The College of Nursing at The University of Tennessee, Knoxville, was established in July 1971 in response to a long-recognized and well-established need for nurses prepared at the collegiate level and as a part of a statewide comprehensive plan approved for The University of Tennessee system by its Board of Trustees and for the state by the Tennessee Higher Education Commission.

The undergraduate program offered by the college is fully accredited by the National League for Nursing. It combines the unique resources of the University with those of several cooperating health agencies in a manner which enables both faculty and students to become aware of and responsive to an evolving dynamic culture, rapid scientific and technological advances, and changing concepts of health, of human beings, and of society.

The baccalaureate nursing program has as its central focus and frame of reference, human beings, society, and health. It is based on the belief that nursing has equal concern for the prevention of illness, the promotion of health, and the care of the sick.

Since nursing is a humanistic science and an art, nursing courses provide theoretical content which is derived from the theories and principles of related sciences and disciplines. This content is organized, integrated, and synthesized in a manner which promotes a comprehensive understanding of the life process from conception through senescence. In nursing practice, this knowledge and understanding is combined with intellectual judgments, practical skills, and human compassion.

Opportunities to develop this kind of expertise in a variety of settings and situations are integral components of all nursing courses.

A broad base of general education, a thorough study of human behavior, emphasis on health maintenance and promotion, and a strong family and community orientation are essential components of baccalaureate education in nursing. It is these characteristics which differentiate it from other types of basic nursing education.

Because of the expanding role of the professional nurse, the increasing complexity of health care delivery, and the ever-changing health needs of society, the goals of the program are to prepare graduates who are to:

1. Assume beginning leadership positions in nursing, in a variety of settings.
2. Work collaboratively with other health professionals.
3. Function as socially conscious and contributing citizens.
4. Pursue advanced education on either a formal or an informal basis.

GENERAL REQUIREMENTS

In order to obtain a Bachelor of Science in Nursing Degree, 12 quarters of full-time study or their equivalent are required. Students may enroll in nursing courses following successful completion of 30 quarter hour credits in prescribed general education courses. These courses may be taken at The University of Tennessee or at any accredited junior or senior college or community college. One hundred eighty-nine quarter hour credits must be successfully completed in order to be awarded the Bachelor of Science in Nursing Degree.

NOTE: Students are advised to consult the University's degree requirements as stated in the front section of this catalog as well as the requirements for the College of Nursing.
BACHELOR OF SCIENCE IN NURSING CURRICULUM

The following curriculum leads to the Bachelor of Science in Nursing degree. A minimum of 189 quarter hours of credit is required.

1480 Administration and Management in Nursing

1490 Leadership in Nursing
assessment of children and adolescents at various levels of health and illness. Emphasis on normal growth and development and interrelationships with parents, children, and health workers and responsibilities to illness and hospitalization. Coreq: 3610, 3110.

3790 Individual and Family Health Problems (4) (Same as Nutrition 3710).

3790 Sexual Adaptation in Health and Illness (3) Anatomy, physiology, and biochemistry of human functioning; recognized health problems of reproductive age; sexual orientation; attitudes toward illness and death; sexual adjustment; psychosomatic factors; family role relationships; parent child problems; community orientation with emphasis on mental health, family, and community health services in planning comprehensive care of clients and their families in the home setting; utilization of community health services in planning comprehensive care of clients and their families in the home setting. Coreq: 3240, 3250.

3810 Community Health Nursing: Family (3) Application of the nursing process to care of clients and their families in the home setting; utilization of community health services in planning comprehensive care of clients and their families in the home setting. Coreq: 3240, 3250.

3830 Community Health Nursing: Group (3) Community studies utilizing the epidemiological approach for comprehensive assessment of and intervention for institutional or situational health and nursing problems; political and legislative community health issues are explored. 1.5 hrs and 1.5 labs. Prereq: All 3000-level nursing courses. Prereq: or coreq: 4110 or 4380. For nursing majors only.

3840 Professional Nursing Seminar (3) Critical examination of legislative, legal, ethical, social, and educational issues and trends which have immediate or long-range implications for professional nursing practice. 10 hrs of 4000-level nursing courses. For nursing majors only.

