534 Production Monitoring and Automation (3) Precision technologies for monitoring and control of agricultural systems. Applications include: yield monitoring, variable rate control and sensing systems for planters, sprayers, soil applied nutrients, water management, crop health, and pest pressure; electronic information transfer, and GPS-based vehicle guidance.

- Contact Hour Distribution: 2 hours and 1 lab.
- Credit Restriction: Students cannot receive credit for both 434 and 534.
- Registration Restriction(s): Minimum student level – graduate.

542 Simulation of Agricultural Systems (3) Synthesis and analysis of agricultural systems using computer simulation, philosophy of system simulation, critical path, discrete and continuous systems.

- Contact Hour Distribution: 2 hours and 1 lab.

RE Prerequisite(s): 506.

546 Automation Devices and Applications (3) Basic electronics as applied to simple automation systems, programmable controllers, data acquisition, digital logic and transducers.

- Contact Hour Distribution: 2 hours and 1 lab.

RE Prerequisite(s): 506.

555 GIS and GPS Applications to Biosystems (3) (See Biosystems Engineering 555.)

562 Selected Topics in Biosystems Engineering Technology (1-3) Lecture/group discussion on specialized topics.

- Repeatability: May be repeated. Maximum 6 hours.

574 Environmental Instrumentation and Monitoring (3) Equipment and techniques commonly used to measure all aspects of hydrologic cycle: precipitation, runoff, streamflow, subsurface water movement. Sampling of all flows for contaminants. Design of monitoring systems. Analysis of data.

- Contact Hour Distribution: 2 hours and 1 lab.
- Credit Restriction: Students cannot receive credit for both 474 and 574.

RE Prerequisite(s): 506.

Recommended Background: Hydrology.

Registration Restriction(s): Minimum student level – graduate.

Business Administration (205)

501 MBA Career Development (1) Career opportunities available in each concentration.

- Grading Restriction: Satisfactory/No Credit grading only.
- Comment(s): Enrollment is limited to students admitted to the MBA program or by consent of the Assistant Dean of the MBA Program.

511 MBA Core I (3) Essential skills of manager: basic information technology skills, teambuilding, and written and oral communication skills. Finance and accounting fundamentals. Introduction to integrated value chain.

- Grading Restriction: Satisfactory/No Credit grading only.
- Comment(s): Requires admission to the MBA program or consent MBA Program Director.

- (DE) Prerequisite(s): 511 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to the MBA program or consent of MBA Program Director.

513 MBA Core III (9) Continuation of the functional fundamentals from 512. Integration of value chain: supply management and resource management. Capstone integrated experience using information technology.

- (DE) Prerequisite(s): 511 and 512 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to MBA program or consent of MBA Program Director.

- (DE) Prerequisite(s): 511, 512, 513 or consent of Assistant Dean of MBA Program.
- Comment(s): Requires admission to MBA program or consent of MBA Program Director.

520 Innovation and Entrepreneurship (3) Introduces students to innovation and entrepreneurship business logics and strategies. Topics include innovative problem solving, business consulting practices, business planning, continuous improvement, transformational change leadership, and project management.

- (DE) Prerequisite(s): 511, 512, and 513.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Master of Accountancy admission required.

- Comment(s): Executive MBA admission required.

- (DE) Prerequisite(s): 551.

- (DE) Prerequisite(s): 552.

561 Management Project I (3) Company project. Preliminary investigation of significant strategic issue (new initiative, program or significant organizational change to enhance organizational effectiveness) in sponsoring organization. Work within firm under guidance of faculty to develop proposal which defines issue and scope of project. Proposal to be approved by company and faculty.

- (DE) Corequisite: 551.
- Comment(s): Executive MBA admission and cooperation of sponsoring organization required.
562 Management Project II (3) Company project. Continuation of 561. Diagnosis and analysis of strategic issue. Work within firm under guidance of faculty member.  
(DE) Prerequisite(s): 561. 
563 Management Project III (3) Company project. Continuation of 562. Completion of analysis and presentation of report to senior management in sponsoring organization. Work within firm under guidance of faculty member.  
(DE) Prerequisite(s): 562. 
591 International Travel (1) This one-hour course provides one-hour credit framework for purposes of international travel and cultural exchange programs that are sponsored by the MBA program.  
Comment(s): Requires admission to MBA program or consent of MBA Program Director. 
593 Directed Independent Study (3) Cross-disciplinary topic of mutual interest to student and faculty.  
Grading: Satisfactory/No Credit or letter grade.  
Repeatability: May be repeated. Maximum 6 hours.  
Comment(s): Available only by prearrangement with supervising faculty member. May require approval of Dean of the MBA program. 
595 Entrepreneurial Strategy Implementation (3) Student teams of 2-4 individuals work with an entrepreneur to implement business strategies. Guided by a Statement of Work, students will conduct research, analyze company data, and interact weekly with the entrepreneur to understand goals of the strategy being implemented. One student per team will serve as the project manager, and a faculty member will serve as the Client Partner lead.  
(DE) Prerequisite(s): 511, 512, 513, and 520. 
599 Executive-In-Residence (3) Interaction with corporate executives from wide spectrum of business disciplines and discussion of domestic and international strategic planning as applied in major corporations.  
(DE) Prerequisite(s): MBA core.  
Registration Permission: Consent of instructor. 
611 Seminar in Theoretical Foundations (3) Theoretical foundations and frameworks common to business research. Historical and philosophical science perspectives. 
612 Seminar in Research Methods (3) Research processes: philosophical foundations, problem formulation, grounded theory, qualitative methods and analysis, measurement, sources of error, experimental design and analysis, survey design and analysis. 
693 Independent Study (3)  
Repeatability: May be repeated. Maximum 6 hours.  
Registration Permission: Consent of instructor. 
699 Special Topics (3) Seminars that integrate content from various business functions: international business, management information systems. 

Chemical Engineering (226) 
467 Honors: Engineering Internship in Process Control (4) Selected students work in small groups on industrial problems in process dynamics and control. Directed by faculty and engineers from host company.  
(DE) Prerequisite(s): 360 and consent of instructor. 
477 Honors: Applied Process Automation Laboratory (3) Interfacing flexible batch continuous processes to automation systems. Top down analysis with bottom up implementation, hierarchical structures and object oriented concepts are used to design automation solutions: human-machine-interfaces. Workstations with modern industrial equipment, provide an interactive graphics, and visualization environment.  
(DE) Prerequisite(s): 360 and consent of instructor. 
483 Introduction to Reliability Engineering (3) (See Nuclear Engineering 483.) 
484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.) 
500 Thesis (1-15)  
Grading Restriction: P/NP only.  
Repeatability: May be repeated.  
Comment(s): Enrollment is limited to students admitted to the graduate program. 
502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated.  
Credit Restriction: May not be used toward degree requirements. 
505 Engineering Analysis (3) Formulation and solution of problems in chemical engineering and materials areas, ordinary and partial differential equations; types of ODE, PDE and solution techniques; transform methods; conformal mapping; variational methods; introduction to numerical methods. (Same as Materials Science and Engineering 505.) 
507 Application of Linear Algebra in Engineering Systems (3) Fundamental algebra concepts of linear algebra to problems in engineering systems: steady state and dynamic systems. Geometric and physical interpretations of relevant concepts: least square problems, LU, QR, and SVD decompositions of system matrix, eigenvalue problems, and similarity transformations in solving difference and differential equations; numerical stability aspects of various algorithms; application of linear algebra concepts in control and optimization studies; introduction to linear programming, Computer projects. (Same as Biomedical Engineering 507; Electrical and Computer Engineering 507; Industrial Engineering 507; Materials Science and Engineering 507; Mechanical Engineering 507.)  
Comment(s): Graduate standing or consent of instructor required. 
509 Multidisciplinary Project (1) (See Industrial Engineering 509.) 
531 Advanced Chemical Engineering Thermodynamics (3) Phase equilibrium in ideal and non-ideal solution; composition relationship between phases, solution behavior, and application to macromolecules; introduction to microscopic approach to thermodynamics. 
541 Polymer Rheology (3) (See Materials Science and Engineering 541.) 
542 Diffusive and Stagewise Mass Transfer Operations (3) Analysis of mass transfer phenomena, coupled mass transfer and reaction, mass transport operations in packed towers and agitated vessels, membrane separations. Equilibrium stage concepts applied to mass transfer operation, emphasizing nonisothermal and multicomponent systems. 
547 Transport Phenomena I (3) Unified treatment of momentum transport (fluid flow), energy transport (heat conduction, convection, and radiation), and mass transport (diffusion). Fundamental basis of transport phenomena and momentum transport: viscous, viscoelastic, and potential flows. 
548 Transport Phenomena II (3) Unified treatment of momentum transport (fluid flow), energy transport (heat conduction, convection, and radiation), and mass transport (diffusion). Energy transport and mass transport in closed and flow systems, interrelationships between transport processes, and prediction of transport parameters. 
551 Chemical Reactor Analysis (3) Rate models for heterogeneous reactions, properties of porous catalysts, catalyst deactivation, fluid-fluid and fluid-solid reactors. 
556 Data Mining in Engineering and Manufacturing (3) (See Industrial Engineering 556.) 
Comment(s): Graduate standing or consent of the instructor required. 
575 Applied Microbiology and Bioengineering (3) Cross-disciplinary course combining basic concepts in microbiology, biochemistry, reaction kinetics, and biochemical and environmental engineering. Commercial processes, biodegradation/wastewater treatment, analysis of basic bioreactor systems, biosensors, and immobilization methods. (Same as Biosystems Engineering 575; Environmental Engineering 575; Microbiology 575.) 
580 Technical Review and Assessment (3) Preparation of critical review literature in area related to chemical engineering.  
Comment(s): Enrollment is limited to students in the non-thesis option.  
Registration Permission: Consent of advisor.
581 Green Engineering (3) Principles and practical aspects of the design, commercialization, and use of processes and products that are feasible and economical while minimizing the generation of pollution at the source and risk to human health and environment. (Same as Engineering Science 585, Environmental Engineering 581.)
Comment(s): Graduate standing in engineering or consent of the instructor required.

585 Process System Reliability and Safety (3) (See Nuclear Engineering 585.)

590 Special Topics in Chemical Engineering (3) Repeatability: May be repeated. Maximum 6 hours.

594 Cumulating Integrated Project Report (3) (See Mechanical Engineering 594.)

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

631 Advanced Topics in Statistical Thermodynamics and Molecular Dynamics (3) Statistical thermodynamics, molecular based computer simulations, Monte Carlo and molecular dynamic calculations; applications to supercritical fluids, macromolecules and biological systems.
(DE) Prerequisite(s): 505 and 547.

642 Advanced Topics in Polymer Processing (3) (See Materials Science and Engineering 642.)

647 Advanced Transport Phenomena (3) Theory of mass, momentum, and energy transport in reactive and non-reactive systems. Formulation of transport models useful for application to analysis and design of separation processes, and chemical and biochemical reactors.
(DE) Prerequisite(s): 505 and 547.

661 Advanced Topics in Process Dynamics and Control (3) Repeatability: May be repeated. Maximum 6 hours.

691 Advanced Topics in Chemical Engineering (3) Repeatability: May be repeated. Maximum 6 hours.

Chemistry (235)

430 Advanced Inorganic Chemistry (3) Atomic and molecular structure, bonding theories, descriptive chemistry of the elements, kinetics and mechanism of inorganic reactions, applications of modern techniques for characterization, coordination and organometallic chemistry.
(DE) Prerequisite(s): 230.

450 Advanced Organic Chemistry (3) Modern organic reactions of mechanistic, synthetic, and theoretical interest. Content reflects current trends in the area.
(DE) Prerequisite(s): 360.

471 Biophysical Chemistry (3) (See Biochemistry and Cellular and Molecular Biology 471.)

473 Physical Chemistry I (3) Properties of gases; first, second and third laws of thermodynamics; chemical equilibria; simple phase equilibria; properties of solutions.
Credit Restriction: Students may not receive credit for both 471 and 473.
(DE) Prerequisite(s): 130 or 138 and Physics 136 or 138 or 222 or 231 and Mathematics 241, 247.

479 Physical Chemistry Laboratory I (2) Experiments on topics discussed in 471 or 473.
Contact Hour Distribution: 1 lab.
(DE) Prerequisite(s) or (DE) Corequisite(s): 471 or 473.

481 Biophysical Chemistry (3) (See Biochemistry and Cellular and Molecular Biology 481.)

483 Physical Chemistry II (3) Introduction to statistical thermodynamics: kinetics of chemical reactions; introduction to quantum mechanics and applications to electronic structure of atoms and molecules; molecular spectroscopy.
Credit Restriction: Students may not receive credit for both 481 and 483.
(DE) Prerequisite(s): 130 or 138 and Physics 136 or 138 or 222 or 231 and Mathematics 241, 247.

489 Physical Chemistry Laboratory II (2) Experiments on topics discussed in 481 or 483.
Contact Hour Distribution: 1 lab.
(DE) Prerequisite(s) or (DE) Corequisite(s): 481 or 483.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

501 Chemistry Seminar (1) Lectures and discussion on current research. Continuous registration is required for resident graduate students.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

505 Special Problems (3) Specially assigned theoretical or experimental work on problems not covered in other courses.
Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of department.

510 Analytical Spectrometry (3) Principles and practice of optical and mass spectrometric techniques in quantitative chemical analysis.
(DE) Prerequisite(s): 2 semesters of physical chemistry.

511 Analytical Separations (3) Principles and practice of chemical separations based on extraction, chromatographic, and electrophoretic phenomena.
(DE) Prerequisite(s): 2 semesters of physical chemistry.

512 Electroanalytical Chemistry (3) Fundamentals of electrode processes; principles and practice of electroanalytical techniques in quantitative chemical analysis and applied to study of chemical systems.
(DE) Prerequisite(s): 2 semesters of physical chemistry.

530 Chemical Bonding (3) Wave mechanical atom, group theory, quantum approach to molecular orbital theory, covalent, ionic, and metallic bonding, ligand field theories, solid state.
(DE) Prerequisite(s): 1 semester of inorganic chemistry.

531 Characteristics of Inorganic Compounds (3) Descriptive chemistry of elements; structure, reactions, kinetics, mechanisms, equilibria, and spectra of coordination, organometallic, bioinorganic compounds.
(DE) Prerequisite(s): 1 semester of inorganic chemistry.

532 Experimental Methods of Inorganic Chemistry (3) Electronic, infrared, Raman, microwave, NMR, ESR, nuclear quadrupole, Mossbauer, mass, and photoelectron spectroscopies for characterization of inorganic compounds.
(DE) Prerequisite(s): 1 semester of inorganic chemistry.

533 Chemistry of the Transition Metals (3) Theoretical and experimental foundations of modern coordination, organometallic, and bioinorganic chemistry of transition metals; transition metal mediated catalysis, materials chemistry, isolobal theory, kinetics and mechanism of reactions of transition metals, and applications in organic synthesis.
(DE) Prerequisite(s): 1 semester of inorganic chemistry.

550 Structure and Reactivity in Organic Chemistry (3) Structure and bonding in organic compounds; molecular orbital theory, stereochemistry, conformational analysis, and molecular mechanics; substituent effects on acidity and reactivity; introduction to reaction mechanisms.
(DE) Prerequisite(s): 2 semesters of organic chemistry.

551 Organic Reactions (3) Organic transformations of use in synthesis; carbonyl chemistry and carbon-carbon bond formation; stereochemistry and regiochemistry of synthetic processes.
(DE) Prerequisite(s): 550.

552 Organic Reaction Mechanisms (3) Techniques and principles in study of organic reaction mechanisms; applications and interpretations in polar, radical, and pericyclic reactions; reactive intermediates.
(DE) Prerequisite(s): 550.

553 Spectroscopic Characterization of Organic Compounds (2) Organic structure elucidation using spectroscopic methods; nuclear magnetic resonance, infrared, ultraviolet and mass spectrometry.
(DE) Prerequisite(s): 2 semesters of organic chemistry.

554 Organic Spectroscopy Laboratory (1) Use of IR, UV, MS and multinuclear FTNMR spectrometers. Development of problem-solving ability in area of spectroscopic characterization of organic molecules.
(DE) Prerequisite(s): 360 or equivalent.
(DE) Corequisite(s): 553.

570 Quantum Chemistry and Spectroscopy (3) Basic principles of quantum mechanics and their applications to molecular orbital theory, molecular structure, and spectroscopy; introduction to group theory.
(DE) Prerequisite(s): 2 semesters of physical chemistry.

571 Advanced Quantum Chemistry and Spectroscopy (3)
(DE) Prerequisite(s): 570 or consent of instructor.

572 Thermodynamics and Statistical Mechanics (3) Macroscopic and microscopic description of equilibrium systems. Basic principles of thermodynamics and statistical mechanics, and application to selected chemical systems.
(DE) Prerequisite(s): 2 semesters of physical chemistry.

573 Chemical Kinetics and Transport (3) Time-dependent phenomena in chemistry: chemical kinetics, chemical dynamics, transport theory.
(DE) Prerequisite(s): 2 semesters of physical chemistry.
550 Polymer Chemistry (3) Fundamentals of polymer synthesis and characterization through application of organic and physical chemical principles. 
Recommended Background: 2 semesters of organic chemistry and 2 semesters of physical chemistry.

(DE) Prerequisite(s): 590 or equivalent.

555 Physical Chemistry of Polymers (3) Conformation of macromolecules, solution and bulk properties, rubber elasticity, kinetics of polymerization, polymer thermodynamics.
(DE) Prerequisite(s): 590 or equivalent.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/IP only.
Repeatability: May be repeated.

601 Chemistry Research Proposal (2) Preparation and oral defense of original written research proposal based on thorough survey of chemical literature.
Grading Restriction: Satisfactory/No Credit grading only.
Registration Permission: Consent of department head.

610 Selected Topics in Analytical Chemistry (3) Topics of current significance.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 510, 511, and 512 or consent of instructor.

630 Selected Topics in Inorganic Chemistry (3) Topics of current significance.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 530, 531, and 532 or consent of instructor.

650 Selected Topics in Organic Chemistry (3) Topics of current significance.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): Any two of 550, 551, 552 or consent of instructor.

670 Selected Topics in Physical Chemistry (3) Topics of current significance.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 570, 572, and 573 or consent of instructor.

690 Selected Topics in Polymer Chemistry (3) Topics of current significance.
Repeatability: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

691 Selected Topics in Thermal Analysis of Polymeric Materials (3) Topics of current significance.
Repeatability: May be repeated. Maximum 9 hours.
Credit Restriction: Maximum 3 hours may be applied toward the chemistry major.
Registration Permission: Consent of instructor.

Child and Family Studies (245)

500 Thesis (1-15)
Grading Restriction: P/IP only.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

505 Development of Interpersonal and Supervision Skills (3) Refinement of interpersonal skills needed to work with families and other professionals. Supervisory training in others’ skill development, active listening, self-disclosure, relationship building, and negotiation. Skills adapted for use among family members.

510 Theory in Human Development (3) Theoretical models of human development: cognitive, social learning, and ecological theory; analysis, synthesis, and discussion of historical and contemporary relevance of models; application of theory to research, prevention, intervention, and education; critical reading and evaluation of theory-based research on human development processes.

511 Survey of Research in Child Development (3) Survey of human development research from conception through adolescence. Classic and contemporary empirical literature in domains of physical, cognitive, language, social, emotional, and moral development; biological basis of development; cross-cultural perspectives.

(DE) Prerequisite(s): 510 or consent of instructor.

515 Children in Contemporary Society (3) Theory and research on environmental and developmental issues in contemporary family situations and educational environments for children from infancy through middle childhood. Implications for programs and policy.

522 Naturalistic Interventions for Parents and Teachers of Young Children (3) Common problems faced by parents and teachers; methods available to modify problem behavior.

525 Seminar on Play (3) Comparison and contrast of theoretical frameworks and research methodologies on play. Developmental perspective on play.

530 Families of Children with Disabilities (3) Developmental nature of families’ experiences in caring for handicapped children, especially during infancy and early childhood.

(DE) Prerequisite(s): 6 hours of graduate coursework in child and family studies.

545 Family Resource Management and Instruction (3) Design and implementation of family resource management curriculum for family life education audiences based on theory and application of managerial functioning in family settings; analysis of goals, resource use. Information systems, constraints within families. Observation and analysis of diverse family practices.
(DE) Prerequisite(s): 563.

550 Theory and Research in Family Studies (3) Research in various major topics in family studies and application of theoretical models to understanding research.

552 Diversity in Children and Families (3) Diversity in family configurations in contemporary U.S. society. Variations of family patterns by race, ethnicity, religion, and social class; social dynamics of family formation, composition, and patterning.

560 Human Sexuality (3) Theory, research, and family life education practice related to study of human sexuality: individual, relational, cognitive, emotional, biological, and developmental issues of human sexuality.

562 Families and Children Coping with Stress (3) Processes used by children and families during times of stress. Theoretical contributions to study of impact of developmental stressors and catastrophes on children and families.

563 Family Life Education Programs (3) Planning, implementing and evaluating programs in marital, parent-child, and family relationships, and parenthood education.

564 Practicum in Human Development or Family Studies I (3) School and community programs concerned with education for human development and family living.
Registration Permission: Consent of instructor.

565 Practicum in Human Development or Family Studies II (3) School and community programs concerned with education for human development and family living. Committee approved and supervised written project.

566 Approaches to Family Intervention and Counseling (3) Various theoretical approaches for family intervention and counseling. Structural, systemic, experiential and social learning schools of practice. Effects of intervention from perspective of their impact on family functioning and communication. (Same as Counselor Education 566.)
(DE) Prerequisite(s): 562.

567 Family Violence (3) Theory and research on initiation, maintenance and cessation of violent behaviors in intimate family contexts, and assessment of responses to violent family behaviors, perpetrators, victims, and family systems.

569 Action Research in Early Childhood Education (3) Principles and methodologies of action research for practitioners in early childhood and school settings.
Comment(s): Requires admission to the early childhood education graduate concentration in the College of Education, Health, and Human Sciences.

(DE) Prerequisite(s): 9 graduate hours in the major.
572 Professional Socialization (2) Behaviors and practices appropriate to a professional researcher and practitioner in the field of Child and Family Studies: understanding and working within the university environment, maintaining ethical standards, complying with human subjects protocols, making public presentations, and networking with peers.

574 Analysis of Teaching for Professional Development (1-2) Strategies to document and analyze effectiveness of teaching and of professional development. Study and application of various approaches. (DE) Prerequisite(s): 570. Repeatable: Not repeatable. May be taken once for 1-2 hours.

575 Professional Internship in Teaching (1-8) Intensive teaching and teaching-related experiences in professional settings in public schools. Enrollment limited to post-baccalaureate students in professional year program.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.
Comment(s): Requires admission to the teacher education program.

580 Special Topics in Human Development or Family Studies (1-3) Research, theory and current issues in child development or family studies: divorce, handicapped children, symbolic interaction, work and family, Piaget, mainstreaming children, theory and research in human sexuality, cognition.
Repeatable: May be repeated if topic differs. Maximum 9 hours.

581 Directed Study in Human Development or Family Studies (1-3) Individual learning experiences in specific topics in child development and early childhood education or family studies.
Repeatable: May be repeated if topic differs. Maximum 6 hours.

591 Clinical Studies (1-4) Group and individual seminar activities during full-time internship. Application and evaluation of professional core competencies. Completion and presentation of portfolio and analysis of teaching project.
Repeatable: Not repeatable. May be taken once for 1-4 hours.

600 Doctoral Research and Dissertation (3-15) Faculty-directed collaborative original research, including problem definition, instrumentation, data collection, data analysis, and report writing on a panel or sample of families and children in the Knox County area.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.

660 Experimental Design and Observation Methods (3) Experimental and quasi-experimental designs (group and time-series single-case) in natural and contrived settings as used in child and family research; observation methods used with these designs. (DE) Prerequisite(s): 570.

(DE) Prerequisite(s): 570 and Statistics 532 and 537.

680 Knox Area Family and Child Study (KAFACS) Research Practica I (3) Faculty-directed collaborative original research, including problem definition, instrumentation, data collection, data analysis, and report writing on a panel or sample of families and children in the Knox County area.
(DE) Prerequisite(s): 570.

681 Knox Area Family and Child Study (KAFACS) Research Practica II (3) Faculty-directed collaborative original research, including problem definition, instrumentation, data collection, data analysis, and report writing on a panel or sample of families and children in the Knox County area.
(DE) Prerequisite(s): 570.

691 Analytic Reasoning (3) Analysis of quantitative methods and measures used in human development and family research: validity, reliability, causality, and generalizability.
(DE) Prerequisite(s): 570, 9 hours of graduate coursework in child and family studies, and 6 hours graduate-level statistics.

Chinese (249)

431 Readings in Chinese Literature (3) (See Asian Languages 431.)

Cinema Studies (251)

400 Special Topics (3) Repeatable: May be repeated. Maximum 6 hours.

420 French Cinema (3) (See French 420.)

421 Topics in Italian Literature and Cinema (3) (See Italian 421.)

433 History of Film and Modern Art (3) (See Art Media Arts 433.)

434 Hispanic Culture Through Film (3) (See Spanish 434.)

435 Cinematography as Art (4) (See Art Media Arts 435.)

436 Video Art (4) (See Art Media Arts 436.)

465 Latin American Film and Culture (3) (See Spanish 465.)

469 Sexuality and Cinema (4) (See Women's Studies 469.)

482 Special Topics in Global Cinema (3) (See Modern Foreign Languages and Literatures 482.)

489 Special Topics in Film (3) (See English 489.)

510 Special Topics (3) Repeatable: May be repeated. Maximum 6 hours.

582 Special Topics in Global Cinema (3) (See Modern Foreign Languages and Literatures 582.)

Civil Engineering (254)

416 Hydrologic and Water Quality Engineering (3) (See Biosystems Engineering 416.)

451 Highway Engineering (3) Design, construction, operation, and maintenance of highway facilities; includes application of various engineering principles and techniques to process of planning, locating and design of highway facilities; covers both geometric and pavement design.
(DE) Prerequisite(s): 352.

453 Airport/Railroad Planning and Design (3) Airport master planning and railroad engineering. Runway configuration, airfield capacity, geometrics, and terminal layout and design. Railroad capacity, geometrics and system layout and design.
(DE) Prerequisite(s): 352.

472 Steel Design (3) Design of plate girders and composite beams; consideration of members subjected to combined stresses; design of a typical framed building including connections.
(DE) Prerequisite(s): 471.

474 Reinforced Concrete Design (3) Design of continuous beams, floor slabs, and columns with combined axial loads and bending, footings; and design for torsion.
(DE) Prerequisite(s): 471.

485 Principles of Hydrogeology (3) (See Geology 485)
490 Water Resources Engineering (3) Application of hydrologic/hydraulic principles for development of water resource project design and management of water resources; assessment of environmental impacts to surface water and groundwater; regulatory framework for water supply and water quality. (DE) Prerequisite(s): 390 and 395 or 416.

500 Thesis (1-15)
Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

510 Urban Systems: Engineering and Management (3) Various urban systems usually under responsibility of city manager and/or city engineer: streets, lighting, water, sewerage, refuse collection. Personnel management, finance, planning and public relations. Comment(s): Graduate standing or consent of instructor required.

521 Pavement Design (3) Empirical and theoretical based methods of pavement design and analysis, strengthening existing pavements, pavement distress and economical design alternatives. (DE) Prerequisite(s): 321 and 330.

522 Mix Design for Asphaltic and Portland-Cement Concrete (3) Aggregate properties and tests, asphalt binder properties and tests, mix design methods for asphaltic mixtures, hot-mix asphalt (HMA) mixture production and construction, Portland-cement concrete (PCC) mix design, additives and admixtures for PCC, special types of PCC, PCC production and construction. (DE) Prerequisite(s): 321.

525 Pavement Materials Characterization (3) Material modeling, laboratory test methods and characterization of unbound granular, stabilized base, hot-mix asphalt mixtures, Portland cement concrete, and other paving materials; performance prediction for flexible and rigid pavements. (DE) Prerequisite(s): 321 and 330.

531 Soil Stabilization (3) Mechanical stabilization of soils by compaction, drainage, and blending; chemical stabilization of soils with admixtures, waterproofing and modifying soils and additives. Reinforced earth and stabilization with geosynthetics. (DE) Prerequisite(s): 330.

532 Rock Mechanics and Rock Engineering (3) Engineering properties and characterization of rock and rock masses. Discontinuity analysis, stress and strain, keyblock theory. Applications to rock slopes, underground excavations, foundations and groundwater flow. (DE) Prerequisite(s): 330 or consent of instructor.

533 Advanced Laboratory and In situ Testing of Soil (3) Instruments for measurement of electrical signals, static and dynamic transducers, data acquisition and control, in situ measurement of stress, pore pressure, deformation, load deformation behavior (seismic methods, static methods), advanced laboratory shear strength and compressibility testing. Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): 330.

538 Finite Element Applications in Geotechnical Engineering (3) Application of finite element method to typical problems in geotechnical engineering. Confined and unconfined flow through porous media; two-dimensional stress and strain; two-dimensional elements; representation of nonlinear soil behavior with elastic and elastic-plastic models. Taught concurrently with 561. Credit Restriction: Students may not receive credit for both 538 and 561. (DE) Prerequisite(s): Coursework in soil behavior and matrix computation.

539 Geotechnology Seminar (1) Seminar topics in geotechnical and geological engineering. Research contributions and case histories by graduate students and engineers and scientists from surrounding community. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Comment(s): Enrollment limited to students with graduate standing. Registration Permission: Consent of advisor.

540 Construction Management I (3) Management and organization of heavy and building construction projects. (DE) Prerequisite(s): 442.

541 Construction Management II (3) Management organization of heavy and building construction projects. (DE) Prerequisite(s): 442.

543 Construction Estimating (3) Project costs, estimating and takeoff techniques, market cost conditions, and feasibility of design to cost. (DE) Prerequisite(s): 442.

550 Transportation Seminar (1) Seminar topics in transportation engineering. Research contributions and case histories by graduate students and engineers and scientists from the professional community. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 10 hours. Comment(s): Minimum student level – senior. Registration Permission: Consent of instructor.

551 Traffic Engineering: Characteristics (3) Characteristics of human, vehicle, and roadway in transportation system; microscopic and macroscopic traffic models; elements of transportation/highway safety. (DE) Prerequisite(s): 352.

552 Traffic Engineering: Operations (3) Operation and management of the surface transportation system including freeways and arterials; traffic control systems including traffic signal design and operation; traffic control devices including signing and markings. (DE) Prerequisite(s): 551.

553 Geometric Design and Layout of Roadways and Community Facilities (3) Functional and geometric design and rural and urban roads of all classes; subdivision layout; configuration of urban roads of all classes; techniques for access control; freeway interchanges and street intersections; and parking. (DE) Prerequisite(s): 451 or consent of instructor.

556 Traffic Accident Reconstruction (3) Data collection and analysis as basis for accident prevention on control programs; roadside hardware design and crash testing. (DE) Prerequisite(s): 452 or graduate standing.

557 Transportation Planning and Operations with Micro-Computer Applications (3) Hands-on laboratory and field experiences in computer and information technology for modeling and analysis of transportation problems. Contact Hour Distribution: Lecture and lab. (DE) Prerequisite(s): 551.

558 Planning and Transportation (3) Preparation of transportation as elements of comprehensive development plans. Analysis of relationship between various transportation modes and between transportation and community features. Use of planning process to establish existing travel patterns, modeling of demand, proposing alternatives and evaluation. (Same as Political Science 553.) Comment(s): Enrollment limited to students with graduate standing.

559 Intermodal Transportation (3) Technical and institutional aspects of intermodal transportation system for passengers and freight providing intercity and urban service; characteristics of individual modes and strategies for their coordination; functional design and operation of transport terminals including seaports and air cargo terminals; safety and security issues. Comment(s): Minimum student level – senior.

561 Finite Element Applications in Structural Engineering (3) Application of finite element method to typical problems in structural engineering. Truss, beam and plate elements; two-dimensional stress and strain; two-dimensional elements; representation of nonlinear material behavior with elastic and elastic-plastic models. Taught concurrently with 538. Credit Restriction: Students may not receive credit for both 561 and 538. (DE) Prerequisite(s): Structural analysis and matrix computation course.

562 Structural Systems (3) Structural system analysis and design; dead, live, wind, and earthquake loads on buildings; vertical and lateral load resisting systems; use of computers in analysis and design. (DE) Prerequisite(s): 471.
565 Structural Dynamics (3) Analysis of free and forced vibrations, and transient response of structures having many degrees of freedom; elastoplastic behavior considered for structural systems; earthquake design and response of structures.  
(DE) Prerequisite(s): 471.

571 Behavior of Steel Structures (3) Behavior of structural steel members due to static and fatigue loading; relation between research results and current specifications for design.  
(DE) Prerequisite(s): 471.

572 Fracture Analysis (3) (See Geology 572.)

573 Prestressed Concrete (3) Properties of prestressing materials; methods of pretensioning and posttensioning; analysis and design of simple and continuous beams and slabs.  
(DE) Prerequisite(s): 471.

574 Behavior of Reinforced Concrete Members (3) Moment-curvature and load-deflection relationships for reinforced concrete beams; combined bending and axial load; shear and torsion; relation between research results and specifications for design.  
(DE) Prerequisite(s): 471.

576 Masonry Design (3) Clay and concrete masonry materials; unreinforced masonry design; reinforced masonry design; seismic behavior of masonry structures.  
(DE) Prerequisite(s): 471.

580 Risk Analysis in Civil and Environmental Engineering (3) Applications of probability theory and statistics in civil engineering disciplines: structures, geotechnology, water resources, transportation, and environmental engineering.  
(DE) Prerequisite(s): Calculus II or consent of instructor.

590 Special Problems in Civil Engineering (3) Grading Restriction: Satisfactory/No Credit grading only.  
Registration Permission: Consent of instructor.  
Repeatability: May be repeated. Maximum 6 hours.  
Comment(s): Enrollment limited to students in non-thesis option only.

