture of sentiment, and Cervantes' legacy to subsequent literary periods. Content varies.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

535 Golden Age Poetry (3) Garcilaso, Fray Luis de León, San Juan de la Cruz, Lope de Vega, Quevedo, and Góngora.

537 Golden Age Drama (3) Major dramatists of period: Lope de Vega, Tirso de Molina, Ruiz de Alarcón, Guíllén de Castro, Calderón de la Barca, Moreto, and Rojas Zorrilla.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

542 20th-Century Spanish Literature: Generation of '98 through Civil War (3) Principal achievements and representative directions in literature of Spain through Civil War years.

543 20th-Century Spanish Literature: Post-Civil War through Pre-sent (3) Principal achievements and representative directions in litera-ture of Spain from Post-Civil War period to present.

550 Techniques of Literary Analysis and Research Methods (3) The-o-retical and critical essays on various techniques of literary analysis. Ex-ploitation of bibliographical and research materials.

551 Special Topics in Hispanic Literature or Linguistics (3)

Repeatability: May be repeated. Maximum 6 hours.

552 Directed Readings (3)

561 Spanish American Colonial Literature (3) From the pre-Columbian era through the 18th century. Reading and analysis of selected works from the Colonial Spanish American period and their Continental sources. Indigenous texts and authors. Content varies.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

571 Spanish American Narrative: Criollosimo to 1950 (3) Critical study of major trends and movements that shaped Spanish American narrative during the first half of 20th century. Content varies.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

572 Spanish American Narrative: Boom to Present (3) Critical study of major trends and movements that established Spanish American nar-rative as influential force in world literature during the second half of the 20th century. Content varies.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

573 Regional Approaches to Interpreting Spanish American Litera-ture (3) Interpretation of Spanish-American literature taking into consid-eration regional differences attributable to such factors as race, geog-raphy, immigration, and economic development. Key regions include Mex-ico and Central America, Caribbean, Andean countries, and the Southern Cone. Course readings vary between specific regional perspective and transregional one. Content varies.

Repeatability: May be repeated with consent of department. Maximum 6 hours.

576 Contemporary Spanish American Poetry (3) Critical study of major poets in Spanish America from 1950 to present. Content varies. Repeatable. May be repeated with consent of department. Maximum 6 hours.

577 Contemporary Spanish American Theater (3) Reading and analysis of Spanish America’s major dramatic works published and performed since 1950. Content varies. Repeatable. May be repeated with consent of department. Maximum 6 hours.

579 Spanish American Literary Criticism (3) Major works in which Spanish Americans have developed strategies to define, organize, and catalog literature published throughout continent. Critical approaches that surpass European and other non-Spanish American critical perspectives. Content varies. Repeatable. May be repeated with consent of department. Maximum 6 hours.

591 Foreign Study (1-15) Repeatable. May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatable. May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatable. May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/INP only. Repeatable. May be repeated.

621 Seminar in Spanish Literature (3) Topics vary in field of Peninsular literature. Repeatable. May be repeated with consent of department. Maximum 9 hours.

631 Seminar in Spanish American Literature (3) Topics vary. Repeatable. May be repeated with consent of department. Maximum 9 hours.

Special Education (932)

410 Early Childhood Special Education Foundations (3) Introduction to the field of early childhood special education including the nature of disabling conditions; theoretical perspectives in the field; legislation; policies and procedures used in the field.

419 Psychology and Education of Students with Mild Disabilities (6) Nature and characteristics of persons with mild handicaps and educational strategies appropriate for these persons. (DE) Prerequisite(s): 402. (DE) Corequisite(s): 420. Comment(s): Admission to teacher education required.

420 Field Experience in Special Education Programs (3) Practicum in teaching special education programs: planning, developing, implementing and evaluating instruction. Grading Restriction: Satisfactory/No Credit grading only. (DE) Prerequisite(s): 402. (DE) Corequisite(s): 419 and/or 471. Comment(s): Admission to teacher education required.

431 Field Experience in Comprehensive Programs (3) On-site teaching experience with moderately and severely handicapped children and youth. Grading Restriction: Satisfactory/No Credit grading only. (DE) Prerequisite(s): 402. (DE) Corequisite(s): 432. Comment(s): Admission to teacher education required.

432 Psychology and Education of Students with Moderate/Severe Disabilities (6) Nature and characteristics of persons with moderate/severe disabilities and educational strategies appropriate for those persons. (DE) Prerequisite(s): 402. (DE) Corequisite(s): 431. Comment(s): Admission to teacher education required.

454 Education of the Gifted and Talented Children (3) Psychometric and behavioral studies of giftedness. Analysis of past and present school practices in reference to curriculum and program implementation. Comment(s): Admission to teacher education required.

456 Speech and Language Basis of Learning Disabilities in the Classroom (3) Normal communication development; understanding of speech and language impairments in school-age students; integration of oral/written communication skills into existing curriculum, especially for high incidence special education students.

470 Psychology of the Exceptional Child (3) General characteristics and educational needs of exceptional children. Implications of developmental variations for functioning as adults.

471 Early Childhood Special Education (3) Assessment, curriculum planning and development and teaching approaches used in early childhood special education.

504 Clinical Experience in Teaching and Supervision of Exceptional Children (3-9) (See Education of the Deaf and Hard of Hearing 504.)

506 Internships in Teaching in Special Education and Rehabilitation (3-15) Placement in professional settings in public schools or agencies under supervision of master practitioners.

553 Assessment of Exceptional Students (3) Current issues related to assessment: advanced study of evaluation models for special education; dynamic and other innovative assessment approaches; advanced study of application to educational programming; basic statistics and application in assessment.

554 Assessment in Early Childhood Special Education (3) Development of knowledge and skills in appropriate formal and informal assessment of handicapped infants and young children; screening, identification, diagnosis, placement and programming assessment issues.

555 Characteristics of Affective/Motivational Functioning in Children with Disabilities (3) Definition, methods, identification and symptoms of children with affective/motivational development in disabled youngsters. Comparison to normal development and that of children labeled disturbed or behavior disordered.

556 Instructional Systems for Affective/Motivational Education for Children with Disabilities (3) Educational strategies and models of instruction; simulation, demonstration; and media. Teaching techniques, materials, and teacher/pupil/family interactions. Therapeutic forms of education through art, music, role play, puppetry, bibliotherapy, and group interactions. (DE) Prerequisite or (DE) Corequisite: 555 or consent of instructor.