4010 Psychologic and Sociological Theories of Nursing (3) Theories of health, illness, and behavior in the context of family, social, and cultural systems. Coreq: 4030.

4020 Psychological and Social Adjustment of Older People (3) Appraisal of selected theories and principles to nursing stages of health and illness. Coreq: 4050. Prereq: consent of instructor. 4030. Psychology and Social Systems of Aging (3) Appraisal of selected theories and principles to nursing stages of health and illness. Coreq: 4050. Prereq: consent of instructor.

4090 Community Mental Health Nursing: Individual (3) Community studies utilizing the epidemiological approach for comprehensive assessment of and intervention for institutional or situational health and nursing problems; political and legislative community health issues are explored. 1.5 hrs and 1.5 labs. Prereq: All 3000-level nursing courses. Prereq: or coreq: 4110 or 4380. For nursing majors only.

4110 Family Health Nursing (10) Nursing needs of families in health and crisis, impact on provision of health care, family health care in various health care settings. Weeekly seminars are devoted to care of families with acute or chronic illness. Coreq: 4130. Prereq: 2000- and 3000-level Nursing courses. 31 dept credit for students who have taken 3210 and/or 3220.

4130 Family Health Nursing (10) Nursing needs of families in health and crisis, impact on provision of health care, family health care in various health care settings. Weeekly seminars are devoted to care of families with acute or chronic illness. Coreq: 4110. Prereq: 2000- and 3000-level Nursing courses. 31 dept credit for students who have taken 3210 and/or 3220.

4330 Nursing in the Specialties (2-4) Application of scientific principles and theories to planning, organizing, implementing, and evaluating care of groups of patients/clients; organization, planning, decision making and leadership are emphasized; nursing staff qualifications, staff utilization, and clinical experience for institutional or situational health and nursing problems; professional and legislative community health issues are explored. 1.5 hrs and 1.5 labs. Prereq: All 3000-level nursing courses. Prereq: or coreq: 4240 or 4250.

4880 Family-Centered Primary Care Nursing I (6) Community studies utilizing the epidemiological approach for comprehensive assessment of and intervention for institutional or situational health and nursing problems; political and legislative community health issues are explored. 1.5 hrs and 1.5 labs. Prereq: All 3000-level nursing courses. Prereq: or coreq: 4240 or 4250. For nursing majors only.

5070 Independent Study in Nursing (1-4) In-depth study of some aspect of nursing in which student has developed special interest. Study leading to completion of independent study initiated independently utilizing guidelines developed by the student with appropriate faculty guidance, supervision, and evaluation. Maximum credit 3 hrs. Prereq: consent of instructor. Maximum credit 2 hrs. Prereq: consent of instructor.

5120 Secondary/Tertiary Nursing of Adults I (6) Coreq: 5121.

5103 Independent Study in Nursing (1-4) In-depth study of some aspect of nursing in which student has developed special interest. Study leading to completion of independent study initiated independently utilizing guidelines developed by the student with appropriate faculty guidance, supervision, and evaluation. Maximum credit 3 hrs. Prereq: consent of instructor. Maximum credit 2 hrs. Prereq: consent of instructor.

5170 Readings in Applied Physiology (3) Prereq: 4110 or consent of instructor.

5200 Applied Nursing Research (4) Prereq: 4110 or consent of instructor.

5300 Secondary/Tertiary Nursing Field Work I (8) 5300 Secondary/Tertiary Nursing Field Work II (8) 5400 Community Mental Health Nursing: Individual (3) 5400 Community Mental Health Nursing: Family (3) 5500 Community Mental Health Nursing: Group (3) 5500 Community Mental Health Nursing Field Work I (8) 5500 Community Mental Health Nursing Field Work II (8)

5800 Teaching Strategies and Pracsticum (5) 5900 Primary Care Nursing Field Work I (8) 5900 Primary Care Nursing Field Work II (8) 6300 Teaching Strategies and Pracsticum 6300 Teaching Strategies and Pracsticum 6900 Advanced Nursing Seminar (3) 6900 Advanced Nursing Seminar (3) 7300 Management Strategies and Practice (6) 7770 Special Topics (6)