595 Special Topics (1-4) Problems and topics related to current developments in field.  
Repeatability: May be repeated.  
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.  
Repeatability: May be repeated.  
Registration Permission: Consent of instructor.

631 Soil Dynamics (3) Introductory and advanced topics: vibrations of elementary systems, foundations subjected to repeated and impulse loading, wave propagation theory and applications, and site response to dynamic loading.  
(DE) Prerequisite(s): 435.

651 Analysis Techniques for Transportation Systems I (3) Topics on mathematical, statistical, operations research, or computer science techniques that may be applied to modeling and analysis of transportation systems.  
Registration Permission: Consent of instructor.

652 Analysis Techniques for Transportation Systems II (3) Advanced topics of application of mathematical, statistical and computer science techniques in modeling and analysis of transportation systems.  
(DE) Prerequisite(s): 651.

671 Behavior of Steel Bridges and Buildings (3) Behavior, analysis and design of plate girders, columns, and composite members subjected to static and dynamic loading.  
(DE) Prerequisite(s): 571.

674 Behavior of Reinforced Concrete Beams and Slabs (3) Strength and behavior of statically indeterminate reinforced concrete beams and frames; limit analysis; behavior, analysis, and design of reinforced concrete slabs: yield-line theory, finite element solutions, and ACI Code Method.  
(DE) Prerequisite(s): 574.

680 Reliability of Constructed Systems (3) Development of safety factors and probability based design codes; Monte Carlo methods; constructed system reliability: evaluation of existing infrastructures.  
(DE) Prerequisite(s): 580 or consent of instructor.

691 Special Topics in Civil Engineering (3) Selected advanced problems of current interest.  
Repeatability: May be repeated.  
Registration Permission: Consent of instructor.

Classics (257)

401 Greek Poetry (3) Epic, lyric, drama. Authors vary.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 261.

402 Greek Prose (3) History, philosophy, and oratory. Authors vary.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 261.

405 Selected Readings from Greek Literature (3) For advanced students in Greek, the study of plays, historical writings, the poetry of ancient Greece in the original Greek.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 401 and 402 or consent of instructor.

406 Selected Readings from Greek Literature (3) For advanced students in Greek, the study of plays, historical writings, the poetry of ancient Greece in the original Greek.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 401 and 402 or consent of instructor.

414 Cicero and Techniques of Latin Prose Composition (3) For advanced students in Latin. Practice in prose composition, the writings of Cicero the model.  
(DE) Prerequisite(s): 351 and 352 or consent of instructor.

431 Selected Readings from Latin Literature (3) For advanced students in Latin. Oratory, historical writings, poetry of ancient Rome in the original Latin.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 351 and 352 or consent of instructor.

432 Selected Readings from Latin Literature (3) For advanced students in Latin. Oratory, historical writings, poetry of ancient Rome in the original Latin.  
Repeatability: May be repeated. Maximum 9 hours.  
(DE) Prerequisite(s): 351 and 352 or consent of instructor.

435 Medieval Latin (3) Selected readings from the Latin prose and poetry of medieval Europe.  
Registration Permission: Consent of instructor.

436 Cities and Sanctuaries of the Greek and Roman World (3) Major cities and sanctuaries in Greece, the Greek colonies, and the Roman Empire. Approach is archaeological, focusing on physical evidence – landscape, architecture and artifacts – as well as description of ancient authors. Cities include various types: planned and unplanned, seaports, caravan centers, government and commercial centers. The sanctuaries also vary in function including prophetic centers, athletic centers, theater centers, and healing centers. (Same as Anthropology 436.)

441 Special Topics in Classical Civilization (3) Topics in art, literature, religion, and society of Greece and Rome.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

442 Intensive Survey of the Archaeology of the Prehistoric Aegean (3) Survey of archaeology and art of the Aegean from the earliest human to the rise of the Greek polis in the 8th century BC. Highlights include Early Cycladic art, Minoan and Mycenaean complex societies, Thera, cultural interconnections with Egypt and the Near East, and the Trojan War. Emphasis on archeological and modern art historical approaches. (Same as Anthropology 442.)

443 Intensive Survey of the Archaeology of Greece (3) Survey of the archaeology and art of Greece and the Greek-speaking areas from the Orientalizing through Hellenistic periods (c. 700–30 BC). Developments in architecture, sculpture, and vase painting seen in the context of changes in society. Archaeological evidence for daily life, economy, and political institutions. (Same as Anthropology 443.)

444 Intensive Survey of the Archaeology of Etruria and Rome (3) Survey of the archaeology of Italy and the Roman world from prehistoric times to the fall of the Roman Empire (1000 BC–AD 476). Highlights are the rise and decline of Etruscan culture, the development of Roman architecture, art, and urban planning, art and architecture used for political propaganda, and Roman cosmopolitan culture during the Empire. (Same as Anthropology 444.)

562 Special Topics in Mediterranean Archaeology (3) Selected topics in archaeology or art of the prehistoric Aegean, historic Greece or Rome. Lectures, discussions, student presentations, and papers. (Same as Anthropology 562.)  
Repeatability: May be repeated. Maximum 9 hours.

565 Graduate Seminar in Ancient Mediterranean Civilization (3) Theoretical and practical issues in the civilizations of the prehistoric Aegean or historic Greece. Study and discussions conducted in seminar format. Emphasis on developing students’ skills in research and oral as well as written presentation. (Same as Anthropology 565.)  
Repeatability: May be repeated. Maximum 15 hours.
Communication and Information (248)

501 Orientation to Graduate Study (1) Overview of the communication and information discipline. Orientation to resources needed for successful graduate study.
Grading Restriction: Satisfactory/No Credit grading only.
Comment(s): Enrollment is limited to students admitted to the program.

540 Communication Theory (3) Overview of theory-building processes and theories in communication.
Comment(s): Enrollment is limited to students admitted to the program or by consent of the instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.

610 Perspectives on Communication and Information Knowledge and Research I (6) Examination of the paradigmatic underpinnings that drive research in positivistic traditions. Integrative study of the role of theory, various theoretical traditions, and methods within positivistic communication and information research. Emphasis on classic and contemporary literature and on conducting primary research across the various fields represented by the college.
Comment(s): Requires admission to the program or consent of instructor.

615 Perspectives on Communication and Information Knowledge and Research II (6) Examination of the paradigmatic underpinnings that drive research in interpretivist traditions. Integrative study of the role of theory, various theoretical traditions, and methods within interpretivist communication and information research. Emphasis on classic and contemporary literature and on conducting primary research across the various fields represented by the college.
(DE) Prerequisite(s): 610.
Registration Permission: Consent of instructor.

620 Seminar in Communication and Information Education (1-3) Topics examining the role and scope of communication and information teaching and professional development.
Grading Restriction: P/NP only.
Comment(s): Requires admission to the program or consent of instructor.

630 Theory and Literature in Communication and Information Disciplines (3) Topics covering specific areas in communication and information. Theory intensive.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 610 and 615.
Registration Permission: Consent of instructor.

640 Advanced Communication and Information Research Methods (3) Topics in communication and information research design, methodology, analysis. Methods intensive.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 610 and 615.
Registration Permission: Consent of instructor.

Communication Studies (250)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

505 Human Communication Research Methods (3) Understanding of wide array of data collection and analysis procedures used in human communication research.

520 Survey of Interpersonal Communication (3) Identifies and addresses theory and research in human communication.

525 Survey of Interpersonal Health Communication (3) Identifies and addresses theories and research concerning how people communicate about health.

540 Survey of Organizational and Team Communication (3) Identifies and addresses theories and research in human interactions in organizations and teams.

560 Special Topics in Communication Studies (3) Contemporary Topics.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

580 Survey of Public Communication (3) Identifies and addresses theories and research in public discourse.

590 Project (3) Capstone project under guidance of faculty. Application of principles from previous coursework.
Grading Restriction: Satisfactory/No Credit grading only.

591 Foreign Study (1-15) Independent study outside U.S. Prior to departure student must have plan of study approved by department head and supervising faculty member. Credit given only upon fulfilling all requirements set by department.
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study/Internship (1-6) Independent study outside traditional classroom setting; community involvement and/or work experiences. Credit given only upon fulfilling all requirements set by department.
Repeatability: May be repeated. Maximum 6 hours.

593 Independent Study (1-6) Independent study by individual under direction of faculty member.
Comment(s): Approval of faculty member and department must be obtained prior to registration.

Comparative and Experimental Medicine – Graduate School of Medicine (262)
Participating departments include Anesthesia, Medicine, Medical Genetics, Obstetrics and Gynecology, Pathology, Pediatrics, Radiology, and Surgery.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
Comment(s): Open to all graduate students.
Registration Permission: Consent of instructor.

541 Cellular and Molecular Basis of Disease (4) Disease at molecular level. Changes in molecular events in cells that lead to disease and occur as result of disease. Correlation with clinical and pathological states.
(DE) Prerequisite(s): Biochemistry and Cellular and Molecular Biology 410 and 419.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Journal Club in Comparative and Experimental Medicine (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

610 Medical Biology Seminar (1) Invited speakers. Topics posted in advance.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.

611 Advanced Topics in Medical Science (1-3) New developments in biological research applicable to clinical medicine.
Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Primarily for doctoral candidates in comparative and experimental medicine.
Registration Permission: Consent of instructor.
Comparative and Experimental Medicine – Veterinary Medicine (261)
Participating departments include Animal Science, Comparative Medicine, microbiology, Pathology, Large Animal Clinical Sciences, and Small Animal Clinical Sciences. Several faculty in the Department of microbiology hold joint appointments in the College of Veterinary Medicine. See Microbiology for additional courses.

500 Thesis (1-15)
Grading Restriction: P/INP only.
Repeatable: May be repeated.

501 Special Topics in Comparative and Experimental Medicine (1-6)
Specialized experience in comparative and experimental medicine.
Repeatable: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Predictive Toxicology (3) Principles and techniques of predictive toxicity: structure-activity relationships, expert systems, neural nets, and molecular similarity.

505 Laboratory Animal Care and Use (2) Review of basic laboratory animal care and use as a prerequisite to conducting research using animals. Compliance issues and regulations.

Contact Hour Distribution: 1 hour and 2 labs.
(De) Prerequisite(s): Coursework in embryology, parasitology, and physiology and/or consent of instructor.

530 Wildlife Diseases (2) (See Wildlife and Fisheries Science 530.)

561 Pharmacology (4) Principles of pharmacokinetics and pharmacodynamics properties of drugs: mode of action, pharmacologic effects, chemical and physical properties, metabolism, toxicities, important idiosyncrasies, and clinical applications.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (1-15)
Grading Restriction: P/INP only.
Repeatable: May be repeated.

602 Surgical Pathology (1-2) Examination of biopsy specimens and interpretation of observations. Preparation of specimens for sectioning.
Repeatable: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

603 Correlative Post-Mortem Pathology (1-3) Gross and microscopic post-mortem examination of animals. Correlative interpretation of clinical diseases and lesions.
Repeatable: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

604 Veterinary Pathology Seminar (1) Microscopic slides and transparency of lesions from cases examined by pathologists, residents, and graduate students. Interpretation of observations.
Repeatable: May be repeated. Maximum 4 hours.
Registration Permission: Consent of instructor.

605 Pathobiology Seminar (1) Subjects of current interest in biomedical science. Students present one seminar per term enrolled.
Contact Hour Distribution: Class meets once monthly.
Repeatable: May be repeated. Maximum 4 hours.

606 Clinical Epidemiology (3) Theory and principles of design implementation and analysis of clinical research. Lab: appraisal of biomedical literature and design of proposal for clinical research project.
Registration Permission: Consent of instructor.

607 Diagnosis and Pathogenesis of Virus Diseases of Domestic Animals (3) Advanced study of virus diseases important to domestic animals: virus biology, pathogenesis, pathology and diagnosis technical training in virus diseases diagnosis.
Contact Hour Distribution: 2 hours and 1 lab.
Registration Permission: Consent of instructor.

608 Descriptive and Applied Epidemiology (3) Principles of epidemiology as well as historic and modern applications to human and animal diseases. Host-agent relationships, measurement of disease frequency, disease monitoring and control in human and animal populations, field investigations, animal health economics and production.
Registration Permission: Consent of instructor.

609 Mechanisms of Disease (4) Advanced topics in pathobiology and mechanisms of disease: pathophysiology, cellular degeneration, inflammation, immunopathology, hemostasis. Principal biochemical and morphologic responses of various cells, tissues, and organs to injury and other metabolic derangements. Selected contemporary topics from current literature and textbooks.
Registration Permission: Consent of instructor.

610 Advanced Topics in Comparative and Experimental Medicine (1-3) Specialized in-depth experience in various disciplines. Current and future research methodology, recent advanced in instrumentation in analytical techniques for comparative medicine.
Repeatable: May be repeated. Maximum 12 hours.
Registration Permission: Consent of instructor.

611 Journal Club in Emerging Infectious Diseases (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.

612 Journal Club in Pathobiology (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.

613 Journal Club in Large Animal Clinical Sciences (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.
Comment(s): DVM or equivalent degree.

614 Journal Club in Small Animal Clinical Sciences (1) Readings and discussions based on current literature.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatable: May be repeated. Maximum 12 hours.
Comment(s): DVM or equivalent degree.

651 Advanced Topics in Animal Anatomy (1-4) (See Animal Science 651.)

652 Disorders of the Endocrine System (2) (See Animal Science 652.)

Comparative Literature (260)

401 Special Topics in Comparative Literature (3) Repeatable: May be repeated. Maximum 9 hours.

402 Special Topics in Comparative Literature (3) Content varies. Repeatable: May be repeated. Maximum 9 hours.

452 Modern Drama, 1880-1945 (3) (See English 452.)

454 Twentieth-Century International Novel (3) (See English 454.)

510 Special Topics (3) Repeatable: May be repeated. Maximum 6 hours.

Computer Science (266)

420 Advanced Topics in Machine Intelligence (3) Topics such as search, learning, expert systems, neural networks, pattern recognition, and natural language processing. Emphasis on faculty research.
Repeatable: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): Completion of core curriculum or consent of instructor.

430 Advanced Topics in Hardware Systems (3) Topics such as architecture, parallel processors, microprogramming, networks, and communications. Emphasis on faculty research.
Repeatable: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): Completion of core curriculum or consent of instructor.

460 Advanced Topics in Software Systems (3) Topics such as operating systems, compilers, parallel computation, software engineering, database systems, and programming languages. Emphasis on faculty research.
Repeatable: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): Completion of core curriculum or consent of instructor.

470 Advanced Topics in Scientific Computation (3) Topics such as numerical methods, supercomputers and computer modeling and simulation of physical systems. Emphasis on faculty research.
Repeatable: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): Completion of core curriculum or consent of instructor.

471 Numerical Analysis (3) (See Mathematics 471.)

472 Numerical Algebra (3) (See Mathematics 472.)

480 Advanced Topics in Theoretical Computer Science (3) Topics such as theory of computation, complexity theory, formal languages and graph theory and its applications. Emphasis on faculty research.
Repeatable: May be repeated. Maximum 9 hours.
(De) Prerequisite(s): Completion of core curriculum or consent of instructor.
494 Special Topics in Computer Science (1-3)
   Repeatability: May be repeated. Maximum 9 hours.

500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

522 Cybernetics (3) Various functions in living systems and their actual or potential realization in computers.
   (DE) Prerequisite(s): Coursework in discrete structures.

525 Software Engineering (3) Survey of key ideas in software engineering: formal methods, tools, testing, reliability, structured design and development, metrics, management, and history of the field.

530 Computer Systems Organization (3) Architectures and systems organization for serial and parallel machines.
   (DE) Prerequisite(s): Coursework in architecture or machine organization.

541 Database Management Systems (3) Data model theory, optimization, and normalization; intelligent database systems; comparison of implementations; analysis of distributed and networked databases. Techniques for evaluation of performance, integrity, security and reliability. Recommended Background: Coursework in discrete structures.

551 Pattern Analysis (3) Decision-theoretic and structural pattern analysis. Deterministic and statistical decision rules, feature extraction and representation; syntactic and semantic methods, relational models.
   (DE) Prerequisite(s): Coursework in discrete structures and probability or statistics.

552 Image Analysis (3) Enhancement and restoration of digital images. 2-D transforms. Segmentation and description. Computational procedures for image reconstruction.
   (DE) Prerequisite(s): 1 year of calculus and coursework in discrete structures.

560 Software Systems (3) Design and implementation of compilers, software systems; optimization, run-time storage administration. Software system design issues; description, structure and design of contemporary software systems. Recommended Background: Coursework in systems programming.

571 Numerical Mathematics (3) (See Mathematics 571.)

572 Numerical Mathematics (3) (See Mathematics 572.)

574 Finite Element Methods (3) (See Mathematics 574.)

575 Matrix Theory and Techniques in Numerical Analysis (3) (See Mathematics 575.)

576 Sparse Matrix Computations (3) Solution of large sparse linear systems: graph models, reordering techniques, symbolic factorizations, data structures, numerical algorithms, complexity analyses, parallel algorithms.
   (DE) Prerequisite(s): Numerical linear algebra course.

580 Foundations (3) Foundations of computer science, including Turing machines, computability and computational complexity.
   (DE) Prerequisite(s): Automata theory course.

581 Algorithms (3) Analysis of algorithms and relevance of analysis to design of efficient computer algorithms. Sorting, searching, graph algorithms, pattern matching, dynamic programming, efficient approximation algorithms.
   (DE) Prerequisite(s): Fundamental algorithms course.

592 Off-campus Study (1-6)
   Repeatability: May be repeated. Maximum 6 hours.

593 Independent Study (1-15)
   Repeatability: May be repeated. Maximum 45 hours.

594 Special Topics in Computer Science (1-3)
   Repeatability: May be repeated. Maximum 45 hours.

600 Doctoral Research and Dissertation (3-15) P/NP only.
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

620 Advanced Topics in Intelligent Systems (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

650 Advanced Topics in Pattern/Image Analysis (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

660 Advanced Topics in Software Systems (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

670 Advanced Topics in Scientific Computing (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

680 Advanced Topics in Theory and Foundations (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

690 Advanced Topics in Computer Science (1-6)
   Repeatability: May be repeated. Maximum 45 hours.
   Registration Permission: Consent of instructor.

Counselor Education (255)

410 Sex Role Development: Implications for Education and Counseling (3) Theories and research concerning the development of sexual role and its relevance in educational and counseling settings. (Same as Women’s Studies 410.)

431 Personality and Mental Health (3) Perspectives of mental health with applications to education and other social institutions. (Same as Educational Psychology 431.)

480 Interviewing and Counseling Techniques (3) An introduction to basic helping skills necessary to the preparation of counselors, teachers, and others involved in human service delivery.

500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated.
   Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 9 hours.

504 Special Topics (1-3) Instructor-initiated course offered at convenience of academic unit on topics of current interest.
   Grading Restriction: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated. Maximum 15 hours.

518 Educational Specialist Research and Thesis (3)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

521 Mental Health Consultation (3) Intended for advanced students in the helping professions, especially mental health counseling. Its main goal is to prepare students for providing mental health consultation and collaboration in the field.

525 Formal Measurement in Education and Counseling (3) Principles of test construction and item analysis. Survey of standardized tests of intelligence, achievement, aptitude, vocational interest, attitudes and personality.

535 Ethical, Legal, and Professional Issues in Counseling (3) Professional practice issues in school and community counseling and related fields: education, research, standards of practice, credentialing, and policy. Comment(s): Requires admission to the counseling program or consent of instructor.

550 Foundations in School Counseling (3) History, philosophy, professional standards, counselor role in relation to school staff and mental health professionals, and ethics of profession.

551 Theory and Practice of Counseling (3) Philosophical bases of helping relationships; development of counselor and client self-awareness; counseling theory/techniques.

552 Career Development: Vocational Theory, Research and Practice (3) Relationship of vocational theory, career development research, and societal factors to life career roles.

553 Career and Educational Information Systems and Resources (3) Use of print and non-print materials; computer-based systems, for career and educational planning. Internet access account is required.
   (DE) Prerequisite(s): 552 or consent of instructor.

554 Group Dynamics and Methods (3) Theory and types of groups, descriptions of group practices, methods, dynamics, and facilitative skills, supervision of leadership skills. (Same as Psychology 567.)
555 Practicum in Counseling (3) Supervised practice and application of counseling skills with individual clients. (Same as Psychology 569.)
Repeatability: May be repeated. Maximum 9 hours.
(DE) Prerequisite(s): 431, 525, and 551.
Comment(s): Admission to program is required.
Registration Permission: Consent of instructor.

556 Orientation to Mental Health Counseling (3) Mental health counseling as profession: professional organizations, work settings, code of ethics, certification requirements, and role identity.

558 Internship in School Counseling (1-6) Supervised post-practicum employment at academic unit approved site.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 550.
Registration Permission: Consent of instructor.

559 Internship in Mental Health Counseling (1-6) Supervised post-practicum employment at academic unit approved human services agency.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 555.
Comment(s): Admission to mental health counseling program required.
Registration Permission: Consent of instructor.

560 Development and Operation of School Counseling Programs (3) Management of comprehensive school counseling programs to include needs assessment, program goals, resource identification, evaluations, and use of computer-based program management software.
(DE) Prerequisite(s): 550.

565 Facilitation of Technical Task Groups (3) Technical and social aspects of group dynamics in context of technical task groups. Application of counseling techniques to facilitation of workplace teams.
(DE) Prerequisite(s): 551 and 554 or consent of instructor.

566 Approaches to Family Intervention and Counseling (3) (See Child and Family Studies 566.)

570 Cross-Cultural Counseling: Theory and Research (3) Theory and research on issues and problems in counseling of clients from different cultural backgrounds in U.S. and abroad. (Same as Psychology 574.)

580 Case Management Process in Mental Health Counseling (3) Introduction and application of knowledge and skills of the case management process: assessment, planning, and service provision/coordination.

585 Seminar in Gerontology (1) (See Health 585.)

593 Independent Study (1-3)
Grading Restriction: P/No P only.
Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/No P only.
Repeatability: May be repeated.

601 Professional Seminar (1) (See Educational Psychology 601.)

602 Directed Research (1-3) Instructor- or student-initiated group investigation of empirical and theoretical problems in educational and counseling psychology.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

604 Special Topics (1-3) Instructor-initiated courses offered at convenience of academic unit on topics of interest.
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

625 Advanced Study in Personality (3) (See Psychology 625.)

635 Ethical, Legal, and Professional Issues in Psychology (3) (See Psychology 635.)

650 Seminar in Counselor Education (3) Professional issues related to role and function of counselor educator.
Comment(s): Admission to the doctoral program in counselor education required.

651 Reality Therapy and Brief Counseling (3) Seminar in theory and practice of reality therapy and brief counseling for advanced graduate study.
(DE) Prerequisite(s): 551 or consent of instructor.

655 Practicum in Counselor Education (3) Supervised practice and application of counseling skills with clients.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Admission to counselor education program required.
Registration Permission: Consent of instructor.

659 Internship in Counselor Education (1-6) Supervised experience in departmentally approved counseling, teaching, supervision, or consultation internship sites.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.
Comment(s): Admission to program in counselor education required.
Registration Permission: Consent of instructor.

660 Advanced Theory and Practice of Counseling (3) In-depth exploration of theories of human nature and the practice of counseling.
Comment(s): Requires admission to PhD program or consent of instructor.

665 Group and Systems Theory and Interventions (3) Exploration of group and family systems theory, preparation as practitioners in facilitation of counseling and task groups, and examination of counseling and psychotherapy interventions applicable to group dynamics.
Comment(s): Requires admission to PhD program or consent of instructor.

670 Theory and Practice of Counseling Supervision and Consultation (3) Theory of counseling supervision and consultation, supervision of entry-level counselors, and agency consultation.
Comment(s): Requires admission to PhD program or consent of instructor.

671 Personality and Vocational Assessment (3) (See Psychology 667.)

675 Theory and Practice of University Teaching in Counselor Education (3) Emphasis on teaching and learning theories and classroom applications in the preparation of future mental health, school, and rehabilitation counselors.
Comment(s): Requires admission to the PhD program or consent of instructor.

693 Independent Study (1-3)
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

Cultural Studies in Education (271)

512 History of Women's Education (3) Historical study of the institutions and philosophies of education that have shaped the education of girls and women in the United States. (Same as Women's Studies 512.)

526 Philosophy of Education (3) Description, interpretation, and critique of philosophical/theoretical arguments: truths, knowledge, and values in relation to education.

539 Development of Education Thought (3) Historic and philosophical approach to lives and writing of influential educators: Plato, Quintillian, Comenius, Rosseau, Pestalozzi, Froebel, Dewey.

544 Survey of Contemporary Philosophies in Education (3) Current debates within various philosophical fields of study related to education.

545 Educational Sociology (3) Sociological analysis of American education system. Controversial social issues that affect educational system and potential solutions offered by various programs.
Comment(s): Open to juniors, seniors, and graduate students.

548 Transforming Critical Thinking: Constructive Thinking and Educational Implications (3) Critique and transformation of critical thinking to more holistic, relational, and aesthetic model of multicultural and gender-sensitive constructive thinking: confronting power and addressing educational implications. (Same as Women's Studies 548.)

549 Topics in International Education (3) Historical, philosophical, and sociological foundations; selected nations and their cultures.
Repeatability: May be repeated.

550 Multicultural Education (3) Introduction to history, varieties, theory and practice of multiculturalism and multicultural education. Addresses the promotion and critique of multicultural education and related concepts in theory and educational practice.

560 Introduction to Qualitative Research in Education (3) Fundamentals of qualitative research methods and development of skills needed for qualitative research proposals. Overview of qualitative research methods: ethnography, case study, historiography, biography, oral and life history. Critical reading and evaluation of qualitative research studies.

561 Qualitative Research in Education Settings (3) Implementing and writing qualitative studies in educational settings. Qualitative data collection, analysis, and report writing.
(DE) Prerequisite(s): 560 or equivalent.

590 Cultural Studies Seminar (2) Two-semester sequence (fall and spring) combining discussion about cultural studies: popular culture, interdisciplinary work, social justice issues. Presentations, videos, readings.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 4 hours.
591 Issues in Cultural Studies (3) Combination of theoretical readings in cultural studies and service learning for social justice project. Discussion of interdisciplinary, social justice and activism. Links between theory and practice of cultural studies.

592 Social Justice and Education (3) Social justice issues: education practices. Social justice, moral commitments to others in educational settings, and equal opportunity to acquire social goods and benefits.

607 Advanced Seminar in the Social Foundations of Education (3) Interdisciplinary, team-taught seminar. Readings selected by faculty participants from classic studies and current periodical literature in anthropology, sociology, history, and philosophy of education. Part of the general core for the PhD program.

Comment(s): For doctoral students in education only.

608 Seminar in Philosophy of Education (3) Selected philosophical issues in education.

Repeatability: May be repeated with consent of instructor.

(DE) Prerequisite(s): 2 courses in the history or philosophy of education.

609 Feminist Theories and Education (3) Theoretical research currently presented by feminist scholars questioning traditional (male) theories; application of these feminist theories to current feminist work in education. (Same as Women’s Studies 609.)

625 Seminar in History of Education (3) Selected historical issues in education.

Repeatability: May be repeated with consent of instructor.

(DE) Prerequisite(s): 2 courses in the history or philosophy of education.

(DE) Prerequisite(s): 560.

Curriculum, Educational Research, and Evaluation (256)

520 Techniques of Research in Education (3) Study and application.

532 Instructional Research: Analysis and Application (3) Analysis of research on instruction. Translation and application of research findings into instructional performance.

534 Program Evaluation in Education (3) Issues and practices in planning and conducting program and curriculum evaluation in variety of settings. Fundamentals of design, measurement, philosophy, ethics, and underlying values; proper role and use of evaluation in educational organizations. (Same as Educational Administration 534; Higher Education Administration 534.)

Registration Permission: Consent of instructor.

541 The High School Curriculum (3) Identification of problems associated with curriculum study, Tennessee curriculum framework, assessment of trends in programs of local, regional, and national significance.

552 School Law for Educators (3) Case and statutory material for public school educators; problems concerning law and public education.

557 The Junior High and Middle School Curriculum (3) Curriculum and instructional design for junior high and middle school. Characteristics of students, curriculum designs, instructional patterns, and organization and structure of junior high and middle school.

558 Curriculum Planning and Development (3) Foundations and principles of curriculum planning and development. Historical analysis of curriculum theory, principles of planning and development, and classroom applications for improved learning.

560 Student Assessment (3) Processes for assessing and reporting student progress; interpretation and use of available assessment data. Methods of assessment other than tests and measurements: portfolios, performance tasks, exhibitions.

580 Techniques for Research in Curriculum and Instruction (3) Fundamentals of research methodology applicable to curriculum, instruction, and other areas of educational inquiry. Critical reading of research and development of skills needed for proposal development.

588 Instructional Theory and Design (3) Relationship of curriculum to instruction; examination of instructional and related learning theories; instructional models and teaching styles.

604 Seminar in Curriculum and Instruction (1) Required two consecutive semesters.

Grading Restriction: Satisfactory/No Credit grading only.

Repeatability: May be repeated.

623 Using Research for Curriculum Improvement (3) Research methodology; application to descriptive/survey curricular materials. Critical reading of research, methodological development in descriptive and survey areas.

630 Seminar in Assessment and Evaluation (3) Trends and issues in student/client assessment, personnel evaluation, and program evaluation; and examination of current state, regional, and national assessment and evaluation projects.

Registration Permission: Consent of instructor.

631 Application of Assessment/Evaluation (3) Systems designs, instruments, procedures, reporting formats used in personnel and program evaluation and student assessment; analysis, synthesis, and interpretation of data sets.

(DE) Prerequisite(s): 630.

672 Interpretation and Application of Curriculum and Instruction Research (3) Analysis of research in curriculum and instruction, newer methodologies and strategies. Utilization of research to improve curriculum and instruction practice, application of research principles in context of specific professional assignments.

Registration Permission: Consent of instructor.

674 Designing and Implementing Personnel Assessments (3) Models and methods for assessing performance of educators and other professionals. Critique of systems currently in use and design of evaluation system.

675 Curriculum Evaluation: Theory and Application (3) Evaluation trends and issues. Theoretical frameworks to design evaluation studies for various educational programs.

676 Curriculum Theory (3) Influential curriculum theories and approaches, implications for structure and design of educational programs. Nature and function of theory; theory building activities.

(DE) Prerequisite(s): 568.

Dance (274)

415 Teaching Creative Dance for Children (2) Theory, methods, materials, and practical experience in presentation and integration of creative dance in grades K-6. A mini-teaching experience is involved in this class.

480 Dance History through the 19th Century (3) Survey of the dance of various societies and cultures from pre-history through the 19th century.

480 Dance in the 20th Century (3) Survey of the history and philosophy of dance in the 20th century.

495 Dance Pedagogy (3) Principles and methods of teaching dance with practical application in a mini-teaching experience. Different level of performance is expected of those registered for graduate credit.

Comment(s): Upper-class or graduate standing required.

Registration Permission: Consent of instructor.

510 Ballet: Level IV (2) Instruction and practice in advanced classical ballet techniques.

Repeatability: May be repeated. Maximum 8 hours.

Registration Permission: Consent of instructor.

520 Jazz: Level IV (2) Instruction and practice in advanced jazz styles and techniques.

Repeatability: May be repeated. Maximum 8 hours.

Registration Permission: Consent of instructor.

530 Modern: Level IV (2) Instruction and practice in advanced modern dance techniques.

Repeatability: May be repeated. Maximum 8 hours.

Registration Permission: Consent of instructor.

550 Dance Composition IV (3) Independent study applying choreographic and production skills, culminating in presentation of two works.

(DE) Prerequisite(s): 440 and 445 or consent of instructor.

593 Independent Study (1-3) Grading Restriction(s): Satisfactory/No Credit or letter grade.

Repeatability: May be repeated. Maximum 12 hours.

EcoLOGY and Evolutionary Biology (278)

410 Plant Evolutionary Morphology (4) Morphology, development, natural history, and evolution of fungi, cyanobacteria, non-vascular plants (algae and bryophytes), and vascular plants (ferns, fern allies, gymnosperms, and flowering plants).

(DE) Prerequisite(s): Biology 102 or 110 or 130.

411 Minicourse in Ecology and Evolutionary Biology (2) Selected advanced topics in ecology, behavior, and evolutionary biology, concentrated in time and subject matter. Consult departmental listing for topics offered.

Repeatability: May be repeated. Maximum 4 hours.

Credit Restriction(s): Maximum 4 hours may be applied toward departmental major.

Comment(s): Prerequisites as announced.
412 Minicourse in Ecology and Evolutionary Biology (2) Selected advanced topics in ecology, behavior, and evolutionary biology, concentrated in time and subject matter. Consult departmental listing for topics offered. 
Credit Restriction(s): Maximum 4 hours.
Comment(s): Prerequisites as announced.

414 Plant Anatomy (3) Cells, tissues and organs, their development in vegetative and reproductive structures of vascular plants – emphasis on seed plants.
(DE) Prerequisite(s): Biology 111 and 112 or Biology 130 and 140.

419 Science as Method (3) The dynamic process of scientific discovery, as opposed to a static body of knowledge. Topics included will be comparisons of science, nonscience, pseudoscience, successful and unsuccessful science, the ethics of scientific research, and the philosophical aspects of the scientific enterprise. Implications for teaching and writing about science will be covered. (Same as Philosophy 419.)
(DE) Prerequisite(s): Introductory science or philosophy course or consent of instructor.

421 Community Ecology (3) Interactions between individuals, species, communities, and environments – including competition, coexistence, predation, herbivory; causes and consequences of biological diversity; biological invasions; application of advanced sampling and analysis techniques; local to global environmental change. Includes periodic field trips or laboratories.
(DE) Prerequisite(s): Biology 250 or equivalent.