557 Positive Preventive Discipline (3) Instructional, classroom and preventive/progressive strategies for use in classroom which positively effects efficiency of classroom. Research on how curriculum can encourage appropriate interactions of children and youth. Comment(s): Admission to graduate program required.

558 Neuromuscular and Health Disorders: Educational Implications (3) Neurological impairments, physical disabilities and special health conditions, autism. Investigation of instructional techniques and adaptations.

565 Instructional Systems for the Gifted and Talented (3) Instructional methods and systems evaluated in terms of effectiveness in various educational environments. (DE) Prerequisite or (DE) Corequisite: 564 or consent of instructor.

568 Early Childhood Special Education: Theories and Interventions (3) Theoretical perspectives of early childhood special education; exploration of programmatic models, family-focused concepts and curriculum development.

575 Creative Problem-Solving Strategies for Special Educators (3) Techniques for solving problems encountered by special educators in any setting.

586 Seminar in Research Techniques in Special Education (3) Evaluation of appropriate research methodologies with handicapped populations.

590 Application of Microcomputer Technology in Special Education and Vocational Rehabilitation (3) Application of microcomputer technology with all categories of exceptionalities and across all chronological and functioning age ranges. Microcomputer adaptive software, special switch access, authoring systems, telecommunication, and strategies for cognitive development.

620 Internship in Research in Special Education and Rehabilitation (3-9) Placement with professional engaged in theoretically-based research: public school, institutions, agencies or university settings.

630 Internship in Institutional Leadership in Special Education and Rehabilitation (3-9) Advanced level field experiences under supervision of practitioner.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 9 hours.

Registration Permission: Consent of instructor.

Sport Management (957)

440 Sport Marketing (3) Application of fundamental marketing concepts to the sport industry. Marketing research, promotions, fund raising, advertising, and assessment of marketing programs specific to sport will be covered. The historical development of sport marketing will be included.

(DE) Prerequisite(s): Marketing 300.

460 Development and Revenue Generation in Sport (3) Designed to provide overview of theories, strategies, and techniques used in the production of revenue for sport organizations and through sport events. Emphasis on developing balanced, multifaceted programs that target a variety of constituencies in the sport industry.

500 Thesis (1-15)

Graduation Restriction: PIPR only.

Repeatability: May be repeated.

501 Special Project (3) Culminating experience for non-thesis major. Research study suitable for publication, or practicum requiring special written work.

(De) Prerequisite(s): 532.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Graduation Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)

Graduation Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 9 hours.

511 Administration/Supervision in Sport (3) Development of knowledge and analytic skills desirable for managers/administrators in sport business/organization: organizational, administrative, and supervisory strategies related to sport in profit and non-profit settings.

512 Application of Legal Concepts to Sport Settings (3) Application of contract law, breach of contract, and monetary damages within sport settings: risk assessment and development of effective risk management strategies; development of contracts in sports; and analysis of cases involving discrimination based upon gender, race, and age as well as protection of rights at amateur and professional levels of sport.

530 Sport and Media Issues (3) Gender and race issues within context of media and sport. Development of sport media and media influence on sport.

532 Research Techniques in Sport (3) Evaluate, compare, and contrast research techniques in sport with consideration for and experiences in appropriate sport review, design, analysis procedures, and proposal development.

535 Ethics in Sport Management (3) Development of analytical skills and knowledge desirable of middle and upper level managers in sport business/organizations. Social issues and ethics in sport administration.

540 Sport Economics and Finance (3) Principles of economics and finance as applied to sport organizations. Market structures of sport finance and political economics that form those structures.

544 Theories of Leadership and Leader Behavior in Sport (3) Integration of various theoretical approaches to leadership styles in sport administration within cultural contexts, research, and field experiences.

553 Case Studies in Sport Management (3) Current issues and problems in sport administration at all levels of amateur and professional sport.

Repeatability: May be repeated if topic differs. Maximum 9 hours.

554 Readings in Sport Management (3) Survey of pertinent literature in refereed and applied journals and texts.

555 Evaluation Techniques for Sport Managers (3) Review and application of techniques of evaluation appropriate for sport programs, facilities, and personnel.

560 Sport Governance (3) Principles of organizational governance theories as applied to sport organizations. Review of history, mission, and structure, administrative and legislative processes of amateur and professional governing bodies in sport.

570 Event Management (3) Review of current research related to theory and practice in event management and involvement in management capacity with one or more special events.

575 Seminar in Sport Management (1) Selected topics in sport management.

Graduation Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated with consent of instructor. Maximum 3 hours.

580 Special Topics (1-3) Advanced study in selected disciplinary or professional areas of physical education and/or sport.

Repeatability: May be repeated. Maximum 6 hours.

590 Practicum (3) Practical experience in areas of major interest.

Graduation Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated. Maximum 6 hours.

593 Independent Study (1-3)

Repeatability: May be repeated. Maximum 6 hours.

595 Internship (3) Full-time application of previous theoretical and applied knowledge and skills in appropriate sport setting.

Graduation Restriction: Satisfactory/No Credit grading only.

Sport Studies (959)

500 Thesis (1-15)

Graduation Restriction: PIPR only.

Repeatability: May be repeated.

501 Special Project (3) Research study suitable for publication, or practicum requiring special written work.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Graduation Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

Credit Restriction: May not be used toward degree requirements.

503 History of Olympics: Ancient and Modern (3) Examination of various aspects of ancient and modern Games. Ancient Olympics 776 BC to 393 AD: Panhellenic Games. Modern Olympics, 1896 to date: political, social, class, gender, and economic issues that influence Games.

Comment(s): Requires admission to the sport studies major or consent of instructor.

514 Advanced Philosophy of Sport (3) Major philosophical theories of sport. Various conceptual, moral, aesthetic, and social-political issues. Comment(s): Requires admission to the sport studies major or consent of instructor.

515 Social Theories of Sport (3) Liberal, democratic and Marxist social theories of sport.

Comment(s): Requires admission to the sport studies major or consent of instructor.

533 Psychology of Sport (3) Social psychological factors influencing human behavior in a sport context; discussion of contemporary theory, research, and methodology.

Comment(s): General psychology course or consent of instructor.

534 Motor Behavior and Skill Acquisition (3) Topical explanation and application of principles of human movement behavior to acquisition and performance of skills; discussion of current research and methodology.

Comment(s): Requires admission to the sport studies major or consent of instructor.

535 Health and Exercise Psychology (3) Study and cultural critique of various aspects of health and exercise psychology.
536 Expert Performance in Sports (3) Examines expertise in athletic performance with a primary focus on the development and maintenance of expertise. Special emphasis is placed on theoretical and practical perspectives on the study of sport expertise as they intersect with issues regarding sport psychology, race, aging, gender, or other socio-cultural factors. 
Comment(s): Requires admission to the sport studies major or consent of instructor.