433 Plant Ecology (3) Interactions between individuals, species, communities and their environments. Circulation of energy and matter in ecosystems. Includes weekly field trips or laboratory periods and at least two weekend field trips.
(DE) Prerequisite(s): 330 or equivalent.

446 Introduction to Oceanography (4) Basic oceanography: including physical, chemical, geological and biological processes and patterns. Emphasis on oceanic subsystems such as upwellings, polar oceans, hydrothermal vents, gyres, coral reefs, estuaries, and coastal regions. Field trip to coast required.
(DE) Prerequisite(s): General biology and Chemistry 120 and 130.
Recommended Background: Biology 250.

450 Comparative Animal Behavior (3) Principles and methods of ethology: emphasis on ecological, developmental, physiological, and evolutionary aspects. (Same as Psychology 450.)

459 Comparative Animal Behavior Laboratory (3) Introduction to observational and experimental research in ethology. (Same as Psychology 459.)
(DE) Corequisite(s): 450.

Contact Hour Distribution: 3 hours and 2 hours lab/discussion.
(DE) Prerequisite(s): 250 or consent of instructor.

461 Special Topics in Organismal Biology (3) Evolution, ecology, biogeography, classification, and anatomy of selected animal and plant taxa. Repeatability: May be repeated if topic differs. Maximum 12 hours.
(DE) Prerequisite(s): Biology 250 or consent of instructor.

465 Evolutionary and Functional Vertebrate Morphology (4) A detailed study of the structure and function of the vertebrates. Analysis of evolutionary patterns of vertebrates using the comparative method and data from anatomy, developmental biology and functional morphology within a phylogenetic context. Laboratory requires intensive dissection to learn vertebrate anatomy, evolutionary trends and specializations.
Contact Hour Distribution: 2 hours and 2 labs.
(DE) Prerequisite(s): Biology 250 or consent of instructor.
Recommended Background: Physics 221.

470 Aquatic Ecology (3) Introduction to the physicochemical nature of inland waters with description of biotic communities and their interrelationships.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): Chemistry 120 and 130 and Biology 250.

474 Ichthyology (4) Evolution, classification, collection and identification, distribution and biology of fishes with emphasis on freshwater fauna of Eastern North America.
Contact Hour Distribution: 2 hours and 2 lab.
(DE) Prerequisite(s): Biology 250 or consent of instructor.

484 Conservation Biology (3) Application of principles and techniques of ecological research to conservation of biological diversity at genetic, population, community, and ecosystem levels.
(DE) Prerequisite(s): Biology 240 and 250.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Ecology and Evolutionary Biology Seminar (1) Advanced topics in ecology, behavior, and evolutionary biology. Required of all first- and second-year graduate students. Senior departmental majors are encouraged to enroll.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 4 hours.

504 Special Topics (1-3) Selected directed readings or special course in topics of current interest. Consult departmental listing for offerings.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated with consent of instructor. Maximum 9 hours.

508 Introduction to Faculty Research (1) Orientation of new graduate students to current research of departmental graduate faculty. Required of all first-year students.
Grading Restriction: Satisfactory/No Credit grading only.
Comment(s): Admission to program in ecology and evolutionary biology required.

509 Foundations: Readings in Ecology (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

511 Foundations: Readings in Evolution (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

512 Foundations: Readings in Conservation Biology (2) Readings and discussion of classic papers in field.

514 Foundations: Readings in Mathematical and Computational Ecology (2) Readings and discussion of classic papers in field.

515 Foundations: Readings in Environmental Toxicology (1-2) Readings and discussion of classic papers in field.
Repeatability: Not repeatable. May be taken once for 1-2 hours.

530 Advanced Taxonomy of Flowering Plants (3) Evolution and classification of families of angiosperms, local flora.
Contact Hour Distribution: 2 hours lecture and 1 lab.
(DE) Prerequisite(s): 330 or equivalent.

535 Ecology and Development in the Amazon (3) Natural history, ecosystem diversity and function, and opportunities for sustainable economic development in the Amazon Basin. Includes a field trip of 1-10 days to Manaus, Brazil.

540 Insect Taxonomy I: Major Orders (3) Survey of classification of major orders of insects, with practical experience in identification of insects at family level.
Contact Hour Distribution: 4 hours combined lecture/lab.
Registration Permission: Consent of instructor.

541 Insect Taxonomy II: Minor Orders (3) Survey of classification of minor orders of insects, with practical experience in identification of insects at family level.
Contact Hour Distribution: 4 hours combined lecture/lab.
(DE) Prerequisite(s): 540 or consent of instructor.

543 Aquatic Insects (3) Taxonomy and biology of aquatic insects; immature forms.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): Consent of instructor.

545 Advanced Animal Behavior (3) Second-level course in ethology, stressing evolution, genetics, physiology, ecology, and human behavior.
(Same as Psychology 545.)
(DE) Prerequisite(s): 450 or equivalent.

546 Ethological Psychology (3) (See Psychology 546.)

547 Conceptual Foundations of Evolution and Behavior (3) (See Psychology 547.)

556 Ice-Age Environments and Global Climate Change (3) Glacial-interglacial climatic cycles and dynamic responses of landscapes within glacial, periglacial, and non-glacial environments across North America over past 2.5 million years. (Same as Geology 556.)

557 Quaternary Ecology (3) Perturbation, process, and pattern within Quaternary ecosystems; climatic change and vegetational response during last 2.5 million years. (Same as Geology 557.)
Registration Permission: Consent of instructor.
560 Biometry (3) Statistical applications in biological research.  
(DE) Prerequisite(s): Statistics course or consent of instructor.

561 Environmental Toxicology (3) Basic concepts in toxicology; molecular toxicology and detoxification; reproductive toxicology; mutagenesis, teratogenesis, carcinogenesis, pathologic changes and environmental impact.  
(Same as Biochemistry and Cellular and Molecular Biology 561.)  
(DE) Prerequisite(s): Biochemistry and Cellular and Molecular Biology 410 and an organic chemistry course or consent of instructor.

575 Ecological Genetics (3) Genetics of natural populations, using both single-locus and quantitative genetical approaches.  
(DE) Prerequisite(s): Statistics course.

577 Landscape Ecology (3) Ecological structure, function, and change through time of landscape mosaics: quantitative measures of landscape heterogeneity; responses of organisms to changes in landscape heterogeneity.  
(DE) Prerequisite(s): Biology 250 or consent of instructor.

581 Mathematical Ecology (3)  
(See Mathematics 581.)

582 Mathematical Ecology (3)  
(See Mathematics 582.)

583 Zoogeography (3) Processes determining geographic distribution of animals and distribution and composition of animal communities.  
(DE) Prerequisite(s): Ecology course or consent of instructor.

585 Mathematical Evolutionary Theory (3)  
(See Mathematics 583.)

591 Foreign Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)  
Repeatability: May be repeated. Maximum 15 hours.

595 Advanced Evolutionary Ecology (3) Advanced concepts in evolutionary and ecological genetics. Biogeography, climate, population genetics, evolution and natural selection, population growth and regulation, competition, niche, experimental ecology, predation, phylogenetics in ecology, biodiversity, and conservation.  
Credit Restriction: Students cannot receive credit for both 595 and 495.  
(DE) Prerequisite(s): General biology course, general ecology course, coursework (1 or more courses) in organismal biology (ecology, evolution) at the upper-undergraduate level or consent of instructor.

600 Doctoral Research and Dissertation (3-15)  
Grading Restriction: P/NP only.  
Repeatability: May be repeated.

602 Advanced Topics in Ecological Process and Structure (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in ecological process and structure. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

603 Advanced Topics in Evolutionary Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in evolutionary biology. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

606 Advanced Topics in Conservation Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in conservation biology. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

607 Seminar in Ecology and Evolutionary Biology (1) Readings and discussion based on current literature.  
Repeatability: May be repeated. Maximum 12 hours.

609 Advanced Topics in Comparative Animal Behavior (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in animal behavior. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

610 Advanced Topics in Mathematical, Theoretical and Computational Ecology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in mathematical, theoretical, and computational ecology. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

611 Advanced Topics in Organismal Biology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in organismal biology. Consult departmental listing for offerings.  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

612 Advanced Topics in Environmental Toxicology (1-3) Exposure and in-depth training in contemporary topics and approaches important to advanced research in environmental toxicology. Consult departmental listing for offerings.  
(Same as Biochemistry and Cellular and Molecular Biology 612.)  
Repeatability: May be repeated with consent of department. Maximum 9 hours.

615 Seminar in the History of Botany (2) History of botanical exploration and advances from early civilization to modern periods.  
Repeatability: May be repeated. Maximum 4 hours.

681 Advanced Mathematical Ecology (3)  
(See Mathematics 681.)

682 Advanced Mathematical Ecology (3)  
(See Mathematics 682.)

Economics (283)

400 Special Topics II (3) Variable topics for advanced students.  
(DE) Prerequisite(s): 311 or 312 and 313.  
Registration Permission: Consent of instructor.

413 Macroeconomics: Business Cycles and Growth (3) Analysis of macroeconomic short-run fluctuations and long-term growth. Coverage will also include the role of monetary and fiscal policy on aggregate output, employment, and interest rates.  
(DE) Prerequisite(s): 313.

421 International Economics (3) Balance of payments, exchange rate determination, monetary and fiscal policies, monetary arrangements, comparative advantage, tariff and non-tariff trade distortions, protection arguments, and regional integration, with analyses based upon intermediate-level economic theory.  
(DE) Prerequisite(s): 311 or 312.

435 Industrial Organization (3) Monopoly and competition in United States economy; interrelationship of market structure, business behavior, and economic performance.  
(DE) Prerequisite(s): 311 or 312.

436 Economics of Health and Health Care (3) Medical care and health status; demand for medical care and insurance; physician and hospital supplies; government provision of services and insurance; regulation of health care markets.  
(DE) Prerequisite(s): 311 or 312.

441 Labor Economics (3) Extension of economic principles to labor markets, public policy questions, demand and supply, theory of wage differentials, unemployment, unions in the private sector, investment in individuals, education and training, mobility.  
(DE) Prerequisite(s): 311 or 312.

463 Environmental Economics (3) Economic foundations for public decision making about environmental resources, utilizing tools from intermediate microeconomic theory. Emphasis on the welfare economic approach for the provision of public goods, with specific emphasis on market failure, externalities, benefit-cost analysis, and methods for valuing environmental resources and human health.  
(DE) Prerequisite(s): 311 or 312.

472 Public Finance: Taxation and Fiscal Federalism (3) Analysis of federal, state, and local government revenue systems, to include individual and corporate income, sales, and property taxes and other tax and non-tax revenue sources. Consideration of current policy issues and relations among various levels of government.  
(DE) Prerequisite(s): 311 or 312.

482 Introduction to Mathematical Economics (3) Application of basic mathematical tools (e.g., calculus, matrix algebra, etc.) to major topics of economic theory.  
(DE) Prerequisite(s): 311 or 312.

500 Thesis (1-15)  
Grading Restriction: P/NP only.  
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated.  
Credit Restriction: May not be used toward degree requirements.

511 Microeconomic Theory (3) Theory of consumer choice and demand, theory of revealed preference, attributes of goods and implicit prices, market demand, labor supply, individual behavior under uncertainty, theory of firm, theory of production and cost, market structures, derived demand and factor pricing, introduction to welfare economics, market failure and theory of second best, pure exchange.
512 Microeconomic Theory (3) Theory of consumer choice and demand, theory of revealed preference, attributes of goods and implicit prices, market demand, labor supply, individual behavior under uncertainty, theory of firm, theory of production and cost, market structures, derived demand and factor pricing, introduction to welfare economics, market failure and theory of second best, pure exchange.

513 Macroeconomic Theory (3) Dynamic general equilibrium models, endogenous growth theory, credibility of monetary policy, budget deficits and fiscal policy, consumption, investment, asset pricing, overlapping generations models, real business cycle, search theory, and open-economy macro models.

514 Macroeconomic Theory (3) Dynamic general equilibrium models, endogenous growth theory, credibility of monetary policy, budget deficits and fiscal policy, consumption, investment, asset pricing, overlapping generations models, real business cycle, search theory, and open-economy macro models.

515 History of Economics (3) Purpose and methods of history of economics. Background for and origins, concerns, methods, development and conclusions of classical political economy; From Adam Smith through J.S. Mill and K. Marx. Anticipators of neoclassicism – J. Dupuit and H.H. Gossen.

577 Environmental Economics and Policy Management (3) Interdisciplinary perspective on goals of sustainable economic development and environmental quality. Development of decision-making tools and conflict resolution.

579 Environmental Policy Research Workshop (1) Multidisciplinary analysis of advanced topics in environmental policy. Student participation. Major writing requirement.

582 Elements of Econometrics I (3) Elementary econometric concepts and techniques. Least squares and maximum likelihood estimation, specification and econometric problems, statistical inference, generalized least squares, simultaneous equation models, applications of concepts to economic problems.

583 Elements of Econometrics II (3) Elementary econometric concepts and techniques. Least squares and maximum likelihood estimation, specification and econometric problems, statistical inference, generalized least squares, simultaneous equation models, applications of concepts to economic problems.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Registration Permission: Consent of instructor.

621 International Economics (3) Comparative advantage, trade migration, commodity composition of trade, protectionist devices, protectionist arguments, trade liberalization, U.S. trade policy, exchange rate determination, balance of payments adjustment, multinational corporations, and international capital flows.

622 International Finance (3) Analysis of macroeconomic adjustment in open economies, with attention to foreign exchange markets, balance of payments, international policy coordination, integration of world capital markets, liberalization of non-market economies and the international monetary system.

623 Economic Development: Theories and Policies (3) Principal theories explaining economic behavior in developing countries and policies and strategies used to promote development.

631 Industrial Organization I (3) Standard models of imperfect competition, oligopoly, and asymmetric information. Topics include pricing with market power and strategic decision making.

632 Industrial Organization II (3) Economics of regulation and antitrust. Topics include public utility regulation, consumer product regulation, occupational safety regulation, environmental regulation and antitrust legislation.

651 Monetary Theory (3) Study of money, credit, and liquidity as related to real output determination, interest rates, employment, and prices.

652 Topics in Monetary Theory (3) Advanced monetary models, issues in monetary policy, open economy monetary theory and policy. Student participation.

661 Regional and Urban Location and Development Theory (3) Theory of industrial and agricultural location and human migration. Economic basis for land-use patterns, central places, and urban form. Spatial inequalities and urban problems. National policies for regional and urban assistance.

662 Methods of Regional and Urban Analysis (3) Theory of regional/urban economic structure and growth. Regional income and product accounts, shift and share analysis, economic base studies, and open-economy input-output models. Theory and problem solution.

672 Public Finance: Taxation and Intergovernmental Relations (3) Theory of taxation; tax incidence and tax efficiency; policy analysis of U.S. tax structure at federal, state, and local levels. Theory of federalism and intergovernmental relations.

677 Environmental and Natural Resource Economics (3) Alternative paradigms for allocating and valuing environmental resources. Exploration of issues related to market failure and differences between renewable and nonrenewable resources.

678 Economics of Environmental Policy (3) Topics in environmental policy analysis. Consideration of alternative policy instruments, defining policy objectives and role of risk in decision-making process.

682 Advanced Topics in Cross-Section Econometrics (3) Models with limited dependent variables, panel data analysis, nonparametric estimation, selection models and duration models.

683 Time Series Econometrics (3) Univariate and multivariate time series modeling of economic data; AR, MA, ARMA, VAR; models of non-stationary time series-unit roots, cointegration and error correction models; time series models of heteroskedasticity-ARCH, ARCH-M, GARCH; exogeneity and causality.

690 Workshop (3) Advanced topics in economics. Student participation.

693 Independent Study (1-3) Directed research on topic of mutual interest to faculty and student. Variable title for transcript purposes.

Education (289)

540 Topics in Improvement of Instruction (1-3) Special conferences, workshops, and in-service programs.

574 Analysis of Teaching for Professional Development (2) Strategies to document and analyze effectiveness of teaching and of professional development. Study and application of various approaches.

575 Professional Internship in Teaching (1-8) Intensive teaching and teaching-related experiences in professional settings in public schools.

576 Practicum in Classroom Teaching (1-8) Teaching and teaching-related experiences in elementary and secondary school settings. Specific hours and school level assignment determined by licensure or certification requirements.

589 Field Experience (1-3) Application of curricular and instructional principles, methods, and materials in schools.
591 Clinical Studies (4) Group and individual seminar activities during full-time internship. Application and evaluation of professional core competencies. Completion and presentation of portfolio and analysis of teaching project.
   (DE) Corequisite(s): 575.

Education of the Deaf and Hard of Hearing (285)

415 Language Development of Deaf/Hard of Hearing I (3) Language problems of hearing impaired contrasted with scope and sequence of normal language development. Formal linguistic systems used to describe language development problems.

   (DE) Prerequisite(s): 415 or consent of instructor.

419 Speech Development of Deaf/Hard of Hearing (4) Theories of speech development, approaches in training perception and production of speech, and aural habilitation. Practicum experiences.

424 Nature of Hearing Impairments (3) Anatomy and physiology of hearing, nature and causes of hearing loss; methods and instrumentation for assessment of hearing level; interpretation of audiologic services to medical and other rehabilitative disciplines.

425 Introduction to the Psychology and Education of the Deaf/Hard of Hearing (3) Primarily for those planning to teach the hearing impaired. Research related to psychology, social adjustment, communication methodology, language development, and education of hearing impaired. Survey of literature. Visit to programs.

504 Clinical Experience in Teaching and Supervision of Exceptional Children (3-9) Placement in educational settings. (Same as Special Education 504.)
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated. Maximum 9 hours.

509 Vocational Guidance and Career Planning With Hearing Impaired (3) Utilization of psychological, educational, social and vocational, diagnostic materials and resources appropriate for hearing impaired persons to provide guidance in career decisions and individualized rehabilitation plan.

523 Practicum with Deaf/Hard of Hearing (3) Receptive and expressive language capabilities of hearing impaired student. Designing, teaching, and post-testing unit of instruction for remediation of specific language errors.

   (DE) Prerequisite(s): 425, 523, and Educational Interpreting 223.

529 Teaching Reading to Deaf/Hard of Hearing (3) Specific methods necessary for the prelinguially hearing impaired student. Practice in preparation of developmentally appropriate reading materials. Methods which assist in integrating hearing impaired students in regular reading curricula and materials.

579 Special Topics (1-3)
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated. Maximum 9 hours.
   Comment(s): Admission to the graduate program is required.

Educational Administration (293)

513 Administrative and Organizational Theory (3) Introduction to theoretical administrative and organizational foundations of management and leadership of educational programs and institutions. (Same as Higher Education Administration 513.)

515 Human Relations and Communication in Administration (3) Development and use of effective interpersonal communication skills and channels; inter-group relations, supportive work climates, personnel motivation, conflict management skills, and role of values, attitudes, and expectations in administration.

516 Research Methods (3) Descriptive, experimental, and quasi-experimental designs to help students without quantitative backgrounds to read and understand technical professional literature. Introduction to inferential statistics, needs assessments, and evaluation procedures.
   (Same as Higher Education Administration 516.)

518 Educational Specialist Research and Thesis (3)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

523 Administration of Special Services (3) Legal, programmatic, and ethical responsibilities of educational administrators in design and implementation of special service programs within school settings. Special learner characteristics, program categories, service delivery models, and legal/ethical frameworks. Inclusion and full service delivery.

529 Politics and Public Relations in Education (3) School/community relations in political context of modern, complex society. Administrator and supervisory competencies: political, social, ethnic, cultural, and racial environments in which schools operate.

534 Program Evaluation in Education (3) (See Curriculum, Educational Research, and Evaluation 534.)

535 Administrative Applications of Micro Computers (3) DOS, word processing, data based management, spreadsheets, and computer communications. Review and development of specific administrative applications: scheduling, attendance, student record systems, and accounting.

544 School Finance and Business Management (3) For prospective building level administrators. Financial and logical management tasks and procedures in individual school setting.

548 Supervision and Personnel Administration (3) Basic supervisory and personnel concepts and related competencies at the micro-organizational level: interviewing, personnel planning, collecting and maintaining employee information, supervision of personnel, performance appraisal and staff development.

553 Strategic Planning (3) Processes for improving decision-making function through use of both quantitative and qualitative planning techniques.

560 Grant Writing and Project Management (3) Processes of finding funding for research efforts, writing grant proposals, negotiating with funding sources, implementing and maintaining funded programs, and closing out projects at end of funding support.

577 Educational Statistics (3) (See Educational Psychology 577.)

580 Internship in Educational Administration (3) Field experience in appropriate educational setting working directly with administrator. At end of planned program of study. Placement by department assignment.
   Repeatability: May be repeated. Maximum 6 hours.

583 Educational Leadership-Principalship (3) Knowledge, skills and relationships for principals to be effective educational leaders.

592 Field Problems in Educational Administration and Supervision (3)
   Repeatability: May be repeated. Maximum 6 hours.

596 Seminar in School Leadership, K-12 (3) On-site study of quality school processes throughout region.
   Repeatability: May be repeated. Maximum 6 hours.

605 Advanced Seminar in Administrative Theory (3) (See Higher Education Administration 605.)

606 Leadership Forum (1-3) Development of research, evaluation, policy analysis skills and critical analysis and evaluation of philosophical principles undergirding American education. Continuous on-campus enrollment for 2 years. (Same as Higher Education Administration 606.)
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 12 hours.

610 Internship in Educational Administration (3) Opportunity for doctoral students and advanced graduate students to gain experience in performance of critical tasks of educational administration under supervision of practitioner and university representative.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated at discretion of student's committee. Maximum 12 hours.

614 Statistics for Educational Administrators (3) An introductory statistics course that focuses on the application of statistical problems to procedures in educational administration. Included are: scales of measurement, hypothesis testing, and descriptive and inferential statistical techniques. Computer applications are explored. (Same as Higher Education Administration 614.)

615 Research Design (3) The foundations of designing, conducting, and evaluating quantitative, qualitative, and mixed-methods research and the philosophical assumptions underlying these approaches. Topics covered include: identifying a research problem, reviewing the literature, specifying a purpose, writing research questions and hypotheses, and collecting and analyzing data. (Same as Higher Education Administration 615.)
616 Research Methods (3) The techniques of multiple regression, analysis of covariance, and multivariate analysis as applied to problems in educational administration. Computer applications are explored. (Same as Higher Education Administration 616.) (DE) Prerequisite(s): 614.

617 Case Study Methods in Educational Research (3) Methods, techniques and strategies consistent with case study approaches to inquiry in educational and related settings. (Same as Higher Education Administration 617.) (DE) Prerequisite(s): 615.

629 Seminar in Policy Issues in Education (3) Local, state, and federal education policy: theory analysis, development and implementation. Why education policy is changing rapidly, ways to follow and influence education policy, and conceptual frameworks to use for future understanding. (Same as Higher Education Administration 629.)

646 Personnel Administration (3) Personnel administration functions for professional and supporting staff in educational organizations. Recruitment, selection, placement, personnel policies, employee wage and salary administration, fringe benefits, collective negotiations, human relations, staff development, and staff evaluation.

656 Legal Issues in Education (3) School law; constitutional foundations as they relate to public education at state and local levels.

658 Conflict Management (3) (See Higher Education Administration 658.)

670 Values and Ethics in Educational Leadership (3) (See Higher Education Administration 670.)

680 Administration of Complex Organizations (3) Concepts and theoretical formulations to understand, analyze, evaluate, and change complex educational programs and organizations. (Same as Higher Education Administration 680.)

Educational Interpreting (287)

431 American Sign Language III (3) Sequence (431-432) stresses fluency of expressive and reception sign communication skills. Using language in context is emphasized. Grammatical structures of ASL and cultural implications of the deaf community. (DE) Prerequisite(s): 226 or consent of instructor. Comment(s): 431 and 432 must be taken in sequence.

432 American Sign Language IV (3) Sequence (431-432) stresses fluency of expressive and reception sign communication skills. Using language in context is emphasized. Grammatical structures of ASL and cultural implications of the deaf community. (DE) Prerequisite(s): 432 or consent of instructor. Comment(s): 431 and 432 must be taken in sequence.

435 Linguistics of American Sign Language (3) Introduction to grammatical and linguistic structures of ASL. Language variations, discourse, bilingualism and language contact also covered in this course. Conducted in ASL.

Gradation: Satisfactory/No Credit or letter grade. (DE) Prerequisite(s): 431 or consent of instructor.

Educational Psychology (310)

431 Personality and Mental Health (3) (See Counselor Education 431.)

460 Self-Management in the Helping Professions (3) Applications of self-management strategies to career, social, emotional, and health domains for both helping professionals and their clientele.

Gradation: Satisfactory/No Credit or letter grade. (DE) Prerequisite(s): Introductory course in psychology or consent of instructor.

500 Thesis (1-15)

Gradation: Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.

Gradation: Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)

Gradation: Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 9 hours.

504 Special Topics (1-3) Instructor-initiated course offered at convenience of unit on topics of current interest.

Gradation: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

505 Quasi-Experimental and Single-Subject Design Research (3) History, theory and research design techniques used to examine cause and effect relationships during applied psychoeducational research. Focus on controlling threats to internal validity through research design.

507 Survey of Educational Psychology (3) Historical developments and current issues; analysis of concepts, principles, techniques and models as they are used to facilitate teaching and learning and the creation of effective educational environments.

509 Internship in Adult Education (3) Practical field experiences in selected settings under supervision of practitioner and departmental representative.

Gradation: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

510 Psychological Theories of Human Development Applied to Education (3) Theory and research on emotional, social, and intellectual development over life span with applications to educational and therapeutic settings.

513 Reflective Practice in Education and Psychology (3) Concepts, theories and processes of reflective practice applied to educational settings.

514 Individual Study in Adult Education (3) Approval form must be completed in office of unit head. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of supervising instructor.

515 Educational Applications of Behavioral Theories of Learning (3) Behavioral theories and research, conditioning, observational learning, and ethological learning as systems apply to student motivation, discipline and learning.

516 Educational Applications of Cognitive Learning Theories (3) Cognitive theory and research, social learning, attribution and information processing as applied to education.

517 Direct Assessment and Interventions for Academic Skills Deficits (3) Theory, techniques and procedures shown to prevent and remedy academic skills deficits: curriculum-based assessment and direct intervention procedures.

518 Educational Specialist Research and Thesis (3) Gradation: Restriction: P/NP only. Repeatability: May be repeated.

520 Survey of Adult Education (3) Historical development, philosophies of adult education agencies, associations, programs, issues, and literature illustrating process of adult education and diversity of continuing education.

Registration Permission: Consent of instructor.

521 Program Development and Operation in Adult Education (3) Theories and methods from research to practice in planning and operating adult education programs.

Registration Permission: Consent of instructor.

522 Adult Development (3) Theory and research in adult development and change over lifespan and its implications for adult learning in formal and informal contexts.

523 Post-Secondary Education for Adults (3) History, evolution, philosophy, structure and functions of post-secondary, sub-university institutions, their programs and clientele.

Registration Permission: Consent of instructor.

524 Continuing Professional Education (3) Theories and concepts supporting design and management of educational programs for adults in professions.

525 Adult Learning (3) Key characteristics of adult learners, current theory and research on adult learning, and implications for teaching and learning concepts.

526 Informal Methods of Assessment (3) Development and use of rating scales, check-lists, observation, test scores and case reports in assessment and counseling of children and adults.

(DE) Prerequisite(s): Counselor Education 525.

527 Controversies in Adult Education (3) Controversies confronting the field of adult education; development of critical analysis skills by looking at controversies from different perspectives.

528 Psychology of Aging (3) Theory and research of aging and gerontology related issues: psychological and related physiological changes that occur in later life stages of human development. Implications for treatment programs and policy.

529 Facilitating Adult Learning (3) Theory, research, and practice related to working with adults in teaching-learning situations.
530 Methods of Action Research (3) Models of action research and applications in professional practice.
550 Statistics and Research Design: Conceptual (3) Consumer-oriented, conceptual treatment of statistics, research design, and quantitative basis of testing.
560 Discipline and Conflict Resolution (3) Applications of major models of discipline and conflict resolution strategies in development of constructive atmosphere for classroom learning.
569 Internship in Educational Psychology (3) Supervised employment in unit approved educational psychology internship sites. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.
572 Cognitive Education: Models and Approaches (3) Models and approaches in field of cognitive education: research and theoretical support for various program components, critical variables of organizational learning that affect success of implementation.
573 Meeting Needs of Nontraditional and Underachieving Learners (3) Exploration of students’ needs at any age and level of functioning who are not progressing up to their fullest potential. Causes of academic and motivational problems, and approaches to overcome them. Learning to learn, cultural alienation, and personal world view and interaction with effective teaching and learning.
574 Facilitating Group Change (3) Practical issues of group change. Analyses of group and individual experiences in all types of educational settings in relation to systems theory and collaborative learning theory. Needs of individuals and groups involved in change and roles of inside and outside change agents.
577 Educational Statistics (3) Applications of descriptive and inferential statistics to educational and instructional problems. Use of Internet sites and computer programs to analyze data. (Same as Educational Administration 577.) (DE) Prerequisite(s): 1 year of college mathematics and an elementary course in statistics or consent of instructor.
585 Seminar in Gerontology (1) (See Health 585.)
593 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.
600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.
601 Professional Seminar (1) An introduction to doctoral study in educational psychology and counseling that explores research requirements, the meaning of scholarship in academe, resources, survival strategies for students, and related topics. (Same as Counselor Education 601.) Grading Restriction: Satisfactory/No Credit grading only. Credit Restriction: May not be used to meet the Educational Psychology 600 or Counselor Education 600 requirement. Comment(s): Admission to a doctoral program in the Department of Educational Psychology and Counseling is required.
602 Directed Research (1-3) Instructor- or student-initiated group investigation of empirical and theoretical problems in educational and counseling psychology. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.
604 Special Topics (1-3) Instructor-initiated courses offered at convenience of unit on topics of interest. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.
609 Advanced Seminar in Curriculum and Learning (3) Team-taught interdisciplinary seminar: trends, themes, and issues in curriculum and learning. Reading and discussions based on significant research and scholarly publications.
620 Seminar in Adult Education (3) Issues in adult education, theories and concepts, philosophical positions, research trends and methodologies. (DE) Prerequisite(s): 520 or equivalent. Registration Permission: Consent of instructor.
621 Advanced Seminar in Program Planning (3) Concepts, principles, and theories related to program planning in adult education. (DE) Prerequisite(s): 521 or equivalent. Registration Permission: Consent of instructor.
622 Advanced Seminar in Adult Development and Learning (3) Adult development and adult learning theory and research. (DE) Prerequisite(s): 522 and 525. Registration Permission: Consent of instructor.
630 Doctoral Seminar in Collaborative Learning (3) Issues, theories, concepts and research in collaborative learning. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 12 hours. Comment(s): Requires admission to collaborative learning specialization.
635 Ethical, Legal, and Professional Issues in Psychology (3) (See Psychology 635.)
640 Seminar in Applied Educational Psychology (2) Issues, theories, concepts and research in applied educational psychology. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours. Comment(s): Admission to PhD, education major, applied educational psychology specialization required.
655 Research in Psychoeducational Studies (1) Data analyses, collection, and interpretation. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 9 hours.
662 Applied Research Design (3) Planning of empirical investigations, collection of data, and drawing of inferences from evidence gathered. (DE) Prerequisite(s): 2-course sequence in statistics.
663 Scale Construction (3) Development, pilot testing, and revision of attitude inventories, rating scales, and other paper-and-pencil techniques for assessing beliefs, personality characteristics, and opinion. (DE) Prerequisite(s): Counselor Education 525 and a 2-course sequence in statistical analysis.
665 Analysis of Research in Instructional Technology (3) Research on human learning, design of learning environments. Analysis of teacher behavior, text development, computer software design and video presentations.
668 Practicum in Instructional Planning (3) Development and management of course or program of instruction in educational psychology. (DE) Prerequisite(s): 665 or consent of instructor.
669 Internship in Educational Psychology (1-6) Supervised employment in unit approved educational psychology internship sites. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 12 hours.
671 Mediated Learning Theory (3) Feuerstein’s theory of mediated learning experience and its connections to work of Piaget, Vygotsky and others. Implications for transformational learning and building of learning communities for learners of all ages. Comment(s): Requires admission to doctoral program or consent of instructor.
673 Collaborative Learning (3) Theories of collaborative learning and research related to facilitating collaborative learning in professional practice settings. (DE) Prerequisite(s): 513 and 617 or consent of instructor.
677 Advanced Educational Statistics (3) Applications of parametric and nonparametric statistical inference to educational and instructional problems. Use of computer programs and Internet sites in analyzing data. (DE) Prerequisite(s): 577. Registration Permission: Consent of instructor.
693 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

Electrical and Computer Engineering (319)
Courses required in the electrical engineering undergraduate curriculum cannot be used in either the MS or PhD programs. No 400-level course may be used toward a graduate degree in electrical engineering except when required by the program.
400 Senior Design (5) A major design project that focuses the student’s attention on professional practice, accumulated background of curricular components, and recent developments in the field. This major design emphasis is directed to topics within the field of electrical engineering. Includes Level 3 design projects which require laboratory work. (DE) Prerequisite(s): 316, 335, 342, and 355.
415 Automatic Control Systems (3) Automatic control systems for physical systems with linear models. The methods presented include steady-state error analysis, stability, root locus, Nyquist theory, and Bode plots. (DE) Prerequisite(s): 316.
416 Computer Control Systems (3) Computer controlled systems using state variables and z-transform model representations with sampling theory and its effect of digital control design. Design of digital controllers in both the state space and frequency domains. Includes Level 1 design projects. (DE) Prerequisite(s): 316.
421 Electric Energy Systems (3) Structure and operation of electrical energy grid; load flow; economic loading; planning; control; reliability. Balanced and unbalanced faults; system protection; system stability. Includes Level 1 design projects. 
(DE) Prerequisite(s): 316.

(DE) Prerequisite(s): 421.