538 Professional Practice Issues in Sport Studies (3) Study and cultural critique of various aspects of professional practice in sport studies. Comment(s): Requires admission to the sport studies major or consent of instructor.

539 Research Development in Sport Psychology: Idea Formation to Data Collection (3) First of a two-semester sequence designed to familiarize students with research process in applied sport psychology. Includes idea formation, critical review of related literature, development of a research question and methodology, and data collection. Comment(s): Requires admission to the sport studies major or consent of instructor.

540 Research Development in Sport Psychology: Data Analysis to Manuscript Submission (3) Second of a two-semester sequence designed to familiarize students with research process in applied sport psychology. Includes data analysis, manuscript preparation and manuscript submission. Comment(s): Requires admission to the sport studies major or consent of instructor.

542 Sociological Aspects of Sport (3) Social and cultural factors influencing sport and physical education. Pertinent issues and research applications. Comment(s): Requires admission to the sport studies major or consent of instructor. Registration Permission: Consent of instructor.

543 Women, Sport, and Culture (3) Critical examination of experiences of girls/women in American sports from a socio-cultural perspective with particular emphasis on the constructs of gender, race, class, and sexuality. Explores theories from sport, feminist, race, and cultural studies. (Same as Women’s Studies 543.)

593 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours.

594 Supervised Readings (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 9 hours.

595 Special Topics (1-3) Advanced study in selected aspects of sport studies. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. Comment(s): Requires admission to the sport studies major or consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Major writing requirement.

601 Research Seminar (1) (See Exercise Science 601.)

633 Advanced Sport Psychology (3) Analysis, synthesis, and discussion of contemporary theory and topics; research development and production in sport psychology. Repeatability: May be repeated. Maximum 9 hours. Comment(s): Requires admission to the sport studies major or consent of instructor.

681 Practicum (1-3) Intern experience in areas of major interest. Repeatability: May be repeated. Maximum 9 hours. Comment(s): Requires admission to the sport studies major or consent of instructor.

693 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours.

694 Supervised Reading (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours.

695 Special Topics (1-3) Study for doctoral students in selected aspects of sport studies. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 9 hours.

Statistics (962)

500 Thesis (1-15) Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

531 Survey of Statistical Methods I (3) Univariate and bivariate data collection and organization, statistical estimation and hypothesis testing; analysis of relationships for categorical and numerical data, including Chi-square tests and simple linear and quadratic regression. Use of computing facilities required. Credit Restriction(s): Students may not receive credit for both 531 and 537. (DE) Prerequisite(s): 1 year of college mathematics.

532 Survey of Statistical Methods II (3) Multiple linear regression, including use of dummy variables; single and multiple factor analysis of variance and covariance; issues in experimental design and analysis. Use of computing facilities required. (DE) Prerequisite(s): 531.

537 Statistics for Research I (3) Principles and application of statistical methodology, integrated with considerable use of major statistical computing system. Probability and probability distributions, forming and testing hypotheses using parametric and nonparametric inference methods. Matrix-based simple linear regression and correlation. Credit Restriction(s): Students may not receive credit for both 537 and 531. (DE) Prerequisite(s): 1 year of undergraduate mathematics and 1 undergraduate statistics course.

538 Statistics for Research II (3) General linear model as applied to multiple regression and analysis of variance. Diagnostic and influence techniques. One-way, factorial, blocking, and nested designs, preplanned versus post-hoc contrasts. Random factors and repeated measures. (DE) Prerequisite(s): 537 or 532.

561 Introduction to Computing for Data Management and Analysis (1) The University of Tennessee, Knoxville, computing environment for beginning statistics graduate students. Use of operating system commands, system editor, utility programs and SAS statistical package for data entry and editing, file management and statistical analysis. Use of UTCC computing facilities required. (DE) Prerequisite(s): 531 or 537 or consent of instructor.

563 Introduction to Mathematical Statistics (3) Basic probability models and theory of distributions of random variables. (DE) Prerequisite(s): Mathematics 241.

564 Theory of Statistical Inference (3) Introductory theory underlying common statistical procedures of hypothesis testing and estimation. (DE) Prerequisite(s): 563.

566 Statistical Techniques in Industrial Processes (3) Applications of control charts and other statistical techniques in industrial setting. Attributes and variables control charts, process capability analysis, aspects of sampling, statistical tolerancing, estimation of variance components, problems of measurement, special industrial applications. (DE) Prerequisite(s): 571 or equivalent.

571 Statistical Methods (3) Data collection strategies. Descriptive statistics. Probability distributions, simulation of random variables, sampling distributions. Estimation and hypothesis testing, regression, Chi-Square test for categorical data, simple design of experiments, nonparametric methods. Use of statistical software. (DE) Prerequisite(s): 1 year of calculus and a statistics course.
(DE) Prerequisite(s): 571 and matrix algebra.

(DE) Corequisite: 572.

574 Data Mining Methods and Applications (3) Understanding and application of data mining methods. Data preparation; exploratory data analysis and visualization; cluster analysis; logistic regression; decision trees; neural networks; association rules; model assessment; and other topics. Applications to real world data. Use of standard computer packages.
(DE) Prerequisite(s): 532 or 538 or 571 or consent of instructor.

575 Applied Time Series (3) Fundamental concepts of time series analysis. Box-Jenkins approach, stationary and nonstationary models, forecasting model identification, seasonal models, transfer function models, and spectral theory.
(DE) Prerequisite(s): 538 or 572 or consent of instructor.

(DE) Prerequisite(s): 1 year of graduate-level statistics and regression analysis and analysis of variance or consent of instructor.

(DE) Prerequisite(s): 538 or knowledge of regression and analysis of variance.

583 Special Topics in Applied Statistics (1-3) Repeatability: May be repeated. Maximum 9 hours.

585 Principles of Statistical Process Management (1-3) Statistical and other techniques applied to management of organizational processes.
Repeatability: Not repeatable. May be taken once for 1-3 hours.
Registration Permission: Consent of department head.

587 Graduate Seminar (1) Directed readings and active participation in colloquium program of Department of Statistics and of student's minor program.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of departmental director of graduate studies.

592 Internship (1-6) Supervised off-campus experience in application of statistical principles and methods in business, industry, or government. Written and oral report required.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 4 courses in graduate-level statistics or consent of departmental director of graduate studies.

593 Independent Study (2-6) Faculty directed readings and investigation of specified topic in probability or statistics. Written report and oral presentation required.
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 2 courses in statistics.
Registration Permission: Consent of the departmental director of graduate studies.

595 Statistical Consulting Practicum (1-6) Supervised experience helping on-campus researchers plan, manage data, and develop and perform analyses specific to designs and hypotheses. Discussion of activities in regular seminar meetings. Final written reports and/or detailed diaries required.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 572 or 538.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.

662 Computational Methods in Statistics (3) Up-to-date computational methods in statistics: open architecture interactive computational languages supplemented by other statistical packages with graphical capabilities. Statistical computing, numerical methods for linear models and generalized linear models, nonlinear statistical methods, matrix computations and special matrices, essentials of Monte Carlo simulation, and resampling techniques.
(DE) Prerequisite(s): Knowledge of programming language and 572 or consent of instructor.

(DE) Prerequisite(s): 564 and Mathematics 445.

664 Advanced Statistics Theory II (3) Testing statistical hypotheses, Bayesian methods and estimation, linear model theory and model selection.
(DE) Prerequisite(s): 663.

(DE) Prerequisite(s): 564 and 566.

673 Advanced Topics in Design of Experiments and Linear Models (3) Experimentation for product and process improvement: response surface methodology and robust design methods; mixture experiments; optimal design topics; distribution theory and inference for linear models.
(DE) Prerequisite(s): 573 or consent of instructor.

(DE) Prerequisite(s): 564, 579 and knowledge of programming language or consent of instructor.

677 Statistical Modeling (3) Modern techniques of statistical modeling: predictive, likelihood, Bayesian, and information-based model selection and evaluation paradigms. Application of techniques in various types of models for both continuous and discrete data modeling problems. Interactive computational tools.
(DE) Prerequisite(s): 564 and 572 or 538 or consent of instructor.

679 Multivariate Statistical Modeling (3) Modern information based techniques and model selection in multivariate analysis, informational tests of significance with multivariate data, multivariate analysis of variance, multivariate regression and variable selection, multisample cluster analysis, common principal component model, factor analysis model, covariance structural models with latent variables, mixture-model cluster analysis.
(DE) Prerequisite(s): Matrix algebra and 564 or matrix-based linear models with experience in interactive computing or consent of instructor.

683 Special Topics in Statistics (1-3) Presentation of specialized topics in statistics.
Repeatability: May be repeated. Maximum 6 hours.

691 Graduate Seminar in Applied Statistics (3) Reading of literature and discussion of open problems of importance to industry; design of experiments, modeling, process control, regression, and reliability.
Grading Restriction: Satisfactory/No Credit or letter grade.
Registration Permission: Consent of instructor.

693 Independent Study (1-6) Directed research on subject of mutual interest to student and faculty member.
Repeatability: May be repeated. Maximum 6 hours.

Theatre (976)

420 Special Studies in Acting (3) Content varies. Exercises in selected concentrated areas such as styles, techniques, approaches, e.g., Shakespeare, movement, humor.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 320.
Registration Permission: Consent of instructor.

425 Advanced Musical Theatre (3) Study and practice of musical theatre material, including dance and vocal work.
(DE) Prerequisite(s): 325.

430 Principles of Play Directing (3) Problems in composition, picturization, rhythm, movement.
(DE) Prerequisite(s): 220.
Comment(s): 430 and 431 must be taken in sequence.
431 Principles of Play Directing (3) Problems in composition, picturization, rhythm, movement.
(DE) Prerequisite(s): 220. Comment(s): 430 and 431 must be taken in sequence.

446 Costume Patterning (3) Draping patterns for period costumes. Includes corsetry and study of historic patterns 1500-1900.
(DE) Prerequisite(s): 345 or consent of instructor.

450 Special Studies in Entertainment Technology (1-3) Content varies.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

452 Entertainment Technology II (3) Automation systems in live entertainment, including advanced rigging and flying for stage and film.
(DE) Prerequisite(s): 352 or consent of instructor.

454 Scenery Painting (2) Introduction to materials, techniques, and principles of craft. Emphasis on gaining skill and understanding through studio experience.
Registration Permission: Consent of instructor.

456 Scenic Design II (3) Advanced studies in set design.
(DE) Prerequisite(s): 355 or consent of instructor.

462 Lighting Design II (3) Advanced lighting design theory and practice. Lab and project intensive.
(DE) Prerequisite(s): 362 or consent of instructor.

464 Computer Aided Drafting for the Theatre (3) Introduction to entertainment drafting. Emphasis on 2-D graphical standards, drafting techniques, drawing layout and presentation.

470 Playwriting (3) Advanced instruction in writing of plays.
Registration Permission: Consent of instructor.

491 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

492 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

493 Independent Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

501 Introduction to Graduate Research in Theatre (3) Research tools and methods for theatre artist and scholar.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Elements of Design for the Theatre (3) Analysis of the principles of design through visual, structural, and emotional relationships.

510 Studies in Theatre History (3) Intensive study of selected topics in theatre history.
Repeatability: May be repeated. Maximum 9 hours.

512 Dramatic Literature Analysis (3) Dramaturgical strategies of major playwrights, using variety of analytical approaches from Aristotelian to deconstruction.

520 Master Class in Performance: Acting (3) Master class in acting techniques.
Repeatability: May be repeated. Maximum 18 hours.
Comment(s): Theatre MFA students only.

523 Master Class in Performance: Movement (3) Master class in movement techniques.
Repeatability: May be repeated. Maximum 18 hours.
Comment(s): Theatre MFA students only.

525 Master Class in Performance: Voice (3) Master class in voice and speech techniques.
Repeatability: May be repeated. Maximum 18 hours.
Comment(s): Theatre MFA students only.

536 Projects in Play Directing (3) Practical work in play direction involving various lengths and kinds of scripts.
Repeatability: May be repeated. Maximum 9 hours.

542 The Social History of Costume (3) Study and analysis of costume as related to society’s manners and mores, architecture and furniture.

Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of department.

545 Millinery for the Stage (2) Pattern making and construction techniques for hats from antiquity to present.
Registration Permission: Consent of instructor.

546 Advanced Costume Patterning (3) Advanced studies in patterning period costume. Development of historic patterns through flat pattern method.
(DE) Prerequisite(s): 446.