423 Electric Machines (3) Principles of electromechanical energy conversion. Design procedures for AC and DC machine windings; construction and performance constraints. Effects of machine parameters on steady state and dynamic performances; the d-q model; reference frames. Includes Level 1 design projects. 
(DE) Prerequisite(s): 316 and 325.

431 Operational Amplifier Circuits (3) Linear and non-linear active circuits using commercial operational amplifiers. Includes operational, instrumentation, isolation, bridge, rms and logarithmic converters, multipliers and function generators, rectifiers, references, active filters, modulation and demodulation, sinusoidal generators. Noise fundamentals and calculations in op-amp circuits. Design for specified pole-zero functions. Emphasis on applications including transducer interfacing. Includes Level 1 design projects which require laboratory work. 
(DE) Prerequisite(s): 316, 332, and 342.

432 Electronic Amplifiers (3) Feedback amplifier principles; wideband linear amplifier design; low-noise preamplifier design; audio power amplifier design. Introduction to radio-frequency amplifier design; oscillator principles. Includes laboratory experiments and design projects. Includes Level 2 design projects which require laboratory work. 
(DE) Prerequisite(s): 431.

441 Digital Communication (3) Quantization and pulse code modulation. Binary and Mary signaling, spectra of line codes, link budget analysis, binary communication in the presence of noise, matched filtering and equalization, band-pass digital transmission, introduction to multiple-access techniques. Includes Level 1 design projects. 
(DE) Prerequisite(s): 342.

442 Communication System Design (3) Application of communication theory to system design. Hardware and software design and simulation. Modern communication topics. Includes Level 1 design projects. 

443 Antennas and Propagation (3) Introduction to antenna theory including fundamental antenna concepts and parameters (directivity, gain, patterns, etc.) and signal propagation. Theory and design of linear and loop antennas, arrays, and other simple antennas. Includes Level 1 design projects. 
(DE) Prerequisite(s): 316, 341, and 342.

446 Electromagnetic Compatibility (3) Principles and practices to avoid interference among and within electrical devices. Parameters and coupling for dipole, biconical, and log-periodic antennas. High frequency effects in circuit elements. Radiated and conducted emissions and susceptibility. Crosstalk, shielding, electrostatic discharge, and EMC regulations. Includes Level 1 design projects which require laboratory work. 
(DE) Prerequisite(s): 316, 341, and 342.

451 Computer Systems Architecture (3) Architecture and design of microcomputer systems with microprocessors or microcontrollers. Instruction set architectures, software interfaces, processor structures, memory hierarchy, interfacing. Includes Level 1 design projects which require laboratory work. 
(DE) Prerequisite(s): 355.

453 Introduction to Computer Networks (3) Principles of computer networking and software design of network protocol with an emphasis on the internet and TCP/IP protocol suite. Includes Level 1 design projects. 
(DE) Prerequisite(s): 206.

471 Introduction to Pattern Recognition (3) Introduction to statistical decision theory, adaptive classifiers, and supervised and unsupervised learning. Students will explore the application of these techniques in areas of current interest such as face recognition, speech processing, remote sensing, data mining and bioinformatics. Includes Level 1 design projects. 
(DE) Prerequisite(s): 316. Comment(s): Non-majors must obtain consent of instructor.

472 Introduction to Digital Image Processing (3) Basic methods for digitizing, storing, processing, and displaying images. Computational procedures for image enhancement, restoration, coding, and segmentation. Includes Level 1 design projects. 
(DE) Prerequisite(s): 316. Comment(s): Non-majors must obtain consent of instructor.

481 Power Electronics (3) Principles and characteristics of power semiconductor devices, single-phase and polyphase phase-controlled converters, converter control, ac voltage controller. Includes Level 1 design projects and laboratory work. 
(DE) Prerequisite(s): 316, 325, and 336.

482 Power Electronic Circuits (3) Voltage-fed inverters, PWM principles, control of inverters, dc-dc converters, dc machine drives, resonance converters, step motor drives, brushless dc machine principles. Includes Level 1 design projects. 
(DE) Prerequisite(s): 481.

491 Special Topics (3) Relating to basic design and current practice. Includes Level 1 or Level 2 design projects which may require laboratory work. 
(DE) Prerequisite(s): Completion of all junior electrical and computer engineering courses or consent of instructor.

495 Senior Seminar (1) Current topics in electrical engineering. 
Grading: Satisfactory/No Credit or letter grade. 
(DE) Prerequisite(s): Completion of all junior electrical and computer engineering courses or consent of instructor.

500 Thesis (1-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated. 
Registration Restriction: Consent of graduate committee.

501 Project in Lieu of Thesis (3) Capstone course taken under supervision of student's major professor and master's committee. Individual project involving literature survey, development of some software or hardware, testing, writing a white paper or journal paper, or other suitable project. 
Repeatability: May be repeated. Maximum 6 hours. 
Credit Restriction: May not be used toward degree requirements.

504 Random Process Theory for Engineers (3) Probability and random variables as approached by set theory. Statistical averages and transformations of random variables. Random processes, stationarity, correlation functions and temporal analysis, power spectrum and spectral analysis as applied to response of systems to random signals. 

505 Digital Signal Processing I (3) Discrete-time signals and systems, sampling, fast Fourier transform (FFT) and fast convolution, design of FIR filters and IIR filters. 

506 Digital Signal Processing II (3) Filter properties in the Z and Fourier transform domains, structures for digital filters, sampling and reconstruction, hardware implementation of digital filters. 

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)

509 Multidisciplinary Project (1) (See Industrial Engineering 509.)

511 Linear Systems Theory (3) State space models of linear dynamical systems, linear algebra, state transition map, matrix exponential, controllability, observability, realization theory, and stability theory. 
(DE) Corequisite(s): 507.

512 Multivariable Control System Design (3) Design of controllers, for multivariable systems, which satisfy constraints on robustness to plant uncertainties, disturbance rejection, command following. 
(DE) Prerequisite(s): 511.

521 Power Systems Analysis I (3) Matrix-vector representations of power networks, sequence modeling of power system components, unbalanced shunt and series faults. Formulating and solving problems in matrix-vector form with application to large scale power systems. 
(DE) Prerequisite(s): 421 or equivalent.
522 Power Systems Analysis II (3) Operation and control of interconnected power systems, transient and dynamic stability. Formulating and solving problems in matrix-vector form with application to large-scale power systems.
(DE) Prerequisite(s): 521.

523 Power Electronics and Drives (3) Forced commutated inverters, advanced PWM techniques, current-fed inverters, drive system modeling, vector and scalar control of induction machines, parameter variations, control principles of synchronous machine.

525 Alternative Energy Sources (3) Energy outlook, interconnection issues of distributed energy resources, efficiency of power production, electric energy conversion and storage. Photovoltaics, fuel cells, wind turbines, microturbines.

(DE) Prerequisite(s): 431 and 432 or consent of instructor.

(DE) Prerequisite(s): 531.

541 Electromagnetic Fields (3) Maxwell’s equations, special relativity, wave reflection and transmission, generalized media, guided waves, radiation from current elements.
(DE) Prerequisite(s): Mathematics 404.

542 Communication Systems Simulation (3) Simulation is used as a design and performance evaluation tool for communication systems. Simulation models for stochastic signals and system components including decoders, modulators, non-linear power amplifiers, bit and carrier synchronizers, equalizers and receivers are discussed along with the error effects resulting from the use of these models. Techniques for modeling time-varying and nonlinear systems are included. Monte Carlo techniques, semi-analytic techniques and variance reduction methods are covered.

(DE) Prerequisite(s): 504.

(DE) Prerequisite(s): 543.

545 Introductory Microwave Networks and Components (3) Scattering and transfer representation for multipoles; unilateral and bilateral microwave and millimeter wave devices. Component and system parameter measurement by modern network analyzers. Electronic oscillators and amplifiers, frequency swept oscillators, transit time devices, parametric devices, mixers, switches.

552 Digital System Design II (3) State identification and structure realizations of sequential machines. Digital system architecture design: microprogramming and interrupt control.
(DE) Prerequisite(s): 551.

553 Computer Networks (3) Principles of computer networks with a focus on the Internet and TCP/IP protocol suite. In-depth study of several core issues and design options involved. Employs a top-down approach to the discussion from the application layer down to the physical layer. An emphasis is given on protocol design and performance analysis. Other topics include ad-hoc networking, network security and network simulation. Assignments that require hands-on networking and programming skills will be issued in order to solve concrete problems.

557 Computer Architecture and Design (3) An exploration of the central issues in computer architecture: instruction set design, addressing and register set design, control unit design, microprogramming, memory hierarchies (cache and main memories, mass storage, virtual memory), pipelining, bus organization, RISC (Reduced Instruction Set Computers), and CISC (Complex Instruction Set Computers), implementation issues, technology trends, architecture modeling and simulation.

561 Plasma Diagnostics I (3) Principles of active, passive, perturbing and nonperturbing diagnostic methods used in low temperature plasmas, and high temperature plasmas of interest in fusion research. Laboratory safety, data reduction and presentation, microprocessor based data handling and analysis, and reduction of time series data.
(DE) Prerequisite(s): 461 or 463 or consent of instructor.

562 Plasma Diagnostics II (3) Laboratory instruction in operation of plasma diagnostic instruments in plasma science laboratory, experience with high voltage, vacuum, RF, and digital data handling techniques.
(DE) Prerequisite(s): 561.

565 Industrial Plasma Engineering I (3) Low temperature plasma physics relevant to industrial applications: kinetic theory, particle dynamics in electric and magnetic fields, gaseous discharges, and electron, ion, and plasma sources.
(DE) Prerequisite(s): Requires graduate standing or consent of instructor.

566 Industrial Plasma Engineering II (3) Continuation of 565 to industrial applications: ion implantation in solids, plasma deposition and etching, space propulsion systems, plasma chemistry, plasma lighting devices, insulating dielectrics and breakdown, materials processing with plasma arcs, and related topics.
(DE) Prerequisite(s): 565 or consent of instructor.

571 Pattern Recognition (3) Decision-theoretic and structural approaches to pattern recognition. Deterministic and statistical decision rules, feature extraction and representation, syntactic and semantic methods.
(DE) Prerequisite(s): 471 or consent of instructor.

(DE) Prerequisite(s): 472 or consent of instructor.

573 3D Methods in Robot Sensing, Vision and Visualization (3) Tools used in image synthesis and analysis: 3D recovery by nonlinear estimation, Projective geometry, analytic photogrammetry, range sensing, lighting models, differential geometry, and 3D rendering.

574 Advanced Computer Vision (3) Principles and methods for analysis of time and/or space varying imagery. Imaging physics and color theory, shape-form-X, feature correspondence and tracking, stereo Vision, structure from motion, optical flow, motion-based segmentation, and selected topics form current literature.
(DE) Prerequisite(s): 573 or consent of instructor.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

598 Graduate Seminar (1) Topics of interest discussed in weekly seminar.

599 Special Topics (1-3) Repeatability: May be repeated. Maximum 9 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

613 Nonlinear Systems Theory (3) Introduction to nonlinear systems theory with applications to control systems. Specific emphasis is given to Lyapunov Theory, Adaptive Control, Feedback Linearization and Sliding Mode Control.
(DE) Prerequisite(s): 511 or equivalent.

614 Optimal Control (3) Deterministic and stochastic dynamic programming in continuous and discrete time, minimum principle and matrix minimum principle, computational methods in optimal control.
(DE) Prerequisite(s): 611.

615 Control of Electric Machines (3) Models in the form of nonlinear differential equations are developed for the induction, synchronous, brushless DC and switched reluctance motors. High performance methods of control based on state space techniques are developed including field-oriented and input-output linearization control.
617 Special Topics in Systems Theory I (3) Topics of current interest to students and faculty: large-scale systems, model-order reduction, algebraic- and geometric-system theories, and advanced-design methods. Registration Permission: Consent of instructor.

618 Special Topics in Systems Theory II (3) Topics of current interest to students and faculty: large-scale systems, model-order reduction, algebraic- and geometric-system theories, and advanced-design methods. Registration Permission: Consent of instructor.

623 Advanced Power Electronics and Drives (3) Phase-controlled cycloconverters, cycloconverter-fed ac drives, resonant converters, vector and scalar control of synchronous machines, static Kramer drives, static Scherbius drives, VSC generation, modern control theory in ac drives.

625 Utility Applications of Power Electronics (3) Electric power quality, harmonics, voltage sag, reactive power compensation, transient stability. Structure and control of power converters, multilevel converters, active power filters, static series and shunt compensators, FACTS, HVDC.

629 Traction Drives (3) Operating principles of traction drives for electric and hybrid electric vehicles. Low speed constant torque control mode and high speed constant power control mode. Ideal performance of the doubly fed, separately excited dc machine and the wound rotor synchronous machine. High CPSSR drives based on singly-fed machines including the induction, permanent magnet synchronous, brushless dc and switched reluctance motors. Other contemporary topics in traction drive applications.

631 Advanced Topics in Electronic Instrumentation I (3) Based on particular interests of students. Fundamental physical processes in instrumentation transducers: thermoelectric, magnetoelectric, electromagnetic and quantum-mechanical devices.

632 Advanced Topics in Electronic Instrumentation II (3) Physical operation of modern discrete, monolithic, and hybrid electronic structures and their application in signal processors. Resolution, sensitivity, response time, and noise considerations in signal processors used in modern electronic instrumentation.

642 Wireless Communications (3) Fundamental theory and design of wireless communications systems; mobile radio propagation; modulation techniques; coding, diversity and equalization. Wireless systems and standards.

643 Detection and Estimation Theory (3) Detection theory; coding theory; system identification. Signals with unknown parameters; optimal filter synthesis; adaptive systems; sequential detection; suboptimal detection.

644 Coding and Information Theory (3) Structure of algebraic and probabilistic codes; linear codes, convolutional codes, error-correcting codes, decoding methods. Identification schemes: deterministic, stochastic, and hierarchical methods.

651 Computer-Aided Design of VLSI Systems I (3) Fabrication of microelectronic devices; computer architecture design; algorithmic state machines; partitioning; structured design methodology.

652 Computer-Aided Design of VLSI Systems II (3) Computer-aided design tools; design and implementation of fully custom very large scale integrated (VLSI) circuits; design for testability; testing of fabricated chips.

653 Advanced Computer Networks (3) Topics of current interest to students and faculty: high-speed Internet switch/router architectures, routing algorithms and protocols, network performance analysis and packet scheduling algorithms. Coursework will include theoretical as well as practical (simulation-based) assignments.

657 Advanced Computer Architecture and Design (3) Advanced computer architecture issues including topics such as superscalar architec-

659 Digital Systems Verification (3) Three critical issues for robust digital systems are design errors, manufacturing faults, and failures during operation. This course covers digital system verification, testing, and reliability for both timing and logic, in order to prepare students to deal with these in their designs. Verification will cover formal verification for logic and timing, and contrast with simulation. Methods for generating test vectors, scan testing, and built-in self test will be covered. MTBF will be calculated for several small systems with emphasis on models and their limitations.

663 Advanced Plasma Physics I (3) Basic concepts of high temperature plasma physics. Magnetohydrodynamics and kinetic descriptions of plasma, plasma transport, plasma waves, equilibrium, and stability.

664 Advanced Plasma Physics II (3) Plasma heating and radiation phenomena. Advanced topics of current interest.

671 Image Processing and Robotics I (3) Three-dimensional scene modeling and recognition, multi-sensor systems.

672 Image Processing and Robotics II (3) Stereovision, shape theory.

673 Image Processing and Robotics III (3) Time-varying imagery, path planning and navigation.

679 Special Topics (1-3) Advanced topics of current interest to PhD students in electrical engineering.

683 Advanced Topics of current interest to PhD students in electrical engineering.

687 Elementary Education (322)

691 Advanced Graduate Seminar (1) Research in department.

692 Special Topics (1-3) Advanced topics of current interest to PhD students in electrical engineering.

717 Computer and Telecommunications Systems Performance Evaluation (3) Introduction to the basic tools of computer and communications systems analysis and evaluation. Deterministic and stochastic modeling concepts are presented. Queuing theory and discrete event (DES) simulation methods are studied with application to a variety of examples drawn from the computer and communications performance evaluation literature. A standard DES language is used in modeling and simulation studies. Topics of current interest such as computer input/output models, mass memory, bus models, and communications network models are discussed. A modeling project is typically required.

754 Studies and Theory in Language Development (3) Studies and theory of language development in children.
505 Elementary and Middle School Teaching Methods II (6) Applied methods of teaching reading, language arts, science, social studies and mathematics; accommodation strategies for students with diverse needs. 
(DE) Prerequisite(s): Course in elementary and middle school teaching methods. 
(DE) Corequisite(s): 575.

515 Seminar (1-3) Curriculum, instructional technology, elementary education, secondary education, or social foundations as related to goals of students’ programs. 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 6 hours.

527 Elementary School Curriculum (3) Examination, evaluation and application of curriculum designs in elementary school. Trends and issues which affect elementary education. 
Registration Permission: Consent of instructor.

528 Teaching Language Arts Elementary and Middle School (3) Recent trends and current materials and methods in teaching elementary language arts (except reading). 
(DE) Prerequisite(s): Course in language arts or consent of instructor.

529 Practicum in Diagnosis and Remediation of Difficulties in Learning Mathematics (3) Assessment and practicum experience with children having difficulties in learning elementary school mathematics. 
(DE) Prerequisite(s): 523 or consent of instructor.

550 Assessment and Correction of Language Arts Difficulties (3) Procedures and materials for diagnosing and correcting language arts difficulties; analysis of children’s work. 
(DE) Prerequisite(s): At least one language arts course or consent of instructor.

566 Curriculum for Early Childhood Education (K-3) (3) Theoretical foundations and current research in content and skill areas of curriculum for Kindergarten-Grade 3; application to local school setting. 
Repeatability: May be repeated. Maximum 9 hours.

567 Application of Theory in Early Childhood Education (K-3) (3) Principles and practices from selected theoretical orientations. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): Course in early childhood education or consent of instructor.

584 Seminar in Early Childhood Education (3) Analysis of research and theory in early childhood education; educative process of young children. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): Course in early childhood education.

606 Research in Elementary Education (3) Analysis of research in elementary education with application to classroom teaching. 
(DE) Prerequisite(s): Research course.

650 Advanced Studies in Early Childhood Education (3) Graduation Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE) Prerequisite(s): 2 graduate courses in early childhood education. 
Registration Permission: Consent of instructor.

651 Advanced Studies in Elementary School Language Arts (3) Selected issues in elementary school language arts. 
(DE) Prerequisite(s): Graduate course in elementary school language arts or consent of instructor.

Engineering Management (328)

501 Capstone Project (3-6) Application-oriented project to show competence in major academic area. 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. Maximum 6 hours. 
Comment(s): Requires enrollment in engineering management.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. 
Grading Restriction: Satisfactory/No Credit grading only. 
Repeatability: May be repeated. 
Credit Restriction: May not be used toward degree requirements.

532 Productivity and Quality Engineering (3) Productivity and quality measures defined and used to analyze current competitive position of important sectors of American industry with respect to national and international competition. Study of management theorists and systems which promote or inhibit productivity or quality improvements.

533 Theory and Practice of Engineering Management (3) Principles of engineering management, including: business and organization design, culture, leadership, marketing and competition in global economy, motivation and performance management, empowerment, organizational behavior, and diversity. Systems thinking, learning organizations, and system dynamics modeling. Principle application to work settings and case studies.

535 Management of Technology (3) Creativity and innovation; incorporation of advanced technology equipment; application of systems thinking; new methods in business and manufacturing organizations; justifying technology; assimilating and managing change; changing management roles; and impacts of new technologies. 
(DE) Prerequisite(s): 538 and Industrial Engineering 518.

536 Project Management (3) Development and management of engineering and technology projects. Project proposal preparation; resource and cost estimating; project planning, organizing, and controlling; network diagrams and other techniques. Role of project manager: team building, conflict resolution, and contract negotiations. Discussion of typical problems and alternative solutions. Case studies and student projects. 
(DE) Prerequisite(s): 537 or consent of instructor.

537 Analytical Methods for Engineering Managers (3) Survey of management analysis and control systems through industrial engineering techniques. Qualitative and quantitative systems: methods analysis, work measurement, incentive systems, wage and salary development, production and inventory control, facility layout, linear programming, and applied operations research techniques. 
Credit Restriction(s): No credit for student with undergraduate degrees in industrial engineering.

538 New Venture Formation (3) Factors other than mechanical or chemical which enter into successful establishment of manufacturing or service enterprise. Organizational and financial planning and evaluation. Cost and location studies and market analysis to determine commercial feasibility of new ventures. 
(DE) Prerequisite(s): 539.

539 Strategic Management in Technical Organizations (3) Strategic planning process and strategic management in practice; corporate vision and mission; product, market, organizational, and financial strategies; external factors; commercialization of new technologies; and competition and beyond. 
(DE) Prerequisite(s): 553 and Industrial Engineering 518 or consent of instructor.

(DE) Prerequisite(s): 516.

(DE) Prerequisite(s): Industrial Engineering 516.

543 Legal and Ethical Aspects of Engineering Management (3) Legal aspects imposed by government and ethical considerations in engineering practice. Selected readings, lecture, discussion, and student presentations. Current topics from government and industry.
Engineering Science (335)

500 Thesis (1-15)  
Grading Restriction: P/No P only.  
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)  
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.  
Grading Restriction: Satisfactory/No Credit grading only.  
Repeatability: May be repeated.  
Credit Restriction: Not to be used toward degree requirements.

526 Mechanics of Composite Materials (3)  
Mechanics analysis of fiber-reinforced composite materials. Lamina stress-strain relations, engineering constants, classical lamination theory; use of computer programs for laminate analysis with reference to current applications. Damage development in composites; fracture mechanics techniques.

527 Fracture Mechanics (3)  
Mechanisms of fracture and crack growth; stress analysis; crack tip plastic zone; energy principles in fracture mechanics; Fatigue crack initiation and propagation; fracture mechanics design and fatigue life prediction. Analytical, numerical, and experimental methods for determination of stress intensity factors. Current topics in fracture mechanics.

538 Ceramic Matrix Composites: Material and Mechanics (3)  
Micromechanical models, fabrication of ceramic/matrix composites; interface characterization and mechanics; electron microscopy; examination; nondestructive evaluation; fracture; fatigue; applications.  
(See Materials Science and Engineering 528.)

539 Fatigue of Engineering Materials (3)  
Fatigue life prediction, crack initiation and propagation. Various fatigue loading, multi-axial loading, environmental fatigue, creep fatigue, metallurgical and microstructural variables, fractography, non-metals.  
(DE) Prerequisite(s): Consent of instructor.

541 Fluid Mechanics I (3)  
(See Mechanical Engineering 541.)

542 Fluid Mechanics II (3)  
(See Mechanical Engineering 542.)

551 Finite Elements for Engineering Applications (3)  
Modern computational theory applied to conservation principles across the engineering sciences. Weak forms, extremization, boundary conditions, discrete implementation via finite element, finite difference, finite volume methods. Asymptotic error estimates, accuracy, convergence, stability. Linear problem applications in 1, 2 and 3 dimensions, extensions to non-linearity, non-smooth data, unsteady, spectral analysis techniques, coupled equation systems. Computer projects in heat transfer, structural mechanics, mechanical vibrations, fluid mechanics, heat/mass transport.  
(See Aerospace Engineering 559: Biomedical Engineering 539: Mechanical Engineering 539.)

552 Computational Fluid-Thermal Systems (3)  
(See Aerospace Engineering 572: Biomedical Engineering 562: Mechanical Engineering 562.)  
(DE) Prerequisite(s): 551.

554 Computational Solid Mechanics (3)  
Finite element techniques in structural mechanics and linear elasticity. Energy method and weak form formulations; isoparametric elements, numerical quadrature. Equation solving, matrix iteration techniques. Applications in beams, plates and shells; use of representative commercial finite element software.  
(See Aerospace Engineering 573: Mechanical Engineering 563.)  
(DE) Prerequisite(s): Mechanical Engineering 321 or equivalent.

555 Advanced Mechanics of Materials I (3)  
(See Mechanical Engineering 559.)

556 Laser Processing of Materials (3)  

557 Biomechanics of Hard and Soft Tissue (3)  
Introduction to terminology, physiology, and analytical methods for mechanics of living tissue. Continuum mechanics analysis of hard and soft issue, biological fluid flows. Flow properties of blood, rheology of blood in micro vessels; bi-viscoelasticity of fluids and solids, mechanical properties of blood vessels; skeletal, heart and smooth muscle; bone and cartilage. Research paper.  
(See Biomedical Engineering 572.)

558 Biomedical Fluid Mechanics (3)  
(See Biomedical Engineering 572.)

559 Fatigue of Engineering Materials (3)  
(See Nuclear Engineering 578.)

561 Advanced Mechanicals of Materials II (3)  
(See Mechanical Engineering 559.)

562 Advanced Fracture Mechanics (3)  
(See Mechanical Engineering 562.)

563 Computer-Aided Design and Engineering (3)  
Computer-aided design, computer-aided manufacturing, computer-aided engineering, computer-aided testing, computer-aided simulation. Applications in industry and academia. Computer projects.  
(See Mechanical Engineering 561.)

564 Computational Fluid Dynamics (3)  
(See Aerospace Engineering 651: Mechanical Engineering 651.)  
(DE) Prerequisite(s): 552.
652 Advanced Topics in Computational Fluid Dynamics (3) Applications of modern CFD theory and code practice for Euler and Navier-Stokes conservation systems. Computer projects in incompressible/compressible flow, viscous, turbulent, reacting and/or inviscid/potential subsonic to hypersonic flows. (Same as Aerospace Engineering 662; Mechanical Engineering 652.)
(DE) Prerequisite(s): 645 and 651.

653 Advanced Topics in Computational Solid Mechanics (3) Fracture mechanics; singularity solutions; non-linear constitutive problems, variable stiffness, initial strain-stress methods, plasticity, creep; geometrically non-linear problems, large deformation, stability, shell structures, solids; accuracy, convergence, adaptive grids; systems of nonlinear equations, solvers. Use of production-level finite element software. Computer projects. (Same as Aerospace Engineering 663; Mechanical Engineering 653.)
(DE) Prerequisite(s): 553.

654 Advanced Topics in Computational Solid Mechanics (3) Fracture mechanics; singularity solutions; non-linear constitutive problems, variable stiffness, initial strain-stress methods, plasticity, creep; geometrically non-linear problems, large deflection, stability, shell structures, solids; accuracy, convergence, adaptive grids; systems of nonlinear equations, solvers. Use of production-level finite element software. Computer projects. (Same as Aerospace Engineering 664; Mechanical Engineering 654.)
(DE) Prerequisite(s): 553.

657 Computational Mechanics Seminar (1) Current developments in computational fluid/thermal/structural mechanics.
Repeatability: May be repeated.
Comment(s): For departmental thesis students only.

659 Advanced Mechanics of Materials II (3) (See Mechanical Engineering 659.)

671 Advanced Topics in Applied Artificial Intelligence (3) (See Nuclear Engineering 671.)

681 Advanced Topics in Engineering Mechanics (3) Advanced problems in mechanics, group or individually.
Repeatability: May be repeated with consent of department.
Registration Permission: Consent of instructor.

English (339)
Students enrolling in English graduate courses must first register in the office of the Director of Graduate Studies in 306 McClung Tower.

401 Medieval Literature (3) Reading and analysis of selected medieval literary masterpieces in modern English. (Same as Medieval Studies 405.)

402 Chaucer (3) Reading and analysis of the Canterbury Tales and Troilus and Cressyde in Middle English. (Same as Medieval Studies 406.)

404 Shakespeare I: Early Plays (3) Shakespeare’s dramatic achievement before 1601. Reading and discussion of selected plays from romantic comedies, including Twelfth Night; English histories; including Henry IV; and early tragedy, including Hamlet.

405 Shakespeare II: Later Plays (3) Shakespeare’s dramatic achievement between 1601 and 1613. Reading and discussion of selected plays from great tragedies, including Othello; problem plays, including Measure for Measure; and dramatic romances, including The Tempest.

406 Renaissance Drama (3) English theatre between 1590 and 1640. Representative plays by Shakespeare’s contemporaries – Marlowe, Webster, Jonson.

409 Spenser and his Contemporaries (3) Principal achievements in prose and poetry of 16th-century authors – Spenser, Wyatt, Marlowe, More, Sidney, and Bacon.

411 Literature of the Restoration and Early 18th Century: Dryden to Pope (3) Survey of English literature and culture from 1660 to 1745.

412 Literature of Later 18th Century: Johnson to Burns (3) Survey of English literature and culture from 1745 to 1800.

413 Restoration and 18th-Century Genres and Modes (3) Study of one major genre or literary mode such as drama, novel, poetry, nonfiction, prose, satire, romance, or epic written between 1660 and 1800.
Repeatability: May be repeated.

414 Romantic Poetry and Prose I (3) Emphasis on Wordsworth, Coleridge, and Blake; with readings from Lamb, De Quincey, and other prose writers.

415 Romantic Poetry and Prose II (3) Emphasis on Keats, Shelley and Byron; with readings from Hazlitt, Peacock, and other prose writers.

416 Early Victorian Literature (3) May include poetry by Tennyson and the Browning’s; prose by Carlyle, Newman, and Mill.

419 Later Victorian Literature (3) May include poetry by the Pre-Raphaelites, Arnold, Hopkins, and Hardy; prose by Arnold, Ruskin, and Carroll; plays by Gilbert and Wilde.

420 The 19th-Century British Novel (3) Major novelists from Scott to Hardy.

421 Modern British Novel (3) Authors such as Joyce and Woolf through contemporary British fiction writers.

422 Women Writers in Britain (3) Emphasis on the literary consciousness and works of women writers in Britain. Course content will vary. Authors covered may include Marie de France, Margery Kempe, Aemilia Lanyer, Elizabeth Cary, Aphra Behn, Frances Burney, Mary Wollstonecraft, Mary Shelley, George Eliot, Virginia Woolf, and Doris Lessing. (Same as Women’s Studies 422.)
Repeatability: May be repeated. Maximum 6 hours.

423 Colonial and Post-Colonial Literature (3) Emphasis on historical and theoretical methodologies for reading colonial and post-colonial literature.
Repeatability: May be repeated with instructor’s consent. Maximum 6 hours.

431 Early American Literature (3) From the earliest texts to 1830, including exploration and discovery, Native American, colonial, revolutionary, and early national works.

432 American Romanticism and Transcendentalism (3) Prose and poetry of the American Renaissance, from c. 1830 to the end of the Civil War. Includes writers such as Cooper, Poe, Hawthorne, Melville, Emerson, Thoreau, Stowe, Douglass, Whitman, Dickinson.

433 American Realism and Naturalism (3) Literature from the time of the Civil War to World War I, including such writers as Twain, Howells, James, Jewett, Freeman, Crane, and Norris.

434 Modern American Literature (3) World War I to the present.

435 American Novel before 1900 (3) From earliest sentimental novels through Brown and Cooper, and major figures to 1900, including Hawthorne, Melville, Stowe, Clemens, and James.

436 Modern American Novel (3) Authors such as Faulkner, Steinbeck, Welty.

441 Southern Literature (3) Southern writing from colonial period into the 20th century, including frontier humorists, local color writers, and southern literary renaissance.

442 American Humor (3) Development of American humor from the early 19th century into the 20th century, with particular emphasis on Mark Twain. (Same as American Studies 442.)

443 Topics in Black Literature (3) Content varies according to particular genres, authors, or theories from 1845 to present, including Langston Hughes and the Harlem Renaissance, Richard Wright and Gwendolyn Brooks, writing by black women, international black literature in English, and black American autobiography. (Same as Africana Studies 443.)

451 Modern British and American Poetry (3) From Yeats and Frost to Auden, Stevens, and more recent poets.

452 Modern Drama, 1880-1945 (3) Survey of British, American, and international drama from the advent of modern drama to the end of World War II. (Same as Comparative Literature 452.)

453 Contemporary Drama (3) Survey of British, American, and international drama since World War II.

454 Twentieth-Century International Novel (3) Fiction in English translation from such writers as Kafka and Camus through contemporary authors. (Same as Comparative Literature 454.)

455 Persuasive Writing (3) Focuses on writing and analyzing persuasive texts in public, private, and academic contexts.
(De) Prerequisite(s): 355 or consent of instructor.

456 Contemporary/Postmodern Literature (3) Studies in literature written after World War II. Content will vary.
Repeatability: May be repeated with consent of instructor. Maximum 6 hours.

460 Technical Editing (3) Editing technical material for publication. Principles of style, format, graphics, layout, and production management.
(De) Prerequisite(s): 360 or consent of instructor.

462 Writing for Publication (3) Principles and practices of writing for publication. Dissertations, theses, articles, and reports in science and technology.
(De) Prerequisite(s): 360 or consent of instructor.

463 Advanced Poetry Writing (3) Development of skills acquired in basic poetry-writing course.
(De) Prerequisite(s): 363 or consent of instructor.