547 Painting and Dyeing for the Theatre (3) Fibers, dyes and dye processes; color matching and distressing.

549 Projects in Costume Technology (1-3) Individualized studies in costume technology in theatre production.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

550 Special Studies in Entertainment Technology (1-3) Content varies.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

551 Structural Design for Stage (3) Application of advanced theatre technology and analysis of common building materials to design of safe stage scenery.
Comment(s): 551 and 552 must be taken in sequence.

552 Structural Design for Stage (3) Application of advanced theatre technology and analysis of common building materials to design of safe stage scenery.
Comment(s): 551 and 552 must be taken in sequence.

553 Projects in Scenic Design (1-3) Conception and completion of major projects, both hypothetical and actual, in scene design.
Repeatability: May be repeated. Maximum 9 hours.

555 Model Building (3) Techniques of model building for scenic designer.
(DE) Prerequisite(s): 401 and 1 semester of 580.
Comment(s): Theatre MFA students only.

556 Drafting (3) Drafting techniques for scenic designer.

560 Lab Analysis of Realized Lighting Design (3) Realized lighting design projects from concept meeting through opening night.
Repeatability: May be repeated. Maximum 18 hours.
Registration Permission: Consent of instructor.

564 Advanced Computer Aided Drafting for the Theatre (3) Advanced drafting techniques. Emphasis on 3-D solid modeling, rendering, and publication.
(DE) Prerequisite(s): 464 or consent of instructor.

580 Design Seminar (1-6) Analysis, research, interpretation, and design of plays in a cross-disciplinary environment.
Repeatability: May be repeated. Maximum 18 hours.

584 Photography for the Theatre (3) Photographic techniques for shooting live performance events under challenging lighting environments.
Registration Permission: Consent of instructor.

585 Production Workshops (1-6) Directed experience in production collaborations.
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

587 Computer Aided Rendering for the Theatre (3) Computer rendering programs and their use by theatrical designers.
Registration Permission: Consent of instructor.

593 Independent Study (1-3) Individual or group projects.
Repeatability: May be repeated. Maximum 15 hours.
Comment(s): Theatre MFA students only.
Registration Permission: Consent of instructor.

599 Project in Lieu of Thesis (1-6)
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Minimum of 30 hours toward the MFA.
Registration Permission: Consent of advisor.
Theory and Practice in Teacher Education (978)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.

517 Trends and Issues in Education (3) Examination of contemporary trends and issues in education.

518 Educational Specialist Research and Thesis (3)
Grading Restriction: P/NP only.
Repeatability: May be repeated. Maximum 15 hours.

526 Drama and Story Telling in Teaching (3)
Use of techniques of drama and storytelling to improve impact of teaching and to teach more effectively.
(DE) Prerequisite(s): Classroom experience or admission to teacher education.

535 Inquiry Teaching and Learning (3) Use of children's and adolescent literature. Exploration of ways to create setting that invite learners to engage in inquiry learning and teaching.

540 Topics in Improvement of Instruction (1-3) Special conferences, workshops, and in-service programs.
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

542 Integrated Middle Grades Methods (3) Activities in this class are intended to promote the professional growth of pre-service and in-service middle grades teachers through study, design, and implementation of curriculum, instruction, and assessment strategies. In particular, methods of integrating language arts, mathematics, science, and social science content in grades 4-8 will be explored. The use of technology in supporting learning of middle grades content will also be an emphasis throughout.

543 Middle Grades: Concepts and Practices (3) Designed as the introductory course for students pursuing middle-level teacher licensure. Attention is focused on the decline of the junior high and rise of the middle school (typically grades 6-8), the programmatic components that characterize exemplary middle schools, and the philosophy that forms the foundation for this movement. Looks at the theories, research, and exemplary practice concerning the components of middle schools. Helps to prepare middle school professionals who understand the rationale for and the role of teachers in interdisciplinary teams, teacher-based advisory, flexible scheduling and grouping, and working with colleagues, families, resource persons, and community groups.

550 Action Research and Practical Inquiry in Education (3) Principles of action research and practical inquiry for practitioners in early childhood and school settings and methods for conducting such inquiries in professional role.
Comment(s): Admission to graduate program required.

593 Independent Study (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

594 Supervised Readings (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

595 Special Topics (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

596 Clinical Experience in Assessment and Instruction (3) Academic remediation applied in lab/field setting; tasks related to teaching: assessment, preparation of lessons, and delivery of instruction.
Grading: Satisfactory/No Credit or letter grade.
(DE) Corequisite(s): 554.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Comment(s): Admission to candidacy required.

604 Trans-Departmental Seminar I (1) Introduction to doctoral programs in education: research requirements, academic integrity, the meaning of scholarship in academic and issues/problems in education.
Grading Restriction: Satisfactory/No Credit grading only.
Credit Restriction: May not be used to meet 600-level requirement.
Comment(s): Admission to a doctoral program or consent of the doctoral program coordinator required.

605 Trans-Departmental Seminar II (1) Seminar to prepare doctoral students for the final steps in completing a terminal degree including preparing for and completing qualifying exams, preparing a prospectus, and completing a dissertation.
Credit Restriction: May not be used to meet 600-level requirement.
(DE) Prerequisite(s): 604.

610 Internship in College Teaching and Supervision (3-9) Supervised practice in college teaching and supervision.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
Comment(s): Admission to doctoral program or consent of instructor required.

617 Advanced Studies in Education – An Interdisciplinary Perspective (3) Educational trends, issues, and policies related to curriculum and instruction, assessment, the organization and administration of schools, and preparation of educators for both K-12 and higher education settings.
Comment(s): Admission to doctoral program or consent of instructor required.

620 Research in Literacy, Language, and ESL Education (3) Recent trends and historical traditions in language and literacy research: analysis of nature of research methods used, questions asked and topics studied.
Comment(s): Admission to doctoral program or consent of instructor required.

Comment(s): Admission to doctoral program required.

689 Internship (1-3) Experiences in application of principles and practices of curriculum development and instructional improvement.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): Program prerequisites.
Registration Permission: Consent of instructor.

693 Independent Study (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

694 Supervised Reading (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

695 Special Topics (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 12 hours.

Veterinary Medicine (987)

801 Application Based Learning Exercise (ABLE) I (1) Small group, student-centered learning sessions with faculty facilitator for self discovery of new information. Week-long sessions based on specific clinical case or problem, and integration of basic science and clinical material.
Grading Restriction: Satisfactory/No Credit grading only.

802 Application Based Learning Exercise (ABLE) II (2) Small group, student-centered learning sessions with faculty facilitator for self discovery of new information. Week-long sessions based on specific clinical case or problem, and integration of basic science and clinical material.
Grading Restriction: Satisfactory/No Credit grading only.

804 Application Based Learning Exercise (ABLE) and Clinical Exposure I (2) Week-long small group, student-centered learning sessions with faculty facilitator for self discovery of new information; based on specific clinical case or problem; integration of basic science and clinical material. One week of clinical experience through participation in specific clinical rotations in Veterinary Teaching Hospital.
Grading Restriction: Satisfactory/No Credit grading only.

805 Application Based Learning Exercise (ABLE) and Clinical Exposure II (2) Week-long small group, student-centered learning sessions with faculty facilitator for self discovery of new information; based on specific clinical case or problem; integration of basic science and clinical material. One week of clinical experience through participation in specific clinical rotations in Veterinary Teaching Hospital.
Grading Restriction: Satisfactory/No Credit grading only.
illuminative clinical cases.

erasers involving bone marrow and blood cells, platelets, and blood coagu-

834 Hematopoietic System (2) Fundamental aspects of microbiology and cell biology relative to pathogene-
sis of bacterial and fungal diseases of animals: antimicrobial actions and
mechanisms of bacterial resistance. General approaches to diagnosis,
treatment and prevention.

813 Infection and Immunity I – Immunology (2) Basic biology and practical aspects of immunology: cells of immune system, immune func-
tion and dysfunction, immunoprophylaxis, diagnostic testing and specific
diseases involving immune system.

814 Clinical Correlations and Ethics I (1) Correlations between basic
science material from concurrent courses and practice of veterinary med-
icine. Thoughts on wide spectrum of current veterinary ethical issues.

815 Infection and Immunity III – Virology (2) Structural and genetic
bases for classification of animal viruses into separate families. Mol-
ecular biology of viral replication and viral pathogenesis.

816 Clinical Correlations and Ethics II (2) Correlations between basic
science material from concurrent courses and practice of veterinary medi-
cine. Thoughts on wide spectrum of current veterinary ethical issues.
Student-led discussions follow faculty presentations.

821 Veterinary Anatomy I (4) Lectures, laboratories, and demonstra-
tions are used in an integrated approach to the study of macroscopic (gross) clinically relevant anatomy, including neuroanatomy, and embry-
ology of common domestic animals. Dissections of embalmed speci-
mens, prosections, plastinated specimens, and radiographs of common
domestic species are examined for comparative purposes.

822 Veterinary Anatomy II (4) Lectures, laboratories, and demonstra-
tions are used in an integrated approach to the study of macroscopic (gross) clinically relevant anatomy, including neuroanatomy, and embry-
ology of common domestic animals. Dissections of embalmed speci-
mens, prosections, plastinated specimens, and radiographs of common
domestic species are examined for comparative purposes.

823 Physiology I (4) Introduction to concepts and problems in physi-
ology which form basis for clinical applications and for formal training
in pharmacology, medicine, pathology, and surgery. Cellular, neural,
cardiovascular, renal, respiratory, digestive, endocrine, and reproduc-
tive physiology.

824 Physiology II (4) Introduction to concepts and problems in physi-
ology which form basis for clinical applications and for formal training
in pharmacology, medicine, pathology, and surgery. Cellular, neural,
cardiovascular, renal, respiratory, digestive, endocrine, and reproduc-
tive physiology.

825 Veterinary Microscopic Anatomy I (2) Lectures, laboratories, and
demonstrations are used in the study of the cell, embryology, and micro-
scopic anatomy of organ systems in common domestic animals to relate
structure with function.

826 Veterinary Microscopic Anatomy II (2) Lectures, laboratories, and
demonstrations are used in the study of the cell, embryology, and micro-
scopic anatomy of organ systems in common domestic animals to relate
structure with function.

827 Special Problems in Animal Science (1-8) Extramural and special-
ly designed study for students interested in select topics in anatomy, his-
tology, and physiology.

831 Physical Diagnosis (1) Basic care, feeding, restraint, and handling
domestic animals. Introduction to physical examination and diagnostic
techniques used by veterinarian.

832 Anesthesiology (2) Principles of anesthesiology; pharmacology of
anesthetic agents, and introduction to anesthetic techniques in veterinary
medicine.

833 Epidemiology and Evidence Based Medicine (2) Study of distribu-
tion and determinants of disease in animal populations. Use of knowl-
edge (evidence) gained from management of clinical patients in past to
improve future clinical decision-making processes.

834 Hematopoietic System (2) Pathophysiology and diagnosis of disor-
ders involving bone marrow and blood cells, platelets, and blood coagu-
ation in domestic animals; interpretation of laboratory test results using
illustrative clinical cases.

835 Principles and Practice of Surgery (2) Principles of veterinary sur-
gery: aseptic technique, patient and surgeon preparation, control of sur-
gical hemorrhage and infection, and general operating room procedures.
Proper methods of tissue handling, surgical instrumentation, and selec-
tion of suture materials and suturing patterns. Pathophysiology of surgi-
cal and accidental wounds: wound healing and management.

836 Toxicology (2) Principles of toxicology, molecular mechanisms, patho-
logic processes and clinical features of animal diseases caused by
common toxic agents.

837 Food Hygiene and Zoonoses (2) Host-agent relationships, public
health aspects of veterinary medicine and role of veterinarians in ecolo-
gy and food hygiene.

838 Clinical Rotation in Pathology I (2) Clinical training and interpreta-
ton in post-mortem examination and laboratory diagnostics: clinical
pathology and introductory histopathology of biopsy specimens.

839 Clinical Rotation in Pathology II (2) Clinical training and interpre-
ton in post-mortem examination and laboratory diagnostics: clinical
pathology and introductory histopathology of biopsy specimens.

840 Integumentary System (3) Pathophysiology, special pathology,
microscopy and surgery of diseases of integumentary system. Laboratory
examination, pathology, diagnosis and treatment.

841 Reproductive System (3) Pathophysiology, special pathology, medi-
cine and surgery of diseases of male and female reproductive systems
and mammary glands.

842 Alimentary System (4) Pathophysiology, special pathology, medi-
cine and surgery of diseases of alimentary systems.

843 Musculoskeletal System I (3) Pathophysiology, clinical description
and basic treatment modalities of common diseases and conditions of skele-
tal system of small animals: development of basic diagnostic and
treatment skills.

844 Musculoskeletal System II (3) Pathophysiology, special pathology,
microscopy and surgery of diseases of muscular and skeletal systems. Ad-
vanced principles, radiographic interpretation and surgical procedures.

845 Veterinary Nutrition (2) Principles of nutrition, and nutrition of ani-
mals in health and disease. Applied nutrition relating to individual small
or large animal patient or to herd situations.