<td>477</td>
<td>Pedagogical Grammar for ESL Teachers (3)</td>
<td>Aspects of English syntax and morphology presenting difficulties for non-native learners of English. Basic and complex sentence structures; noun and article system; verb tense, aspect, modality, and complementation.</td>
<td>(Same as Linguistics 477.)</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>479</td>
<td>Literary Criticism (3)</td>
<td>Historical survey of major works of literary criticism.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>480</td>
<td>Fairy Tale, Legend, and Myth: Folk Narrative (3)</td>
<td>Study of forms of folk narrative: normally includes Grimms’, Anderson’s, Irish, English, Appalachian, African, and Native American tales.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>481</td>
<td>Studies in Folklore (3)</td>
<td>Topics vary.</td>
<td>Repeatable: May be repeated if topic differs. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>482</td>
<td>Major Authors (3)</td>
<td>Content varies. Concentrated study of at least one of the most influential writers in British or American literary history (e.g., Donne, Pope, Austen, Tennyson, Whitman, Faulkner, Lawrence, Baldwin, or Morrison).</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>483</td>
<td>Special Topics in Literature (3)</td>
<td>Topics vary.</td>
<td>Repeatable: May be repeated. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>484</td>
<td>Special Topics in Writing (3)</td>
<td>Original writing integrated with reading, usually taught by professional author.</td>
<td>Repeatable: May be repeated. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>485</td>
<td>Special Topics in Language (3)</td>
<td>(Same as Linguistics 485.)</td>
<td>Repeatable: May be repeated with consent of department. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>486</td>
<td>Special Topics in Criticism (3)</td>
<td>Content varies. Special topics in theoretical and practical approaches to British and American literature.</td>
<td>Repeatable: May be repeated with consent of department. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>489</td>
<td>Special Topics in Film (3)</td>
<td>Content varies. Particular directors, film genres, national cinema movements, or other topics.</td>
<td>(Same as Cinema Studies 489.)</td>
<td>Repeatable: May be repeated with consent of department. Maximum 6 hours.</td>
<td></td>
</tr>
<tr>
<td>490</td>
<td>Language and Law (3)</td>
<td>Language in the Anglo-American legal process: focus on differences between spoken and written language; lexical and syntactic pragmatics; and legal language with an emphasis on legal writing and transmission of results of scholarship.</td>
<td>(Same as Legal Studies 490; Linguistics 490.)</td>
<td>(DE) Prerequisite(s): 371 or 372</td>
<td></td>
</tr>
<tr>
<td>495</td>
<td>Introduction to Rhetoric and Composition (3)</td>
<td>Introduction to the historical, theoretical, and empirical modes of inquiry in rhetoric and composition and their implications for the teaching of composition.</td>
<td>(DE) Prerequisite(s): 355 or consent of instructor.</td>
<td>(DE) Prerequisite(s): 355 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>496</td>
<td>The Rhetoric of Legal Discourse (3)</td>
<td>Applying basic principles of persuasive writing to legal materials. Writing position papers, briefs, and memoranda, students learn identification and argument. Critical reading and discussion of both professional and student writing. Introductory legal research techniques. No prior legal knowledge necessary.</td>
<td>(Same as Legal Studies 496.)</td>
<td>(DE) Prerequisite(s): 355 or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>500</td>
<td>Thesis (1-15)</td>
<td>Grading Restriction: P/NP only.</td>
<td>Repeatable: May be repeated. Maximum 6 hours.</td>
<td>(DE) Prerequisite(s): Second year of foreign language or consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>502</td>
<td>Registration for Use of Facilities (1-15)</td>
<td>Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.</td>
<td>Grading Restriction: Satisfactory/No Credit grading only.</td>
<td>Repeatable: May be repeated. Credit Restriction: May not be used toward degree requirements.</td>
<td></td>
</tr>

</table>
561 Readings in 20th-Century Literature (3) Content varies: genre, theme, literary movement, or other coherent emphasis. 
Repeatability: May be repeated. Maximum 9 hours.

575 Issues in Second/Foreign Language Rhetoric and Composition (3) Examination of cross-linguistic and cross-cultural issues in the development of academic writing proficiency in a second/foreign language. 
(Same as Linguistics 575.) 

576 Introduction to Contemporary Criticism (3) Introductory survey of 20th-century literary criticism from New Criticism to present. 

580 Fiction Writing (3) Advanced fiction projects under supervision of instructor and for independent study. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE Prequisite(s): Extensive background in reading and writing fiction. 

581 Colloquium in Poetry Writing (3) Major poetic project or continuation of project begun in 463. Individual consultation with instructor supplements class analysis; readings in contemporary poetry and theory. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE Prequisite(s): Consent of instructor. 

582 Special Topics in Writing (1-3) Topics vary. 
Repeatability: May be repeated. Maximum 6 hours. 
Comment(s): Enrollment by consent of director of graduate studies.

583 Special Topics in Literature (3) Topics vary: genres, modes, and other literary subjects not in standard period divisions. 
Repeatability: May be repeated. Maximum 9 hours.

584 Topics in Feminist Studies (3) Topics vary. 
Repeatability: May be repeated. Maximum 9 hours.

585 Issues in Invention, Style, and Audience (3) Theoretical perspectives on contemporary research in rhetoric and composition. 

586 History of Rhetoric I (3) Survey of rhetoric from Sophists to Ramus. 

587 History of Rhetoric II (3) Survey of rhetoric from Bacon to present. 

588 Readings in Applied Rhetoric (3) Content varies: Writing across curriculum, writing centers, technical communication, text linguistics. 
Repeatability: May be repeated. Maximum 6 hours.

589 Special Topics in Language (3) Topics vary. 
Repeatability: May be repeated. Maximum 6 hours.

590 Topics in Critical Theory (3) Topics vary. 
Repeatability: May be repeated. Maximum 9 hours.

591 Foreign Study (1-15) 

592 Off-Campus Study (1-15) 

593 Independent Study (1-15) 

594 Film History, Form, and Analysis (3) Issues in film studies: history of narrative film; concept of film form; critical approaches to film study (genre, auteur, formalist, and others); and critical analysis of individual films. 

600 Doctoral Research and Dissertation (3-15) 
Grading Restriction: P/NP only. 
Repeatability: May be repeated.

610 Studies in Old English Language and Literature (3) Old English grammar with readings in prose and poetry. 

611 Studies in Beowulf (3) Translation and critical study of Beowulf. 
(DE Prequisite(s): 610 or consent of instructor.

620 Studies in Medieval English Literature (3) Seminar in literature and literary genres of Medieval English literature, read in Old and Middle English. Subject matter varies from year to year. 
Repeatability: May be repeated. Maximum 9 hours.

621 Studies in Chaucer (3) Seminar in text, interpretation, and criticism of Chaucer’s writings. 
Repeatability: May be repeated. Maximum 6 hours. 
(DE Prequisite(s): Previous course in Chaucer.

630 Studies in Renaissance Literature (3) Seminars: Spenser, Milton, 17th-century prose and poetry, Shakespeare, 16th-century prose and poetry, non-Shakespearean drama. 
Repeatability: May be repeated. Maximum 9 hours.

Repeatability: May be repeated. Maximum 9 hours.

640 Studies in Restoration and 18th-Century Literature (3) Topics vary. Swift, satire, restoration literature, Johnson and Boswell, Addison and Steele, restoration drama, Dryden. 
Repeatability: May be repeated. Maximum 9 hours.

641 Studies in Restoration and 18th-Century Literature (3) Topics vary. Swift, satire, restoration literature, Johnson and Boswell, Addison and Steele, restoration drama, Dryden. 
Repeatability: May be repeated. Maximum 9 hours.

650 Studies in English Romanticism (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

651 Studies in Victorian Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

652 Studies in Victorian Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus.

660 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women’s literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

661 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women’s literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

662 Studies in American Literature (3) Southern literature before 1830, frontier, regionalism, women’s literature, Irving, Cooper, Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, Dickinson, James, and Twain. 
Repeatability: May be repeated. Maximum 9 hours.

670 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

671 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

672 Studies in 20th-Century Literature (3) Seminar content varies: particular literary figure or figures, genres, theme, or other coherent focus. 
Repeatability: May be repeated. Maximum 9 hours.

680 Topics in English Language (3) 

682 Studies in Rhetoric and Composition (3) Content varies. Advanced work in theory and/or history of rhetoric and composition. Issues in invention, textuality, literacy, historiography, style and ethics. 
Repeatability: May be repeated. Maximum 9 hours.

685 Studies in Creative Writing (3) Content varies. Connection between theory and practice in writing. 
Repeatability: May be repeated. Maximum 9 hours.

688 Studies in Literary Criticism (3) Content varies. Advanced work in theory and history of literary criticism. 
Repeatability: May be repeated. Maximum 9 hours.

690 Special Topics (3) Content varies. History of ideas, humor, biography, autobiography, extra-literary disciplines. 
Repeatability: May be repeated. Maximum 9 hours.

694 Studies in Film (3) Content varies. Advanced work in film history and analyses. 
Repeatability: May be repeated. Maximum 6 hours.

English Education (340)

459 Teaching English in the Secondary School (3) Techniques of teaching composition, language, and literature. 
Comment(s): Admission to teacher education required.

460 Teaching Reading and Literature in the Secondary School (3) Teaching basic reading skills and literature.

507 Teaching Poetry Grades 7-12 (3) Research and theory in application to teaching of poetry. Design of strategies and materials for teaching and writing and reading of poetry. Review of texts and materials.

508 Teaching Composition in the Secondary School (3) Teaching narration, description, exposition, and argumentation; writing process and marking of student papers.

509 Teaching Fiction in the Secondary School (3) Teaching of novels and short stories.
521 Interdisciplinary Aesthetics (3) Discussions, visual and audio presentations concerned with aesthetic considerations of areas of study: geography, history, physics, literature, languages, music, visual arts and drama.

543 Teaching Language Arts in the Middle Grades (3) Activities in this class are intended to promote the professional growth of pre-service and in-service language arts teachers through study, design, and implementation of language arts curriculum and instructional strategies. In particular, methods of teaching contemporary language arts content in grades 4-8 will be explored.

590 Seminar in Teaching English in Secondary Schools (3) Content varies. Theoretical and practical approaches to teaching English in secondary school.

592 Linguistics and the Teaching of English (3) Grammar, usage, semantics, dialectology, history of language, and lexicography.

597 Teaching Drama Grades 7-13 (3) Strategies and materials for teaching creative dramatics, enacting and writing of plays, reading of scripts.

598 Developing Speaking and Listening Skills, Grades 7-12 (3) Teaching approaches to nonverbal communication, interpersonal and group communication, public address and listening. Review of tests and materials.

601 Studies in English Education (3) Issues and research in teaching of English.

Entomology and Plant Pathology (341)

410 Diseases and Insects of Ornamental Plants (3) Symptoms, identification and management of diseases and insect pests that affect plants in greenhouse, nursery, and landscape environments.

451 Plant Tissue Culture (3) Methods for the culture of cells, tissues, and organs including media preparation and maintenance of cultures.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Registration Restriction(s): Master of Science – entomology and plant pathology major.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: Not to be used toward degree requirements.

505 Mycology (3) Survey of the fungal kingdom and traditional allies in the context of phyla and classes. Systematics, biology, reproduction, structure-function, physiology, and ecology illustrated with fresh and preserved material and cultural techniques in laboratories.

545 Plant Microtechnique (1) Practical light and scanning electron microscopy methods for investigating aspects of plant development, histology and pathological structures in ornamental forest and crop species. (Same as Plant Sciences 545.)

550 Molecular Epidemiology and Mycology (3) An overview of molecular tools for exploring population biology as well as gene function with an emphasis on tools for emerging and traditional model organisms that have whole genome sequences available. The course will include lectures, assigned reading and discussion, and laboratory demonstrations. (Same as Microbiology 550.)

555 Physiology of Plant Disease (3) Biochemical and physiological events involved in host-pathogen interactions. Mechanisms of disease resistance.

560 Plant Parasitic Nematodes (2) Morphology, physiology, taxonomy, ecology, and management of plant parasitic nematodes, host-parasite relationships.

561 Special Problems in Entomology (1-3) Comprehensive individual study of current problems. Repeatability: May be repeated. Maximum 6 hours.

562 Special Problems in Plant Pathology (1-4) Comprehensive individual study of current problems. Repeatability: May be repeated. Maximum 6 hours.

563 Concentrated Study in Entomology (1-3) Selected subjects in entomology for advanced students, concentrated in time and subject matter. Repeatability: May be repeated. Maximum 6 hours.

564 Protein Gel Electrophoresis (1) Practical experience with isolating native and denatured proteins from plants and fungi; determining protein concentrations, PAGE of proteins including total proteins and assays for specific enzymes (isozyme) analyses. (Same as Plant Sciences 544.)

565 Plant Microtechnique (1) Practical light and scanning electron microscopy methods for investigating aspects of plant development, histology and pathological structures in ornamental forest and crop species. (Same as Plant Sciences 545.)

566 Taxonomy of Adult Insects (3) Classification, phylogeny, and distribution of insects and related arthropods. Lectures on theory and practice of insect systematics and major features of insect evolution. Laboratory practice on methods of collection, preservation, and study of insects, with emphasis on order and family identification of adults. Substantial insect collection (above requirements for 448), one or more field trips, and a taxonomically oriented project required. Credit Restriction: Students cannot receive credit for both 548 and 448. Registration Permission: Consent of instructor.

567 Molecular Epidemiology and Mycology (3) An overview of molecular tools for exploring population biology as well as gene function with an emphasis on tools for emerging and traditional model organisms that have whole genome sequences available. The course will include lectures, assigned reading and discussion, and laboratory demonstrations. (Same as Microbiology 550.)

568 Registration Restriction(s): Minimum student level – senior. Registration Permission: Consent of instructor.
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction(s): Doctor of Philosophy – plant, soils, and insects major.

602 Advanced Topics in Entomology (1-3)
Morphology, systematics, physiology, ecology and genetics of arthropods, apiculture, medical and veterinary entomology, insect biodiversity, and insect pathology.
Repeatability: May be repeated. Maximum 12 hours.

604 Advanced Topics in Plant Pathology (1-3)
Biological control, disease diagnosis and management, epidemiology, fungal plant pathogens, integrated pest management, molecular plant-microbe interactions, mycology, plant pathogenesis, plant pathogenic bacteria, soil- and seed-borne pathogens, and virology.
Repeatability: May be repeated. Maximum 12 hours.

606 Advanced Topics in Bioactive Natural Products (1-3)
Bioactive pesticides, ethno botany and paleobotany, ethnomedicine, biocontrol of plant pathogens, bioprospecting, natural product diversity, alternative bioactive crops, organic agriculture, allelopathy in agriculture, regulatory issues in natural product development, and bioactivity-guided isolation.
Repeatability: May be repeated. Maximum 12 hours.

608 Advanced Topics in Integrated Pest Management (1-3)
Selected issues and topics of current significance to integrated pest management: transgenics in agriculture, issues in biological control, pesticide resistance management, ethics in pest management, environmental manipulations, epidemiology of plant diseases, biological control of plant pests, induced plant resistance, plant-microbe interactions, and new pesticide chemistries.
Repeatability: May be repeated. Maximum 12 hours.
(DE) Prerequisite(s): 530 or consent of instructor.

612 Soilborne Plant Pathogens (3)
Causal agents; host-parasite-soil environment interactions; epidemiology; detection and identification of soilborne plant pathogens; biological, cultural, and chemical control.
Credit Restriction(s): Students who have received credit for 512 may not enroll in 612.
(DE) Prerequisite(s): 313 or consent of instructor.
Comment(s): PhD students only.

615 Physiology of Plant Disease (3)
Biochemical and physiological events involved in host-pathogen interactions. Mechanisms of disease resistance.
Credit Restriction: Students who have taken 515 cannot receive credit for 615.
(DE) Prerequisite(s): Introductory plant physiology and plant pathology or consent of instructor.
Comment(s): PhD students only.

640 Seminar (1)
Review of literature and current research in entomology and plant pathology.
Repeatability: May be repeated. Maximum 2 hours.
Comment(s): PhD students only.

643 DNA Analysis (2)
Practical experience in isolating genomic DNA from prokaryotic and eukaryotic organisms, amplification of DNA using arbitrary nucleotide primers. DNA profiling techniques (DAF, ASAP, ITS ribosomal DNA and 16S bacterial gene) isolation and purification of amplified products. Data collection and analysis of relationships between organisms. (Same as Plant Sciences 643.)
Contact Hour Distribution: 1 hour and 4 labs weekly for 7 weeks.
(DE) Prerequisite(s): 12 hours biological science and 8 hours chemistry.
Registration Permission: Consent of instructor.

Environmental and Soil Sciences (345)

434 Environmental Soil Chemistry (3)
Composition and chemical properties of soils and processes that govern fate and behavior of chemicals in soil environment. Topics include clay mineralogy, soil organic matter, mineral weathering and stability; aqueous speciation; surface chemistry; ion exchange, adsorption, and molecular retention; oxidation-reduction; and soil acidity, alkalinity, and salinity.
Recommended Background: Organic chemistry.

442 Soil Genesis and Classification (3)
Soil genesis and formation; observing and describing morphology of agricultural and forest soils; chemical and physical properties, classification. Includes 3 weekend field trips.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: General soils.

444 Transport Processes in Soil (3)
Basic understanding of soil physical properties and processes; influence of soil physical properties on water and chemical movement in soil; practical experience in the measurement and analysis of soil physical properties, water flow, and chemical movement in soil.
Recommended Background: General soils and physics.

462 Environmental Climatology (3)
Study of atmosphere as environment. Physical, chemical and biological factors affecting climates of various earth environments; meteorological process affecting biosystems. Climatic change and the human impact on the atmosphere, consequences of climatic change and mitigation policies, microclimates and urban climates, atmospheric pollution, extreme events and ozone depletion. Design and operation of weather information systems; automated weather stations.
Recommended Background: Computer proficiency.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction(s): Master of Science – environmental and soil sciences major.

502 Registration for Use of Facilities (3-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Seminar (1)
Presentations and discussions of current scientific material. (Same as Biosystems Engineering 503; Biosystems Engineering Technology 503.)
Repeatability: May be repeated. Maximum 3 hours.

511 Soil-Plant Relationships (3)
Principles of mineral nutrition of higher plants: plant physiological characteristics that influence uptake of water and nutrients; functions of nutrient elements in plants; soil factors influencing nutrient availability to plants; important relationships at soil-plant root interface; and responses to adverse soil environmental conditions.
Contact Hour Distribution: 3 hours and 1 rec.
Recommended Background: Plant physiology.

512 Pedology (3)
Physical and chemical weathering processes, factors of soil formation, soil forming processes.
Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: Soil genesis and classification.

513 Advanced Soil Chemistry (3)
Chemical properties and processes that operate in soil environment: thermodynamics of soil solutions and surface chemistry of soils, soluble complex formation, mineral solubility, electrochemical equilibria, geochemical modeling, ion exchange equilibria, surface functionality and reactivity, adsorption phenomena, and surface complexation modeling.
Recommended Background: Soil chemistry.

514 Environmental Soil Physics (3)
Principles of water, gas, and solute movement in soil/water systems; application of appropriate models for the description of these processes; methods for characterizing hydraulic and chemical transport properties of soil; applications of the science of soil physics to solutions of contemporary problems in water conservation, prevention of surface/ground water contamination, and management of plant water status.
Recommended Background: Soil physics.

516 Soil Biology and Biochemistry (3)
Soil organisms and their activities in soils: soil ecology, biogeochemical cycling of important elements, organic matter dynamics, and applications of agricultural and environmental biology and biochemistry.
Contact Hour Distribution: 2 hours and one 3-hour lab.
Recommended Background: General soils.

593 Special Problems in Plant and Soil Science (1-3)
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
Registration Restriction(s): Doctor of Philosophy – plants, soils, and insects major.

601 Special Topics in Soil Science (1-3)
Thermodynamics of soil solutions, clay structure and surface chemistry, soil mineralogy, plant mineral nutrition, soil microbiology, water movement and use by plants, soil structure, soil thermal properties, interaction in the soil-plant environment.
Repeatability: May be repeated. Maximum 6 hours.

603 Seminar (1)
Presentations and discussions of current scientific material. (Same as Biosystems Engineering 603.)
Repeatability: May be repeated. Maximum 3 hours.

613 Advanced Topics in Soil Chemistry and Fertility (2)
Topics of current significance: scientific literature.
(RE) Prerequisite(s): 513.

614 Advanced Topics in Soil Biology and Biochemistry (2)
Topics of current significance: scientific literature.
(RE) Prerequisite(s): 514.
615 Advanced Topics in Soil Physics, Genesis, and Morphology (2)
Topics of current significance; scientific literature.

Environmental Engineering (344)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

508 Seminar (1) Reports on current research in environmental engineering at the University of Tennessee, Knoxville.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 10 hours.
Comment(s): Graduate standing required.

520 River Mechanics (3) An integrated study of river mechanics including the principles of open channel flow, and the fluvial processes associated with a mobile bed. Theory and analysis of open channel hydraulics include uniform, gradually-varied, rapidly-varied, spatially-varied, and unsteady flow conditions. Fluvial processes consist of sediment properties, dynamics of suspended and bedload sediment transport, adjustments in channel morphology and channel stability, channel regime theory and erodible channel design, and modeling applications.

(DE) Prerequisite(s): Civil Engineering 390.

522 Floodplain and Urban Flood Management (3) Review of national, regional, and local flood problems; state of the art flood damage reduction alternatives: structural and non-structural; institutional responses: policies, programs, organizations, regulations, and legal aspects; floodplain hydrology and hydraulics, HEC-1, HEC-2; floodway encroachment, flood hazard zone and damage potential determinations; cast studies.

(DE) Prerequisite(s): 390 or consent of instructor for non-majors.

(Same as Biosystems Engineering 525.)

(DE) Prerequisite(s): Civil Engineering 395 or 416.

530 Urban Hydrology and Stormwater Engineering (3) Planning, design, modeling, management, and maintenance of urban stormwater systems. Theory and application of hydraulic and hydrologic principles to design of stormwater management systems; design of inlet structures, conveyance systems, detention/retention basins and appurtenances, and selected best management practices (BMP’s); evaluation of land-use changes of runoff quantity and quality; review, selection and application of contemporary computer models.

(DE) Prerequisite(s): Civil Engineering 395 or 416.

535 Applied Ground Water Hydrology (3) Applied hydrology of multi-layered aquifer systems. Modeling of complex groundwater systems that will include: the development and implementation of conceptual, analytical and numerical models. Numerical approaches to the solution of PDEs that describe flow through porous media: boundary conditions, stability, existence and uniqueness. (Same as Geology 535.)

(DE) Prerequisite(s): 485 or Geology 485 or consent of instructor.

543 Instrumentation and Measurement (3) (See Biosystems Engineering 543.)

545 Monitoring Hydrologic Phenomena (3) (See Biosystems Engineering 545.)

551 Physicochemical Unit Processes (3) Theory and design application in water and wastewater treatment.

(DE) Prerequisite(s): Civil Engineering 380 and 390.

552 Biological Treatment Theory (3) Theory and design applications of biological processes to treatment of wastewater and solid wastes. (Same as Biosystems Engineering 552.)

Contact Hour Distribution: 2 hours and 1 lab.

(DE) Prerequisite(s): Civil Engineering 380.

553 Aquatic Chemistry (3) Theoretical, applied and analytical chemistry related to generation, measurement and treatment of environmental contaminants.

Contact Hour Distribution: 2 hours and 1 lab.

(DE) Prerequisite(s): General chemistry course.

554 Environmental Engineering Chemistry (3) Application of chemical principles in analyzing physical, chemical, or biological interactions of chemical contaminants in various environmental compartments: atmosphere, hydrosphere, and lithosphere.

(DE) Prerequisite(s): 1 year of chemistry
Registration Permission: Consent of instructor.

555 Solid Waste Management (3) Magnitude and characteristics of solid waste problems; collection systems; design of disposal systems: landfill, incineration, and composting, design of resource recovery systems; current and future regulations.
Comment(s): Senior standing required for undergraduates.

556 Hazardous Waste Management (3) Analysis and design of operations and processes for hazardous waste disposal and processing; regulations; applications; industrial applications.
Comment(s): Requires graduate standing or consent of instructor.

570 Air Quality Management/Pollution Control (3) Introductory course on concepts of air pollution, analysis of relationships among sources, meteorology, effects; stack sampling; emission control systems.
Registration Permission: Consent of instructor.

571 Design of Air Pollution Control Systems (3) Design and evaluation of systems used to control emission of gaseous and particle air pollutants. Comprehensive design of specific devices and systems.

(DE) Prerequisite(s): 570.

572 Air Quality Dispersion Modeling (3) Diffusion in atmosphere; application of atmospheric dispersion models and evaluation of meteorological and air quality data.

(DE) Prerequisite(s): 570.

573 Sampling of Air Pollutants (3) Standard sampling methods for particulate and gaseous air pollutant emissions from industrial processes; ambient air monitoring instrumentation/techniques.

(DE) Prerequisite(s): 570.

575 Applied Microbiology and Bioengineering (3) (See Chemical Engineering 575.)

581 Green Engineering (3) (See Chemical Engineering 581.)

590 Special Problems in Environmental Engineering (3) Enrollment limited to environmental engineering students in non-thesis program.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to students with graduate standing.

595 Special Topics (1-4) Problems and topics related to current developments in field.
Repeatability: May be repeated.

651 Industrial Waste Unit Operations and Processes (3) Theoretical design and laboratory modeling of industrial waste treatment processes and operations.

Contact Hour Distribution: 2 hours and 1 lab.

(DE) Prerequisite(s): 551 and 553.

(DE) Prerequisite or (DE) Corequisite(s): 552.

653 Pollutant Fate Modeling and Risk Assessment (3) Application of scientific principles concerning movement and fate of chemicals at interfaces of air, water, and earth and solids in environment. Methods of assessing risk posed by presence of those chemicals.

(DE) Prerequisite(s): 551.

691 Special Topics in Environmental Engineering (3) Selected advanced problems of current interest.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

Exercise Science (347)

480 Physiology of Exercise (3) Lecture and laboratory class dealing with functions of the body in muscular work. Topics include physiological aspects of fatigue, training, and adaptation to environment. (Same as Biochemistry and Cellular and Molecular Biology 480.)

Contact Hour Distribution: 2 lectures and 1 lab.

(DE) Prerequisite(s): Biochemistry and Cellular and Molecular Biology 230 or 440.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Special Project (3) Culminating experience for non-thesis major. Research study suitable for publication, or practicum requiring special written work.
Grading Restriction: Satisfactory/No Credit grading only.
502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

508 Research in Exercise Science (3) Research for writing of thesis and institutional review board proposals; presentation of research through free communications and poster presentations; calculation and interpretation of statistics related to common research designs used in research; and use of computer software.

509 Graduate Seminar in Public Health (1) (See Public Health 509.)

513 Biomechanics of Orthopedic Rehabilitation (3) Effect of physical activity on musculoskeletal tissue: flexibility development and measurement, surgical implications, and rehabilitation related research.

516 Therapeutic Exercise (3) Current research in therapeutic exercise: role of nervous system, soft tissue healing, proprioception, muscle activation patterns, and strength.

521 Physical Activity Epidemiology Methods (3) Epidemiological foundation for research in physical activity related to individual and population-based health. Emphasis on analytic methods, surveys, and research designs. Focus on issues within special populations (e.g., elderly, children).
(DE) Prerequisite(s): Course in statistics or consent of instructor.

525 Epidemiology of Injury and Violence (3) Epidemiologic methods to describe magnitude and examine etiology of unintentional and intentional injury. Alternative approaches for preventing or controlling occurrence of injury and violence in both general population and high risk sub-populations.

531 Biomechanics (3) Biomechanical principles and applications to analyses of human movements. Quantitative analysis of human movements.
(DE) Prerequisite(s): General physics course.

533 Exercise Physiology (3) Physiology of human performance: acute and chronic effects of exercise on metabolic, cardiac, pulmonary, and skeletal systems.
Contact Hour Distribution: 2 hours and 1 lab.
(DE) Prerequisite(s): Human physiology or general physiology course and a general chemistry course.

541 Special Topics (1-3) Advanced study in selected areas of exercise science.
Repeatability: May be repeated. Maximum 6 hours.

565 Advanced Physiology of Exercise (3) Systematic study of skeletal muscle and metabolism related to acute exercise and physical training: lectures, discussions of major scientific reviews, and appropriate laboratory experiments.
(DE) Prerequisite(s): 480 or 533.

(DE) Prerequisite(s): Undergraduate courses in human physiology and physiology of exercise.

569 Clinical Exercise Physiology (3) Cardiac structure and function, interpretation of 12-lead electrocardiograms, exercise considerations for cardiac and pulmonary patient.
(DE) Prerequisite(s): 480 or 533 and 567.

570 Cardiac Rehabilitation Practicum (1-3) Supervised experience in hospital-based exercise programs for participants with cardiac and/or pulmonary disorders. Use of telemetry monitoring, leading safe exercise regimens counseling participants on safe exercise guidelines. Presenting educational class on topic applicable to participants.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Corequisite(s): 533 and 567 or consent of instructor.

585 Seminar in Gerontology (1) (See Health 585.)

593 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Research Seminar (1) Research topics in different aspects of exercise science, sport psychology, and sport sociology. (Same as Sport Studies 601.)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

622 Directed Independent Research (3-6) Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

635 Physical Activity and Positive Health (3) Review of clinical, epidemiological, and experimental evidence concerning relationship and effects of exercise on health-related components of fitness. (Same as Public Health 635.)
(DE) Prerequisite(s): Elementary statistics course, 480 or 533 and 567 or consent of instructor.

661 Seminar in Exercise and Applied Physiology (1-3) Selected topics in exercise and environmental physiology.
Repeatability: May be repeated. Maximum 6 hours.
(DE) Prerequisite(s): 480 or 533.

664 Research Participation in Exercise Science (1-6) Participation in research with faculty member whose interests coincide with those of student.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

681 Practicum (1-3) Intern experience in areas of major interest.
Repeatability: May be repeated. Maximum 6 hours.

693 Independent Study (1-3) Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.

Finance (349)

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

511 Strategic Management for Creation of Financial Value (3) Strategic issues in corporate finance, investments, and capital markets: how firms can employ financial strategies to create value. Use of derivatives, risk management, real options, fixed income securities, venture capital, initial public offerings and financial restructuring.
(DE) Prerequisite(s): Business Administration 511, 512, and 513 or consent of instructor.

512 Problems in Financial Management (3) Readings and cases that apply finance theory to real-world investment, financing, and asset management problems.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

525 Investment Analysis and Portfolio Management (3) Investment process, portfolio applications. Asset allocation decision in global setting; organization and functioning of financial markets; equity and bond valuation; asset valuation models; equity and bond portfolio management; options, forwards and futures contracts; evaluation of portfolio performance; and review of alternative economies and emerging markets.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

551 Financial Management of a New Enterprise (3) Financial issues associated with formation, control, and long-term planning of new enterprise. Acquisition of venture capital.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.

581 Real Estate Investment and Finance (3) Financial and market analysis used to make real estate investment decisions. Effects of variety of financing options on rate of return on income-producing properties. Effect of various financing options on consumer’s decisions to purchase. Relationship between primary and secondary mortgage markets and impact of those markets on cost and availability of funds for real estate lending. Effects of government intervention (taxation, subsidization, and regulation) in both real estate and mortgage markets.
(DE) Prerequisite(s): 511 and Business Administration 511, 512, 513, and 514 or consent of instructor.
593 Independent Study (3) Directed research and study. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): Business Administration 511, 512, 513, and 514, or consent of instructor.

599 Special Topics in Finance (1-3) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

641 Seminar in Finance (1-3) Capital markets, utility theory, asset pricing, theory of the firm, capital structure, dividend policy. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 641. Registration Permission: Consent of instructor.

651 Seminar in Corporate Finance (1-3) Recent theoretical and empirical developments in micro-finance literature. Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 641. Registration Permission: Consent of instructor.

652 Seminar in Asset Pricing and Markets (1-3) Recent theoretical and empirical developments in finance. Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 641. Registration Permission: Consent of instructor.

653 Seminar in Financial Institutions (1-3) Theoretical and empirical studies of financial institutions. Topics: modeling banking firm, efficiencies in banking, bank lending arrangements and asymmetric information, international competitiveness, and deposit insurance. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 641. Registration Permission: Consent of instructor.

654 Special Topics (1-3) Recent developments in finance. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 641. Registration Permission: Consent of instructor.

693 Independent Study (1-6) Directed research on subject of mutual interest to student and staff member. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

Food Science and Technology (390)

410 Food Chemistry (3) Reactions of water, proteins, lipids, carbohydrates, minerals, enzymes, vitamins, and additives in foods. Contact Hour Distribution: 3 hours lecture. (DE) Prerequisite(s): Chemistry 110, Biochemistry and Cellular and Molecular Biology 310.

415 Food Analysis (4) Principles, methods and techniques for qualitative and quantitative analyses of composition and physical, chemical, and biological properties of food and food ingredients. Contact Hour Distribution: 3 hours and one 2-hour lab. (DE) Prerequisite(s): Chemistry 110 or 350.

420 Food Microbiology (2) Physical, chemical and environmental factors moderating growth and survival of foodborne microorganisms; pathogenic and spoilage microorganisms affecting quality of foods and their control. (DE) Prerequisite(s): Microbiology 210. (DE) Corequisite(s): 429.

429 Food Microbiology Lab (3) Methods for examination, enumeration, cultivation and identification of foodborne microorganisms. (DE) Prerequisite(s): Microbiology 210. (DE) Corequisite(s): 420.

430 Sensory Evaluation of Food (3) Principles and methods of sensory evaluation of foods. Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): Basic statistics course.

445 Application of Food Chemistry and Processing Principles (4) Interactions and functions of dairy, egg, cereal and other plant based ingredients during the production and storage of processed food products. Contact Hour Distribution: 3 hours lecture and 1 lab. (DE) Prerequisite(s): 340 and 410 or consent of instructor.

461 Fresh Meats (3) Basic principles in the conversion of muscle to meat and the factors that contribute to the utilization and marketing of quality fresh meat products. 462 Manufactured Meat Technology (2) Basic principles of manufacturing valued added meat products. Contact Hour Distribution: 1 hour lecture and 1 hour lab.

490 Food Laws and Regulations (3) A comprehensive examination of the laws and regulations designed to preserve safety, wholesomeness, and nutritional quality of the United States food supply with an in-depth analysis and discussion of precedent case studies and their impacts on laws and regulations. (DE) Prerequisite(s): 140. Registration Permission: Consent of instructor for non-majors.

495 Quality Assurance and Sanitation Practices (3) Design and evaluation of a food processing operation to produce a safe and acceptable quality food product. (DE) Prerequisite(s): 320 and 340 or consent of instructor.

500 Thesis (1-15) Grading Restriction: Satisfactory/No Credit or letter grade. Repeatability: May be repeated.

501 Seminar (1) Individual reports and discussion on topics from current literature. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 3 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3) Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 9 hours.

507 Professional Development Seminar (1) (See Agriculture and Natural Resources 507.)

510 Instrumental Analysis of Food (3) Modern instrumental methods for control of food manufacturing processes. Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): 410.

515 Food Carbohydrates, Proteins and Lipids (4) Advanced study of chemical and physical attributes of carbohydrate, protein, and lipid components of foods; effects of components on production of safe and consistent quality food products; and changes during processing and/or distribution of food products. Contact Hour Distribution: 3 hours and 1 lab. (DE) Prerequisite(s): 410.

521 Advanced Food Microbiology (3) Extrinsic and intrinsic factors associated with foods and food processing that relate to growth, survival, inhibition, detection, and recovery of foodborne pathogens and spoilage organisms; traditional and current approaches to microbiological food safety and quality. (DE) Prerequisite(s): 420 and 429.

540 Food Product Development (3) Art, science and technology of developing and marketing new food products. Contact Hour Distribution: 2 hours and 1 lab. (DE) Prerequisite(s): 410.

541 Food Engineering (3) Transport processes in food engineering; unit operations: thermal and non-thermal processing of foods; food separations; processing and physicochemical properties of foods; calculations, design practices, and equipment used in food processing operations. Contact Hour Distribution: 2 hours and one 2-hour lab. Recommended Background: Basic calculus and physics.

590 Special Topics in Food Science and Technology and Science (1-3) Critical reviews of current research and production concerns of food industry. Repeatability: May be repeated. Maximum 9 hours.

593 Directed Studies (1-3) Research on non-thesis topics chosen by student and major professor. Supervised experience in food industry or governmental laboratories. Repeatability: May be repeated. Maximum 6 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.
514 Tree Physiology (3) Tree structure, growth and development, and function, and how these are related to the environment and to cultural practices. Influence of environmental variables on plant growth and distribution; effects of forest management practices on growth and function. Credit Restriction: Students cannot receive credit for both 514 and 414. (DE) Prerequisite(s): Biology 111 and 112 or Biology 101 and 102.

515 Forest Conservation Workshop (1-3) Relation of forest biology, ecology and management to conservation issues; integration of current conservation issues into classroom work and student projects; environmental education strategies. Repeatability: May be repeated. Maximum 3 hours. Comment(s): Not available to students in forestry or wildlife and fisheries science.

520 Advanced Forest Ecology (3) Physiological ecology and adaptations of trees; relationships between overstory structure, microclimate, and understory response; regeneration ecology; competition and effects of natural and human disturbance regimes at multiple scales; forest succession and stand dynamics. Comment(s): Requires graduate standing in forestry or biological science or consent of instructor.

521 Composite Materials from Renewable Resources (3) Manufacturing processes, science and engineering of composite materials derived from renewable resources. Overview of renewable resources and utilization; structure and properties of natural fibers, thermosets, thermostatics, and bioplastics; fundamentals of adhesion; engineered wood composites; natural fiber reinforced composites; and mechanical property and durability testing. (DE) Prerequisite(s): Basic understanding of polymer chemistry, engineering, physics, a silvicultural methods course, and Biology 220 or consent of instructor.

525 Woodlot Management (3) Current technologies and management strategies concerning wise use of forest resources for private, non-industrial forest landowners necessary for decision making and implementation. Contact Hour Distribution: 6.5 hours and 1 lab weekly for 6 weeks. (DE) Prerequisite(s): 6 hours of biological sciences or consent of instructor. Comment(s): Not available to students in forestry or wildlife and fisheries science.

530 Advanced Forest Resource Management (3) Analysis of forest management problems in public and private organizations. Classical forest regulation; linear and goal programming, as applied to resource management problems; advanced forest investment analysis; decision-making methods for primary forest management activities; and methodologies for incorporating non-timber values in forest management operations. (DE) Prerequisite(s): Senior-level forest management course or consent of instructor.

550 Recreation Planning for Forests and Associated Lands (3) Planning process for recreation development on forests and associated lands; analysis and critique of specific contemporary alternatives. Includes overnight field trips. (DE) Prerequisite(s): Senior-level course in forest recreation or consent of instructor.

580 Advanced Silviculture (3) Silvicultural characteristics, silvicultural practices and systems applied to commercially important hardwoods and softwoods. In-depth analyses of silvicultural principles involved and tools used, prescribed fire, pesticides, in regeneration and management; computer modeling of stand dynamics, structure, growth/yield. Contact Hour Distribution: 2 hours and 1 lab. Recommended Background: Silviculture course.

585 Advanced Forest Biometry (3) Application of sampling techniques to forest inventory; fixed and variable plot sampling; list sampling; Poisson sampling; regression estimators; multistage and multiphase sampling. Growth and yield prediction for even-aged and uneven-aged forests. Recommended Background: Forest inventory and sampling coursework.

590 Advanced Topics in Forestry (1-3) Recent advances and concepts; research techniques and analysis of current problems. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

593 Independent Study in Forestry (1-4) Repeatability: May be repeated. Maximum 6 hours.

590 Forest Growth and Development (3) Forest stand dynamics, analysis of changes in species composition and forest stand structure (physical and temporal) during forest succession, response of stands to disturbances (anthropogenic and natural), modeling techniques to make predictions of future stand development. Contact Hour Distribution: 2 hours and 1 lab. Recommended Background: Undergraduate course in silviculture.
Forestry, Wildlife and Fisheries (398)

410 Wildlife Habitat Evaluation and Management (3) Ecological relationships between wildlife and habitat. Evaluation, modeling, and management of wildlife habitat. Effects of land-use practices on wildlife habitat. Weekend field trips required.

Contact Hour Distribution: 2 hours and 1 lab.
Recommended Background: Undergraduate course in wildlife and fisheries.

416 Planning and Management of Forest, Wildlife and Fisheries Resources (3) Integrated forest and wildlife resource management through developing land management plans and analyzing case studies including conflict resolution.

Contact Hour Distribution: 1 hour and 2 labs.
Comment(s): To enroll, students must be at least a senior.

520 Natural Resource Issues at International Level (2) Identification and analyses of issues regarding forestry, wildlife, fisheries and wildland park resources beyond U.S. borders. Political, economic, social, and biophysical elements impacting natural resources in different parts of world: Northern Europe, Latin America, Asia, Africa, and South America. In-depth case study and class presentation required by student teams.

Credit Restriction: Not available to students who have taken 420.

535 Environmental Impacts to Natural Ecosystems (3) Current environmental problems impacting natural ecosystems: climatic change, acidic deposition, air pollution, species declines, and introductions of exotic species. Management methodologies to mitigate environmental problems. Overnigt field trips required.

Recommended Background: Undergraduate course in natural resource management.

540 Seminar on Integrated Resources Management in Biosphere Reserves (2) MAB program, UNESCO-sanctioned global conservation initiative. Analysis of integrated resources management practices that demonstrate concept of sustainable development. Environmental policy and application of science to management practice. Applicable to majors in forestry and in wildlife and fisheries science.

570 Natural Resource Sustainability: Social, Political and Institutional Dimensions (3) Use and management of natural resources in a world of constant change, interdependent systems (environmental, social, economic and political), and inevitable conflicts, utilizing technical as well as social/political advances. Historical and current approaches to natural resource governance, associated and inherent conflicts, changes in institutions and new paradigms of collaboration, adaptive management, social learning and social capacity building.

Credit Restriction: Offered to students who have taken 570.

580 Advanced Topics in Forestry, Wildlife and Fisheries (1-3) Recent advances and concepts, research techniques, and analysis of current problems.

Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only.
Repeatability: May be repeated.

Registration Permission: Consent of instructor.

610 Seminar in Natural Resources (2) Selected issues in natural resources and natural resource management at regional, national, or international level. Development of interdisciplinary approach to addressing problems; evaluating current state of knowledge, developing alternative actions to address problems, and identifying criteria for evaluation of alternatives.

Repeatability: May be repeated. Maximum 3 hours.

612 Seminar in Forestry, Wildlife and Fisheries (1) Current issues and developments in forestry, wildlife and fisheries. Required of all doctoral students in residence during the fall.

Repeatability: May be repeated. Maximum 3 hours.

French (405)

410 Medieval French Literature (3) Major representative works of Medieval French literature. Texts in modern French. (Same as Medieval Studies 410.)
(DE) Prerequisite(s): 300-level literature course.

411 French Literature of the 16th Century (3) Highlights of 16th-century French literature. Excerpts from Rabelais and Montaigne; readings of poems from writers from Lyon and members of Pléiade.
(DE) Prerequisite(s): 300-level literature course.

(DE) Prerequisite(s): 300-level literature course.

413 French Literature of the 18th Century (3) Major works of the Enlightenment.
(DE) Prerequisite(s): 300-level literature course.

(DE) Prerequisite(s): 300-level literature course.

(DE) Prerequisite(s): 300-level literature course.

420 French Cinema (3) The French cinema from its earliest days through New Wave directors. May be applied toward the French major. (Same as Cinema Studies 420.)
(DE) Prerequisite(s): 300-level literature course.

421 Phonetics (3) Foundation in the science of phonetics. Practical exercises and individual performance.
Credit Restriction(s): Graduate credit is not available to students majoring in a Romance language.
(DE) Prerequisite(s): 333 or 334 or 345 or permission of department.

422 Advanced Grammar (3) Improving one’s written French by studying basic and more refined structures of the French language. Writing creative free-style compositions.
(DE) Prerequisite(s): 333 or 334 or 345.

423 Advanced Conversation (1) Informal conversation with native speaker on contemporary topics. Stresses in-class contact rather than outside preparation.
Contact Hour Distribution: Meets 2 hours a week.
(DE) Prerequisite(s): 333 or 334 or 345.

424 Advanced Conversation (1) Informal conversation with native speaker on contemporary topics. Stresses in-class contact rather than outside preparation.
Contact Hour Distribution: Meets 2 hours a week.
(DE) Prerequisite(s): 333 or 334 or 345.

425 Introduction to Descriptive Linguistics (3) Initiation into the theory and practice of techniques of linguistic analysis in the subfields of phonetics, phonology, morphology, syntax, semantics, pragmatics and historical linguistics; discussion of their relevance to the learning and teaching of foreign languages and to the study of literary texts. (Same as German 425; Linguistics 425; Russian 425; and Spanish 425.)
Recommended Background: Linguistics 200.

426 Methods of Historical Linguistics (3) (See German 426.)

429 Romance Linguistics (3) Development of Classical Latin through Vulgar Latin into major Romance languages. (Same as Linguistics 429; Spanish 429.)

430 Theatrical French (4) Comprehensive introduction to dramatic texts, performance, and theatrical production in French. Students collaborate in the creative staging of a French play and they actively participate in its public performance. May be applied toward the major as a literature course.
(DE) Prerequisite(s): French 351 or French 352.

431 Highlights of French Civilization (3) Survey of French civilization from the Gauls to World War II. Historical events, daily life, all forms of arts.
(DE) Prerequisite(s): 300-level literature course.

432 Contemporary French Culture (3) Current French cultural issues placed in historical perspective with comparative emphasis. Taught in English; readings in French for majors. May be applied toward the French major.

434 Literature of Quebec (3) Survey of literature of Quebec, as well as French literature connected with North America. Readings include exploratory and missionary works, such as Voyages of Champlain and Journals of the Jesuits, as well as literature of contemporary Quebec.
(DE) Prerequisite(s): 300-level literature course.
445 Advanced French for Business (3) Study of advanced contemporary French language and culture as they relate to business transactions. A comparative approach is used to explore differences and similarities between Francophone business culture(s) and those of North America and Japan. Students build upon their knowledge of business terminology while being sensitized to cultural differences and the dangers of simplistic stereotyping.

(DE) Prerequisite(s): 345 or consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP grading only.
Repeatability: May be repeated.

501 Techniques in Literary Analysis (3) Close stylistic analysis of texts representative of different eras and of different genres. Development and improvement of student's written French. Required for MA students.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 The French Language (3) French as spoken and written from Medieval period to present.

512 Teaching a Foreign Language (3) Practical application of methods for teaching and evaluating basic language skills and foreign language skills, and cultural aspects through seminars, demonstrations, peer teaching, and observation of foreign language classes. Required of all MA and PhD students holding Graduate Teaching Assistantships, except those whose previous training or experience warrants their being excused by the department.

515 Technology Enhanced Language Learning (3) Introduction to TELL. Overview of existing software, programs, and professional literature on topic. Hands-on development of instructional Web site for teaching language, culture, or literature.

519 Bibliography and Methods of Research (3) Critical research tools and scholarly contributions in French literature and language. Practical exercises on compiling of scholarly data using computer-based and non-computer sources.

520 French and Francophone Film (3) French and Francophone culture through film.

530 French and Francophone Theater (3) Changing approaches to French and Francophone theater.

540 French Literature and Culture I (3) Literary and cultural heritage of French Middle Ages.

550 French Literature and Culture II (3) Literary and cultural heritage of 16th- and 17th-century France.

560 French Literature and Culture III (3) Literary and cultural heritage of 18th- and 19th-century France.

570 French and Francophone Literature and Culture I (3) Literary and cultural heritage of France and other Francophone countries in the first part of 20th century.

573 French and Francophone Literature and Culture II (3) Literary and cultural heritage of France and other Francophone countries from the late 20th century to present.

580 Critical Moments in French and Francophone Studies, or Linguistics (3) Contribution of France and Francophone world to evolution of literature, society, and ideas.
Repeatability: May be repeated. Maximum 12 hours.

584 Modern Theory and Criticism (3) Survey of 20th-century critical theory, including psychoanalysis, Marxism, structuralism, and more.

591 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

594 French Directed Readings (3)

595 French Directed Readings (3)

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

610 Doctoral Seminar in French and Francophone Studies, or Linguistics (3) Content varies.
Repeatability: May be repeated with consent of department. Maximum 12 hours.

Geography (415)

410 Global Positioning Systems and Geographic Data (3) Theory, field, and laboratory use of Global Positioning Systems for capturing digital geographic data; management of geographic data, including coordinate systems, datum issues, scanning digitizing, map standards, and uncertainty in Geographic Information Systems.
Contact Hour Distribution: 2 hours and one 2-hour lab.

411 Introduction to Geographic Information Science (3) Concepts and methods of spatial analysis and their application using geographic information systems software and techniques. Emphasizes both theoretical and applied aspects of GIS.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 310 or consent of instructor.

412 Advanced Cartography Techniques (3) Cartographic design and data display techniques for reference and thematic maps. Basic principles and methods of map reproduction.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 310 or consent of instructor.

413 Remote Sensing: Types and Applications (4) Principles and uses of remote sensing imagery, digital data, and spectral data, with particular emphasis on geographic interpretation and mapping techniques.
Contact Hour Distribution: 3 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 312.

414 Spatial Databases and Data Management (3) Types, sources, acquisition, and documentation of spatial data. Spatial database management methods and strategies for data sharing.
Contact Hour Distribution: 2 hours lecture and 2 hours lab.
(DE) Prerequisite(s): 411 or consent of instructor.

415 Quantitative Methods in Geography (4) Geographic application of statistical techniques, point pattern analysis, spatial analyses, and correlation and regression techniques.
Contact Hour Distribution: 3 hours lecture and 2 hours lab per week.
(DE) Prerequisite(s): Math 115 or Statistics 201.

421 Geography of Folk Societies (3) Geographical study of folk culture, emphasizing traditional material culture and rural settlement, with examples drawn from eastern North America and selected foreign areas.

423 Geography of American Popular Culture (3) Geographical study of regional variation in popular cultures, especially focused on youth cultures in the United States.
(Same as American Studies 423.)

432 Dendrochronology (4) Principles, techniques, and interpretation in tree-ring science. Applications in geography, climate, ecology, forestry, archaeology, and earth sciences.
Contact Hour Distribution: 3 hours and 2 hours lab per week.
(DE) Prerequisite(s): 132.

433 The Land-Surface System (3) Characteristics of surface form, water, vegetation, and surface materials, and their regional interrelationships. People as evaluators and agents of change.
(DE) Prerequisite(s): 132.

434 Climatology (3) General circulation system leading to world pattern of climates. Climatic change and modification, and interrelationships of climate and human activity.
(DE) Prerequisite(s): 131 or consent of instructor.

435 Biogeography (3) Study of the changing distribution patterns of plants and animals on a variety of spatial and temporal scales. The effects of plate tectonics, Pleistocene climatic change, and human activity on world biota.
Recommended Background: Introductory physical geography or coursework in botany or ecology.

436 Water Resources (3) Global water resources and hydrologic processes: water availability, flooding, and water quality issues examined from physical and economic geographical perspectives.
(DE) Prerequisite(s): 132.

439 Plant Geography of North America (3) Characteristics and distribution of major plant communities of Canada, the U.S., Mexico, and Central America. Relationships to climate, soil, fire, and human disturbance. Long-term history and future prospects.
Recommended Background: Introductory physical geography or coursework in botany or ecology.

441 Urban Geography of the United States (3) Concepts and theories concerning development and significance of systems of cities and internal morphology of cities in the United States.
442 Urban Social Geography (3) Geographical study of urban culture: social production of neighborhoods; social and behavioral aspects of territoriality, residential mobility, segregation, and the rise of post-industrial and global cities.

443 Rural Geography of the United States (3) Geographical appraisal of rural areas of the United States, including small towns and urban fringes. Problems and potentials of rural America.

449 Geography of Transportation (3) Examination of transportation systems, emphasizing their effects on trade patterns, land use, location, problems, and development.

450 Process Geomorphology (3) (See Geology 450.)

454 Terrain Analysis (3) Analysis of landscape history from digital elevation data sets and traditional topographic maps. Basement materials and structures; and erosional and depositional evidence, including fluvial, glacial, aeolian, and shoreline features, of past climatic and biological regimes.

Recommended Background: 132 or Geology 101 and 102 or Geology 107 and 108.

466 Teaching and Learning Geography (3) Preparation of prospective teachers in content, skills, strategies, and understandings needed for effective teaching and assessment of geography in the K-12 schools. Course organization and content based largely on that of National Geography Standards.

495 Special Topics in Geography (1-4) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

501 Colloquium in Geography (1) Discussion of departmental research, current research literature, and general topics. Grading required of resident graduate students whenever offered. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 4 hours.

502 Registration for Use of Facilities (1-15) Required of new graduate students. Registration Permission: Consent of instructor.

504 Introduction to Geographical Research (1) Research interests and methods of departmental faculty. Research frontiers in geography. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

505 Directed Research (2-6) Research on problems as defined by individual students. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

506 Directed Readings (2-6) Readings on topics of interest as defined by individual students. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

507 Research in Human Geography (3) An introduction to human geography's questions, methods, and norms. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

509 Topics in Geography (2-3) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

510 Geographic Software Design (3) Algorithms for spatial analysis, software design, and program implementation in stand alone and distributed computing environments. Registration Permission: Consent of instructor.

513 Topics in Remote Sensing (3) Applied research using imagery for interpretation and mapping of geographic data. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 413 or consent of instructor.

515 Topics in Quantitative Geography (3) Multivariate analysis applied to problems in geography; research problems utilizing appropriate computer programs; usefulness to geographic research of techniques developed by other disciplines. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 415 or consent of instructor.

517 Geographic Information Management and Processing (3) Concepts and methods in management of geographic information. Database design, manipulation, sampling and analysis. (DE) Prerequisite(s): Consent of instructor.

518 GIS Project Management (3) Interactions between management, technical, and application aspects of Geographic Information Systems projects through simulated environment of real-world GIS sites. (DE) Prerequisite(s): 411 or consent of instructor.

519 Graduate Practicum in Cartography/Remote Sensing/GIS (2-6) Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Written consent of department before registration.

521 Topics in Cultural Geography (3) Examination of trends, problems, and methods in cultural geography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 421 or consent of instructor.

522 Topics in Global Change (3) Emerging trends, anticipated problems and methods in global change research and response. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 434 or consent of instructor.

532 Topics in Physical Geography (3) Trends, problems, and methods in geomorphology or other areas of physical geography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

534 Topics in Climatology (3) Trends, problems and methods in area of climatology. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 434 or consent of instructor.

535 Topics in Biogeography (3) Examination of trends, problems, and methods in biogeography. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 435 or consent of instructor.

536 Topics in Watershed Dynamics (3) Trends, problems and methods in study of watershed processes. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. Registration Permission: Consent of instructor.

541 Topics in Urban Geography (3) Analysis of research on urban systems, internal morphology, urban problems and urban spatial behavior. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 441 or consent of instructor.

545 Topics in Population Geography (3) Human population dynamics and migration, spatial variation in population composition and housing. Demographic analysis techniques. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 445 or consent of instructor.

549 Topics in the Geography of Transportation (3) Examination of trends, problems, and methods in transportation geography and transportation networks. Repeatability: May be repeated with consent of instructor. Maximum 6 hours. (DE) Prerequisite(s): 449 or consent of instructor.

591 Foreign Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

592 Off-Campus Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours. Registration Permission: Written consent of department prior to registration.

599 Geographic Concept and Method (3) Traditional and modern geographic thought; readings on nature, scope, problems, and methods of geography. Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

609 Seminar in Geography (2-3) Topics vary. Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

611 Seminar in Geographic Information Science (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 517 and 518 or consent of instructor.

631 Seminar in Natural Hazards (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.
Laboratory exercises emphasize thin section and x-ray diffractometer properties of minerals, visible and infrared spectroscopy, and x-ray diffraction. Interaction of electromagnetic radiation and crystalline solids. Optical properties of solutions, and applications of radiogenic and stable isotopes to geosciences toward a comprehension of the effects of geological processes.

401 Quantitative Methods in Geology (3) Applications of calculus and differential equations to problems in the earth sciences. Examples of the diffusion equation in hydrogeology; the wave equation in geophysics; mechanical modeling and boundary conditions in structural geology and tectonics.

411 Optical Mineralogy (2) Laboratory course on the principles of optical mineralogy. Use of petrographic microscope to identify rock-forming minerals with applications to petrology and environmental mineralogy.

440 Field Geology (5) Summer field course for advanced undergraduate geology majors and first-year graduate students in geology. Taught off-campus and requires the full time of the student. Course provides a synthesis of the major aspects of the geological sciences in societal context. Field techniques demonstrated, practiced, and applied to solution of geologic problems.

450 Process Geomorphology (3) Integrative approach to the development of the surface of Earth based upon case histories, maps, remote sensing imagery. (Same as Geography 450.)

455 Basic Environmental Geology (3) Applications of the geological sciences toward a comprehension of the effects of geological processes on humans and effects of human activities on the Earth’s environments.

460 Principles of Geochemistry (4) Applications of chemical principles to geologic systems with emphasis on problem-solving techniques. Topics include phase diagrams, partitioning of trace elements, thermodynamic principles for evaluating stabilities of mineral assemblages, aqueous solutions, and applications of radiogenic and stable isotopes to geologic systems.

470 Applied Geophysics (3) Basic principles of data collection, processing, and analysis for several common geophysical techniques will be presented through lectures, computer assignments (labs), and field work. Passive (earthquake) and active (reflection and refraction) seismology, potential fields (gravity and magnetics), heat flow, electromagnetics (including ground penetrating radar), and electrical techniques.

480 Principles of Economic Geology (4) Ore-forming processes, classification of mineral deposits, survey of different types of mineral deposits with examples, and metallogenesis.

485 Principles of Hydrogeology (3) Physical principles of flow, flow equations, geologic controls, aquifer analysis, water well design/testing, introduction to transport processes. (Same as Civil Engineering 485.) Recommended Background: Calculus, physics, petrology, and geochemistry or consent of instructor.

486 Hydrogeology Laboratory (1) Application and demonstration of hydrogeological principles in the field and laboratory. (DE) Corequisite(s): 485 and Environmental Engineering 535. Registration Permission: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability. May be repeated.

501 Fractal Models in Earth Sciences (3) An introduction to the theory and methods of fractal analysis as applicable to earth sciences. Topics include deterministic and statistical fractals, self-affine fractals, multifractals, percolation, renormalization group theory, cellular automata, and methods of estimating fractal parameters (e.g., dimension and lacunarity). Applications to be discussed include: characterization of coastlines, drainage basins, and fracture networks; terrain simulation; modeling porous media and hydraulic properties; rock fragmentation; spatial variability of mineral deposits; and temporal variability of earthquakes and floods.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability. May be repeated. Credit Restriction: May not be used toward degree requirements.

505 Structure of the Southern and Central Appalachians (2) Structural development of Southern and Central Appalachians from extensional Late Proterozoic to early Paleozoic rift-drift-platform margin through processes related to compressional events producing accretionary elements that formed Appalachians throughout the Paleozoic. Comparisons to similar orogens.

510 Clay Mineralogy (3) Origin, chemistry, structures, and properties of clay minerals; application of mineralogical techniques in clay mineral studies.

530 Petrogenesis of Crystalline Rocks (4) Origin and properties of igneous and metamorphic rocks, magmatic and subsolidus processes and physical conditions. Laboratory involves petrographic study of crystalline rocks in thin section.

535 Applied Ground Water Hydrology (3) (See Environmental Engineering 535.)

539 Geologic Applications of Remote Sensing (3) An introduction to the use of visible, infrared, microwave/radio, and nuclear remote sensing techniques in the geologic study of the Earth. Topics covered include mineral spectroscopy, light scattering models, instrumentation for remote sensing, calibration and atmospheric removal, multi- and hyperspectral image cube analysis, and ground-truthing techniques. Emphasis on working directly with remote sensing data to solve geologic problems.

641 Seminar in Urban Geography (3) Repeatability. May be repeated. Maximum 6 hours.

644 Seminar in Geology of Transportation (3) Repeatability: May be repeated. Maximum 6 hours.

645 Seminar in Geology of the American South (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

649 Seminar in Geography of Transportation (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

655 Seminar in Physical Geography (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 533 or consent of instructor.

661 Seminar in Biogeography (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 534 and 532 or consent of instructor.

663 Seminar in Oceanography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

664 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 541 or consent of instructor.

665 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. (DE) Prerequisite(s): 541 or consent of instructor.

666 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

671 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

681 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

684 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

685 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

686 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

687 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

688 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

689 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

693 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

694 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

695 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

696 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

697 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

698 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.

699 Seminar in Urban Geography (3) Repeatability: May be repeated. Maximum 6 hours. Recommended Background: Introduction to geology and calculus or consent of instructor.
545 Siliciclastic Petrogenesis (4) Origin and evolution of siliciclastic sediments from a geochemical and petrographic perspective. Emphasis on a quantitative treatment of major elements, trace elements and rare earth elements to extract provenance, weathering, and diagenesis information.

Contact Hour Distribution: 2 lectures per week, one 2-hour lab. Recommended Background: General chemistry and mineralogy or consent of instructor.

546 Carbonate Sedimentology and Geochemistry (4) Environments of deposition and diagenesis of carbonate rocks; introduction to carbonate chemistry, carbonate equilibria, and the precipitation of carbonate minerals; abiotic vs. biotic control of carbonate precipitation; secular change in carbonate mineralogy and fabric through geology time. Petrographic observation, synthesis of petrographic and geochemical datasets, critical analysis of scientific literature, and oral/written presentation.

Contact Hour Distribution: 3 lecture/discussion hours per week and one 2-hour lab. Recommended Background: General chemistry, mineralogy and sedimentology and stratigraphy or consent of instructor.

556 Ice-Age Environments and Global Climate Change (3) (See Ecology and Evolutionary Biology 556.)

557 Quaternary Ecology (3) (See Ecology and Evolutionary Biology 557.)

561 Organic Geochemistry (3) Fundamentals of organic geochemistry; primary production, diagenesis, and preservation of organic matter in the sedimentary rock records; and reconstruction of ancient geologic environments using biomarker compounds.

Contact Hour Distribution: 3 lecture hours. Recommended Background: General chemistry or consent of instructor.

563 Stable Isotope Geochemistry (3) Theoretical aspects of isotope fractionation and applications to geologic systems. Isotope exchange, variations in natural waters, diagenetic, hydrothermal and metamorphic systems.

Recommended Background: General chemistry or consent of instructor.

565 Chemical Petrology (3) Application of thermodynamics to geologic materials. Thermodynamics of condensed phases, solutions, thermodynamic stability, heterogeneous multicomponent phase equilibria, and conduction of heat through earth.

Recommended Background: Calculus, general chemistry and physical chemistry or consent of instructor.

568 Geochemical Analysis (3) Collection and treatment of geochemical data using electron microprobe, x-ray fluorescence, and atomic absorption spectrophotometry techniques.

Contact Hour Distribution: 2 hours lecture and one 2-hour lab. Recommended Background: General chemistry and mineralogy or consent of instructor.

570 Advanced Structural Geology (4) Current topics in structural geology and tectonics of mountain belts; recent literature.

Contact Hour Distribution: 3 hours lecture and 1 lab or seminar. Recommended Background: Structural geology or consent of instructor.

572 Fracture Analysis (3) Field and subsurface characterization, and mechanical development of natural fractures: role in groundwater flow. (Same as Civil Engineering 572.)

Recommended Background: Structural geology or consent of instructor.

575 Tectonics (4) Evolution of Earth's lithosphere in context of plate tectonics theory. Formation of continents through comparative anatomy of mountain belts, including Appalachians, Alps, Uralis, Caledonians, Cordillera, Andes, and Himalayas.

Contact Hour Distribution: 3 hours lecture and 1 seminar. Recommended Background: Structural geology course. Registration Permission: Consent of instructor.

576 Reflection Seismology (3) Imaging subsurface features using reflected seismic waves. Energy sources, modes of wave propagation, field procedures, computer data processing, and pitfalls. Applications to tectonic and environmental problems.

Recommended Background: Geophysics. Registration Permission: Consent of instructor.

585 Contaminant Hydrogeology (3) Physical transport processes, isotopes and groundwater age dating, processes influencing inorganic, organic and microbial contaminants, sampling and monitoring methods, remediation of contaminated groundwater, aquifer protection.

Recommended Background: Calculus, physics, hydrogeology and geochemistry or aquatic chemistry. Registration Permission: Consent of instructor.

586 Field and Laboratory Methods in Hydrogeology (3) Research methods. Measurement of hydraulic properties, drilling, sampling and instrumentation, tracer experiments. Formulating hypotheses and research plans.

Recommended Background: Calculus, physics, and hydrogeology. Registration Permission: Consent of instructor.

590 Special Problems in Geology (1-3) Student- or instructor-initiated course offered at the convenience of the department, with focus on specialized topics in the geological sciences.

Repeatability: May be repeated. Maximum 12 hours. Registration Permission: Consent of instructor.

591 Foreign Study (1-12)

Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to the geology major. Registration Permission: Consent of instructor.

592 Off-Campus Study (1-12)

Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to the geology major. Registration Permission: Consent of instructor.

593 Independent Study (1-12)

Student or instructor initiated independent study.

Repeatability: May be repeated. Maximum 12 hours. Credit Restriction: Only 3 hours may be applied to completion of graduate coursework requirements. Registration Permission: Consent of instructor.

595 Selected Topics in Geology (1) Presentation of research by faculty and visiting scientists.

Grading Restriction: Satisfactory/No Credit grading only. Comment(s): Registration required each spring and fall semester for resident full-time graduate students, except when registered for 596.

596 Geology Colloquium (1) Preparation and oral presentation of scientific material. Grade based on content, preparation, presentation, and instructor critique in departmental seminar.

Comment(s): Registration required once during residence for each graduate student.

600 Doctoral Research and Dissertation (3-15) P/NP only.

Grading Restriction: P/NP only. Repeatability: May be repeated.

630 Seminar in Petrology (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

640 Seminar in Sedimentary Geology (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

650 Seminar in Geomorphology and Quaternary Geology (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

660 Seminar in Geochemistry (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

670 Seminar in Structural Geology (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

675 Seminar in Geophysics (3) Advanced treatment of selected topics in geophysics.

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

685 Seminar in Hydrogeology (3)

Repeatability: May be repeated. Maximum 9 hours. Registration Permission: Consent of instructor.

German (433)

411 Advanced Conversation and Composition (3)

(DE) Prerequisite(s): 311 and 312 or consent of department.

412 Advanced Conversation and Composition (3)

(DE) Prerequisite(s): 311 and 312 or consent of department.

415 German Special Topics (3)

Repeatability: May be repeated. Maximum 6 hours.

416 Metropolis Revisited (3) The 20th-century German or Austrian metropolis in the mirror of history, literature, theory, art, architecture, and music. Taught in English.

(DE) Prerequisite(s): 101 and 102 or simultaneous enrollment in that sequence and consent of instructor.
419 German Fairy Tales and Literary Fantasies (3) How and why forms of literary fantasies ranging from apocalyptic dreams to enchanted visions have changed over the centuries. Strong interdisciplinary component, tracing interconnections between philosophy, religion and literary history, as well as exploring the relationship between literary, musical and artistic representations of specific themes. (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

420 Selected Topics in German Literature from 1750 to the Present (3) (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332 and courses in English translation.

425 Introduction to Descriptive Linguistics (3) (See French 425.)

426 Methods of Historical Linguistics (3) Phonetics, distinctive feature analysis, sound change types, nature of sound change, principles of reconstruction, and fundamental assumptions about language change through time. Non-phonological linguistic change, language families, Proto-Indo-European, and other proto-languages. (Same as French 426; Linguistics 426; Russian 426; Spanish 426.) (DE) Prerequisite(s): 6 hours of upper-division foreign language courses, excluding courses in translation or graduate reading courses.