846 Multispecies Medicine (3) Anatomy, pathophysiology, medicine,
and surgery of avian species, laboratory and zoo animals and reptiles.
Species and diseases seen by practicing veterinarian. Current topics on
foreign animal diseases.

847 Clinical Rotation in Radiology I (2) Clinical training in radiograph-
ic techniques and interpretation, including ultrasonography.

849 Clinical Rotation in Radiology II (2) Clinical training in radiograph-
ic techniques and interpretation, including ultrasonography.

851 Urinary System (3) Pathophysiology, special pathology, medicine
and surgery of diseases of urinary system. Urinary system in health and
disease.

852 Cardiovascular System (2) Pathophysiology, special pathology,
microscopy and surgery of diseases of cardiovascular system. Anatomic,
physiologic and pharmacologic principles which provide basis for treat-
ment.

853 Endocrine System (2) Pathophysiology, medicine and surgery of
diseases of endocrine system. Mechanisms of endocrine and metabolic
diseases: therapy and prevention.

854 Respiratory System (3) Pathophysiology, special pathology, medi-
cine and surgery of diseases of respiratory system. Upper and lower res-
piratory systems: infectious and noninfectious diseases.

855 Radiology (3) Basic, advanced and special techniques in radiology
with interpretation and use of radiologic and related techniques in diag-
nosis and treatment of animal diseases.

856 Special Sensory Systems (2) Pathophysiology, special pathology, medi-
cine and surgery of diseases of visual and auditory systems.

857 Nervous System (3) Pathophysiology, special pathology, medicine
and surgery of diseases of nervous system: clinical neurology and neu-
ropathology.

858 Neurology/Ophthalmology (4) Clinical training in specialty servic-
es: ophthalmology and neurology. Direct responsibility for diagnosis, pa-
tient care, and treatment of patients in both Large Animal and Small Ani-
mal Clinical Sciences.

861 Pharmacology I (2) Principles of pharmacokinetics and pharmaco-
nologic properties of veterinary drugs; mode of action and pharma-
ologic effects including important metabolic aspects, chemical and physi-
cal properties, side effects (toxicities) and clinical application.
300 COURSES OF INSTRUCTION

862 Pharmacology II (2) Continuation of 861: modes of action, pharmacologic effects, and clinical application of drugs to control specific disease conditions.

864 Infectious Diseases (2) Pathogenesis and clinical findings of major viral, bacterial, and fungal infectious diseases of domestic animals: cattle, horses, swine, sheep, goats, dogs and cats; relevant case-based presentations.

865 Clinical Rotation in Comparative Medicine (2) Clinical training in avian medicine, laboratory animal and zoo animal medicine, epidemiology, public health, and other related disciplines.

867 Special Problems in Comparative Medicine (1-8) Extramural and specially designed study for students interested in select topics in avian medicine, laboratory animal medicine, zoo animal medicine, epidemiology, public health, pharmacology or toxicology.

868 Introduction to Animal Behavior (2) Basic principles of normal and abnormal animal behavior in domestic animals; clinical case discussions to illustrate common behavioral problems and current approaches to therapy.

870 Anesthesiology (4) Clinical training in sedation and anesthesia of companion animals, food animals and horses. Direct responsibility for diagnosis, care and treatment of clinical patients.

871 General Pathology (3) Principles of pathobiology: causes of disease, disturbances of cell growth and inflammation.

873 Infection and Immunity IV – Parasitology (3) Principles of parasitology: protozoology, helminthology, and entomology and relationship to diseases in animals.

874 Oncology (2) Fundamental aspects of cell biology and pathology relative to etiology and natural behavior of various neoplasms of animals; general approaches to diagnosis, treatment and prevention of neoplasia.

877 Special Problems in Pathology (1-8) Extramural and specially designed study for students interested in select topics in morphologic pathology, clinical pathology, clinical microbiology and parasitology.

878 Elective Clinical Rotation I (2) Special rotations in applied clinical education in Small Animal Clinical Sciences, Large Animal Clinical Sciences, Comparative Medicine and Pathology. Novel experience not associated with required clinical rotations may be arranged.

879 Elective Clinical Rotation II (2) Special rotations in applied clinical education in Small Animal Clinical Sciences, Large Animal Clinical Sciences, Comparative Medicine and Pathology. Novel experience not associated with required clinical rotations may be arranged.

881 Clinical Rotations in Small Animal Clinical Sciences I (4) Clinical training in medicine, surgery and specialty disciplines for companion animals. Direct responsibility for diagnosis, care, and treatment of clinical patients.

882 Clinical Rotations in Small Animal Clinical Sciences II (4) Clinical training in medicine, surgery and specialty disciplines for companion animals. Direct responsibility for diagnosis, care, and treatment of clinical patients.

883 Clinical Rotations in Small Animal Clinical Sciences III (4) Clinical training in medicine, surgery and specialty disciplines for companion animals. Direct responsibility for diagnosis, care, and treatment of clinical patients.

887 Special Problems in Small Animal Clinical Sciences (1-8) Extramural and specially designed study for students interested in select topics in medicine, surgery, anesthesiology, radiology and medical specialties of small (companion) animals.

890 Transition and Accreditation Seminars (2) Discussion of USDA, state, and local animal laws and regulations: preparation of animal movement forms, veterinary ethics, jurisprudence, basic practice management, and other topics involved in practice of veterinary medicine.

891 Clinical Rotations in Large Animal Clinical Sciences I (4) Clinical training in medicine, surgery, specialty disciplines and herd health of food animals and horses. Direct responsibility for diagnosis, care and treatment of clinical patients.

892 Clinical Rotations in Large Animal Clinical Sciences II (4) Clinical training in medicine, surgery, specialty disciplines and herd health of food animals and horses. Direct responsibility for diagnosis, care and treatment of clinical patients.

893 Clinical Rotations in Large Animal Clinical Sciences III (4) Clinical training in medicine, surgery, specialty disciplines and herd health of food animals and horses. Direct responsibility for diagnosis, care and treatment of clinical patients.

897 Special Problems in Large Animal Clinical Sciences (1-8) Extramural and specially designed study for students interested in select topics in medicine, surgery, herd health, reproduction, radiology and medical specialties of large animals.

898 Externship I (2) Educational experiences in private practice, research facility, zoological preserve, aquarium, or other veterinary-related facility outside Veterinary Teaching Hospital; to provide experiences not frequently available in large referral veterinary teaching hospitals.