431 Images of Nature and the Body in German Culture (3) Representations of nature from idyllic refuge and object of praise to scientific object and precarious resource. Other themes include sexuality, the body, childhood, and aging. Discussions based on literary and documentary texts and films. (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

432 German Creative Thinking: Interdisciplinary Dialogues (3) Interdisciplinary dialogue between German literature and art, music, philosophy, theatrical praxis, psychology, dance, anthropology, history, and the sciences. Comparative analyses of literary and non-fictional texts, films, and other media. (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

433 Nation, Race, and Ethnicity (3) Examination of cultural constructions of nation, race, and ethnicity and how they have challenged each other and developed in German-speaking countries since the eighteenth century. Close study and analysis of fiction, non-fiction, and films that address controversial topics such as assimilation, integration, racial/ethnic identity formation and multiculturalism. (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

434 Extraordinary Wo(Men)-Outcasts, Rebels, Martyrs and Saints (3) Examination of German texts and visual media that have challenged mainstream thinking throughout the centuries. Strong interdisciplinary component, focusing on literary and artistic forms that depict struggles involving religion, politics and gender. (DE) Prerequisite(s): 6 hours of 300-level courses, excluding 331 and 332.

435 Structure of the German Language (3) Contrastive English-German segmental and suprasegmental phonemes, contrastive English-German linguistic structures, selected topics in advanced German grammar and syntactic analysis. (Same as Linguistics 435.) (DE) Prerequisite(s): 6 hours of upper-division German language courses, excluding courses in translation and graduate reading courses.

436 History of the German Language (3) Development of German language from Indo-European through Proto-Germanic, Old High German, Middle High German to New High German. Internal and external linguistic history of German speech. (Same as Linguistics 436.) (DE) Prerequisite(s): 6 hours of upper-division German language courses, excluding courses in translation and graduate reading courses.

485 Business German (3) German used in fields of business, government, administration, and economics. (DE) Prerequisite(s): 6 hours of upper-division German, excluding courses in translation and 331 and 332.

494 German Community Service Practicum (1) Supervised by the director of the lower-division German program. Students either assist German classes at local schools or perform supervised service with local institutions that promote awareness of German culture among the general public. Repeatability: May be repeated. Maximum 3 hours. (Maximum 1 hour per semester.) (DE) Prerequisite(s): 18 hours of upper-division German courses. Registration Permission: Consent of instructor.

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

510 German Phonetics and Advanced Grammar (3) Advanced work in phonetics, pronunciation, and selected topics in German grammar. For teachers and prospective teachers. Registration Permission: Consent of instructor.

512 Teaching a Foreign Language (3) Practical application of methods for teaching and evaluating basic language skills and foreign language skills and cultural knowledge, through seminars, demonstrations, peer teaching, and observation of foreign language classes. Required of all MA and PhD students holding Graduate Teaching Assistantships, except those whose previous training or experience warrants their being excused by the department.

519 Bibliography and Methods of Research (3) Critical research tools and scholarly contributions in German literature and language. Practical exercises on compiling of scholarly data using computer-based and non-computer sources.

541 Medieval German Language and Literature (3) Introduction to Middle High German.

550 Studies in German Literature (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

552 German Enlightenment, Rococo, and Sturm und Drang (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

553 German Classicism and Romanticism (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

554 German Realism and Naturalism (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

555 Modern German Literature 1890-1945 (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

556 Modern German Literature 1945-Present (3) Content varies. Repeatability: May be repeated. Maximum 6 hours.

560 German Literary Theory and Criticism (3)

561 Directed Readings in German Language and Literature (3)

562 Directed Readings in German Language and Literature (3)

591 Foreign Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15) Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15) Grading: Satisfactory/No Credit or letter grade. Repeatability: May be repeated. Maximum 15 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

621 Seminar in German Literature (3) Repeatability: May be repeated. Maximum 18 hours.

622 Seminar in German Literature (3) Repeatability: May be repeated. Maximum 18 hours.

631 Seminar in German and Germanic Philology (3)

632 Seminar in German and Germanic Philology (3)

Global Studies (440)

482 Special Topics in Global Cinema (3) (See Modern Foreign Languages and Literatures 482.)

Health (449)

400 Consumer Health (3) Major consumer health care providers and health care services. Selecting, purchasing, evaluating and financing medical and health care services/products. (Same as Public Health 400.)

406 Death, Dying and Bereavement (3) Aspects of dying, death and handling the trauma of loss. Medical, financial, physical, legal, and social implications of death.

420 Sex Education As It Relates to Human Sexuality (3) Science of human sexuality. Emphasis on the trends, issues, and content of sex education.

425 Women’s Health (3) Factors influencing women’s health and women as consumers in nation’s health service delivery systems. Study of health problems/concerns of women and techniques for prevention, maintenance and/or correction. (Same as Women’s Studies 425.)

430 Suicide and Crisis Intervention (3) Factors which make suicide a serious health problem. Assessment, intervention, and prevention techniques.
435 Substance Use and Abuse (3) Drug and alcohol abuse problems and suspected causes; pharmacology of drugs and effects on society; strategies for intervention and education.

465 Aging and Health (3) Aging process in a health perspective as it relates to health promotion and wellness of the aged.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.

513 Administrative and Organizational Theory (3) (See Educational Administration 513.)

514 Leadership Themes in Literature (3) Review and analysis of selected literature works – novels, biographies, poetry, plays, essays, personal letters and speeches; history – for lessons that enhance understanding of leadership role, values, and effectiveness.

516 Research Methods (3) (See Educational Administration 516.)

534 Program Evaluation in Education (3) (See Curriculum, Educational Research, and Evaluation 534.)

536 Policy Issues in Higher Education (3) Explores issues in higher education. Grading Restriction: Satisfactory/No Credit grading only.

540 Evaluation in Health Promotion and Health Education (3) (DE) Prerequisite(s): 590 and 610. Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

550 Internship in College Student Personnel (1-6)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

558 Seminar in Gerontology (1) Scope of gerontology as discipline and as related to other professional disciplines. Speakers both internal and external to the University of Tennessee, Knoxville. (Same as Counselor Education 585; Educational Psychology 585; Exercise Science 585; Nursing 585; Public Health 585; Social Work 585; Sociology 585.) Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

560 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

561 Internship/Research in Safety and Health (3-6) (See Safety 601.)

565 Seminar in Nation's Health (3) Comprehensive study of definition, determinants, resources and health status of nation. (Same as Public Health 655.)

566 International Health (3) Study of quality of health, health promotion and health services in countries throughout world. (Same as Public Health 660.)

Higher Education Administration (461)

455 Seminar in Student Leadership (1) Topics to be assigned. Designed to develop knowledge and skills in leadership roles for resident assistants, student government leaders, student activities, and other student organizations.
Repeatability: May be repeated. Maximum 3 hours.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. May not be used toward degree requirements.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 9 hours.

513 Administrative and Organizational Theory (3) (See Educational Administration 513.)

514 Leadership Themes in Literature (3) Review and analysis of selected literature works – novels, biographies, poetry, plays, essays, personal letters and speeches; history – for lessons that enhance understanding of leadership role, values, and effectiveness.

516 Research Methods (3) (See Educational Administration 516.)

534 Program Evaluation in Education (3) (See Curriculum, Educational Research, and Evaluation 534.)

536 Policy Issues in Higher Education (3) Explores issues in higher education. Grading Restriction: Satisfactory/No Credit grading only.

540 Evaluation in Health Promotion and Health Education (3) (DE) Prerequisite(s): 590 and 610. Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 12 hours.

550 Internship in College Student Personnel (1-6)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

558 Seminar in Gerontology (1) Scope of gerontology as discipline and as related to other academic and professional disciplines. Speakers both internal and external to the University of Tennessee, Knoxville. (Same as Counselor Education 585; Educational Psychology 585; Exercise Science 585; Nursing 585; Public Health 585; Social Work 585; Sociology 585.) Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

560 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

561 Internship/Research in Safety and Health (3-6) (See Safety 601.)

565 Seminar in Nation's Health (3) Comprehensive study of definition, determinants, resources and health status of nation. (Same as Public Health 655.)

566 International Health (3) Study of quality of health, health promotion and health services in countries throughout world. (Same as Public Health 660.)

Higher Education Administration (461)

455 Seminar in Student Leadership (1) Topics to be assigned. Designed to develop knowledge and skills in leadership roles for resident assistants, student government leaders, student activities, and other student organizations.
Repeatability: May be repeated. Maximum 3 hours.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.
617 Case Study Methods in Educational Research (3) (See as Educational Administration 617.)

619 Administration and Governance of Higher Education (3) Trends, structure, and process of collegiate governance. Development of understanding of administrative theory and practice in higher education.

629 Seminar in Policy Issues in Education (3) (See Educational Administration 629.)

640 Policy Issues in College and University Law (3) Legal precedent affecting organizations, administration, and finance of higher education. Academic freedom, faculty termination, religion, tort liability, administrative law, academic due process and affirmative action in employment.

645 Curriculum and Instruction in Higher Education (3) Examination of teaching, learning and curriculum in higher education.

650 Fiscal Policy Issues in Higher Education (3) Revenue sources, appropriation process, budget procedures, cost analysis, and fiscal management in public and independent colleges and universities.

658 Conflict Management (3) Social conflict and its management. Causes of interpersonal, inter-group, and organizational conflict, skills and strategies used to manage conflict, conflict management models associated with different sectors of human activity, and current organizational practices for managing destructive conflict. (Same as Educational Administration 658.)

670 Values and Ethics in Educational Leadership (3) Examination of moral and ethical dimensions of the work of educational leaders. (Same as Educational Administration 670.)

680 Administration of Complex Organizations (3) (See Educational Administration 680.)

693 Independent Study (1-3) Repeatability: May be repeated. Maximum 12 hours.

695 Special Topics (1-3) Repeatability: May be repeated. Maximum 12 hours.

History (462)

500 Thesis (1-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

510 Foundations of Graduate Study in History (3) Assumptions and methods of historians. Required of all candidates for advanced degrees.

511 Teaching World History (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in world history.

512 Teaching Western Civilization (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in western civilization.

513 Teaching United States History (3) Methodology, conceptualization, historiography, text book selection and syllabus construction to prepare students to teach courses in U.S. history.

515 Introduction to American History to 1840s (3) Survey of major themes, methodologies, and interpretations in early American historiography.

516 Introduction to American History, 1840s – present (3) Survey of major themes, methodologies, and interpretations in modern American historiography.

521 MA Readings (3) Directed readings in preparation for MA examinations. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours. Comment(s): Open only to master’s candidates in history.

531 Topics in Pre-modern Europe (3) Reading seminar: secondary sources on pre-modern European movements and trends. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

532 Topics in Modern Europe (3) Reading seminar: secondary sources on movements and trends that are multinational in focus. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

533 Topics in European National History (3) Reading seminar: secondary sources on intra-national topics, usually British, Russian, German, or French. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

541 Topics in Early American History (3) Reading seminar: secondary sources on early North American history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

542 Topics in 19th-Century United States (3) Reading seminar: secondary sources on 19th-century United States. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

543 Topics in 20th-Century United States (3) Reading seminar: secondary sources on 20th-century United States. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

544 Topics in U.S. Environmental History (3) Reading seminar: secondary sources on U.S. environmental history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

551 Topics in the History of Foreign Relations (3) Reading seminar: secondary sources on foreign relations. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

552 Topics in Military History (3) Reading seminar: secondary sources on military history, military operations, social impact of war, and naval strategy in foreign policy. Repeatability: May be repeated. Maximum 15 hours.

553 Topics in United States Social and Economic History (3) Reading seminar: secondary sources on U.S. social and economic history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

554 Topics in European Social and Economic History (3) Reading seminar: secondary sources on social or economic history of European nations. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

555 Topics in Cultural and Intellectual History (3) Reading seminar: secondary sources on cultural and intellectual history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

556 Topics in United States Regional and Local History (3) Reading seminar: secondary sources on regions, states and cities of the South. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

557 Topics in Jewish History (3) Reading seminar: secondary sources on Jewish history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

558 Topics in Latin American History (3) Reading seminar: secondary sources on Latin America. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

559 Topics in Asian History (3) Reading seminar: secondary sources on Asian history; East Asia and Middle East. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

560 Topics in History (3) Reading seminar: secondary sources for new topics. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

561 Topics in World History (3) Reading seminar in transnational themes involving analysis of two or more world cultures. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

591 Foreign Study (1-12) Repeatability: May be repeated. Maximum 12 hours.

592 Off-Campus Study (1-12) Repeatability: May be repeated. Maximum 12 hours.

593 Independent Study (1-12) Repeatability: May be repeated. Maximum 12 hours.

600 Doctoral Research and Dissertation (3-15) Grading Restriction: P/NP only. Repeatability: May be repeated.

621 Directed Readings (3) Directed readings to prepare candidate for doctoral comprehensive examination. Grading Restriction: Satisfactory/No Credit grading only. Repeatability: May be repeated. Maximum 6 hours.

631 Seminar in Pre-Modern European History (3) Research seminar in primary sources. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

632 Seminar in Modern European History (3) Research seminar in primary sources culminating in scholarly paper in modern European history. Focus varies. Repeatability: May be repeated. Maximum 15 hours.

641 Seminar in 17th- and 18th-Century America (3) Research seminar in primary sources. Focus varies. Repeatability: May be repeated. Maximum 15 hours.
Repeatability: May be repeated. Maximum 15 hours.

Repeatability: May be repeated. Maximum 15 hours.

651 Seminar in Military and Foreign Relations History (3) Research seminar in primary sources culminating in scholarly paper in military or foreign relations history. Focus varies. Not restricted by national grouping.
Repeatability: May be repeated. Maximum 15 hours.

658 Seminar in United States Regional and Local History (3) Research seminar in primary sources culminating in scholarly paper in regional and local history. Focus varies.
Repeatability: May be repeated. Maximum 15 hours.

Hotel, Restaurant, and Tourism (514)

423 Marketing for Hospitality and Tourism (3) Marketing principles and practices specifically applied to the hospitality and tourism industry. Includes the analyses of various hospitality and tourism marketing strategies and the implications of those strategies. Develops the use of marketing tools as an integral part of the hospitality and tourism operation.
( DE Prerequisite(s): 210, 211, 224, and Marketing 300 or consent of instructor.

435 Conventions and Meetings: Pursuit and Attainment (3) Discussion of types of conventions/meetings, roles of meeting planners, identifying decision makers, site selection, negotiating, budgeting, marketing and gaining commitment from group.
( DE Prerequisite(s): 210, 211, and 390 or consent of instructor.

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Professional Project (3-6) Application-oriented, capstone project to show competence in major academic area.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to hotel, restaurant, and tourism students in non-thesis option.
Registration Permission: Consent of instructor.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Trends and Issues in Service Management (3) Examination of current and emerging trends and issues in the consumer product and services industry. Implications of trends and their managerial and strategic applications in services management.

523 Tourism Analysis (3) Trade theory and regional analysis methodologies applied to tourism and the service industry, including travel balance account, interregional transactions flow, economic impacts, environmental economics, demand theory and forecasting.

524 Tourism Destination Development (3) Relationship of economic theory and planning principles to tourism development. Includes the application of pre-feasibility analysis to tourism projects and the evaluation of various types of tourism and components of tourism.

532 Human Resource Management in Services Industry (3) Analysis of significant organizational processes and practices in management of human resources within consumer product and service industry.

534 Special Topics in Foodservice and Lodging Administration (1-3) Lecture/discussion format. Contemporary developments and trends in industry.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

535 Directed Study in Foodservice and Lodging Administration (1-3) Problems selected for study by student with guidance of faculty member.
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of instructor.

537 Seminar in Foodservice and Lodging Administration (1) Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.

542 Advanced Hotel Administration (3) Strategic management of hotel organizations. Theoretical and applied literature on formulation and implementation of strategy; external and internal factors relevant for business and corporate level decisions. Consideration of role of marketing in hotel firms. Analysis of industry and case studies.
( DE Prerequisite(s): 531 and 532.

547 Field Experience (3-9) Experience in food- or lodging-related industry or agency under supervision of faculty member.
Grading Restriction: Satisfactory/No Credit grading only.
Registration Permission: Consent of instructor.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

615 Trends and Issues in Hospitality and Tourism (3) Examination of contemporary issues in hospitality and tourism.

616 Literature and Thought in Hospitality and Tourism (3) Evaluation of hospitality and tourism management literature with emphasis upon research literature, development of scholarly thought, and identification of potential areas of further study.

Human Ecology (520)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

Human Resource Development (529)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (3)
Grading Restriction: Maximum 6 hours.
Grading Restriction: Satisfactory/No Credit grading only.

509 Implementation of Human Resource Development Systems (3) The internship provides experiential learning for students who come to human resource development without practical real world experience. The internship is an opportunity to apply classroom knowledge, obtain additional human resource experience, and reflect on the knowledge and experience. The corporate experience provides additional human resource knowledge and assists the student in research and career advancement.
( DE Prerequisite(s): 510.

510 Foundations of Human Resources (3) Students develop a working definition and understanding of the foundations that grid the academic discipline and profession of Human Resources. Students develop knowledge of the historical, theoretical, and philosophical foundations as well as the core models of learning, performance, change and management that promote best practices in the field. Students are introduced to the disciplines of training and development, human expertise, organizational development, and management including human resource management goals and activities.

511 Issues and Trends in Human Resource Development (3) Study of current, emerging, and future issues and trends in Human Resource Development research and practice. Linking research and practice, importance of theory to inform practice, research needs reflected in practice, cycle of how researchers and practitioners learn, how they design practice, and how they evaluate to inform policy.
( DE Prerequisite(s): 510.

513 Special Topics in Human Resource Development (1-3) Topics vary in research, theory and current issues in human resources.
Repeatability: May be repeated. Maximum 9 hours.
Registration Permission: Consent of instructor.

514 Individual Study in Human Resource Development (3) Approval form must be filed in the office of the program liaison. 
Repeatability: May be repeated. Maximum 6 hours.
Registration Permission: Consent of supervising instructor.
517 Career Development (3) Examination of processes and practices that facilitate the individual's leadership development, performance improvement and career goals in relation to the organization's present and future human resource needs, including identification of personal responsibilities and organizational opportunities through successful career development systems.

518 Performance Improvement Systems and Technologies (3) Provides studies of concepts, strategies, tools, and trends of performance improvement technologies. Major emphasis will be on the planning, facilitating, and implementation of performance technologies that support human resource functions and facilitate their value to organizations.

(DE) Prerequisite(s): 510.

519 Human Resource Problems (3) Accommodates experiential learning for students who have a background in human resource development. In an employment context, students identify, analyze design, develop, implement, and evaluate a practical human resource development intervention.

(DE) Prerequisite(s): 510 and 511.

520 Collaborative Strategies in Human Resource Development (3) Examines the strategies for collaboration and teambuilding within organizational systems. The course assists human resource professionals understand the processes associated with teambuilding including defining types of teams, rewarding and evaluating team performance, operating principles and communication within teams. The primary focus of this course will be creating the high performance team.

(DE) Corequisite(s): 509.

556 Organizational Development Strategies (3) Overview of the roles, strategies, and challenges of organizational development with a focus on the dynamics of organizational change and the internal integration of organizational culture in a global context.

(DE) Corequisite(s): 510.

557 Design Strategies (3) Design methodology for business and industry interventions; development of instructor-based, technology-based, and self-directed training for training and development and consulting.

(DE) Corequisite(s): 510.

558 Evaluation Strategies (3) Evaluation strategies for professional settings. This course examines the importance of evaluation, how to conduct appropriate evaluations, instrumentation and analysis strategies, how to assess the return-on-investment, and guidelines for creating an evaluation report.

(DE) Prerequisite(s): 557.

561 Strategic Human Resource Development (3) Overviews how human resource development increases organizational competitive advantage. Human capital theory, systems theory and systems integration emerge as theoretical frameworks for linking human resource development with business strategy to attain strategic initiatives. Students study human resource development stakeholders, management of human resource development resources, and continuous improvement of human resource development processes are emphasized. Students explore the role of human resource development in organizational visioning, planning, leadership development, innovating, and economic development.

(DE) Corequisite(s): 510.

563 Organizational Communication Strategies (3) Students investigate organizational communication theory, purposes, channels, practices, styles, approaches, skills, and tools. Process improvement strategies span internal and external communication and target oral, written, and nonverbal communications that occur in face-to-face, technology-mediated, and blended organizational communication contexts.

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

602 Proseminar I in Human Resource Development (3) Basic thought, concepts, and issues required for advanced graduate study in human resource development. Must be taken during the first year of study in the program.

Registration Permission: Consent of instructor for non-program students.

603 Proseminar II in Human Resource Development (3) Basic thought, concepts, and issues required for advanced graduate study in human resource development. Must be taken during the first year of study in the program.

Registration Permission: Consent of instructor for non-program students.

605 Seminar in Organizational Theory and Environmental Context (3) Organizational structure and basic systems influencing individual, group and organizational behavior with an emphasis on environmental context impacting worker performance and opportunities for learning transfer. Ecological approach to organizational effectiveness is addressed.

(DE) Prerequisite(s): 602 and 603.

606 Research in Human Resource Development (3) Theory and application of qualitative approaches to social science and human resource development research. Emphasis is on ethnographic methods to obtain in-depth information about behaviors and beliefs of people in natural settings. Use of methods: structured interviews using heuristic elicitation methodology, participant/observation and case studies.

(DE) Prerequisite(s): 602 and 603.

607 Seminar in Organizational Communication Processes (3) Students study how the elements and complexities of organizational communication lead to potential miscommunications. This course involves analysis of contemporary and leading-edge organizational communication systems and processes. Students address prevention and minimization of destructive system and process complexities, and maximization of constructive elements; and explore organizational and individual accountability for creating, sustaining, and improving organizational communication systems, processes, and environments.

(DE) Prerequisite(s): 602 and 603.

608 Seminar in Work/Life Interface Issues (3) Interface of work/life topics; how does work and life issues interconnect and influence each other from a psychosocial perspective? The goal of the course will be to help human resource professionals better understand and address the critical linkages between work and life to encourage personal and professional well-being.

(DE) Prerequisite(s): 602 and 603.

609 Seminar in Technological Frameworks for Human Resource Development (3) Provides instruction and discussions on technology and human performance issues in today's organization. Topics include technology diffusion, performance improvement technologies, and privacy and ergonomic issues in utilizing technologies to improve human performance in organizations.

(DE) Prerequisite(s): 602 and 603.

611 Internship in Human Resource Development (3) Field experience in relevant organizations.

Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated Maximum 6 hours.
Registration Permission: Consent of instructor.

613 Seminar in Selected Topics (3) Topics in human resource development.

Repeatability: May be repeated Maximum 6 hours.
(DE) Prerequisite(s): 602 and 603.

Industrial and Organizational Psychology (568)

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is complete.

Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.

525 Research in Industrial/Organizational Psychology (1-3)
Grading: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Available only to students admitted to program or by rearrangement with program director.

567 Proseminar in Industrial/Organizational Psychology (3) Basic thought, concepts, and issues required for advanced graduate study in industrial and organizational psychology. Must be taken within first year of study in program.

Registration Permission: Consent of instructor required for non-program students.

568 Proseminar in Industrial/Organizational Psychology (3) Basic thought, concepts, and issues required for advanced graduate study in industrial and organizational psychology. Must be taken during first year of study in program.

Registration Permission: Consent of instructor required for non-program students.

569 Applied Measurement for Industrial/Organizational Psychology (3) Basic techniques for collection and evaluation of individual and organizational data using both classical and modern psychometric techniques. Relevant statistical models: reliability analysis, and exploratory and confirmatory factor analyses.
600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

605 Advanced Research Methods in Psychology (3) Critical analysis of new and evolving techniques for psychological research; new statistical and psychometric methods.

610 Individuals in Organizations Seminar (3) Bridging principles and processes which link individual attributes with more macro organization concerns: culture, climate, and group decision making.

611 Seminar in Organizational Leadership (3) Current theories, concepts, and issues associated with psychology of organizational leadership.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

612 Seminar in Work Motivation (3) Current theories, concepts, and issues associated with psychology of work motivation.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

613 Seminar in Performance Appraisal (3) Current issues, problems, and research in performance appraisal and criterion development; applications in compensation.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

614 Seminar in Employee Selection (3) Current issues, concerns, and methods used in employee selection.
(DE) Prerequisite(s): 567 and 567 or consent of instructor.

615 Seminar in Organizational Training and Development (3) Current issues, problems, and research in training and development.
(DE) Prerequisite(s): 567 and 568 or consent of instructor.

625 Topics in Organizational Psychology (3) Topics vary.
Repeatability: May be repeated. Maximum 9 hours.

626 Topics in Industrial Psychology (3) Topics vary.
Repeatability: May be repeated. Maximum 9 hours.

627 Structural Equation Models in Organizational Research (3) Issues related to analysis of organizational data using structural equation and related techniques.

628 Personality Assessment (3) Review of key domains of social cognition: measurement systems which use individual differences in social-cognitive biases as basis for measuring personality.

635 Ethical and Professional Issues in Industrial/Organizational Psychology (3) Issues involved with ethical practice in research, academic, organizational, and consulting situations.

690 Supervised Practicum, Internship or Field Training in Industrial/Organizational Psychology (1-15) One credit hour per 30 hours of practice.
Grading Restriction: Satisfactory/No Credit or letter grade.
Repeatability: May be repeated. Maximum 15 hours.

Industrial Engineering (556)

Note: Any 400-level course required for the Bachelor of Science in Industrial Engineering at the University of Tennessee, Knoxville, may not be used for graduate credit in the MS program.

401 Integrated Manufacturing Systems (3) NC and CNC machine tools, robotics and related materials handling systems, hard automation, alternative integrated manufacturing systems, and manufacturing information/control systems.
(DE) Prerequisite(s): 330.

402 Production System Planning and Control (3) Theory and application of forecasting systems including regression and time series models. Independent demand inventory models, including development of safety stock. All modules of Manufacturing Resource Planning (MRP) Systems: master production scheduling, resource requirements planning, bill of material and inventory file structures, material requirements planning, capacity planning, shop floor and purchase order control. Overview of just-in-time inventory concepts and MRP’s role in manufacturing automation.
(DE) Prerequisite(s): 202.

421 Information Systems Analysis and Design (3) Systems engineering approach to analysis and design of systems of information. Topics include: system development life cycle, system analysis methodologies, data analysis techniques, system design, joint application design, and rapid application design. Lab introduces analysis and design software tools.

422 Senior Problems Analysis (3) Current real-world problems will be drawn from local production and service organizations and presented by personnel from these organizations. Senior industrial engineering student teams will solve these real-world problems under the guidance of their instructor using industrial engineering methodology. These problems emphasize problem definitions, analysis, and presentation with considerations for engineering standards and realistic economic, environmental, ethical, safety, social, political, and other pertinent constraints.

427 Introduction to Lean Systems (3) Introduces a framework to implement improvements within an enterprise. This framework will focus on designing both the physical system and the associated information system. The students will be introduced to the basic concepts of facilities design based upon process design and requirements. The design of the physical and information systems will be based on integrating the concepts, terminology, and tools of lean enterprise and Six Sigma. Activities will include case studies, industry based projects, and the preparation of written engineering reports.
( DE) Corequisite(s): 306 and 402.

440 Process Improvement Through Planned Experimentation (3) Review of fundamentals of continuous improvement, advanced statistical process control techniques, and strategies for short production runs. Use of experimental design techniques to improve processes, including single and multiple-factor designs, blocking and confounding, and fractional designs. Full factorial designs are compared to fractional designs to balance experimental efficiency with loss of information. Lab component utilizes statistical and simulation software to provide hands-on experience.
(DE) Prerequisite(s): 300.

455 Human-Computer Interaction (3) Introduction to the analysis, design, production, and implementation of systems requiring interaction between humans and computers (HCI). Includes human sensory systems, human memory capacity, computer hardware/software requirements, input/output device design, and error message handling.
(DE) Prerequisite(s): Computer programming course.

483 Introduction to Reliability Engineering (3) (See Nuclear Engineering 483.)

484 Introduction to Maintainability Engineering (3) (See Nuclear Engineering 484.)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

501 Design Project (1-3)
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated. Maximum 6 hours.
Comment(s): Enrollment limited to industrial engineering students in non-thesis option.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be applied toward degree requirements.

503 Industrial Engineering Methods Review (3) Survey of industrial engineering tools and techniques applied to analysis, design, and improvement of manufacturing systems. Students who do not have an undergraduate degree in industrial engineering must enroll in this course.
Grading Restriction: Satisfactory/No Credit grading only.
Credit Restriction(s): May not be applied toward degree requirements.
Comment(s): Admission to dual MS-MBA program required.

504 Product Development Process (1) (See Mechanical Engineering 504.)

506 Product Selection and Evaluation (2) (See Mechanical Engineering 506.)

507 Application of Linear Algebra in Engineering Systems (3) (See Chemical Engineering 507.)
508 Integrated Product, Process and Manufacturing System Design (3) Different manufacturing system configurations. Relationships between product design and processing requirements, design specifications and manufacturing costs. Finalizing design specifications and selecting processes. Analysis of manufacturing system costs. Presentation of manufacturing system design. Case studies and team projects. (Same as Mechanical Engineering 508.)
Registration Permission: Consent of instructor.

509 Multidisciplinary Project (1) Venue for multidisciplinary student teams to coordinate design and manufacturing tasks of product to be developed. Project management (budget and schedule), assignment of tasks for team members, and concurrent design and manufacturing. Design concepts and product feature reviewed by potential customers/investors. (Same as Aerospace Engineering 509; Biomedical Engineering 509; Chemical Engineering 509; Electrical and Computer Engineering 509; Materials Science Engineering 509; Mechanical Engineering 509; Nuclear Engineering 509.)
Repeatability: May be repeated. Maximum 3 hours.
Registration Permission: Consent of instructor.

511 Business Planning and Commercialization (3) Complex issues of product development and business planning required to deliver new product from concept to market. Strategic issues that emerge during product development cycle, beginning with concept to product development to commercialization to eventual product introduction or dismissal. Management practices for successful product development and product management.
Registration Permission: Consent of instructor.

513 Facilities Planning and Design (3) Modern materials handling techniques, computer-aided layout techniques, application of operation research models, and use of these to design manufacturing facilities. (DE) Prerequisite(s): 403 or consent of instructor.

514 Advanced Information Systems Analysis and Design (3) Systems analysis and systems control concepts applied to systems of information. Role of Industrial engineering in office and factory of future. Management support systems, decision support systems, and integrated support systems.

515 Advanced Production and Inventory Systems (3) Advanced topics in production planning and inventory systems. Material requirements planning; production planning and master scheduling; just-in-time concepts; distribution requirements planning; and other selected topics. (DE) Prerequisite(s): 402 or consent of instructor.

516 Statistical Methods in Industrial Engineering (3) Application of classical statistical techniques to industrial engineering problems. Statistics and statistical thinking in managerial context of organizational improvement; descriptive statistics and distribution theory; relationship between statistical process control techniques and classical statistical tools; parameter estimation and hypothesis testing; goodness-of-fit testing; linear regression and correlation; analysis of variance; single and multiple factor experimental design. (DE) Prerequisite(s): Statistics 251 or equivalent.

517 Reliability Engineering (3) Continuous time random processes with applications to availability of equipment and manufacturing systems. Failure densities and failure data analysis. Maintainability. Reliability-based criteria for product acceptance. (DE) Prerequisite(s): 516.

518 Advanced Engineering Economic Analysis (3) Application of engineering economic analysis in complex decision situations. Inflation and price changes; uncertainty evaluation using non-probabilistic techniques; capital financing and project allocation; evaluations involving equipment replacement, investment in new utilities, and public works projects; probabilistic risk analysis including computer simulation and decision trees; multi-attribute decision analysis; and other advanced topics. (DE) Prerequisite(s): 405 and Statistics 251.

519 Human Factors Engineering and Ergonomics (3) Application of human factor and ergonomic concepts and principles to design and analysis of manned systems and products. Human as biomechanical system; human information processing; minimization of human error; anthropometry; anatomy and physiology; physical and mental workload; effects of environmental factors; temperature, lighting, weightlessness, and vibration on humans; manual materials handling and back injuries; design of workstations and office ergonomics; design of displays and controls; hand tool design; and cumulative trauma injuries. (DE) Prerequisite(s): Statistics 251 or consent of instructor.

520 Human Factors and Product Safety Engineering (3) Role of human factors and safety engineering, legal implications in product design, product liability, system safety, and system failure analysis. Product testing, reliability, and system safety analysis techniques. Case histories of accident investigations, reconstruction, causality, and product liability litigation. (DE) Prerequisite(s): 519 or consent of instructor.

521 Advanced Human Factors Engineering Methodology (3) Advanced methodologies used in human factors engineering. Observational methods; function/task analysis; computerized human factors design methods; human reliability and error prediction; evaluation of human-machine interface; modeling techniques; questionnaire and survey design; experimental design, and other selected topics. (DE) Prerequisite(s): 519 or consent of instructor.

522 Optimization Methods in Industrial Engineering (3) Classical optimization applied to constrained and unconstrained, non-linear, multi-variable functions; search techniques; decision making under uncertainty; game theory; and dynamic programming. (DE) Prerequisite(s): 401 and 508 or consent of instructor.

525 Systems Modeling and Simulation (3) Modeling of discrete systems using current simulation software and Monte-Carlo simulation. Problem definition, input distributions, output data analysis, model validation and verification, variance reduction techniques, animation of models, and design of simulation experiments. Case studies in variety of domains for simulation modeling. Registration Permission: Consent of instructor.

526 Advanced Applications of Systems Modeling and Simulation (3) Modeling of discrete, continuous, and combined systems using current simulation software. Development of flexible simulation models to enhance accessibility of simulation models for experimentation. Development of distributed simulation models to represent and test production and supply chain systems. (Same as Management Science 526.) (DE) Prerequisite(s): 306 or 525.

527 Lean Production Systems (3) Characteristics and performance of mass and lean production systems. Lean production concepts and principles. Planning, designing and implementing lean production systems: line balancing, set-up time reduction, cost management, maintenance support and other selected topics. Application at enterprise level to achieve strategic competitive goals. (DE) Prerequisite(s): 515 or consent of instructor.

550 Graduate Seminar (1) A seminar to guide and familiarize graduate students of engineering to the process of thesis and/or dissertation research. This includes selection of committee members, research management and guidelines, basics of data analysis and presentation, and guidelines for writing grant and research proposals. Grading Restriction: Satisfactory/No Credit grading only. Comment(s): Admission to graduate program required.