899 Externship II (2) Educational experiences in private practice, research facility, zoological preserve, aquarium, or other veterinary-related facility outside Veterinary Teaching Hospital; to provide experiences not frequently available in large referral veterinary teaching hospitals.

Wildlife and Fisheries Science (993)

440 Wildlife Techniques (3) Methods in wildlife damage control, forest, farmland, wetland wildlife habitat management, identification of wildlife field sign, wildlife capturing techniques and management plan preparation. Weekend field trips (2) required.

442 Fisheries Techniques (3) Active and passive sampling techniques for fish and aquatic organisms; population estimation methods; fish handling and transport; fish habitat analysis; marking and tagging techniques; age determination and incremental growth analysis; stream assessment; equipment and instrumentation usage and maintenance; safety in sampling methods Weekend field trip may be required.

443 Fisheries Science (3) Quantification and management of freshwater fisheries including population estimation, age and growth, biological assessment, and stocking.

444 Ecology and Management of Wild Mammals (3) Biological and ecological characteristics of game mammals and endangered mammals. Current principles and practices of wild mammal management. Weekend field trip required.

445 Ecology and Management of Wild Birds (3) Biological and ecological characteristics of game birds, endangered birds, and bird pests. Current principles and practices of wild bird management. Weekend field trip required.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

512 Seminar in Wildlife and Fisheries Science (1) Current developments in wildlife and fisheries science. Required of all graduate students in residence in the fall.

515 Seminar in Avian Ecology and Management (1-2) Readings and discussion based on current literature on contemporary topics in avian ecology and management. Additional credit awarded for writing review paper on contemporary topic of interest to student. Registration Permission: Consent of instructor.

530 Wildlife Diseases (2) Necropsy of birds and mammals. Recognition of various diseases and methods of preparing pathological materials in field and lab. Investigative procedures concerning wildlife diseases. (Same as Comparative and Experimental Medicine – Veterinary Medicine 530.)

Recommended Background: Upper-division undergraduate course in wildlife sciences.
531 Wildlife Physiology and Nutrition (2) Introduction and overview of endocrine and physiological mechanisms regulating wild animal populations (primarily wild birds and mammals): the importance of wildlife physiology and nutrition in monitoring and managing wildlife.

Comment(s): Requires senior or graduate standing in the life sciences.

535 Floodplain Ecosystems (3) Ecology, restoration and management of floodplain ecosystems: biotic and abiotic processes, social considerations, and wildlife and forest management; Lower Mississippi River Alluvial Valley.

Registration Permission: Consent of instructor.

536 Advanced Wetland Ecology (3) A comprehensive examination of wetland delineation and classification, wetland communities and hydrogeomorphic processes, wetland values, human impacts on wetlands, and the management and conservation of wetland communities.

Comments: Day or overnight field trips may be required.

545 Advanced Population Analysis (2) Detail characteristics, assumptions, goals, methods, and current technologies for fish and wildlife population analysis. Use of computers.

(Re) Prerequisite(s): Animal Science 571 or Statistics 538.

546 Advanced Habitat Analysis (2) Habitat analysis as tool to evaluate habitat use and predict occurrences of animal and plant species: principles and goals of modeling, habitat analysis theory, GIS and statistical techniques. Use of computer programs.

 Recommended Background: Undergraduate course in GIS.

550 Fish Physiology (3) Mechanisms of gas transfer, circulation, excretion, osmoregulation, locomotion, and neural/hormonal control of these systems in fishes. Comparisons and contrasts with physiology of terrestrial animals. Practical applications of fish physiology to aquaculture, pollution assessment, and fisheries management.

Comment(s): Requires senior or graduate standing in the life sciences.

555 Fish Culture (3) Principles, concepts and techniques of culturing economically important fish and shellfish species.

Contact Hour Distribution: 2 hours and 1 lab.

(Re) Prerequisite(s): 443 or consent of instructor.

556 Recirculating Aquaculture (3) Growing fish in intensive, indoor systems with reconditioned water. Techniques of solids removal, nitrification, and gas balance. Practical experience with operating system.

Recommended Background: Upper-division undergraduate course in fisheries science.

560 Advanced Topics in Wildlife and Fisheries Science (1-3) Recent advances and concepts, research techniques and analysis of current problems.

Repeatability: May be repeated. Maximum 6 hours.

(Re) Prerequisite(s): 443, 444, and 445 or consent of instructor.

593 Independent Study in Wildlife and Fisheries Science (1-4)

Repeatability: May be repeated. Maximum 6 hours.

Music Technology Courses 269
Music Theory Courses 269
Music Voice Courses 269
Music, School of 75
Musicology Courses 269

N
Natural Resources Major 48
Nuclear Criticality Safety, Graduate Certificate In 151
Nuclear Engineering Courses 270
Nuclear Engineering Major 150, 151
Nuclear Engineering, Department of 149
Nurse Anesthesia, Graduate Certificate In 161
Nursing Administration, Graduate Certificate In 161
Nursing Courses 271
Nursing Education Minor 160
Nursing Education, Graduate Certificate In 161
Nursing Major 157, 160
Nursing of Women and Children, Graduate Certificate In 161
Nursing, College of 157
Nutrition Courses 274
Nutrition Institute 177
Nutrition Major 127
Nutrition Minor 128
Nutrition, Department of 127

O
Oak Ridge Associated Universities (ORAU) 179
Office of Information Technology 177
Operations and Management Science Courses 275

P
Philosophy Courses 275
Philosophy Major 77
Philosophy, Department of 76
Physician Executive MBA Program 89
Physics and Astronomy, Department of 77
Physics Courses 276
Physics Major 78
Plagiarism 26
Planning Major 80
Plant Sciences Courses 277
Plant Sciences Major 49
Plant Sciences, Department of 49
Plants, Soils, and Insects Major - Bioactive Natural Products, Entomology, Integrated Pest Management, or Plant Pathology Concentrations 46
Plants, Soils, and Insects Major - Crop Sciences, Horticulture, Plant Improvement, or Weed Biology Concentrations 50
Plants, Soils, and Insects Major - Environmental and Soil Sciences Concentration 44
Political Science Courses 279
Political Science Major, Master of Arts 79
Political Science Major, PhD, 80
Political Science, Department of 78
Polymer Engineering Major 145
Portuguese Courses 281

Prerequisites 25
Professional MBA Program 90
Proficiency Examinations 25
Program of Study, Doctoral Degree 30
Programs Abroad 37
Psychological Clinic 178
Psychology Courses 281
Psychology Major 81
Psychology, Department of 81