552 Advanced Linear Programming and Extensions (3) Linear programming solution procedures, duality, sensitivity, and parametric analysis; and quadratic, separable, integer, and goal programming. (DE) Prerequisite(s): 301.

554 Advanced Development of Information Systems (3) Presents algorithms commonly needed to implement advanced information systems. Different types of data structures are presented in an attempt to find the model that best suits a given problem. Includes in-depth discussion of Visual Basic modules. Involves the transformation of problems into programming paradigms, and encodes solutions using the Microsoft Visual Basic 6 rapid application development tool. Activities will include case studies and demonstrations to supplement lectures. Practical problems and projects will be assigned. (DE) Prerequisite(s): 514 or consent of instructor.

555 Advanced Topics in Human-Computer Interactions (3) This course is a combination seminar/hands-on all phases of the product development lifecycle, examining the impact of human-computer interactions (HCI design course that covers) at each. It focuses on a user-centered approach to product design, addressing and applying usability to physical design; and web designs. The course includes lectures, discussions, demonstrations and field trip to a local usability lab. (DE) Prerequisite(s): 455 or consent of instructor.
556 Data Mining in Engineering and Manufacturing (3) This course will include the following components: the process of knowledge discovery; popular data mining tools such as classification, regression, and clustering; advanced data mining techniques; application of data mining in manufacturing, engineering design, and security; and research project. (Same as Chemical Engineering 556.)
(De) Prerequisite(s): 516 or equivalent.

561 Application of Multivariate Statistics to Process Modeling and Data Analysis (3) (See Chemical Engineering 561.)

591 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

592 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

593 Special Topics in Industrial Engineering (1-3) Individual or group research projects.
Repeatability: May be repeated.
Registration Permission: Consent of instructor.

594 Culminating Integrated Project Report (3) (See Mechanical Engineering 594.)

600 Doctoral Research and Dissertation (3-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

601 Operations Research Models in Engineering Economy (3) Mathematical programming techniques applied to capital budgeting; advanced topics in multiple attribute decision analysis; Bayesian analysis of sequential decision making; artificial intelligence in complex decision analyses.
(De) Prerequisite(s): 518 and 523.

602 Nonlinear Optimization (3) (See Management Science 651.)

(De) Prerequisite(s): 516.

606 Advanced Topics in Human Factors, Safety and Biomechanical Engineering (3) Application of advanced engineering analysis and design methods to manned system safety, epidemiology of accidents and injuries, and study of injury causal mechanisms. Injury models and theories and development of injury, loss, and risk reduction techniques. Current research issues in manned systems analysis and design. Research into system failures: prevention of injuries.
Registration Permission: Consent of instructor.

691 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

692 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

693 Advanced Topics in Industrial Engineering (3) Forum to study individually or in groups.
Repeatability: May be repeated with consent of instructor.
Comment(s): Requires graduate standing.
Registration Permission: Consent of instructor.

Information Management (558)

541 Advanced Database Systems (3) Illustrates and applies advanced database techniques including data modeling, database design, SQL, stored procedures, multi-user databases and web databases. Also covered are data security and control issues related to multi-user databases. In addition to MS Access, this course makes use of the Oracle database to introduce concepts and implement assignments. A database project is a major component of this course.
(De) Prerequisite(s): 541 or consent of instructor.

542 Application Security and Controls (3) Introduces students to data security, systems controls, and privacy issues regarding Internet applications.
(De) Prerequisite(s): 541 or consent of instructor.

543 Systems Audit Security and Controls (3) Discusses information systems security, auditing/assurance, planning, and control issues. The course examines security and control issues primarily at the operating system level.
(De) Prerequisite(s): 541 or consent of instructor.

549 Enterprise Planning, Security and Controls (3) Examines the use of enterprise information systems to achieve strategic and operational advantage, to support managerial decision making, and to achieve operational control.
(De) Prerequisite(s): 541 or consent of instructor.

Information Sciences (560)

450 Writing About Science and Medicine (3) (See Journalism and Electronic Media 450.)

500 Thesis (1-15)
Grading Restriction: P/NP only.
Repeatability: May be repeated.

502 Registration and Use of Facilities (1-15) Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

510 Information Environment (3) Generation, production, management, dissemination, and use of information. Roles of information in society, information seeking and user behavior, information industry, economics of information products and services, technological and organizational change, information professions, and issues.

520 Information Representation and Organization (3) The structure and organization of intellectual content regardless of format. Emphasis on how content is created, exchanged, and stored so it can be found. Includes standards and best practice for describing and characterizing intellectual content.

521 Cataloging and Classification (3) Basic library-oriented cataloging and classification techniques, tools, and supporting operations. Descriptive cataloging, choice and form of non-subject entries, subject heading work, general classification, authority control, bibliographic utilities, online library catalogs.

523 Abstracting and Indexing (3) Philosophies, standards, and procedures for manual and automatic document indexing, back-of-the-book indexing, vocabulary control, thesaurus construction, and abstracting.

530 Information Access and Retrieval (3) Information access, retrieval, and use. Information seeking, user interfaces, information services and tools. Database structure, search engines, query logic, and evaluation of retrieval system performance.

531 Sources and Services for the Social Sciences (3) Information sources in political science, sociology, psychology, geography, history, anthropology, business, and education.

532 Sources and Services for Science and Engineering (3) Information sources in engineering, physical and life sciences.

533 Sources and Services for the Humanities (3) Information sources in philosophy, religion, fine arts, performing arts, literature and language. Organization and management of regional collections.

534 Government Information Sources (3) Selection, acquisition, organization, and utilization of government information in variety of formats from legislative, judicial and executive branches of federal, state, local, and international government and intergovernmental agencies.

535 Advanced Information Retrieval (3) Bibliographic, non-bibliographic, full-text databases, e.g., non-bibliographic formula and structure databases, contents-page/full-text databases, patents; document delivery alternatives, evaluation, and testing.

536 The Information Society (3) Competing theoretical positions and definitions regarding the existence and importance of the information society; historical evolution and selected key contributors of information society theories; issues of globalization including critical perspectives of economic, social, political, and cultural aspects.

537 Information Industry (3) Issues and trends concerning information industry: products and services. Standards, enabling technologies, choice of distribution media, entrepreneurial opportunities. Legal, ethical, and quality concerns.

538 Economics of Information (3) Costing and pricing of information; value of information and value added services; cost-benefit analysis and tradeoffs; policy issues related to economic aspects of information exchange and transfer.

539 Information Policy (3) Role of government in creation and exchange of information; review of key national and international policy areas relevant to information creation, production, and distribution; development of information policy for organizations.
540 Research Methods for Information Professionals (3) Research methods in a variety of information environments; primary and secondary research; research project design; research results interpretation; analysis of published research; techniques supporting research process.

550 Management of Information Organizations (3) Supervisory and management concepts, strategies, and techniques applicable to information professionals working in libraries, archives, records management, and other information organizations.

551 School Library Media Centers (3) Planning, implementing, and evaluating school library programs. Curricular involvement, role of technology, site-based management, relationships with district and state services.

552 Academic Libraries (3) Mission, status, and history of academic libraries and academic librarianship in community colleges, colleges and universities; trends in higher education, information technology, and government’s impact on public, technical, and administrative services.

553 Specialized Information Agencies and Services (3) Development and present status, scope and objectives. Information resources external to organization.

(DE) Prerequisite(s): 550 or consent of instructor.

554 Public Library Management and Services (3) Development, roles, political environment, governance, organization, fiscal management, services, marketing, and performance evaluations.

(DE) Prerequisite(s): 550 or consent of instructor.

555 Scientific and Technical Communications (3) Evolution of scientific and technical communication; current trends; role of formal and informal communications; major STI organizations and their roles.

556 Knowledge Management for Information Professionals (3) Cov- ers classic theories of knowledge and theories of first and second-gener- ation knowledge management paradigms. Introduces related disciplines and the knowledge lifecycle, types of knowledge, organizational learning, intellectual capital, communities of practice, knowledge ecologies, knowl- edge audits, knowledge sharing repurposing of information, uses of infor- mation technology, and roles of information professionals in developing knowledge management initiatives.

557 User Instruction (3) Theory, strategy, design, and practice in providing instructional services and technology for end users of information and information systems. Emphasizes practical experience.

558 Library Services for a Diverse Society (3) Examines the issues of diversity and multiculturalism in libraries and librarianship. Considers general issues affecting institutions in addition to libraries. Examines specific social characteristics and the social/cultural groups constructed around these characteristics. Considers the needs of such groups, and library responses to these needs, and how to create a more diverse library profession.

560 Development and Management of Collections (3) Selecting and preserving a variety of items (tangible and intangible) to meet needs of particular users; community analysis; policies and procedures; evaluation; purchasing.

561 Contemporary Book Publishing (3) Creation, design, production, marketing, and distribution; various types of publishers.

563 Graphic Design and Media (3) Principles and practice in visual aspects of communications. Graphic design, typography, production techniques and publication design, as these apply to electronic information delivery systems.

564 Archives and Records Management (3) Objectives and functional elements of records systems, archival programs, management information systems and techniques within various types of organizations. Management of information internal to organizations.

566 Business Intelligence for Information Professionals (3) Princi- ples and practices of gathering and synthesizing business intelligence, including competitive intelligence, environmental scanning, and issues management; information evaluation and synthesis; role of strategic infor- mation in modern organizations.

567 Information Network Applications (3) Scholarly and community- based electronic communications. National and international standards, tools, resources; identification, analysis, evaluation, and management of tools and resources; construction of local technologies as developed and applicable.

572 Resources and Services for Young Adults (3) Critical survey of books and related materials for young adults; personal, vocational, and recreational needs and interests. Evaluation, selection, and utilization for school and public libraries.

573 Programming for Children and Young Adults (3) Philosophy and objectives of public and school library services for children and young adults. Reading, listening, and viewing guidance for individuals and groups. Program planning, implementation, and evaluation.

(DE) Prerequisite(s): 571 or 572.

574 Resources and Services for Adults (3) Examines strategies and procedures for developing programs in libraries. The course provides public service librarians with the knowledge and skills to create, evaluate, and improve programs with some emphasis on reader’s advisory.

575 Valuing Diversity: International and Intercultural Resources for Youth (3) Examines texts and materials for youth that reflect the contem- porary settings and lives of young people from all over the world. This course will review the scholarly literature and film to determine how to recognize stereotypes; how to understand publishing worlds; and how to recognize universal themes that transcend ethnicity, religion, gender, class, and nationhood.

576 Storytelling in Libraries and Classrooms (3) Examines the history of those who influenced the programming and styles of storytelling. Ad- ditionally, the course will offer techniques and sources for selecting, preparing and telling stories to library and classroom audience.

580 Information Science Theory (3) Definitions of information, informa- tion sciences, and information technology; theories of information, infor- mation representation, retrieval, and transfer; standards and technolo- gies for information processing and distribution: research front; bibliomet- rics and infometrics; relationships with other disciplines.

582 Information Systems Planning and Evaluation (3) Information systems used in libraries and information agencies. Emphasizes planning, evaluation and system implementation. Covers usability engineer- ing, interface design, and human computer interaction.

583 Information Systems Problems and Principles (3) Use of systems theory and analytical tools for understanding and improving information systems. Emphasizes the interaction between technology, processes, and stakeholders. Focuses on problem identification and problem-solving techniques, system design representations, object-oriented system de- sign, system prototyping, and project management.

584 Database Management Systems (3) Defining data needs, data structures, role of operating systems in data management, file organiza- tion, database management systems, logical data models, internal data models, database administration and evaluation. Design and implementa- tion of application using database management system.

585 Information Technologies (3) Evolution, trends, capabilities, and limitations of technologies applied to information capture, storage, preservation, access, and distribution.

586 Information Retrieval Systems (3) Historical perspective on infor- mation retrieval research; statistical and probabilistic retrieval tech- niques; cognitive user modeling; expert intermediary systems; associa- tions, relations and hypertext.

587 Mining the Web (3) Covers strategies for mining the Web, Web en- gines and directories, cognitive accessibility, Web design and develop- ment, and usability engineering.

588 Human-Computer Interaction (3) Survey of human-computer inter- action and introduction to human and technological factors of importance to design of usable information systems. Basic phenomena of human perception, cognition, memory, and problem solving, and relationship to user-centered design. Methods and techniques for interaction design and evaluation.

590 Problems in Information Sciences (3-6) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.

591 Independent Project or Research (3) Repeatability: May be repeated. Maximum 6 hours. Registration Permission: Consent of instructor.
574 Graduate Research Participation (3) Advanced research techniques under supervision of staff research director whose area coincides with interests of student.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 6 hours.
   Registration Permission: Consent of advisor and research director.

575 Student Teaching in School Library Information Center (9)
   Planned professional semester: full day school library work and classroom observation activities.
   Grading Restriction: Satisfactory/No Credit grading only.

576 Field-Based Experience in School Library Information Centers (2)
   Prescribed activities to gain competencies in a school library information center setting. Must be taken twice.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 6 hours.

577 Internet-Mediated Collaborative Learning (3)
   Use of the Internet to conduct collaborative learning activities among diverse, geographically-distributed participants. Participants will need unrestricted access to the Internet to complete all course activities.
   (DE) Prerequisite(s): 575 or 521.

578 Web Design (3)
   Design and development of instructional Web sites using basic design principles and visual Web editor software.

669 Instructional Media Research (3)
   Identification, location, and collection of developmental and experimental research on instructional media. Application of research.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 6 hours.

670 Constructivist Perspectives in Instructional Technology (3)
   Effectively designed technology based teaching strategies can enhance learning in a wide variety of subjects and learners from K-12 students to adults. This course will examine the theories, principles, and applications of constructivism with emphasis on technology based constructivist strategies and instructional designs for online and classroom learning.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 3 hours.
   Registration Permission: Consent of instructor.

679 Trends and Issues in Instructional Technology (3)
   Literature: history and origins, integration and application, teacher preparation, future developments, diffusion of change and philosophical/theoretical perspectives.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 6 hours.

680 Designing Problem-Based Learning Environments (3)
   Development and integration of problem-based learning pedagogy into curriculum. Examination of literature to understand theoretical perspective for design of this type of learning environment.

Instructional Technology and Educational Studies (570)

500 Thesis (1-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

502 Registration for Use of Facilities (1-15)
   Required for the student not otherwise registered during any semester when student uses university facilities and/or faculty time before degree is completed.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Credit Restriction: May not be used toward degree requirements.

503 Problems in Lieu of Thesis (2-3)
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 9 hours.

518 Educational Specialist Research and Thesis (3)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

593 Independent Study (1-3)
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.

594 Supervised Readings (1-3)
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.

595 Special Topics (1-3)
   Grading: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.

600 Doctoral Research and Dissertation (3-15)
   Grading Restriction: P/NP only.
   Repeatability: May be repeated.

601 Foundations of Research, Scholarship & Doctoral Study (3)
   Introduction to PhD program concentrations in ITES: research requirements, meaning of scholarship in academe and issues/problems in education.
   Comment(s): Admission to a PhD program in ITES required.

689 Internship (1-3)
   Experiences in application of principles and practices of curriculum development and instructional improvement.
   Grading Restriction: Satisfactory/No Credit grading only.
   Repeatability: May be repeated. Maximum 9 hours.
   (DE) Prerequisite(s): Program prerequisites.
   Registration Permission: Consent of instructor.

693 Independent Study (1-3)
   Grading Restriction: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.

694 Supervised Reading (1-3)
   Grading Restriction: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.

695 Special Topics (1-3)
   Grading Restriction: Satisfactory/No Credit or letter grade.
   Repeatability: May be repeated.
Italian (584)

401 Dante and Medieval Culture (3) Introduction to the significance of this great Italian writer. (Same as Medieval Studies 401.)
(DE) Prerequisite(s): 212 or consent of instructor.

402 Petrarch and Boccaccio (3) (Same as Medieval Studies 402.)
(DE) Prerequisite(s): 212 or consent of instructor.

403 Literature of the Rinascimento (3) From Pulci to Tasso, Quattrocento and Cinquecento.
(DE) Prerequisite(s): 212 or consent of instructor.

406 The Modern Italian Novel (3)
(DE) Prerequisite(s): 212 or consent of instructor.

409 Directed Readings (3)

410 Italian Theatre (3) Survey of Italian theatre from Renaissance to present.
(DE) Prerequisite(s): 212 or consent of instructor.

421 Topics in Italian Literature and Cinema (3) Examination of Italian literature and cinema from 1930 to the present focusing on literary works translated into English and adapted into film. Objectives of the course are to investigate the relationship between literature and cinema and to achieve a greater understanding of Italian culture since 1930. Films will be shown in Italian with English subtitles. (Same as Cinema Studies 421.)

Repeatability: May be repeated. Maximum 6 hours.

510 Readings in Italian Literature (3) Topics vary. Repeatability: May be repeated. Maximum 6 hours.

591 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

592 Off-Campus Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

593 Independent Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

Japanese (589)

451 Readings in Pre-Modern Japanese Literature (3) (See Asian Languages 451.)

452 Readings in Modern Japanese Literature (3) (See Asian Languages 452.)

Journalism and Electronic Media (592)

412 Opinion Writing (3) Analysis of editorial positions and practices. Writing editorials/columns for newspapers, magazines, corporate publications, and electronic media (radio, television, cable, Internet), with emphasis upon study and use of rhetorical devices and logic.

414 Magazine and Feature Writing (3) Techniques of writing features and in-depth articles for mass circulation and specialized magazines or newspapers. Organizing and presenting material, with attention to problems in areas such as business, science, agriculture, and the humanities.
(DE) Prerequisite(s): 203 or consent of instructor.

415 Magazine Industry Workshop (3) Introduction to the magazine industry including management, design, writing and editing, and interactivity. Analysis of print and electronic format magazines. Planning new products for the marketplace.
(DE) Prerequisite(s): 412 or consent of instructor.

430 Public Affairs Reporting (3) (Reporting including database reporting) and writing about courts, government and public agencies. Event and issue-oriented journalism of politics and public affairs.
(DE) Prerequisite(s): 315.

433 Editing and Layout for Print/Web (3) Editing and layout for newspapers, magazines, and online publishing.
(DE) Prerequisite(s): 212 or consent of instructor.

450 Writing About Science and Medicine (3) Writing workshop to analyze examples of successful science writing and write series of articles for general public based on scientific journals, news conferences, technical meetings and interviews. (Same as Information Sciences 450.)
Registration Permission: Consent of instructor.

451 Environmental Writing (3) Writing for news media (including the Internet) on such environmental issues as sprawl, forests, air pollution, energy, and invasive species. Students hear presentations from and interview experts in environmental science and reporting. Exemplary environmental writing is analyzed.
Registration Permission: Consent of instructor.

460 Electronic News Operations (3) Production of news programs for television, cable and the Internet. Advanced course in electronic news gathering, reporting, digital videography, non-linear editing, and producing. Computerized newsroom and studio are utilized.
(DE) Prerequisite(s): 411.

470 Cable, Broadband, and Interactive Digital Media (3) History and structure of cable television and other broadband delivery systems (DBS, Internet, etc.). Development of digital broadcasting, interactive television, and other broadband media systems and digital technologies. Regulatory, policy, programming, and management issues arising from new media and digital technologies.
(DE) Prerequisite(s): 275 or consent of instructor.

475 Sports Writing (3) Writing sports stories, features and columns. Sports writing is considered from the standpoint of sports reporters, sports information specialists and others with an interest in writing about sports.

488 Web Publishing (3) Cross-disciplinary approach to design and production of on-line publications. Emphasis on researching, planning, site content and design, and the economic, legal and ethical issues involved in online publishing.
Registration Permission: Consent of instructor.

(DE) Prerequisite(s): 290 or consent of instructor.

491 Foreign Study (1-15)
Repeatability: May be repeated. Maximum 15 hours.

502 Registration for Use of Facilities (1-15) Required for the student not otherwise registered during any semester when the student uses university facilities and/or faculty time before degree is completed.
Grading Restriction: Satisfactory/No Credit grading only.
Repeatability: May be repeated.
Credit Restriction: May not be used toward degree requirements.

503 Workshop in Journalism across the Media I (3) Techniques of writing, reporting, and editing for print and Web. Also includes graphics, layout, and photography. Overview of the history, technology, and economics of newspapers, magazines, and the Internet. Consideration of the First Amendment.
Credit Restriction: Cannot be counted toward the number of hours required for the Master of Science degree.

504 Workshop in Journalism across the Media II (3) Techniques of writing, reporting, and editing for electronic media. Also includes video production. Overview of the history, technology, and economics of cable broadcasting, and satellite. Consideration of the impact of rules, regulations, and policies of the Federal Communications Commission. Comparison of techniques in print, Web, and electronic media. Creating material for one medium and using it in another.
Credit Restriction: Cannot be counted toward the number of hours required for the Master of Science degree.

510 International Journalism (3) Studies the development and impact of international and trans-national media systems on journalism today. Examines the implications for reporters, editors, and publishers in print, broadcasting, cable, satellite, and the Internet as well as the effects the media and the audience. Consideration of the First Amendment.
Comment(s): Requires admission to the program or consent of the instructor.

512 Mass Media Research Methods (3) Applications of communication research techniques for management. Gathering and analysis of data for assessing media audiences and message impacts.
Comment(s): Requires admission to the program or consent of the instructor.

515 Advanced Reporting across the Media (3) Developing good story ideas, researching them, and translating them into suitable material for news in print, broadcasting, cable, and the Internet. Using video and graphics to reinforce the story concept. Considering the needs of the media and the audience. Theories of how content changes as the medium changes.

520 Seminar in Political Communication (3) Relationships among mass media, public relations and government and their roles in democratic society. Governmental public relations, political campaigns, coverage of military, executive, legislative and judicial branches of government, special interest groups and public access to government information.
522 Seminar in Journalism Issues and Theory (3) Discussion of the important issues in journalism from a variety of theoretical viewpoints. Study of the basic literature on theory involving journalism (print, broadcasting, cable, and the Internet) and its application to current problems.

525 Public Opinion (3) Role of press in developing and influencing public consensus. Social theories of public opinion and analysis of media's response. (Same as Public Relations 525.)

550 Writing And Editing Projects (3) Specialized writing or editing interests: agriculture, politics, labor, finance, science, technical, general publications.

Registration Permission: Consent of instructor.

554 Seminar in Mass Media and Health Risk (3) Mass communication and health communication theories examined as they relate to intended and unintended effects on individual behavior and on public health policy. Setting of media's agenda on health and risk. Interaction of scientists, journalists, and public on scientific, technological, and medical questions.

Registration permission: Consent of instructor.

555 Seminar in Media Economics and New Technology (3) Electronic and print media ownership, finance and corporate structure. Roles of new technologies and marketing techniques in changing media content and function in future.

Comment(s): Requires admission to the program or consent of the instructor.

560 Advanced Web Publishing (3) Electronic research and publishing. Social, legal and ethical challenges surrounding online publishing. Project planning and storyboarding techniques for designing and creating site on Web.

590 Project (3) Capstone project under guidance of faculty. Applications of principles from previous coursework.

Grading Restriction: Satisfactory/No Credit grading only.

593 Seminar in Journalism And Electronic Media Issues (3) Contemporary topics in communications.

Repeatability: May be repeated. Maximum 6 hours.

Registration Permission: Consent of instructor.

597 Independent Study (3)

Registration Permission: Consent of instructor.

Judaic Studies (595)

405 Modern Jewish Thought (3) (See Religious Studies 405.)
425 Early Christian and Byzantine Art to 1350 (3) (See Art History 425.)
431 Medieval Art of the West, 800-1400 (3) (See Art History 431.)

Latin American Studies (600)

431 Topics in the Literature and Language of Portuguese-Speaking World (3) (See Portuguese 431)
432 Topics in the Literature and Language of Portuguese-Speaking World (3) (See Portuguese 432.)
456 Latin American Government and Politics (3) (See Political Science 456.)
465 Latin American Film and Culture (3) (See Spanish 465.)
479 Disenchanted Texts in Hispanic Literature (3) (See Spanish 479.)
510 Special Topics (3)

Repeatability: May be repeated. Maximum 6 hours.

Law (613)

801 Civil Procedure I (3) Binding effect of judgments, selecting proper court (jurisdiction and venue), ascertaining applicable law, and federal and state practice.

803 Contracts I (3) Basic agreement process and legal protections afforded contracts: offer and acceptance, consideration and other bases for enforcing promises; the Statute of Frauds, unconscionability and other controls of promissory liability. Introduction to relevant portions of Article 2 of the Uniform Commercial Code.

804 Contracts II (3) Continuation of Contracts I. Issues arising after contract formation: interpretation, duty of good faith; conditions, impracticability and frustration of purpose; remedies; third party beneficiaries; assignment and delegation. Considerable coverage of Article 2 of the Uniform Commercial Code with respect to remedies, anticipatory repudiation, impracticability and good faith.

805 Legal Process I (3) Lawyer-like use of cases and statutes in prediction and persuasion. Analysis and synthesis of common law decisions; statutory interpretation; fundamentals of expository legal writing and legal research.

806 Legal Process II (3) Continuation of Legal Process I. Formal legal writing, appellate procedure, and oral advocacy.

807 Torts I (3) Intentional torts, defenses and privileges related to intentional torts; negligence: standard of care, professional malpractice, and liability of owners and occupiers of land; defenses based on plaintiff's conduct; contributory and comparative negligence, assumption of risk, failure to take precautions, and avoidable consequences; causation, proximate cause; duty rules; and questions of joint and several or several liability.

808 Torts II (3) Vicarious liability and related concepts; strict liability for dangerous animals and abnormally dangerous activities; products liability; nuisance, defamation and invasion of privacy; economic torts: misrepresentation and interference with contract and prospective opportunities; immunities: those of government, governmental employees, charities and family members, and damages.

809 Criminal Law (3) Substantive aspects of criminal law; general principles applicable to all criminal conduct; specific analysis of particular crimes; defenses to crimes.

810 Property (4) Introductory course treating issues of ownership, possession, and title in the areas of: landlord-tenant relations; estates in land and future interests; co-ownership and marital property; real estate sales agreements and conveyances; title assurance and recording statutes; servitudes; and selected aspects of nuisance law, eminent domain and zoning.

812 Constitutional Law (4) Fundamental principles of American constitutional law: federalism, separation of powers, equal protection of law, and constitutional protection of other fundamental individual rights.

813 Evidence (4) Rules regulating introduction and exclusion of oral, written and demonstrative evidence at trials and other proceedings, including relevance, competence, impeachment, hearsay, privilege, expert testimony, authentication, and judicial notice.

(De) Corequisite(s): 920 for students electing concentration in advocacy.

814 Legal Profession (3) Legal, professional and ethical standards applicable to lawyers.

Credit Restriction: Not open to students who have taken 815.

815 Introduction to Advocacy and Professional Responsibility (3) Theory and morality of advocacy in adversarial system, and legal, ethical, and professional standards applicable to lawyers and especially lawyers as advocates.

818 Fundamental Concepts of Income Taxation (3) Introduction to basic statutory analysis, fundamental principles of federal individual income tax, and pervasive income tax concerns that arise in practice. Federal concept of gross income, pattern of exclusions, exemptions and deductions from gross income used to arrive at tax base; special treatment of capital gains and losses, and rate structure.

819 Economic Principles of Income Taxation (3) Survey of time value of money and related economic principles in federal income tax system. Taxation of employment compensation arrangements and of various financial arrangements and products, and introduction to tax accounting.

(De) Prerequisite(s): 818.
821 Administrative Law (3) Administrative agency decision-making processes and judicial review of administrative decisions: procedural standards for informal and formal administrative adjudication and rule-making (attention to federal Administrative Procedure Act); constitutional due process standards in administrative settings; and availability, scope and timing of judicial review of agency actions.

822 Legislation (3) Interpretation and drafting of statutes, legislative processes, and legislative power; comparison of judicial views on legislative process with both realities of legislative process and applicable constitutional principles.

827 Business Associations (4) Legal problems associated with the formation, operation, and dissolution of unincorporated and incorporated business firms; legal rights of duties of firm participants (principals and agents; partners, joint venturers, limited partners, limited liability partners, and members and managers of limited liability companies; and corporate shareholders, directors, and officers) and others with whom those participants interact in connection with the firm's business.

828 Corporate Finance (3) Legal issues arising in conjunction with the purchase, sale, and repurchase of securities in capital formation and investment transactions, including: private and public debt, equity, and convertible securities offerings; dividends and other shareholder distributions; and mergers and acquisitions.

(DE) Prerequisite(s): 827.

830 Securities Regulation (3) Basic structure and operation of the federal securities laws, including legal issues associated with: primary and secondary public and private securities offerings; Section 11 of the Securities Act of 1933, as amended, Rule 10b-5 under the Securities Exchange Act of 1934, as amended, and other antifraud provisions; periodic and other disclosure requirements; the regulation of proxy solicitations, tender offers, and securities transactions involving officers, directors, and other insiders; and the regulation of stock markets and professional service providers in the securities industry.

(DE) Prerequisite or (DE) Corequisite: 827.

833 Representative Enterprises (3-5) Capstone course for concentration in business transactions. Simulated business transactions and completion of major planning drafting project. Transactions vary: formation of new business, acquisition of existing business, development of real estate project, various financing transactions and corporate reorganization.

(DE) Prerequisite(s): Completion of all courses for concentration in business transactions.

834 Antitrust (3) Federal antitrust laws; monopolization, price-fixing, group boycotts, and anticompetitive practices generally; government enforcement techniques and private treble damage suits.

840 Commercial Law (4) Basic coverage of most significant provisions of Uniform Commercial Code: security interests in personal property (Art. 9 of U.C.C. and relevant Bankruptcy Code provisions); commercial paper, including checks, notes and other negotiable instruments (Arts. 3 and 4 of U.C.C.); sales of goods, including coverage of portions of Art. 2 of U.C.C. not covered in Contracts.

842 Contract Drafting Seminar (2) Practical fundamentals of drafting contracts of different types.

843 Debtor-Creditor Law (3) Basic elements of federal bankruptcy law: claims, property of estate, automatic stay, trustee's avoidance powers, assumption and rejection of contracts, priority of distributions, and distinction between liquidation and rehabilitation. Enforcing judgments outside of bankruptcy.

844 Business Reorganizations and Workouts (3) An examination of reorganization under chapter 11 of the United States Bankruptcy Code from petition date to confirmation of a plan of reorganization as well as coverage of the use of extensions, compositions, workouts and other non-bankruptcy methods of adjusting the rights or parties to business transactions. Although not required as prerequisites, an understanding of the subject matter of Commercial Law and especially Debtor/Creditor law is strongly recommended. The course satisfies the expository writing requirement.

847 Advanced Constitutional Law (2-3) Advanced study of issues in American constitutional law. Specific course offerings vary. Subjects include: constitutional structure of American governmental institutions, federalism, separation of governmental powers: relationship between legislative and executive branches, relationship among states and between states and federal government, and constitutional amendment process; state constitutional law, Tennessee constitution and differences between state and federal constitutional law; Bill of Rights and 14th Amendment to Constitution: constitutional rights as protected by Bill of Rights and 14th Amendment.

Repeatability: May be repeated under different topic.

848 Civil Rights Actions (3) Litigation to vindicate constitutional rights in private actions against the government and its officials, as well as rights protected by other civil rights legislation: elements of cause of action under 42 U.S.C. sec. 1983; actions against federal government officials under the Bivens doctrine; institutional and individual immunities; relationship between state and federal courts in civil rights actions; and remedies for violations of constitutional and other civil rights.

849 Discrimination and the Law (3) Comparison of race, sex, and other forms of discrimination with respect to education, employment, housing, political participation and other social and economic activities; historical landmarks and current issues in discrimination law.

850 Supreme Court (3) History of Supreme Court and of procedures by which Court arrives at decisions; influences of justices' ideology and role of Court in political system.

854 Investigatory Criminal Procedure (3) Police practices and constitutional rights of persons charged with crimes: arrest; search and seizure; identification; interrogation and confessions; electronic eavesdropping; and right to counsel.

855 Adjudicatory Criminal Procedure (3) Pre- and post-trial procedures in criminal case: bail; preliminary hearing; grand jury; prosecutoral discretion; discovery; speedy trial; plea bargaining; jury trial; and double jeopardy. Federal Rules of Criminal Procedure.

859 Criminal Law Seminar (2) Advanced problems in criminal law and administration of justice.

(DE) Prerequisite(s): 809.

862 Family Law (3) Survey of laws affecting formal and informal family relationships: premarital disputes; ante nuptial contracts; creation of common law and formal marriage; legal effects of marriage; support obligations within family; legal separation, annulment, divorce, alimony, and property settlements; child custody and child support; abortion; illegitimacy.

863 Children and the Law (3) Legal relationships between children, families and state; juvenile justice; foster care; adoption; educational issues: special education; child abuse and neglect; health care and income maintenance; advocacy for children and families.

866 Environmental Law and Policy (3) Study, through methods of public policy analysis, of policies and relevant statutes and regulations: environmental litigation; Clean Air Act; Clean Water Act; National Environmental Policy Act; and selected regulatory issues.

867 Environmental Law Seminar (2) Selected topics in environmental law.

868 Natural Resources (3) Considers how our society allocates and regulates the use of natural resources, including national parks, national forests, coastal resources, minerals, timber, and wildlife.

873 American Legal History (3) Selected topics in American legal history.

877 Jurisprudence (3) Critical or comparative examination of legal theories, concepts, and problems: legal positivism; natural law theory; legal realism; idealism; historical jurisprudence; utilitarianism; Kantianism; sociological jurisprudence; policy science; and critical studies.

879 Law and Economics (3) Relationship between legal and economic thought; application of basic economic concepts to legal problems; economics in legal decision making; scholarly support for and criticism of economic analysis of law. Designed for students with no undergraduate background in economics or mathematics.

886 Public International Law (3) Law-creating processes and doctrines: principles and rules of law that regulate mutual behavior of states and other entities in international system.
